HIBBARD WATER MOTOR WASHING MACHINES

Water Motor used on this machine is gearless. This prevents noise and lost motion and insures easy running qualities that are absolutely necessary in a motor that will operate, as does this one, on water pressure as low as thirty-five pounds. No frictional parts, self-draining and non-freezing, requires no oiling, will not wear, rust or stick, bearings are non-metal.

Tub is well and strongly built of selected Southern Cypress—"The wood everlasting"—nicely finished with good quality varnish. It will hold fifteen gallons of water and if given reasonable care, will not warp or shrink.

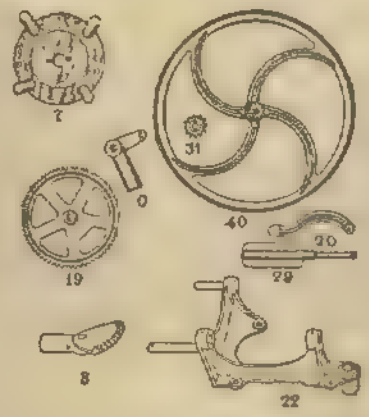
No. W21—Inside dimensions of tub—bottom 22 in., top 20 in., height 12⅞ in., height from floor 35½ in., w't each 70 lbs., ...each $32.00

WATER MOTOR BELTS

One of these endless belts should be purchased with each water motor, as the regular rubber and leather belts are too heavy and use too much power.

No. 25—9 ft., endless belt for No. 1994 water motors, 1 in. wide, made of rubber and cloth webbing, each $0.80

REVONOC WASHER PARTS



For Nos. W10, F18, F19, F26

No. 7—Pinwheel, w't 2 lbs., each $1.00

No. 8—Gear segment, for new style, w't 2¼ lbs. .....each $1.00

No. 6—Handle socket, for new style, w't 2 lbs. .....each $1.00

No. 22—Main frame, for new style, w't 7½ lbs. .....each $3.00

No. 19—Gear wheel, 65 cogs, w't 3½ lbs. each $1.60

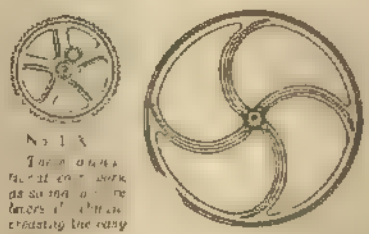
No. 20—Pitman, w't 14 oz., each $0.60

No. 29—Dasher center, w't 1¾ lbs., each $1.00

No. 31—Pinion, w't 7 oz., each $0.30

No. 05—Extra wood handles, each $0.20

IMPROVED REVONOC PARTS



No. 42.

No. 19X—Gear wheel, 94 cogs, w't 3¼ lbs. .....each $1.60

No. 42—Fly wheel, 15 cogs on pinion, w't 13½ lbs. .....each $5.00

POWER PULLEY FOR WASHING MACHINES

No. 8—Pulley, 8 in., w't per doz. 42 lbs., per doz. $24.00

WATER MOTORS AND BRACKETS

Cut shows motor and bracket attached. Sold separately.

No. 1994—Motor 2 in flat belt double **flanged pulley**, made of brass, iron and steel, for ¾ in. pipe, w't per doz. 160 lbs., each $11.00

No. 1944—Wall or bench **brackets**, w't per doz. 17 lbs. .....each $9.60

PENBERTHY WASHING MACHINE DRAINER

It is designed to transfer water from washing machines, wash tubs, cellar tubs, or any place where there is an accumulation, by means of ordinary water pressure. No electrical, steam or other operative power required.

No. 10—Aluminum, w't 5 ounces, w't per dozen 4 lbs. .....each $4.20
ONE DOZEN IN A BOX

WASHING MACHINE DRAINER ADAPTERS

Adapters can be supplied for use where the faucet is not threaded. Simply slip this over the smooth faucet, screw on the coupling and a tight connection is made.

No. 5—Brass, w't per doz. 2 lbs., each $0.70
ONE DOZEN IN A BOX

GUARANTEED BALL BEARING WRINGERS

On this and the following page we illustrate several patterns of Wringers, under the brands [illegible] and Hibbard. The rolls in [illegible] wringers are guaranteed for five years, those in the Hibbard are guaranted for three years, otherwise they are identical.

These wringers embody two very important improvements, namely, the "Enclosed Cog Wheels" and "Ball Bearings," but in connection with these are a number of other points which contribute to their superiority.

Frame—This is made of seasoned hard wood, in the simplest manner, carefully joined and bolted, all of the working parts encased leaving nothing to be desired in the appearance and convenience of the wringer. It is carefully varnished, painted, and well finished in every detail.

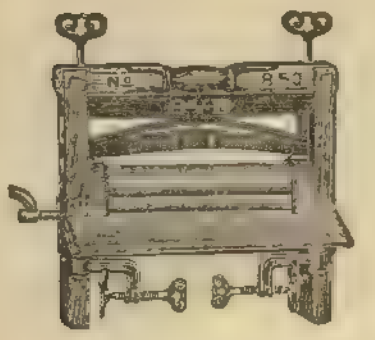
Rolls—These are of exceptional quality and will last the term of years for which they are guaranteed, if used for family washing. The [illegible] are made from the best solid white rubber, the same quality from outside of cover to shaft, are soft and have the proper elasticity to do good wringing. The rolls of the HIBBARD are second only to the [illegible].

Covered Gearing—This is a very important improvement—there is no danger of clothing catching in the cogs. The appearance is vastly improved. The spring is longer, removing the strain on the rollers when rolls are separated, and the danger of children getting their fingers crushed is entirely removed.

Ball Bearing—These are located on the outside of the cog wheels, and therefore removed a considerable distance from the rolls, so that no water can reach them from wringing of clothes. The ball race is so constructed that should any water reach the bearings, it will drain out immediately, avoiding rust. . The bearings can be oiled without any danger of the oil reaching the rolls. The balls are solid steel of uniform size. The bearings are of large size and reduce friction to a minimum, and [illegible] or HIBBARD wringers can be operated with one-half the effort of an ordinary wringer.

Other Points—Everything about these wringers is high grade and made for use. The thumb screws are large and easy to handle. The spring is made of the best quality of steel, adapted for the purpose. The clamps are extra strong and easy to apply, and are made to be attached to wood or galvanized tubs, either round or square.

[illegible]



See general description above.

Rolls warranted for five years, encased cog wheels with ball bearings, large frame, folding apron, adjustable clamps, for either wood or galvanized tubs

10x1¾ in. Finest Quality Rolls, Upper No. 54, Lower No. 55, W't Per Dozen 275 Lbs.

No. R850 [illegible]—Full quarter dozen cases, per dozen $103.60

No. 850 [illegible]—Less than case lots, per dozen $103.60

11x1¾ in. Finest Quality Rolls, Upper No. 61, Lower No. 62, W't Per Dozen 290 Lbs.

FISHING RODS

Hinduvine

★HINDUVINE FLY

Hinduvine Derives its Name from a Fibrous Vine, Native Only to Hindoostan, and Has the Strongest, Toughest, and at the Same Time the Most Elastic Fiber Ever Put in a Fishing Rod. The Fibers are as Hard as Steel and Possess the Suppleness of Whalebone; Great Care is Taken in Splitting So as Not to Make Any Traverse Cuts which Would Destroy the Elasticity and Weaken the Rod. Each Joint is Made of Six Strips, Cemented Together in the Same Manner as a Split Bamboo Rod. Each Section is Tested and Must be Absolutely Perfect, and the Strongest of Any on the Market. **For Strength, Toughness and Pliability, Hinduvine Cannot be Excelled.** Actual Tests have Proven Hinduvine Rods to Possess Two and One-half Times the Tensile Strength of Any Rod Manufactured.

KITCHEN CABINETS

These cabinets are made for us by one of the largest, best known and most dependable makers in America. And if you bought them under his name you would pay much more than we ask.

Note These Features of All Our Kitchen Cabinets

Rounded corners and edges, all joints mortised and tenoned, guaranteed not to sag or fall apart. All white enameled cabinets are finished with high grade "Satin" white enamel. All doors and drawers have the dust lip construction and are finished inside. High grade refrigerator slip cardware and three ply panel backs on all cabinets.

26,165 Miles Without a Stop

Dealers–Write for Booklet "26,165 Miles Without a Stop" An absorbing story.

The Reliability Record

Days without Engine Stop.....58
Total Non-Stop Mileage....26,165
Average Miles Per Day.....449
Gas.—ave. miles per gal.....21.5
Oil—ave. miles per gal.....304.5

Replacements

At 22,106 mi.—Brake lining
At 24,955 mi.—Head lamp tie rod
At 24,997 mi.—Front Spring
At 26,165 mi.—Fan Belt

The first engine stop was necessitated by the breaking of the fan belt. The run was then continued two days, the total mileage at the end of 60 days being 27,096, on which the daily average is computed.

Perhaps no motor car ever before was given such a reliability test as this; and perhaps none ever acquitted itself so creditably.

A stock Hupmobile, with 6000 miles already behind it, was driven continuously by three shifts of drivers, night and day, for 58 days.

In that time it traveled 26,615 miles over the roads of Utah, Idaho and Wyoming adjacent to Salt Lake City—farther by a great deal than the average car travels in two whole years.

The qualities revealed by the car in this test—its economy records—the way it stood up in continuous service such as not one motor car in a thousand is asked to give—these things are not remarkable

They are the daily portion of every Hupmobile owner. He counts upon them confidently. They are his interpretation of reliability.

Hupp Motor Car Corporation, Detroit, Michigan

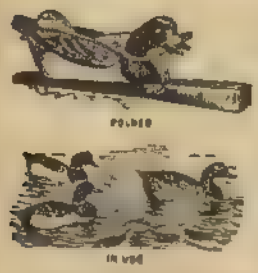
FOLDING WOOD DUCKS



ILLINOIS RIVER PROFILE DECOYS, 3 in group, 2 male and 1 female, painted in natural colors to represent male and female, w't per doz. 10 lbs.

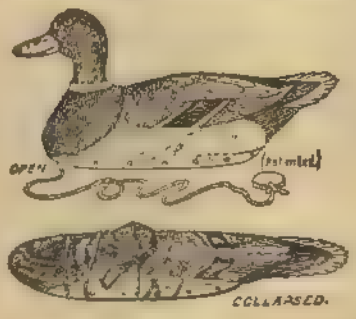
Four floats take one dozen decoys. One cord and anchor for three decoys

No. 6—Mallards, w't per doz. 9½ lbs., per dozen $14.70

No. F6—Canvas Backs, Blue Bills, Black Mallards, Whistlers, Red Heads, Teal Pidgeons, w't per doz. 10 lbs. ....per dozen★ $14.70

ONE DOZEN IN A STRONG SHIPPING CARTON

AUTOMATIC CANVAS DUCKS

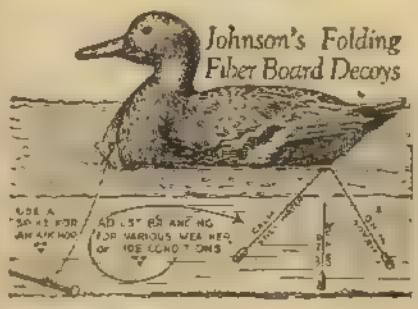


Open up automatically, no lever, no cranks, no air pressure, expand by means of spring when cord is unwound. Light in weight, pack in small space, can be collapsed quicker than any other decoy made, give good service and are hand painted, true to life.

No. 14—Collapsible decoys, mallard only, canvas body, wooden float and head block, one wire spring head support, one wire tail support, complete with anchor and cords, assorted 8 males and 4 females to the dozen .....,per dozen $18.20

ONE DOZEN IN A NEAT CARRYING BOX, WITH HANDLE; W'T PER DOZEN ABOUT 13½ LBS.

JOHNSON'S FOLDING FIBRE-BOARD DUCKS



MALLARD

Cheapest, lightest and most compact decoy made. Easily carried in a hunting coat.

No. 25—Folding decoys, life size, drakes and hens assorted. A good photographic reproduction of the Mallard duck is printed in natural colors on tough jute fibre board similar to stock used in manufacture of high grade shot gun shells, and so thoroughly waterproofed they last indefinitely when properly cared for. Decoy is composed of fiber-board body which folds flat, with full instructions printed on bottom of each decoy. Thin cedar float, also thoroughly waterproofed, slides snugly inside body to spread decoy and float it. The balancing device attached to the float makes tipping impossible. No more effective decoy made and none to be compared for convenience, w't complete 8 lbs., per dozen $8 80

ONE DOZEN IN TWO COMPACT CANVAS BAGS WHICH CAN BE CARRIED IN HUNTING COAT

Carry a line of goods upon which you can rely.

The dealer who carries H. S. B. & Co. Brands marks his store as a place where the better goods are sold.

A house with over sixty-eight years' experience stands back of our brands.

CEDAR DECOY DUCKS

SOLID

Flat bottomed, float evenly on water, well balanced, assorted, one-third female, two-thirds male.

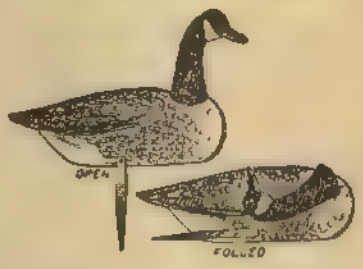
Glass eye, cedar decoys, good quality from selected white cedar. Painted in natural colors true to life. **Mallard, Blue Bill, Red Head Sprig Tail, Blue Winged Teal** and **Canvas Back.**

No. T1—Full one dozen box, per dozen $20.00

No. 1—Less than box, per dozen $20.00

ONE DOZEN IN A BOX, AVERAGE W'T PER DOZ. 30 BS.

FOLDING CANADA GEESE



No. 12—Canada geese decoys for land shooting, profile wooden bodies, folding wooden heads and folding wooden sticks which may be pressed into the ground, natural appearing, w't per doz. 6 lbs., per dozen $18.20

ONE DOZEN IN A NEAT CARRYING BOX

LIVE DECOY FASTENERS

Fastens around neck and has many advantages over leg fastening. Ducks can remain in water longer, as they have better use of their feet. Don't splash water all over you when taking them up.

No. 17—Samuell, flat brass collar, hinged to admit of fastening, riveted ring for cord, w't per doz. 8 oz. per dozen $4.00

DECOY ANCHORS

No. 15—Made from galvanized, malleable iron, with large loop wide enough to go over the head of the decoys and small loop for anchor cord, w't per doz. 5½ lbs., per dozen $2.90

No. 16—Made from iron, japanned. W't about 1½ lbs. each. Is heavy enough to securely hold live, as well as wood, decoys, is not easily fouled in snags and very convenient for winding the anchor cord when not in use, per dozen $3.70

BALANCE WEIGHTS

FOR WOOD DECOYS

No. 18—Made of cast iron. Have eyelets for anchor cord and two nail holes for fastening the weight to the decoy. These weights are easily attached, will balance the decoys so that it sets upright poperly in the water, also are cheaper than lead strips, w't per doz. 3¾ lbs., per dozen $1.80

GAME CARRIER

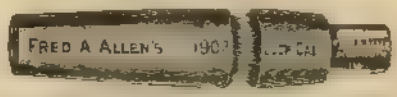
No. 0—Barnum, 2 tinned steel loops, stitched tan duck connecting strap, length folded 8 in., w't per doz. 2½ lbs. .....per dozen $3.00

LOOSE

CALLS

No. 760—Duck, cocobola wood, nickel tip .....per dozen $8.40

ONE DOZEN IN A BOX



No. 768—Allen's, duck, wood shell, nickel plated end, per dozen $14.00

The Allen Cal is as near perfection as can be attained being tuned by Mr. F. A. Allen, who is one of the oldest and most expert duck hunters in the country.

HALF DOZEN IN A BOX

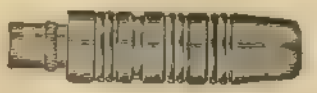
THE BROADBILL DUCK CALL will reproduce, with perfect accuracy, any call of our native ducks; will not break in tone by loud calling, operates with less effort than any other call on the market and has excellent tone quality.

It is made in two pieces, allowing the reed to be fastened securely to one side by the use of a metal clamp. Reed is made of the very best hard rubber and for durability cannot be improved upon.

The duck bill shape of the mouth piece gives the user a chance to manipulate this call much more freely than other calls, thus to obtain better results.

No. 767—W't per doz. 1½ lbs., per dozen $12.60

ONE IN A CARDBOARD BOX WITH FULL INSTRUCTIONS. ONE DOZEN IN A CARTON. SIX DOZEN IN A SHIPPING CARTON.



Non-corrosive and is easily adjusted to suit the different voices of Mallard, Pintail, Widgeon and other ducks without effecting the reed.

No. 769—Ditto's, duck, fitted with hand made rubber reed, rubber and cork inner parts, outside part of hard maple wood and spun brass, per dozen $21.50

ONE DOZEN IN A BOX

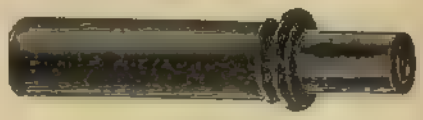
CALLS

This Call is the most natural toned, easiest blowing Crow Call on the market. Is always ready for use. Any inexperienced hunter can successfully call Crows. The Crow is one of the worst destroyers of our game birds and their nests. Every sportsman should help rid the country of these pests, who are busy from early dawn until dark, traveling in flocks over fields, prairies, woodlands and lakes, destroying the nests and young birds. In closed season the hunter enjoys this pastime of hunting Crows.

No. 780—Allen's Crow, wood shell, nickel plated end, w't per doz. 1½ lbs., per dozen $11.90

ONE DOZEN IN A BOX

OLTS FAMOUS CALLS



DUCK

A high grade call with a natural sound. It is constructed of hard rubber throughout. The reed is made of a specially prepared hard sheet rubber. This construction insures the calls against damage by climatic conditions.

No. 766—W't per doz. 1½ lbs., per dozen $11.20

ONE DOZEN IN A BOX

CROW

Easy to operate and will imitate a crow perfectly. It is made of fine hard polished rubber. The reed is also rubber. This construction insures the call against climatic conditions.

No. 764—W't per doz. 11 ozs., per dozen $11.20

ONE DOZEN IN A BOX

High Grade Imported Hall Clock

Big, Stately, Beautifully-made Clocks of Superior Quality and Workmanship

After carefully examining all makes of hall clocks we have selected those listed here and recommend them to you as the best to be had.

They are good, dependable timekeepers as well as being as finely finished as the best cabinet makers can make them.

These clocks run with weights and are wound only once in eight days. The striking gongs are so tempered that when the hammer strikes, a rich, mellow tone results. The clocks that have Westminster Chimes are self adjusting so that the strike cannot get out of time with the hands. All hall clocks are fitted with a beautiful cabinet of selected mahogany

83+6743 Mahogany Hall Clock, 5 feet 10 inches high, 14 inches wide Bronze Dial 12½x8½. Eight day Westminster Chimes.....**$200.00**

Height, 3¾ in., width, 6½ in Eight-day Time. Silver dial Tambour shape. Very good looking **$11.40**

For years the merchandising department of The Indianapolis News has studied and analyzed and collated the information about selling conditions in the Indianapolis Radius (Indianapolis and central Indiana) with an exceptionally high degree of thoroughness.

Most of this information has been reduced to writing and to tabular forms, and fills more than a score of bound volumes in The News building. This information could not be reduced to one book for general distribution.

But The 1923 Indianapolis Radius Book is a veritable gold mine of facts about selling conditions in the rich Indianapolis territory — facts based upon the extensive experience of The News organization. Manufacturers, advertising managers and advertising agencies should have this book. It is being mailed as it comes from the printer to practically everyone who might be interested in introducing or increasing the distribution or sale of a product in the Indianapolis Radius.

If by any chance you have not received *your* copy of The 1923 Radius Book, write at once for it.

You will find it not only a help to you in solving your Indianapolis distribution problems, but you will find in it much interesting information about Indianapolis and The Indianapolis News.

If you haven't yours, send for it today.

Half-way Isn't Very Far

The purposes of our advertising and the activities of our selling force are not directed toward soliciting business, so far as new clients are concerned.

That which we solicit is simply an opportunity to show the buyer of printing that the Charles Francis Press organization can be of real service to him.

Why not meet us half-way? Give us this opportunity. It takes but a few moments' time, and may result in your getting a new slant on the possibilities of your printing.

Florida's Largest Evening Newspaper

and

GROWING

—Surely
—Conservatively
—On its merits

It is easy for a newspaper to gain in circulation—if the methods adopted in getting the increase are not to be questioned.

But to show a continuous growth, day by day, when every copy is paid for and is sold on its merits as a newspaper—then you have reason for interest in such a newspaper's development.

The Jacksonville Journal

ESTABLISHED 1887

is gaining circulation daily—on the right basis. There are no contests; no artificial stimulation. Yet each day we are adding new subscribers and keeping our old ones at a rate that should make our year's increase total 40%.

Here, indeed, is a good buy in newspaper space. An influential medium that deserves the title, "The People's Favorite Newspaper."

In working up a list of farm papers, however, it is very often the case that he has no basis in his own experience for estimating confidently the appeal to farmers of the periodicals that are published solely for rural distribution.

It is necessary, therefore, for the advertiser and the agency man, confronted with the responsibility in choosing between National farm papers, to depend in a larger measure upon the semi-annual Publishers' Statements than is required in forming a correct judgment of any other group.

Realizing that it takes a great deal of time to ferret out the salient facts from the Publishers' Statements themselves, *Farm and Home* has charted these statements and has added a few maps showing average farm incomes, value of farm property, etc., by states.

This collection of blueprints and maps will be valuable to any advertiser or agency man. You may have a copy for the asking.

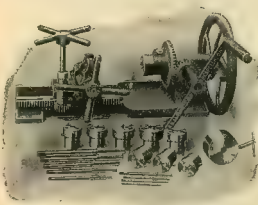
"THE HOUSE OF QUALITY, SERVICE AND SATISFACTION"

THREADING MACHINES

No. 11 AND No. 12 JARDINE



"V" Oversize or U.S. Standard Thread

This is a machine of up-to-date design. The self-centering Vise is strong, the Rack and Pinion Wheel are convenient to the left hand of the operator, as well as being quicker and surer in operation than the old ratchet rack and pawl. There is a large Drip Pan widened to catch the drip from the Die. The Spindle is well fitted in a Bearing of ample length. Gearing is two to one.

Collets are held in the Spindle by a Key instead of the old style split clamp. The Key makes a Positive Drive and avoids the risk of breakage, to which the clamp is so liable.

No. 11—Cuts ¼, 5/16, ⅜, 7/16, ½, ⅝, ¾ inch.

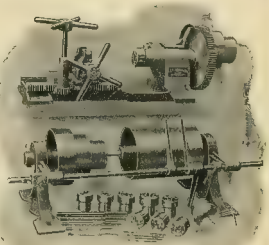
No. 12—Cuts ¼, 5/16, ⅜, 7/16, ½, ⅝, ¾, 7/8, 1 in.

Prices Complete with Taps, Dies, Collets and Tap Chuck

Shipping Weight 235 lbs.

No. 11A—With Solid Dies	$250 00
No. 11B—With Speed or Lightning Dies	270 00
No. 11C—With Opening Die Head and Dies	384 00
No. 12A—With Solid Dies	276 00
No. 12B—With Speed or Lightning Dies	310 00
No. 12C—With Opening Die Head and Dies	420 00

No. 22 JARDINE



Cuts up to and including 1-inch Bolt "V" Oversize or U.S. Standard Thread

The Spindle or Arbor runs in a long bearing and carries a large Cut Gear on the end. This Gear is driven by a Pinion and Three-Speed Cone Pulley, giving three changes of speed with ample power.

The Chuck is bored 2-3/16 inch diameter for Shank of Tap Chuck, Self-Opening Die or Collets for Solid or Adjustable Dies. This Chuck or Socket, is tightened by a Taper Key, making a positive drive, and avoiding all risk of breakage.

The Bed of the machine has a wide drip pan and carries a Self-Centering Vise, fitted to Milled Slides and opened or closed by a Right and Left Screw on the end of which is a four-arm Capstan. The Vise is moved endwise on the Bed by Rack and Pinion, the teeth of the Rack being upright, so that chips or dirt cannot lodge.

Can be furnished mounted on Stout Iron Legs at an extra charge.

Cuts ¼, 5/16, ⅜, 7/16, ½, ⅝, ¾, 7/8, 1-in.

Net Weight 360 lbs. Crated Weight 440 lbs.

No. 22A—With Solid Dies	$384.00
No. 22B—With Speed or Lightning Dies	426 00
No. 22C—With Opening Die Head and Dies	534 00
The Above Prices Include the Countershaft	
Extra for High Four Leg Iron Stand	$50 00
Extra for Crank and Gearing for Hand Operation	50 00

JARDINE OPENING DIE HEAD

Used with Nos. 11, 12 and 22 Threading Machines

This Die Head, while low priced, will do any work within its range as quickly and as well as the most expensive Threading machine. It is supplied with Jardine Threading Machines, if so ordered, or sold separately and attached to any Bolt Threader.

The Dies are held in position by Two Screws and are easily and quickly changed.

The Die is opened while the machine is running by pushing the Lever backward and closed to working position by drawing it forward.

Price of Die Head, without Dies $102.00

Price of Die Head, with 9 Dies ¼, 5/16, ⅜, 7/16, ½, ⅝, ¾, ⅞, 1 in. 198.00

Rear Spindle Bearing	1¼x2⅝-in.
Hole through Spindle	¾-in.
Spindle Nose	Dia. 1⅝-in. 10 U.S.S. Threads
Tail Spindle	Dia. 1⅝-in. 5-in Traverse
Taper of Centers	No. 3 Morse
Threads per inch	4-80
Cone Pulley diameters on lathe	7-5¾-4½-3¼-in.
Width of Belt	2-in.
Ratio of Back Gearing	8½ to 1
Spindle Speeds	16
Compound Rest Travel	4-in.
Length of Carriage Bearing on Shears	15-in.
Cone Pulley diameters on Countershaft	8¾-7-5¾-4½-in.
Countershaft Driving Pulley	8x3¾-in.
Countershaft Speed	150 R.P.M.
Lathe bed made in any length.	
Size of tools	½x1⅛-in.
Weight Five-Foot Bed	1,100 lbs.

The Lancaster 13-inch Engine Lathe is Powerful, Accurate and Durable.

Cuts Standard Threads from 4 to 40, Right or Left, including 11½-in. Pipe Thread. Equipped with Plain or Compound Rest, Follower and Steady Rests, Change Gears, Large and Small Face Plates, Double Friction Countershaft and Wrenches. All Gears Guarded and all Parts interchangeable.

The Bed is rigid with frequent Cross Ribs and Head Stock has bearing of 15¾-inches on Bed.

Spindle is 60 Carbon Crucible Steel with a ¾-in. Hole through entire length and is Bored for No. 3 Morse Taper.

The Crucible Steel Tail Stock is Offset to allow the Compound Rest to swing parallel to the Bed.

Bearings are high grade Phosphor Bronze, carefully scraped to fit the Spindle.

The Carriage and Apron are strong, with deep bridges cast in one piece.

The Apron is equipped with Safety Device, which prevents throwing in half nuts when either feed is connected, thus preventing breakage.

The Rack is steel and cut from solid bar and the Compound Rest is gratuated in degrees.

One Dozen Each Size in a Bundle; One Gross in a Box

HACK SAW FRAMES

★ DIAMOND EDGE

BACK SAW STYLE HANDLE EXTENSION FRAME

Note—The Frame of these Saws are Positive Locking; absolutely no chance of Loosening while in use. Easily and quickly released when desired.

Extra Stiff Nickel Plated Steel Frame, 3-16x⅝ in.; Varnished Applewood Handle fastened with Nickel Plated Saw Screws; Saws can be Set to cut in any direction at any Angle; Depth from inside of Back to Cutting Edge 3½ inches.

Heavy, Rigid and Strong—The Floating Rivet Makes adjustment Quick and Easy.

The Handle end of Frame engages with the Floating Rivet by means of Notches on the under side.

When the Blade is tightened up the Floating Rivet slides up the inclined Plane formed by the angular slot in the Tube. The Handle End thus has a bearing throughout its entire length against the Tube forming the back, making it extra strong and rigid and prevents Buckling.

This construction is not to be found in any other Frame on the market and will appeal to the mechanic as one of the most practical improvements made in the construction of Hack Saw Frames.

Adjustable Handle

The Handle on this Saw may be adjusted to different positions to suit conditions of ordinary overhead or work in low down or Cramped positions. Tension is controlled by a Wing Nut at front end of Frame.

Per Dozen

No. DE77—Without Blade; adjustable to take Blades 8 to 12 inches; Weight each 1½ lbs.; Weight per Dozen 18 lbs..... ...$15.50
One in a Box

Solid Handle

The Handle on this Saw is Securely Fastened to the Frame with Two Saw Screws. It is made exceptionally Strong and Rigid, has a comfortable Grip and is recommended for Heavy work. Tension is controlled by a Knurled Nut at Rear end of Frame

Per Dozen

No. DE88—Without Blade; Adjustable to take Blades 8 to 12 inches; Weight each, 1½ lbs.; Weight per Dozen 18½ lbs.....$15.50
One in a Box

EXTENSION FRAME

Nickel Plated and Polished Steel Frame, ⅝x¼ inch; Polished Cocobolo Handle; Blade can be Set to Cut at any Angle; Depth from Inside of Back to Cutting Edge 2⅝ inches.

When Blade is Tightened up, the Floating Rivet Slides up the inclined Plane formed by the Angular Slot in the Tube; The Handle thus has a Bearing throughout its entire length against the Tube forming the Back, making it extra Strong and Rigid.

Per Dozen

No. DE65—Without Blade; Adjustable to take 8 to 12 inch Blade; Weight per Dozen 12 lbs.....$26.00
One in a Box

★BRIDGE

No. 676NR—Lamp Brass Body; 3 inch Nickel Plated Reflector; Flat Hook; This Lamp is Principally Used in Lead Mines; Weight per Dozen 6 lbs **23.10**

No. 662—Lamp Same as No. 661 Except 2 inch Reflector Used for Mining Low Seam Coal; Weight per Dozen 6 lbs. **19 80**
Twelfth Dozen in a Box

CAMPERS GAS LAMPS

With Matchless Lighting Attachment

Especially Intended for use by Sportsmen for Camping, Although they will also be Found Suitable for Superintendents, Engineers, Surveyors, Mine Inspectors, etc.

JUSTRITE

Equipped with 3 inch Saucer Shape Reflector; Nickel Plated; Used Principally in Lead Mines; This Lamp is Equipped with a Flat Hook.

Per Dozen

No. 709—Nickel Plated Lamp; Weight per Dozen 6 lbs. **$24.70**
Twelfth Dozen in a Box

EXTRA PARTS FOR MINERS LAMPS

These Auto-Lighters Eliminate the Necessity of Carrying Matches and the Trouble Necessary to Keep them Dry and in Condition to Use. If your Light Should Accidentally go out, a Twist or Two of the Wheel Lights it Again. The Convenience and Saving in time is Readily Apparent.

These Lighters are not Soldered to the Reflectors; the Lock Nut Enables You to Remove the Lighter from the Reflector and put it on a New Reflector.

REFLECTORS

Spun Brass; Diameter 2½ inches; Equipped with Patented Sparkers.

Per Dozen

No. 26—Weight per Dozen 16 ozs. **$5.50**
One Dozen in a Box

RUBBER GASKETS

Flat, Red India Rubber; Diameter Outside 1¾ inches; Diameter Inside 1⅜ inches.

Per Dozen

No. 60—Weight per Dozen about 2 ozs. **$0.80**
Loose

FELT PACKERS

Good Grade Felt; Diameter 1½ inches; Thickness 3-16 inch.

Per Dozen

No. 9—Weight per Dozen about 1 oz. **$0.80**
Loose

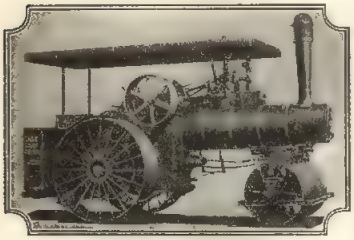
Case Road Rollers

How To Build Good Roads Most Economically



Belt Pulley Side, Case Road Roller

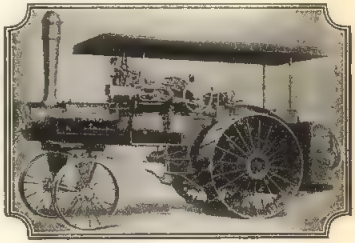
Economy in Road Building depends upon the machinery with which the work is done; and equipment which saves time, and reduces labor costs, will necessarily reduce road construction costs.

Case Road Rollers are constructed and designed upon tried and tested principles. They will prove to be the most economical in the long run for lasting qualities, performance and ability to do more good work.

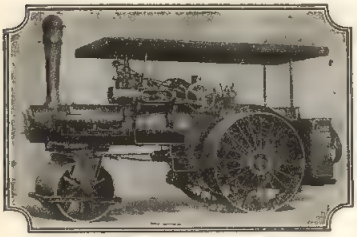
The Case Road Roller is built in 10 and 12 ton sizes, the two sizes most adaptable to do general all around work. Because of their scientifically distributed weight they consolidate the road material quickly with exceptional uniformity. Experienced road builders and engineers agree that three wheeled rollers built in these sizes are most practical for general road construction.

The Case Road Roller is always ready for belt work. When one requires up to fully 40 horse power for stationary or belt work, the large clutch pulley is ready instantly by simply shifting a lever, and may be belted up to a rock crusher, concrete mixer, large pump or any other machinery.

Road builders approve the Case Roller because of it convertibility into a hauling tractor. The Case Roller is convertible by simply removing the front roll and displacing it with a pair of front wheels. It may then be used as a hauling tractor for pulling road graders, movings crushing plants, hauling materials, scarifiers, etc.



Converted into Hauling Tractor



Left Side Case Road Roller

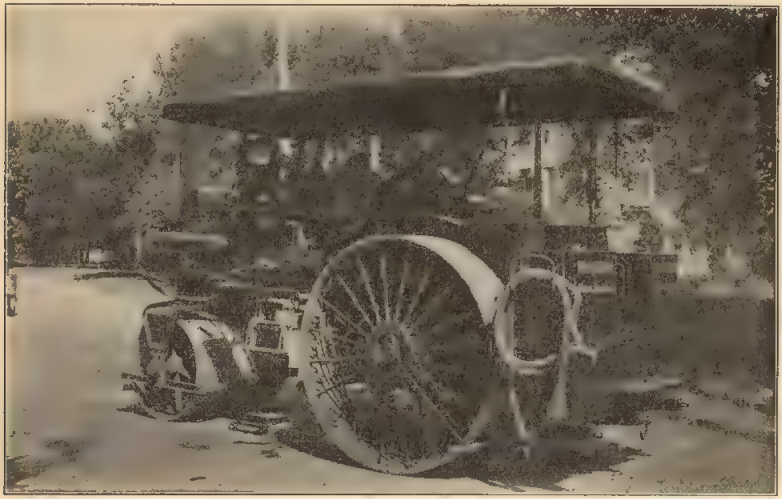
Case Road Making Machinery has many exclusive features that appeal to roller engineers and contractors. Case Rollers have a wide spread and cannot turn over. They will not slip off the crown of slick, muddy roads, and will roll closer to a curb than any other three wheeled road roller.

One can turn in half the space on a narrow road with a Case Road Roller and this roller is so splendidly balanced that the operator finds the steering device very easily operated, as a slight pressure on the hand lever, actuates the power steering mechanism, quickly turning the front rolls in either direction as desired, whether the roller is in motion or at rest. The operator can reach this lever without changing his position. The big, wide, comfortable cab also appeals to the engineer and enables him to work with greater efficiency.

Roomy Cab for Operator

These are some of the reasons why practical and expert roller men and successful contractors prefer Case Road Rollers.

Case Road Rollers Always In Stock



This J. I. Case Roller is the property of M. R. Amerman, of Wichita, Kans., who is one of the largest Paving Contractors in the West. Mr. Amerman standardizes on Bunting equipment knowing that he not only gets Quality and Price, but he gets Service as well.

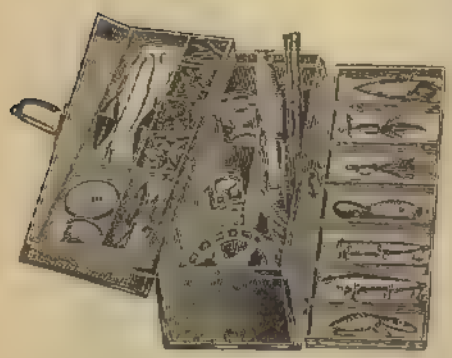
KENNEDY TACKLE BOXES

No. 44 — 14 in. long x 7 in. wide, 10 in. high, leather brown baked enamel finish, light weight but strong grade steel, double seamed electric welded and reinforced throughout, waterproof and watertight, holds several reels, with two trays, fitted with solid brass corner irons, side catches and lock, leather covered steel handle, w't per doz. 87 lbs. .....per dozen **$96.00**

WRAPPED SINGLY



This style box is for the fishermen who desire a box in which they can carry short casting rods, in addition to their other equipment.

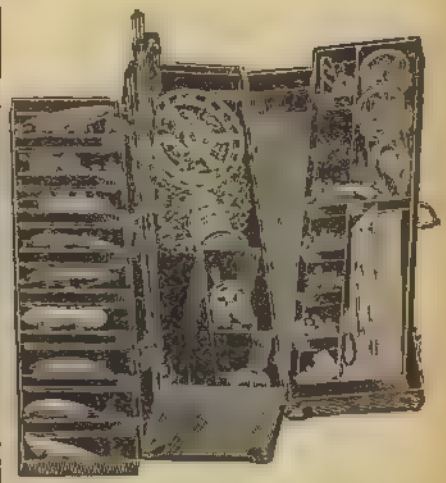
The two trays fit flush so that there is no danger of the contents spilling. They are so divided that there is plenty of room for plugs, or other artificial bait, hooks, lines, sinkers, etc.

There are two divisions in the bottom of box for reels with ample space, short casting rods, landing net, etc.

No. 616—Length 16 in., width 6 in., height 6 in., equipped with a corbin multiple-change lock, leather handle with steel core, w't per dozen 48 lbs. .....per dozen **$76.00**

Made of steel practical design, having plenty of compartments in the two trays for artificial bait, snelled hooks, lines and sinkers, two compartments in the bottom for reels, bottled bait and other equipment. Watertight and is equipped with a first class lock with strong loop-catch and a genuine leather-handle with steel-core. Finished in a durable, brown, rust-resisting, baked enamel. Electrically welded throughout, not soldered. Also makes a nice shell box.

No. 612—Length 12 in., width 6 in., height 6 in. w't per doz. 48 lbs., per dozen **$60.00**



Combination Rod-Kit and Tackle-Case especially designed for the fisherman who wants a good substantial box in which he can carry full casting equipment, including rods. Equipped with two trays, suitable for carrying at least nine plugs or artifical baits. Ample space for snelled hooks, lines, sinkers, etc., in the tray. Bottom of the Box is divided to accommodate two reels in separate compartments, as well as space for rods, landing net, bottle bait, etc. Equipped with welded corner-irons, side catches, and a strong Corbin multiple-change lock. Finished in a durable brown baked enamel which cannot chip or easily scratch off.

No. 621—Length 21 in., width 6 in., height 6 in. w't per doz. 78 lbs., per dozen **$96.00**

SANITARY BATH TUB, STOVE AND WATER HEATER 3 In One

2H3646—**Bath tub,** heavy steel highly finished in best grade white enamel, fitted with large wood rim, drain connection for pipe or hose waste through floor or wall. Heater, fitted with the famous "Kerogas" burner which burns kerosene, glass oil tank, 10 gal. water tank. Rigo and black enamel finish hanger stand and tank. Tub and heater are separate and heater can be easily moved to kitchen and used for washing, ironing, or cooking. One complete outfit, in crate, 90 lbs.
Each, **$28.50**

"KEROGAS" COMBINATION OIL AND ELECTRIC RANGES

Oil and electric cooking—singly or simultaneously. Attaches to any electric lamp socket—requires no special wiring, no extra cost to install.

2 oil burners, 17 x35 top 39½ in high to cooking top, heavy steel full cabinet style body, baked japan finish, nickeling brass "Kerogas" burners drawn out of one solid piece, leak proof and rustproof fitted with one extra large or "Giant" burner, white porcelain enameled burner drums, efficient wick raiser and regulator, glass oil tank. Thermostatic control or clock attachment makes cooking by electricity automatic. After food is prepared and placed in cooker clock is set for the hour when cooking should begin and stop, the current is then automatically turned on and off at proper time. Breakfast can be cooking while the family sleeps. Heat does not go above 250 degrees nor below 225 degrees. 1 in crate

2H4803—Without high shelf back. . . . . Each, **$74.50**

2H4804—Complete with white porcelain high shelf back. **82.00**

ENGINES

LAUSON "FROST KING" GASOLINE ENGINES

UNIFORMITY

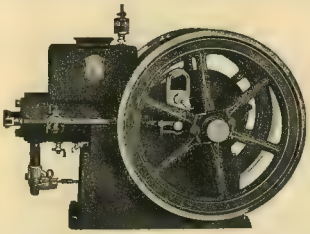
Only one grade of Lauson Engine is made and **Best Quality** rather than rapid production is the chief aim of the makers.

SIMPLICITY

A minimum number of parts means great **Wearing Qualities** and convenience in repairing.

EFFICIENCY

Lauson Engines use all possible fuel energy at all speeds with the least heating of the cooling water.



RELIABILITY

Lauson Engines are so built that they require little attention while operating. They need no coaxing to do their work promptly and properly.

DUPLICATION OF PARTS

Every part of a Lauson Engine is made according to a Jig or Template and Perfectly fitting Repair Parts can be furnished promptly. These Parts require no special fitting or adjustment.

When buying a Gasoline Engine, there are Five Cardinal Points to be looked for:
UNIFORMITY, SIMPLICITY, EFFICIENCY, RELIABILITY, DUPLICATION OF PARTS
Lawson Engines measure fully up to requirement in every one of these

MAGNETO

The **Sumpter Magneto** is firmly attached to the Frame and the Engine starts direct from the Magneto with a Half-turn of the Wheel.

FUEL TANK

The Fuel Tank of the Self-Contained Type is located in the Base of the Engine thereby reducing Floor Space to a Minimum.

"FROST KING" STATIONARY SELF-CONTAINED GASOLINE ENGINES

No.	Size	Dia. Pulley	Face Pulley	R.P.M.	Floor Space	Shipping Wt.	Price

No. 61—12 gauge, 30 in. barrel, w't 7½ to 8 lbs., each $79.10

LE FEVER "NITRO SPECIAL"

The new LeFever "NITRO SPECIAL" is a well finished, medium priced, double barrel, hammerless shot gun. Built to shoot right and to stand as much use as is required of a good gun. Fitted with non-breakable coil springs. Stock is securely fastened to frame with a draw bolt running up through grip of stock to frame. Top snap may be tripped by simply pressing down with thumb, on a trip pin which comes up through face of frame. Will be FURNISHED only in following STANDARD specifications:

12 gauge, 28 in., weighing about 7½ lbs.
12 gauge, 30 in., weighing about 7 lbs. 10 ozs.
16 gauge, 28 in., weighing about 6¾ lbs.
20 gauge, 28 in., weighing about 6¼ lbs.
Right barrel, modified choke; left barrel, full choke.

Standard length of stocks 14 in., with 2⅝ in. drop at heel. Every gun is proof-tested with an extreme load. The locks for this new LeFever were designed by the best gun maker in America.

No. 15—12 gauge, 28 in. or 30 in., w't about 7½ to 7 lbs. 10 ozs. .....each $46.50
No. 2015—20 gauge, 28 in., w't about 6¼ lbs., each 46.50
No. 1615—16 gauge, 28 in., w't 6¾ lbs. .....each 46.50

IVER JOHNSON

Barrels—Special steel, browned, with top-bolt extension and re-enforced drop forged steel breech, finely matted flat-top rib; 30 in. left barrel full choke, right barrel modified choke bored, 32 in. both barrels full choke bored.

Stock—English black walnut, with pistol grip,, carefully machined, shaped, checkered and hand-finished, 14 inch with about 3 inch drop, genuine hard rubber butt plate.

Frame—Case hardened steel of high tensile strength, the design of the frame which, is of the heavy breech type, is such that the interior rear portion of the breech wall is re-enforced by a heavy vertical wall of metal, solid with the frame itself. This construction adds unusual strength to the frame at the point of greatest strain. Top snap action with new top-bolt barrel fastening, the bolt has a firm bearing on the entire area of the barrel extension, which, in itself, is a part of the solid steel forged breech of the barrels, and provides an unusually strong and substantial barrel fastening. Has coil mainspring incased within the solid wall of the sides of the frame and completely protected from friction and so mounted as to provide a uniformly strong, smooth and even action when in operation. All working parts are drop forged, accurately machined.

No. 65—12 gauge, 30 or 32 in. barrel, w't about 7 lbs., each $48.00

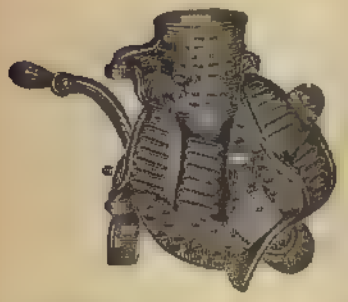
Each, **$2.60**
Lots of 12, " **2.55**

CORN SHELLERS

The tension of the hopper spring allows the hopper to expand and contract according to the size of the ear. At the outlet of the hopper a flange holds the ear close to the shelling disc or wheel, thus assuring a thorough shelling of the ear.

No. T100—Little Giant, 10 in. sheller disc or wheel with projecting teeth, spring hopper, adjustable for different sizes of ears, malleable iron frame, disc, crank, etc., heavy steel hopper spring, long axle bearing and hook, 7 in. crank with wood grip, w't per doz. 150 lbs., per dozen $24.00

ONE IN A CARTON



Manufacturer guarantees to furnish free any part that ever breaks, wears out or gets lost.

BLACK HAWK, 8½ in. shell wheel with round teeth, long chilled bearings, malleable iron hopper, separator and crank, will shell all sizes of ears, fastens to side of box by means of two clamps with winged nuts, capacity 8 to 14 bu. per hr., w't per doz. 180 lbs.

HALF DOZEN IN A BARREL

No. W1903—Full one-half dozen barrel, per dozen $52.00

No. 1903—Less than half dozen, per dozen $52 00

CORN SHELLERS

RED CHIEF

Closed hopper makes it impossible for operator to pinch hand. Patented oval shape teeth, arranged on the wheel so as to go between the rows, pressing them from the ear instead of tearing them. Will not crack or otherwise injure grain. The only safe sheller to use for seed corn. Throws cobs outside every time. Patented fastener clamp, with large strong wing nut. Fastens securely by hand on box, barrel or tub. Holds steady. Easy to remove. Tension directly on cob, not on hopper, making the Red Chief run easily, no force being required to expand hopper. Perfect spring tension assures clean shelling of any size ear. Three-quarter in. cold rolled steel axle, very strong, with 4½ in. bearing on the hub, preventing rapid wear and assuring long life. Long strong crank, securely fastened with No. 10 standard thread, assuring ease in operation. Wooden handle, securely riveted to crank, w't 11½ lbs.

No. T120—Full half dozen crates, per dozen $48.00

No. 120—Less than case. per dozen $50.00

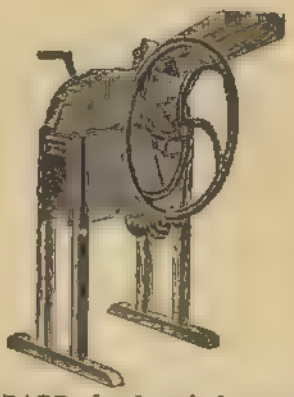
HALF DOZEN IN A CRATE

POP CORN ATTACHMENTS

Designed to fit inside the Red Chief Corn Sheller, will shell any size ear of Pop Corn. Easily attached and self-adjusting.

No. 121—Per dozen $8.00

CORN SHELLERS



HIBBARD, hardwood frame, body and legs painted vermilion, striped in black and varnished. All iron parts painted black. Heavy balance wheel, light running gears and easily adjustable spring to receive and shell any size ear of corn. All parts strong and durable, 21 in. fly wheel, height 3½ ft., length 2 ft., width 12 in.

The HIBBARD shells prfectly clean, does not break the cob or throw out corn with the cob. Has hand wheel for regulating springs and cast iron frame for all boxes. It can be used with light power by replacing crank with pulley.

WITHOUT FAN

No. F5—Without feed table, w't each 138 lbs.★ .....each $24.00

No. F5T—With feed table, w't each 145 lbs.★ .....each $25.50

Price does not include rope.

ONE DOZEN IN A BOX

★ Items Marked Thus ★ Are Shipped From Factory Only.

SEED CORN GRADERS

No planter will drop right with ungraded seed.

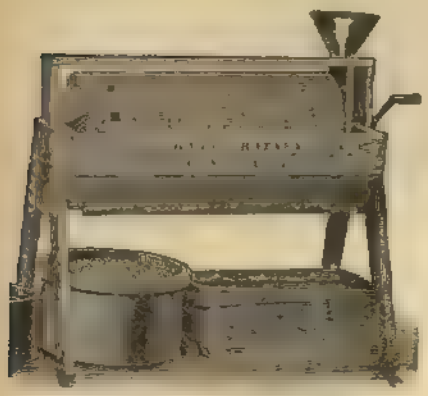
Graded seed insures perfect dropping, stronger plants and increases yield 5 to 15 bushels per acre.

The Perfection has a special lower screen construction that sorts out the THIN wafer-like kernels as well as the ROUND and NARROW ones.

Both screens are corrugated giving every aperture an incline guard on lower screen which prevents spilling corn while grading, permitting action of entire screen on corn at once.

No. N21—Perfection, double screen, corrugated, beveled apertures, three kinds of holes in the lower screen, retains corn on lower screen until separation is complete, size 11x19 in. capacity 6 to 10 bushels per hour, per dozen $23.20

HALF DOZEN IN A BOX



A rotary screen never clogs, constructed so that kernels are turned on edge or on end that they may readily pass through. Will handle any variety of field corn. Crated for shipment with legs detached. Measures and basket not included.

No. N50—Double Rotary, 5 grade, height 30 in., length 32 in., width 15 in., composed of two corrugated steel drums, the finer screen drum surrounding the other; simple easily operated, accurate, quick acting, w't each crated 50 lbs., per dozen $232.00

CORN PLANTERS

Wood frame, natural finish, steel jaws, 8x3x3¼ in. heavy tin hopper and conveying tube, wood grips securely bolted, height 34 in., w't per doz. 63 lbs.

No. NN1—Full dozen crate, per dozen $22.00

No. N1—Less than crate, per dozen $22.00

ONE DOZEN IN A CRATE

ECLIPSE ROTARY

All steel frame, varnished, wedge point, spring on side to throw handles apart, 4 iron discs for different feeds, one for broom corn and the others for corn, with perforations in each to drop 1, 2 and 3 grains each according to the number of holes, sheet steel hopper, height 34 in., w't per doz. 116 lbs.

No. NN5—Full doz. crate, doz. $42.00

No. N5—Less than crate, doz. 42.00

ONE DOZEN IN A CRATE

Acme rotary full rotary drop, hardwood frame varnished, heavy steel jaws 4x4¼x6¾ in., pressed steel hopper green japanned adjustable drop disc, clock steel spring, cutoff, height 32 in., w't per doz. 80 lbs.

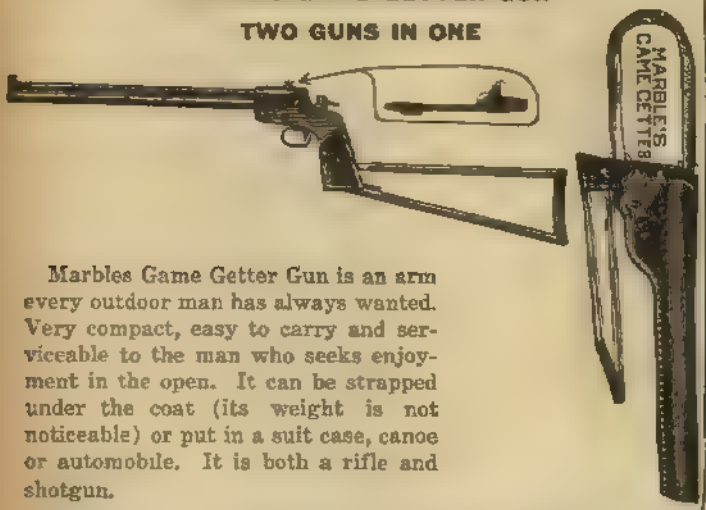
MARBLES GAME GETTER GUN

TWO GUNS IN ONE



Marbles Game Getter Gun is an arm every outdoor man has always wanted. Very compact, easy to carry and serviceable to the man who seeks enjoyment in the open. It can be strapped under the coat (its weight is not noticeable) or put in a suit case, canoe or automobile. It is both a rifle and shotgun.

Fitted with a rear sight that gives three combinations; folding leaf with small "U" notch; stationary buck horn with large "U" notch and folding peep with 3/32 in. aperture. Folding leaves can be turned down quickly with the thumb. Front sight 1/16 inch gold bead.

Striker—Is adjustable to either barrel as desired.

Hammer—Rebounds to safety notch after firing.

Ejector—Strong, but simple, partially ejects from both barrels at the same time.

Receiver Lock—Trigger guard must be pulled back to open breech.

Folding Stock—Made from cold rolled steel, nickeled. To place in rigid position, swing it backward, pulling back on sliding lock. Stock is locked by a strong sliding lock, which enters a notch ¼ in. deep, at base of grip.

Frame—Drop forged, blued.

Specifications; Barrels—Round, blued, single trigger, leather holster with strap, walnut grips.

MODEL A

Upper Barrel—Shoots 22 caliber short, long and long rifle cartridges.

Lower Barrel—Shoots 2 inch, 410 gauge loaded shot shells and 410 gauge single ball shells.

No. F2112—Marbles Game Getter Gun, 12 inch barrels, complete with fine leather holster, w't 3¼ lbs., each★ $41.30

No. F2115—Marbles Game Getter Gun, 15 inch barrels, complete with fine leather holster, w't 3¼ lbs., each★ $43.85

No. F2118—Marbles Game Getter Gun, 18 in. barrels, complete with fine leather holster, w't 3¼ lbs., each★ $46.45

MODEL B

Upper Barrel—Shoots 22 caliber short, long and long rifle cartridges.

Lower Barrel—Shoots 2½ in. 410 gauge loaded shot shells only.

No. F2212—Marbles Game Getter Gun, 12 in. barrels, complete with fine leather holster, w't 3¼ lbs., each★ $41.30

No. F2215—Marbles Game Getter Gun, 15 in. barrels, complete with fine leather holster, w't 3¼ lbs., each★ $43.85

HAMILTON SINGLE SHOT RIFLES

TAKE-DOWN

Tapered bronze barrel, rifled with great care, length 16 in., built up steel jacket gives great strength, durability and accuracy, solid breech block makes action absolutely safe from rear explosion, front knife and open rear adjustable sights, automatic ejector, w't 3 lbs.

.22 Caliber, adapted to 22 short or long cartridges.

No. 27—Each $4.60

HAMILTON HAMMERLESS REPEATING

MODEL 39—TAKE-DOWN—.22 CALIBER

A hammerless, take-down model, with pump action. The magazine holds fifteen 22 short rim fire cartridges and twelve 22 long rim fire cartridges. It has an automatic lock which prevents accidental discharge while operating pump action, as the trigger cannot be pulled until breech is locked in firing position.

Barrel is bronze lined, accurately rifled, with solid steel breech. Front sight knife pattern, rear sight open and adjustable, stock and forearm genuine walnut, turned. Length over all, 35 in., length of barrel assembly when taken down, 21½ in., w't about four pounds. Each rifle is packed in cardboard box.

No. 39—.22 caliber take-down adapted to .22 short and long cartridges, w't about 4 lbs. ..... each $17.50

HALF DOZEN IN A BOX

WOODCRAFT KNIVES

The desirable features of several knives embodies in one. Is adapted for sticking, skinning, cleaning, slicing, breaking bones, etc.

The thick tapering bevel blade carries the strength from handle to point. Back of blade close to handle is checkered to give a firm grip with thumb and finger. The back of point is beveled for chopping, breaking bones, etc.

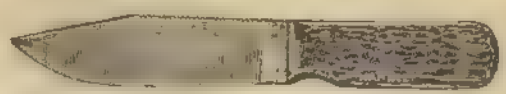
AN ALL PURPOSE WOODMAN'S KNIFE.

Laminated Leather Handle, with colored hard fibre and brass washers. Has flush aluminum tip. Complete in leather sheath.

No. 49—4½ in. blade, w't per doz. 5 lbs., per dozen $40.80

HALF DOZEN IN A BOX

DALL DE WEESE PATTERN



Designed by Dall DeWeese, for use on expedition after big game, where every item of the outfit has to be figured down to the lightest and most compact form. It has a dull saw back on which the thumb is placed when skinning or cutting hard substances. When sticking the little finger should be doubled up, letting the end of handle rest against it. This takes the place of a hilt.

Stag Horn Handle, with groove to fit finger. Complete in leather sheath with point protector.

No. 62—4 in. blade, w't per doz. 4 lbs., per dozen $36 20

HALF DOZEN IN A BOX

EXPERT KNIVES

Particularly designed to meet the requirements of the professional hunter, trapper and guide, who requires a thin, keen-edge for dressing skins and furs.

The back of the blade is designed for scraping skins while on the forms.

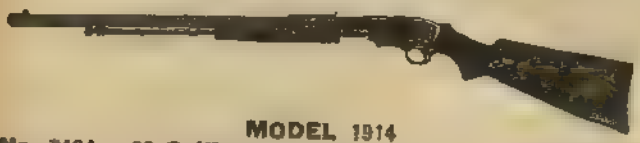
RIFLES

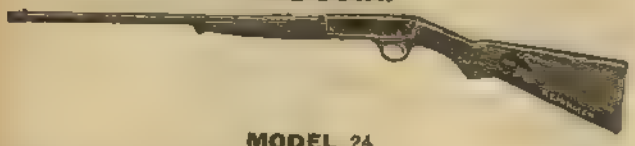
SAVAGE REPEATING



MODEL 1914

No. 7424—.22 Caliber, 24 in. octagon barrel, hammerless take-down extra full pistol grip stock, corrugated steel butt plate, solid top, side ejection, positive safety, trombone action, tube magazine handling twenty .22 short, seventeen .22 long or fifteen .22 long rifle rim fire cartridges. Fitted with metal bead front and adjustable wind gauge rear sights. Length taken down 27½ in., w't 5¾ lbs. .....each $33.50

REMINGTON AUTO LOADING HAMMERLESS TAKE-DOWN



MODEL 24

Stock—American walnut with half pistol grip and steel butt plate.
Barrel—Remington Steel, round, 19 in. length.
Sights—Adjustable straight bar rear sight and white metal bead front sight. Receiver matted as an aid for quick alignment of sight.
Loading—To load rifle draw magazine tube to rear and insert cartridges into loading hole, in the side of stock.
Action—Simple, strong and readily taken apart (for cleaning) without use of tools. Hammerless solid breech construction.
Ejection—Empty shells ejected from bottom, away from the shooter's face and out of line of sight.
Take-Down—Quick, strong and dependable, being the same interrupted-thread system used in Remington Repeating Shot Guns. Barrel may be removed quickly without use of tools, permitting cleaning from breech.
Safety—Cross bolt type, located conveniently in front portion of trigger guard for operation with trigger finger.
Portability—When taken down may be packed in space 19 in. long. A 20 in. suit case will carry the rifle nicely.
Ammunition—Rim Fire Smokeless Lubricated or Semi Smokeless, in either solid or hollow point bullet. Lubricated cartridges ALWAYS should be used. All Semi-Smokeless Ammunition is lubricated

No. 1026—.22 Caliber Short Rim Fire, length over all 37 inches., magazine capacity 15 cartridges, w't 4¾ lbs. Each $45 45

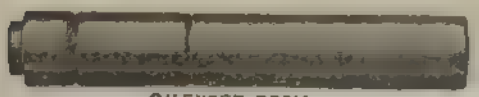
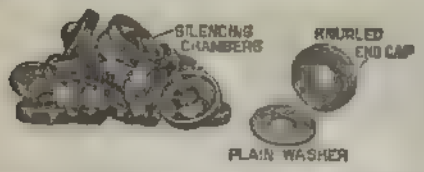
MAXIM SILENCERS



SILENCER BODY



BLUE STEEL

The Model 1920 Maxim Silencer Consists of: Silencer Body, Knurled End Cap, 19 Silencing Chambers, and One Plain Washer. It Can be Readily Taken Apart for Cleaning and Repairing; is Interchangeable with the Old 1912 Model, and Slightly More Efficient, Smaller and Lighter.

This Silencer is a Practical Device that Can be Fitted to Any Standard Rifle, and Will Prevent All Noise Usually Caused by the Explosion of the Cartridges; Recoil is Reduced Over 5 per cent.

The Slight Weight of the Silencer Does Not Impair the Balance of the Gun. In Fact, Experience Shows that the Small Increase in Weight at the Muzzle End Helps in Target Shooting, as Does the Reduction in Recoil, Due to the Presence of the Silencer.

Smokeless Cartridges are Especially Well Adapted for Rifles Equipped with Silencers.

Model 1920

Each

No. MS22—For .22 Caliber Rifle, Silencer Complete, with Assembling Tool, Size 6⅝x⅞ inches, Weight 5 ozs. $10.50

Collections
Not Always a Bugbear
Not long ago a customer came into your store to pay you, but his account was not balanced on your books. He did not want to wait, so you had to wait for your money.
Now and then you find that one of your customers is unsatisfied; he thinks that he has already paid for certain items billed him or questions the price named. It is too late, then, to recall the details of the transaction. You must adjust the account to suit his wishes or lose him. In either case you are the loser.
You are always facing bad accounts, overbuying, delinquent paying or other bugbears with old methods, but it is not necessary, for—
McCaskey System Improves Collections—Stops Disputes!
The very fact that the McCaskey System keeps the customer informed at all times as to his total owing makes it possible for Boyd Clithero, Concordia, Kansas, to say, "Our customers mail us their checks for the amount of the last balance on their slips or come in with their checks all made out."
"We get our money sooner," is the way Thompson & Howard, Arlington, Vermont, put it.
The McCaskey System
limits credit;
keeps the customer informed;
keeps you ready to accept payment;
keeps you informed;
collects your credit accounts.
Some day you'll join the others, "I wouldn't take twice the price I paid, if I could not get another." McCaskey collection service will prompt you to say it. We'll tell you why with complete information—send us a card:

Milwaukee Gasoline Locomotives

FOR INDUSTRIAL HAULAGE

The most economical motive power for road-building and construction work, and for haulage in and around manufacturing plants, lumber mills, brick yards, cement works, fertilizer plants, stone quarries, plantations, coal and metal mines, etc., etc.

Built in various types and sizes for all gauges of track.

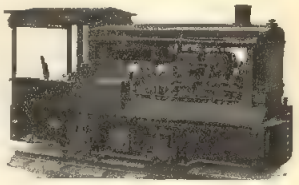
Type "W" Locomotive, Canopy Top and Curtains

TYPE "W" LOCOMOTIVES

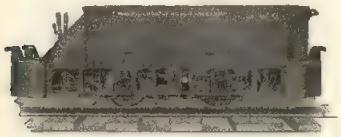
Type "W" Locomotives are built in 2 ton, 3 ton and 3½ ton sizes and for maximum governed speeds of 6 and 8 miles per hour both forward and reverse. Can be furnished with Electric Starting and Lighting Equipments and with Canopy Top and Curtains or complete Wooden Cab when specified.

TYPE "F" LOCOMOTIVES

Type "F" Locomotives are built in 4 ton size and have a governed speed of 3 to 12 miles per hour both forward and reverse. Regularly furnished with open type of Cab with curtains, but can also be furnished with complete enclosed cab. Electric Starting and Lighting Equipment can also be furnished when specified.



Type "F" Locomotive



Type "L" Locomotive

TYPE "L" LOCOMOTIVES

Types "L.30" and "L.50" Locomotives weigh 6 and 8 tons respectively and are designed especially for service, where haulage conditions demand a great abundance of power and the utmost sturdiness in design. They operate at a maximum governed speed of 8 miles per hour both forward and reverse. Regularly furnished with Electric Starting and Lighting equipment. Steel Cabs can also be furnished when specified.

TYPE "L" (STANDARD GAUGE) LOCOMOTIVES

Types "L. 40" and "L. 60" (Standard Gauge) Locomotives weigh approximately 9 and 14 tons respectively, and operate at a maximum governed speed of 8 miles per hour, both forward and reverse. Regularly furnished with Standard "M. C. B." type of couplers, steel cabs and Electric Starting and Lighting Equipment. Type "L. 60" Locomotives can be furnished with Air Brake Equipment when specified.

Type "L" (Standard Gauge) Locomotives

Note: For more complete description of Milwaukee Gasoline Locomotives ask for Catalog No. 118.

Speed, Capacity, Reliability.

One in a Box, Shipping Weight, 120 lbs.

KEEP YOUR STOCK OF AUTO ACCESSORIES UNBROKEN, AND THE TRADE OF THE GOOD MECHANICS WILL COME YOUR WAY.

THE SHAPLEIGH LINE EMBRACES ALL THE BEST SELLING AUTO ACCESSORIES.

IT IS DANGEROUS TO ADVERTISE A "COMPLETE" STOCK OF AUTO ACCESSORIES AND THEN RUN SHORT BECAUSE OF NEGLECT TO SEND A MAIL ORDER.

IF YOU HAVE A COMPLETE STOCK THE CUSTOMER AT ONCE GAINS A GOOD OPINION OF YOUR STORE AND FIRST IMPRESSIONS ARE OFTEN VITAL.

LIVE BOXES AND FISH WELLS

One of the most convenient accessories for a fisherman is a live box in a boat. This is placed under one of the seats, can be divided into two compartments where desired, one for live bait and one for fish. Holes in the bottom of the boat are so arranged that the motion of the boat causes a continuous flow of fresh water in the boxes. No dead minnows, fish always fresh when you reach your cottage ..... each $15.50

GUARANTEE

All of these boats are guaranteed both as to material and workmanship. Any defects will cheerfully be made right.

★ Items Marked Thus ★ Are Shipped from Factory Only.

BOYS STEEL WAGONS

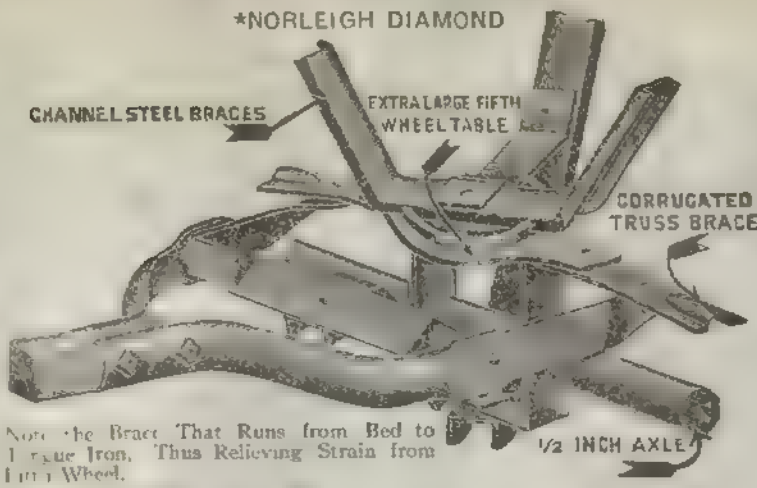
*NORLEIGH DIAMOND

TRADE MARK REGISTERED IN THE U. S. PATENT OFFICE

Illustration Shows Norleigh Diamond Fifth Wheel and Gear, Which is the Strongest and Most Practical.

It is Different From All Others. Made From Extra Heavy 10 Gauge Channel Steel. Others Use Light 12 or 14 Gauge Steel.

We Use ⅝ inch Steel Axles. Ordinary Wagons Have ½ inch.



Note the Brace That Runs from Bed to Tongue Iron, Thus Relieving Strain from Fifth Wheel.

TRADE MARK REGISTERED IN THE U. S. PATENT OFFICE

The Top Part of the Fifth Wheel is Turned or Welded (Not Riveted, Y[illegible] and the Lower Part.

Has Three Reinforcing Channel Steel Braces; One Runs From Bed to Extreme Bottom Part of Fifth Wheel, One From Top of Fifth Wheel to Rear Brace, and the Other From Bottom of Fifth Wheel to Handle Iron.

This Construction Makes it Possible for the Norleigh Diamond Fifth Wheel and Gear to Support a Weight of More Than 200 pounds While Others Crush Down Under 100 pounds.

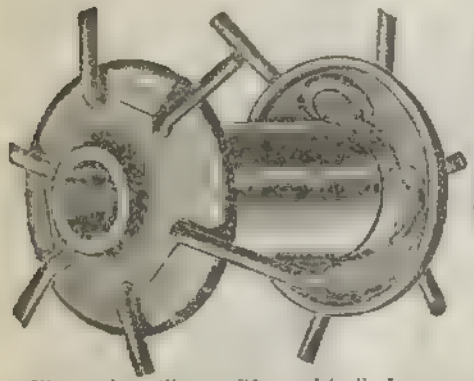


Illustration Shows "New Idea" Large Barrel Anti-Friction Outer Bearing Hub, Used on Norleigh Diamond Wagons.

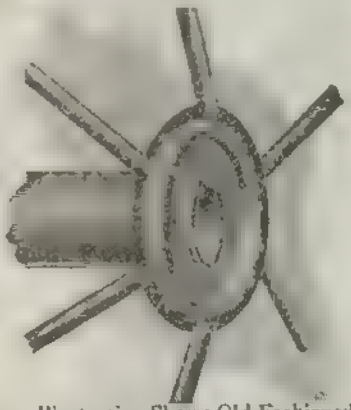

Illustration Shows Old-Fashioned Small Spindle Hub Used on All Other [illegible] Wagons.

Illustration Shows Width and Thickness of Norleigh Diamond Tires.

Illustration Shows Tires Used on Other Wagons

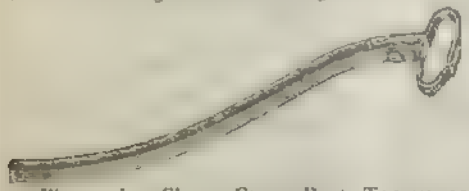

Illustration Shows Steam-Bent Tongue as Used on All Norleigh Diamond Wagons. These Tongues Will Always Stand Back Against Bed of Wagon and Will Not Fall Down to be Tripped Over, Stands Back Far Enough to Enable Child to Sit in Rear of Wagon and Steer With Tongue While Coasting.

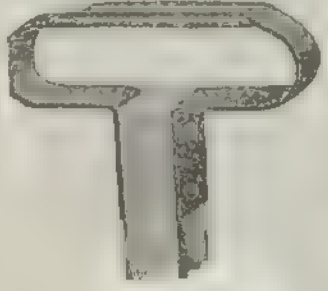

Illustration Shows Tongue and "New Idea" Steel Loop Used on Norleigh Diamond Wagons.

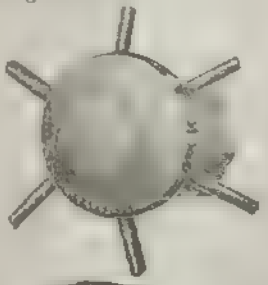

Illustration Shows Hub Cap Furnished on Norleigh Diamond Wagons.

Illustration Shows Common Iron Axle Nut Furnished on Other Wagons.

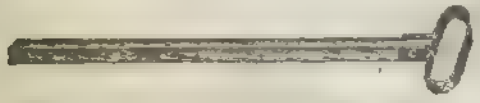

Illustration Shows Straight Tongue Used on Ordinary Wagons. Will Seldom Stand Back Against Bed of Wagon; a Source of Danger to Children Tripping Over the Tongue When Down on the Ground.

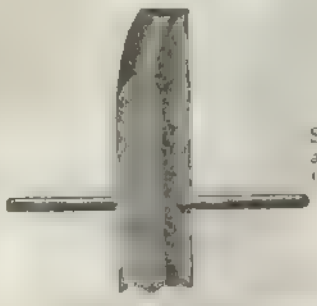

Illustration Shows Tongue and Pin Used on Other Wagons.

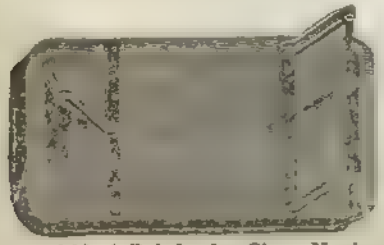
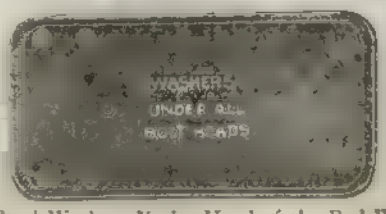
Illustration Shows Lock Washer Used on Norleigh Diamond Wagons.



Four 1½ inch Reinforcing Cleats Used on All of the Six Largest Sizes of Norleigh Diamond Wagons.



Steel Washers Under Head of the Bed Bolts Prevent the Bolts From Being Forced Through the Bed Bottom.

Norleigh Diamond "New Idea" Packing Steel Tired Wagons. Sixth Dozen in Fiber Carton, All Carefully Wrapped in Extra Heavy Paper to Preserve Enamel. Cartons are Made of Heavy Fiber and Thoroughly Protect Wagons in Transit.

Eveready Doubles Space and Money

This is what The National Carbon Company told their dealers:

"NOW comes still another big addition to Eveready advertising. In 1923 Eveready will double the money spent and the space used in 1922 in the 12 magazines of the All-Fiction Field, using a color schedule as heretofore.

"Last year's advertising brought Eveready dealers everywhere a record business in Flashlights, with a tremendous volume of repeat orders for Batteries. Figure for yourself what this big new addition to Eveready advertising should mean to *your* sales.

"Full-page advertisements in color appearing every month in the 12 most popular fiction magazines in the country. Nine million readers. The best market in the United States."

Over 2,000,000 Circulation for $2700 a Page

NOTICE

The Potteries are recovering rapidly from the effect of the recent strike. Although assured by the manufacturer this number will probably be in our stock by March 1st, we are marking it T. O., meaning Temporarily Out, fearing there might be some unforeseen delay. The price range is about the same as the "Dresden" pattern.

Temp. Out

HALF DOZEN IN A BOX

WOODCRAFT KNIVES

The desirable features of several knives embodied in one. Is adapted for Sticking, Skinning, Cleaning, Slicing, Breaking bones etc.

The thick tapering bevel blade carries the strength from handle to point. Back of blade close to handle is checkered to give a firm grip with thumb and finger. The back of point is beveled for chopping, breaking bones, etc.

AN ALL PURPOSE WOODMANS KNIFE.

Laminated Leather Handle, with colored hard fibre and brass washers. Has flush Aluminum tip. Complete in leather sheath.

No. 49—4½ in. blade, weight per doz. 5 lbs., per dozen $40.80

HALF DOZEN IN A BOX

DALL DE WEESE PATTERN

Designed by Dall DeWeese, for use on expedition after big game, where every item of the outfit has to be figured down to the lightest and most compact form. It has a dull saw back on which the thumb is placed when skinning or cutting hard substances. When sticking the little finger should be doubled up, letting the end of handle rest against it. This takes the place of a hilt.

Stag Horn Handle, with groove to fit finger. Complete in leather sheath with point protector.

No. 62—4 in. blade, weight per dozen 4 lbs., per dozen $36.20

HALF DOZEN IN A BOX

EXPERT KNIVES

Particularly designed to meet the requirements of the professional hunter, trapper and guide, who requires a thin, keen edge for dressing skins and furs.

The back of the blade is designed for scraping skins while on the forms.

Laminated Leather Handle, with colored hard fibre and brass washers. Has flush Aluminum tip. Complete in leather sheath with point protector.

No. 545—5 in. blade, weight per dozen 5 lbs., per dozen $45.30

NESTOR JOHNSON NORTH STAR SKATES

Scientific principles of construction make Nestor Johnson skates the peer among tubular skates. Not only does the patent rib, on each side of the runner housing tube, add a feature of strength, but adds to the rigidity of the skate as well. A very superior feature is the one-piece drawn steel heel cup, which is an exclusive feature of all our skates. Nestor Jonhson blades are to well known to need any added praise. Shoes for all outfits are made with correctly molded counters and only with inside counter pockets, same as all high grade shoes. All Nestor Johnson skates are made to place the foot in correct scientific position and cups are heel compensating. Reliability and long wear are built into every pair of our skates and shoes.

The Second Peak

During 1921 The Boston Herald carried more national advertising in its daily editions than any other American newspaper. During 1922 it has not only continued that leadership, but has, we believe, also carried more national advertising in its daily and Sunday editions than any other seven-day American newspaper.

Its unquestioned twofold leadership among Boston newspapers is demonstrated by the following report of lineage, from figures furnished by the Boston Newspapers' Statistical Bureau:

First in National Advertising
Daily Newspapers

Herald	3,200,680 lines
Post	2,736,963 lines
Transcript	2,188,803 lines
Globe	1,729,758 lines
American	1,420,795 lines

First in National Advertising
Daily and Sunday Newspapers

Herald	4,114,174 lines
Post	4,064,214 lines
Globe	2,340,476 lines

THREE years before the Declaration of Independence was signed, the Maryland Journal and Advertiser was established in Baltimore. Some years later it became known as The BALTIMORE AMERICAN.

This year The AMERICAN celebrates its 150th Anniversary. In glancing back over a career that has seen the development of Baltimore from a "mere village" to a city of more than three-quarters of a million, its chief pride is not in its historic past, but in the tremendously vital responsibility of its future.

It is a glorious bit of history to have "grown up" with Baltimore—to have had such close relationship with the molding of the city's life during the past century and a half; but it will be a privilege still more glorious to continue to hold that same relationship to the Baltimore of the future.

The AMERICAN knows no worthier cause than that of serving Baltimore and Maryland. It is its one reason for being. And the loyalty of its readers in and near Baltimore and throughout the State of Maryland is evidence of the supreme faith and confidence they place in this great paper.

It is to a following like that of The AMERICAN that the national advertiser finds it so profitable to address his message.

Sold in combination with the BALTIMORE NEWS; combination rate 30c per line on contract for 1000 lines or more, 35c Sunday. Sunday AMERICAN Rotogravure rate 35c per line flat.

Mrs. Blatch gives her picture of a better way of government.

Samuel Ranck sees a vision of the ideal city, in which all will be happy.

And Collier's platform for industrial peace is made complete.

Every week in more than a million homes, Collier's is read by alert, intelligent men and women whose substantial progress is measured by the thinking they do. They provide a vast, open market for products that can be sold by advertising.

Collier's

THE NATIONAL WEEKLY

in more than a million homes

The Crowell Publishing Company
381 Fourth Avenue, New York, N. Y.

Will you exhibit in Baltimore's 17th Auto Show?

BACK in the days when "twenty-five miles an hour" was a big selling point for motor vehicles and doors on pleasure cars were a luxury, Baltimore's first Automobile Show was staged. The touring car shown in the inset, "built on lines of beauty," as its maker describes it, was a part of the exhibition. In all, there were thirty exhibitors, and many of these were accessory dealers.

Today, all Baltimore and Maryland motorists are eagerly looking forward to *the event of the year* —the Seventeenth Annual Show which will open January 20 with more than seventy-five exhibitors.

And all Baltimore and Maryland are awaiting just as eagerly the big Auto Show Numbers of the NEWS of January 20 and of the Sunday AMERICAN of January 21 —two great issues that will not only index the whole exhibition for the thousands of readers of these two papers, but will cover the entire automotive industry with such informational news matter as to make these Show Numbers the most valuable sources of reference that can be put into our readers' hands.

Maybe you were one of those thirty exhibitors in that first show. Surely if you are one of the seventy-five exhibitors in the 1923 Show, you will want to run your advertising in these Show Numbers. Will you wire or write at once for space reservation? The rate of 35c per line covers insertion in both papers.

Collier's ideal is the utterance of truth, its hope that the building up of moral ideas may in time do away with the exercise of force in all human affairs.

(October 14.)

Collier's, for one, never wavers in its faith that this generation can, if it will, so work and plan that its children and grandchildren may live a life serene and more abundant. If this be idealism, make the most of it.

(October 21.)

This editorial program is so thoroughly ingrained in Collier's own organization, and has been so cordially received by its readers, that it stands above the horizon like a fixed star, by which we shall continue to make our onward course.

It is a program which engages the attention and holds the interest of forward-looking people in more than a million homes—people who are alert to read and act upon what they read in Collier's—whether in its editorial or in its advertising columns.

"Interested Readers" Buy the Cars

Car owners, prospective purchasers, dealers and traders and mechanics—practically every financially competent motorist and is-to-be motorist in Chicago and its suburbs—read The Chicago Daily News. Moreover, they read its daily automobile column for technical, trade and advertising information and for the sheer pleasure of its entertaining gossip. It commands reader-interest and reader-confidence to an unapproachable degree in Chicago's motor world, which is thoroughly covered by The Daily News' circulation of approximately 400,000—about 1,200,000 daily readers.

It is the interested reader who buys—as every experienced advertiser knows. This accounts for the leadership of The Chicago Daily News among Chicago daily newspapers, in the amount of automobile advertising carried. In the first eleven months of 1922 The Daily News printed 542,670 lines of automobile advertising, as against 492,578 lines printed by the daily newspaper, The Daily Tribune, making the next highest score.

THE

CHICAGO DAILY NEWS

First in Chicago

a good year in Oklahoma

80 cents and oats at 50 and 60 cents are swelling bank accounts.

What a different condition than existed a year ago! The farmer feels happy over the outlook. He has held his own or made money during 1922 with the break in prices against him.

Now, with farm prices steadily creeping up, he is digging in. With adequate moisture in the soil, good crop prospects and higher prices for farm products, the farmers of Oklahoma are going to help bring back national prosperity in 1923.

This active farm market is best covered by The Oklahoma Farmer-Stockman, not only Oklahoma's dominant farm paper, but one of the leadership sectional farm journals the country over.

Another Record

The Chicago Evening American again broke all records in 1922.

Complete details of a wonderful year will be told in an early issue.

CHICAGO EVENING AMERICAN

A dominating State; a dominating Paper!

OHIO is a dominating State; practically no undeveloped land; a State evenly balanced between mining, manufacturing and farming. The most perfectly balanced State in the Union! Try out your new products, or your old products with new features, in Ohio.

And in Cincinnati, the most typically Ohian of all the cities, you have a dominating newspaper, the TIMES-STAR. It offers you a reader supremacy that has been increasing for the past fifteen years. The TIMES-STAR goes into four out of every five Cincinnati homes.

The TIMES-STAR offers the most economical and most effective medium through which the full purchasing power of this market can be reached. Local and national advertisers have testified to this fact by using more display space in the TIMES-STAR for over fifteen years than in any other Cincinnati paper, including those with Sunday editions.

The Cleveland Newspaper Situation—d

The PRESS

Leads All Cleveland Daily Newspapers

THE PRESS is First in Cleveland. Not only is The Press first in local advertising, but in total paid advertising as well.

The following 1922 figures pertaining to the Cleveland Newspaper situation reveal the clear-cut and outstanding supremacy of The Press as the dominant medium of Cleveland. Below are six day figures.

Daily	Local Advertising Lines	Total Advertising Lines
The PRESS	**8,579,032**	**12,800,354**
Plain Dealer	**5,490,240**	**11,154,402**
The News	**6,815,200**	**9,327,094**

These statistics indicate that The Press carried 1,645,952 more lines of advertising than The Plain Dealer and 3,473,260 more than The News during 1922.

In local advertising alone, The Press carried 3,088,792 and 1,763,832 more lines than The Plain Dealer and The News respectively.

These figures point unmistakably to the fact that most advertisers prefer The Press.

DOMINATES GREATER CLEVELAND

1922
Repeats the Long-Time Advertising Leadership of The Chicago Daily News

1922 maintained The Daily News' traditional leadership among the daily newspapers of Chicago in both Display and Classified Advertising. Here are the figures:

Display Advertising

	Agate Lines	*Comparison*
The Daily News . . .	13,779,579	13,779,579
The Daily Tribune .	10,528,983	10,528,983
The American	8,065,866	
The Post	4,444,476	
The Journal	4,272,900	
The Daily Herald-Examiner	4,233,426	
The Daily News' excess over the next highest score, that of The Daily Tribune, is		3,250,596

The Daily News' year-in and year-out advertising leadership among the daily newspapers of Chicago bears convincing testimony to its pre-eminent power of service in every line of business in which general publicity is essential to success, whether it be a matter of personal service, general merchandising or investment.

The advertising record of 1922 confirms

THE DAILY NEWS
First in Chicago

has been increased by from promoters

of the total, for in numerous cases a claim is settled with the member direct, after Protective Association pressure is brought into play.

These, briefly, are a few of the functions of The Oklahoma Farmer-Stockman Protective Association.

The Association is a very real personal and active influence in financial and business circles in Oklahoma. It is a symbol of the sincerity of the publishers of The Oklahoma Farmer-Stockman; unquestionable evidence of the confidence existing between reader and editor.

The Oklahoma Farmer-Stockman is the *trusted* farm paper of Oklahoma.

REPEAT ORDERS IN ANY LINE OF BUSINESS TELL THE STORY

WITHIN its life, The Detroit Free Press has come to number among its friends a long line of advertisers whose campaigns find first place within its pages time and time again. In no classification is this more true than in automotive advertising.

For years the Free Press has universally been known as a permanently effective medium for advertising of this nature—effectiveness that is built upon the natural appeal of this newspaper to those who are and who always will be AUTOMOBILE BUYERS.

SHOW NUMBER JAN. 21st

An issue which will be replete with everything pertaining to the show and to automobiles. Too good an opportunity for the automotive advertiser to pass up.

Automotive Industries reaches weekly practically all of these men. In every active worthwhile plant engaged in producing automotive apparatus, from 1 to 5 copies of *Automotive Industries* is subscribed for regularly and routed through the plant among the various department executives. In most of the plants from 1 to 25 extra copies are subscribed for personally by these executives themselves—President, Engineers, Production Managers, Plant Superintendents, etc.

And the remarkable prestige of *Automotive Industries*, both at home and abroad, as the recognized authority of the Industry, lends considerable additional force to the value of its advertising pages.

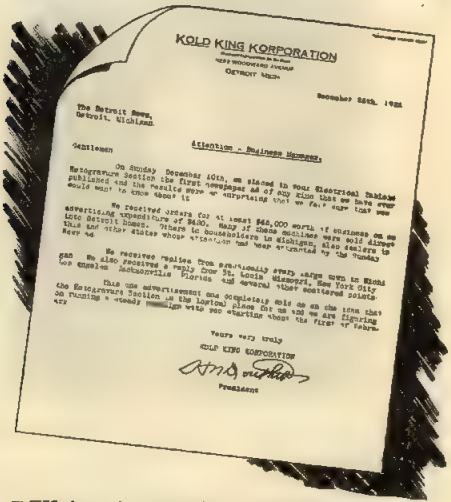
Detroit News Roto Ad Pulls $45,000 Business



KOLD KING KORPORATION

DETROIT, MICH.

December 26th, 1922

The Detroit News,
Detroit, Michigan.

Attention - Business Manager.

Gentlemen:

On Sunday December 10th, we placed in your Electrical Edition Rotogravure Section the first newspaper ad of any kind that we have ever published and the results were so surprising that we feel sure that you would want to know about it.

We received orders for at least $45,000 worth of business on an investment expenditure of $430. Many of these machines were sold direct into Detroit homes. Others to householders in Michigan, also dealers in this and other states whose attention had been attracted by the Sunday News ad.

We received replies from substantially every large town in Michigan and we also received a reply from St. Louis Missouri, New York City and Jacksonville, Florida and several other scattered points.

This one advertisement and completely sold up on the item that the Rotogravure Section is the logical place for us and we are figuring on running a steady campaign with you starting about the first of February.

Yours very truly

KOLD KING KORPORATION

President

THIS letter is noteworthy because it emphasizes the superior attention-getting value of NEWS Rotogravure. Not only were scores of Detroit householders sold by this advertisement, but also dealers and private individuals in practically every large town in Michigan and some in other states.

THE NEWS was the first paper in Michigan to print a Rotogravure and since its inception has led in Rotogravure advertising. The Sunday News reaches at least 65,000 more Detroit homes than its nearest competitor. It has the greatest Sunday circulation in Detroit and Michigan.

The Detroit News

24 Million Lines of Advertising

DURING the year 1922 The Kansas City Star—morning, evening and Sunday—carried a total of more than 24 million agate lines of paid advertising—***a gain of nearly two million lines as compared with 1921.***

Analysis of the figures indicates that increases occurred in each of the three divisions—Local, Foreign and Classified.

The following table shows the volume of advertising carried in 1922 and 1921 expressed in agate lines:

	LOCAL	FOREIGN	CLASSIFIED	TOTAL
1922	13,073,670	3,972,691	7,274,388	24,320,749
1921	12,710,289	3,293,001	6,411,574	22,414,864
Gain	363,381	679,690	862,814	1,905,885

Circulation has also shown healthy increases. A gain of 18,000 copies daily as compared with a year ago brings the total daily output (morning and evening combined) to more than 460,000 copies each day.

The Sun Leads All New York Evening Newspapers in Advertising Gains

DURING 1922 The Sun published 9,620,816 agate lines of advertising (32,069 columns)—an increase of 1,420,092 lines (4,734 columns) over the preceding year.

The Sun's gain was greater than the combined gain of the three other evening newspapers that increased in advertising.

The Sun's gain was 516,412 lines greater than that of the next evening newspaper.

For 10 consecutive months The Sun's gain has been larger than the gain of the next evening newspaper.

This record reflects the confidence of advertisers in The Sun—a confidence drawn from a consistently large and increasing volume of sales directly traceable to advertising in this newspaper.

The Sun

280 Broadway **New York City**

MYSTIC DIGITS

One, nine and three were sacred figures thousands of years ago. For our purpose we have added a bunch of characters represented by 0. For instance take this combination

1 9 0 0 0 0 0 0

sacred to the temple of lineage and truth in advertising—our volume for 1922 (some sacred 1 and 9).

But the mystic digit three holds attention here for the gain was

3 0 0 0 0 0 0

lines, an inspiring figure surely.

No doubt the gods favored us in 1922 because the Sunday circulation increased to

3 0 0 0 0 0 0

which on the average of three readers in each family gives

1 0 0 0 0 0 0

Customers—each with wants and the money to pay for them

Millions for Motorcars

Millions of dollars will be spent in the Milwaukee-Wisconsin Market for automobiles in 1923. It is estimated that next year's sales will reach 50,000 cars in this territory.

Most of these millions will be spent by readers of The Milwaukee Journal. The motoring public in Wisconsin have been sold by The Journal's progressive editorial policy during the years of growth in the automotive industry.

The Journal is not only read daily in 4 out of every 5 English-reading homes in Milwaukee, but it is read by more Milwaukee and Wisconsin people than any other publication in the world.

The Journal—"The Motorist's Newspaper"

Leads In Automotive Advertising

For the first 11 months of 1922 the score is as follows:

The Milwaukee Journal	971,006 Lines
The other three Milwaukee papers combined	886,447 Lines

How "Bo" McMillin

Awoke Shreveport's Football Fighting Spirit

When "Bo" McMillin, famous all-American quarter of the "Praying Colonels," came to Shreveport last fall as coach at Centenary College, at a five-figure salary, he found:

A student enrollment of some five hundred that had never produced a winning eleven.

A complete lack of football spirit among the people of the city.

Maximum attendance of 500 at games played in the city the previous year.

From out of the material the college afforded, McMillin moulded a team that finished the season as Collegiate Champions of the State; that lost but one game during the season; and that, through its brilliant and successful playing, converted Shreveport from a lukewarm 500-fan city into a fighting, behind-the-team-every-inch-of-the-way mass of rooters that clicked the turnstiles for a total of 7,200 on Thanksgiving Day.

Shreveport is a sport-loving city. It has long been known for its large baseball attendances in the Texas League; it is prominent in golf; enthusiastic about hunting; fond of competitive events of every kind. Football was the only sport it treated with indifference. McMillin changed that.

As a market for all goods sold to sportsmen, Shreveport stands high in point of buyer-responsiveness. Through the sporting pages of The Shreveport Times, the followers of every branch of play are thoroughly covered.

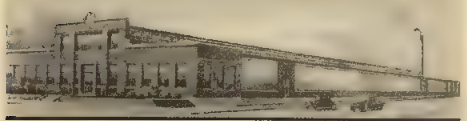
MUSIC TYPOGRAPHY IN ALL ITS BRANCHES



The Radio Medium in Canada is The Toronto Daily Star

THE STAR was the first newspaper in Canada to erect a 2 kilowatt station---as powerful a wireless apparatus as the Government sanctions.

Every day, including Sunday, The Star broadcasts a consistently high-class programme, and has an orchestra exclusively for radio. The Station Call is C. F. C. A., operating on a wave length of 400 metres.

These concerts are enthusiastically listened to as far north as the outposts of civilization; as far west as Alberta and Montana; as far south as the Gulf of Mexico, and as far east as the Atlantic seaboard. They are heard in 32 States and 8 out of 9 Provinces in the Dominion.

The Star is now also using radio in special cases for the gathering of news.

In the city of Toronto alone over 6,000 families have receiving sets. There are many thousands more throughout Ontario, the field covered by The Star. In Eastern Canada when one thinks of Radio one instinctively thinks of The Star---Radio Headquarters.

The Star is unquestionably the best advertising medium for radio dealers. Every day a feature page is devoted to Radio News.

The Daily Star's circulation averaged over 120,000 copies per day during December, and The Star Weekly (Sunday edition) over 146,000---each the largest newspaper circulation in its field.

ONE IN A CASE

OUR VERY BEST

Our Very Best
Is
The Very Best

New Haven Nickel Watches, Pedometers and Games

The Motor
Plain Dial
No. 1735 Price each.....$1.90

THE MOTOR

Open Face 16 Size
Stem Wind and Stem Set

An all-round serviceable Watch that will stand considerable hard usage

The case is finished in Nickel Gilt or Gun Metal and can be furnished with plain or fancy back

Has sunk second dial and heavy beveled glass Snap back and bezel

The Motor
With Radium Dial
No. 1736 Price each.....$2.20

The demand for "Radium Dial" Watches is constantly increasing, and considering the extra service they give they are easily worth the slight additional cost over the plain dial watch

ONE HUNDRED MILE PEDOMETER

Exact Size

The case is nickel finished and highly polished, and in general appearance resembles a gentleman's small sized watch. The dial is very similar to that of a watch the figures 1, 2, 3, 4, 5, etc., represent miles, the space between each number being divided into ¼, ½ or ¾ of a mile

The movement too is like a watch the pendulum within swings to the rhythm of the stride, ticking off the steps as a watch ticks off the seconds, and the hand points out the miles walked. The hand can be set backward or forward as desired by simply removing back of case, and turning set screw

No. 1741 Price each..... $3.10

GUARANTEED WATCHES FOR EVERYBODY

The New Haven
Plain Dial
No. 1737 Price each..... $2.02

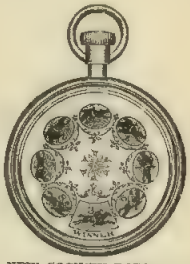
THE NEW HAVEN

New model, non-jeweled watch. It has a "pull-out" stem set The entire movement with dial and hands can be removed from case by taking out three screws under the bezel. The main spring can be removed without disturbing the balance of the movement.

16 Size. Thin Model

Has sunk second dial and heavy beveled glass. Snap back and bezel

The New Haven
Radium Dial
No. 1738 Price each..... $3.30



THE NEW SOCIETY PARLOR GAME

Interesting, Fascinating

You can spend an enjoyable evening at home and entertain your friends

No. 1742 Price each..... $3.72

The Elite
Plain Dial
No. 1738 Price each..... $4.04

THE ELITH

Open Face 12 Size
Stem Wind and Stem Set

A watch any one should be proud to wear

The case is an extra thin model of handsome design and is made of Nickel Silver, nicely finished in Nickel Gilt or Gun Metal, and can be furnished with either plain or fancy back

Has antique pendant with gilt crown, sunk second dial and heavy beveled glass. Snap back and bezel

The Elite
With Radium Dial
No. 1740 Price each..... $5.00

POCKET ROULETTE

New society game, polished nickel plated case, with watch crown and bow, made in same style as 16 size watch open face, dial depressed around the center, with dents opposite each figure or number to mixers run from 0 upwards and are printed on colored panels, small steel pin stops in dent opposite the winner dial is set spinning by pressure of crown revolves very rapidly A fine pocket roulette

No. 1743 Price each..... $3.72

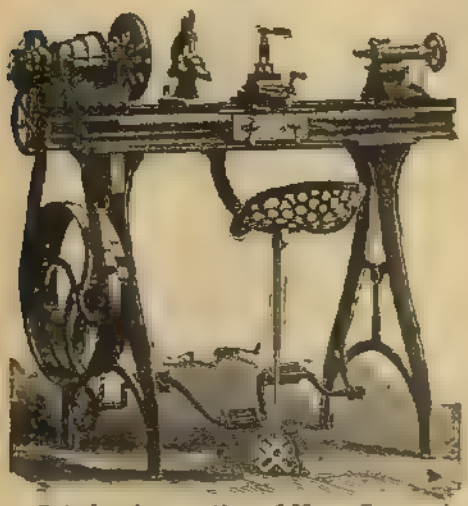
LATHES



Cut showing portion of No. 6 Screw Cutting Engine Lathe.

Barnes all iron and steel, velocipede foot power.

Swings 11 in. on the face plate, 6½ in. over the tool carriage, and is 34 in. between centers. Back-gearing and cone pulleys give great range of speed. Head stock has a steel spindle with 1 5/32 in. hole through its entire length. Tail stock can be readily set at any desired point, and can be taken off altogether, leaving it free for face plate or chuck work. It can also be set over for turning tapers. Spindles of both head and tail stocks are of steel, with positively true taper holes for the reception of the centers. Tail stock center is self-discharging. Tool carriage is gibbed to the bed. The tool can be set to the work at any position or angle desired; also to bore a taper hole. All the works are securely protected from chips and dirt. As a right or left screw cutting lathe it is simply perfect. All the gearing is cut from solid metal in the best machinery known for gear cutting, and is as true and noiseless as it is possible for metal gearing to be. Weight 385 lbs., boxed ready for shipment, 500 lbs.

No. F5—Lathe, complete, each★ $313 50

BOYS STEEL WAGONS

★NORLEIGH DIAMOND

"Norleigh Diamond" High Grade Boys Wagons are Original in Construction and Distinctive in Appearance. They are Better Ironed, Better Finished and Much Stronger Than Any Other.

The NORLEIGH DIAMOND Boys Wagon is **Better Ironed, Better Finished** and **Much Stronger** Than Any Other Wagon On the Market Just Compare Our Gear With Any Other and Verify This Statement; Where Other Front Gears are Riveted Once or Twice the **Norleigh Diamond is Riveted, Welded** and **Reinforced at Nine Different Places.**

Note the Practical and Powerful Fifth Wheel and Gear: Note That the Tongue is Ironed—this Obviates All Tongue Trouble—Tongue Remains Where You Leave It—Does Not Fall to the Ground; Examine the **New Idea Steel Hand Loop,** Which is the Best and Most Practical Ever Used.

The NORLEIGH DIAMOND Gear and Heavy Iron Work, Together with the "New Idea" Large Barrel, Anti-Friction Outer Bearing Hubs and Extraordinary Heavy Spokes and Wide Tires, Enables the NORLEIGH DIAMOND to Withstand Heavy Loads and Rough Usage Where Other Wagons Break Down.

Body—24 Gauge Steel (Others Made of 29 Gauge). Double Beaded or Swedged. Top Edge Reinforced With Heavy Steel Wire; Bed Substantially Fastened to Gear by Eight Steel, Copper Plated Bolts and Nuts, With Washers Under Heads to Keep Them From Pulling Through.

Finish—Enameled, Varnished and Decorated by Hand in **Four Different Color Combinations, as Follows:** Red Outside, Green Inside, Green Gear and Wheels, Green Outside, Red Inside, Red Gear and Wheels; Blue Outside, Red Inside, Red Gear and Wheels; Red Outside, Green Inside, Black Gear and Wheels; Gold Letters and Decorations.

Washers—Lock Washers Used on All NORLEIGH DIAMOND Wagons.

Wheels—Steel, Highly Finished to Match Gear, **Fitted with Extra Heavy Spokes and Wide Tires; "New Idea"** Large Barrel Outer Bearings; Anti-Friction Hubs and Brass Plated Hub Caps.

Gear—Extra Heavy 10 Gauge Channel Steel (Others Made from 14 Gauge, Which is Much Lighter), Enameled to Match Wheels; "V" Shaped Channel Steel Braces; Improved Style Reinforcing Brace on Rear Axles, Extra Large and Strong Fifth Wheel Braces.

Tongue—Made of Select Closely Grained Bent Hard Wood and Will Reach Bows Far Enough to Allow Coasting, Finished in Oil; Fitted With **"New Idea" Steel Hand Loop.**

Packing—All NORLEIGH DIAMOND **Gears, Wheels and Tongues are Packed in the Wagon Bed; this Eliminates Battered or Broken Wheels and Lost Tongues; This Also Means a Lower Freight Rate.**

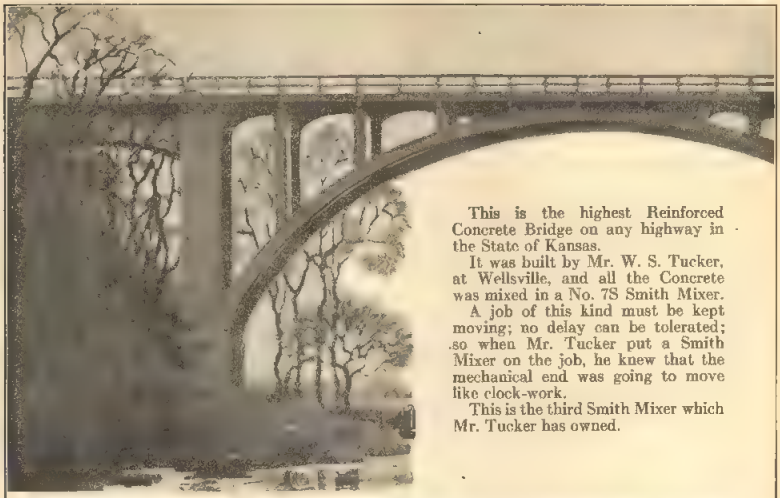
½ doz. in pkg Doz **$7.20**



This is the highest Reinforced Concrete Bridge on any highway in the State of Kansas.

It was built by Mr. W. S. Tucker, at Wellsville, and all the Concrete was mixed in a No. 7S Smith Mixer.

A job of this kind must be kept moving; no delay can be tolerated; so when Mr. Tucker put a Smith Mixer on the job, he knew that the mechanical end was going to move like clock-work.

This is the third Smith Mixer which Mr. Tucker has owned.

The Casteel Engineering Company of St. Joseph, Missouri, has laid a lot of paving since beginning business. They find that to get a job done in time, they must have Mixers that can be speeded up, and still stay on the job.

The above illustration shows their Smith Paver in action. They like its work extremely well.

GASOLINE GAS LAMPS

NU-LITE

Has Durable White Embossed Shade Decorated, Match Lighting Burner; No Alcohol Torch Required; 400 Candle Power, Nickeled Plated Base; Has Two Mantels; Fount, 8 inch Base; Capacity, 3 pints; Uses Gasoline as Fuel.

Macbeth
Nu-type Chimney
Pearl Glass
A new chimney designed
for present day kerosene.
Eliminates flicker and smoke
The Old Way
Macbeth-Evans Glass Company
Pittsburgh
U. S. A.
The New Way
The shape of the Macbeth Nu-type chimney has been scientifically determined to get the most light from the lamp. This shape is absolutely maintained in every chimney, as each one is made in a mould which permits no variation.
Macbeth Nu-type chimneys are made of Pearl glass, tough against heat. This famous glass has been used for more than half a century in the manufacture of all Macbeth chimneys.

And Here's the Better Way to Sell Macbeth *Nu-type* Chimneys!

This beautiful display carton, lithographed in three colors, has been devised the best way to help you sell the new Macbeth *Nu-type* Chimney. It holds six Macbeth *Nu-type* Chimneys, packed in individual Blue Cartons. You get this handsome carton free with your order for three dozen or more.

You can place this carton in your window or on your counter arranged as shown above. Contrast views of the old-style chimney and the Macbeth *Nu-type* Chimney are prominently shown. Large size type tells the story. All in all it is a self-selling carton.

This handsome display carton will add to the attractiveness of your counter or window and is bound to induce people to notice—to examine—and to buy the new chimney.

Each Macbeth *Nu-type* Chimney [illegible] Blue Carton. It always [illegible] display [illegible] Carton [illegible] ers. The Blue Carton is shown below

The Old Way

MACBETH *Nu-type* CHIMNEY

The New Way

Old-fashioned crimp top chimneys will not function properly with the kerosene of today; they cause oil lamps to flicker and smoke. To get a big, white light-producing flame the specially designed Macbeth *Nu-type* chimney must be used.

THE REMEDY

Fifty years ago Macbeth research produced a better lamp chimney. First, because Pearl Glass, permanently brilliant and tough against heat, was used in its manufacture. Second, because each type of chimney was designed to meet the individual requirements of the lamp with which it was to be used, thus ensuring the functioning of the combination at its greatest efficiency.

Once again Macbeth research has achieved another triumph in the Macbeth *Nu-type* chimney. It has been evolved to compensate for the change in kerosene, and thereby enable your customers who use oil lamps to obtain the good, comfortable illumination which they enjoyed years ago.

The Macbeth *Nu-type* chimney is scientifically designed and, when used in conjunction with a good type of burner, eliminates all flicker and smoke, producing a clear, steady burning, big white flame. The design of the chimney controls the drafts so that there is an even balance on both sides of the flame and enough air is brought to the flame with no excess.

LONG LIFE ASSURED

The Macbeth *Nu-type* Chimney, however, is made of the famous Pearl Glass, permanently brilliant, and of uniform thickness. The shape is absolutely maintained in every chimney because it is made in a mould. The unusual quality of Pearl Glass and the "mould made" feature in Macbeth *Nu-type* chimneys insure long life.

Each Macbeth *Nu-type* Chimney bears the stamp of approval of the Standard Oil Company. This is the result of their being thoroughly tested by this company.

YOU CAN DO A LARGER CHIMNEY BUSINESS THAN EVER!

Here is a big opportunity for you to do a larger lamp chimney business than you have ever done before. The moment your customers see the folly of trying to get along with their old crimp top chimneys when the Macbeth *Nu-type* is so much better, you'll be busy handling the *Nu-type* across the counter.

Tell your customers to get a new burner and a Macbeth *Nu-type* Chimney. Have them try it out at home. As soon as they do, they'll come back again and again, demanding Macbeth *Nu-type* Chimneys, in preference to any other.

The attractive counter carton for display, shown on the next page, together with the many high qualities of the Macbeth *Nu-type* Chimney, make a selling proposition that will bring real results.

Macbeth Pearl Glass *Nu-type* No. 2. Outside diameter bottom 3 in., of bulge 4 in., of top 2 in., height 8½ in.

No. 2RS02. One doz. in shipping carton, weight per carton 7 lbs. ..... Per dozen $3.70
No. 2RD502. Three doz. in shipping carton, weight per carton 20 lbs. ..... Per dozen 3.50
No. WD502. Six doz. in shipping carton, weight per carton 37 lbs. ..... Per dozen 3.30

The P. & H. Trencher Digs Deep and Piles Up Profits

Pawling & Harnischfeger Ladder Type Trenching Machines

The P. and H Ladder Type Trenching Machines as illustrated above are designed for cutting trenches of from 23″ to 42″ in width and up to 18′0″ in depth. These machines are used where it is necessary to cut deep trenches below the frost line or where the grade demands deep ditches. Sewer and other contractors, Water Works departments and Gas Companies use this machine extensively.

The P. and H. Ladder Type Trenching Machines cut curves of practical radius right or left as desired, work on grades as steep as 15% and can climb grades as steep as 50% by throwing in the digging traction. These machines cut readily through very hard soil and through soils containing rock.

The amount of trench which can be cut with these machines varies greatly, but 500 to 750 lineal fee of 30″ trench from 10 to 12 feet deep in an 8-hour day is no unusual performance. Gasoline consumption is also a varying quantity but 20-25 gallons of gasoline and 2 quarts of oil is the average.

BRIEF SPECIFICATIONS

The car bodies of P. & H. Machines are strongly built of structural steel and have three point suspension motors of the 4-cylinder internal combustion heavy-duty type with high-grade impluse starter magnetos, air cleansers and governors. All gearing is of steel, practically all having cut teeth. Turned shafting is used, ground to size, heavy duty shafts being of forged steel. All operating levers are grouped within easy reach of the operator. Feeding speeds are changed by gear shifts so that change of sprockets is not necessary for each speed. This greatly increases digging capacity. The hoisting and lowering of the booms is accomplished by drums operated by reversible self-locking worm and worm gears enclosed and running in oil. The corduroy tractors are of the well-known P. & H , self-cleaning type, the corduroy link pins being of chrome manganese steel. The digging ladder is of extra heavy box section, removable without disturbing the upper tumbler bearings. Buckets are of pressed steel: side cutters and rooters are of high carbon tool steel which can be reforged and sharpened when dull. The spoil conveyor is arranged to discharge at either side of the machine interchangeably.

The various sizes of P. & H. Ladder Type machines with minimum and maximum width and depth of cuts together with full descriptions are given in a special bulletin which will be sent upon request.

P. & H. Backfillers and Tampers

P. & H. One Man Backfiller

P. & H. TOM THUMB BACKFILLER

The P. & H. "Tom Thumb" Backfillers are used by many telephone, electric light, and gas companies, contractors and others who do light trenching. These machines are especially well suited to their needs for the following reasons:

They do not represent a big investment and consequently do not "consume" much interest when idle. Operation is very simple and any laborer of ordinary intelligence can learn to run them. They are of narrow width and can be used in narrow alleys or crowded streets without blocking traffic. No booms are used and for this reason the "Tom Thumb" can be used in narrow alleys or other restricted places where no other type of backfiller can be used. The design is simple and rugged so that with ordinary care they give long continuous service. Under ordinary conditions these little machines will backfill about 150 cu. yards of spoil per day.

The wheels both front and rear have plate steel tires and steel spokes. All gears are of steel or semi-steel, spur gears having cut teeth. Backward or forward movements are at the rate of 1½ miles per hour. The engines are of the single cylinder vertical type, 6 H. P. provided with governors.

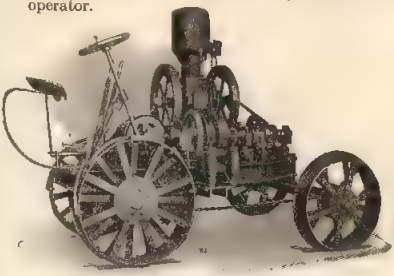
P. & H. ONE MAN TRACTION BACKFILLER

One of the most troublesome and expensive operations which confronts contractors on water, gas, or other trench work is backfilling. The cost of this operation sometimes equals the cost of excavating itself. Usually the dirt in the spoil bank has settled to such an extent that it requires almost the same effort to move it as it did to take it from the trench.

The P. & H. Power Traction Backfillers are used extensively by contractors to lower their backfilling costs. Four hundred cubic yards of spoil can be backfilled in one day easily with only one man, the operator.

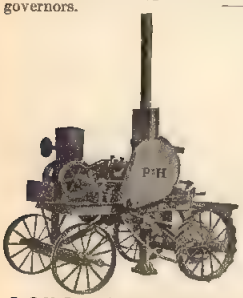
The booms of these machines are adjustable; 20 feet, being the minimum length and 30 ft., the maximum length. The motors are of the 4-cylinder internal-combustion heavy duty type.

Machines are of all steel construction. Cut gears are employed throughout. All operating levers are concentrated within easy reach of the operator.



P. & H. "Tom Thumb" Backfiller

The P. & H. Line reduces the number of horses required on the job, are quick, powerful, easily cared for and operated, and save money all along the line. ***Time is always money to the busy contractor.***



P. & H. Power Traction Tamper

P. & H. POWER TRACTION TAMPERS

P. & H. Power Traction Tampers are used to eliminate the arduous labor of manual tamping. They are equipped with tamping bars weighing 150 lbs. and have a tamping rate of 42 blows per minute.

The machines can be adjusted to the width of the trench by means of sliding wheels adjustable between widths of 58" and 76". The tamping bars can be traversed left or right at the operator's will so as to cover trenches of maximum width of 30". Power is transmitted to the rear wheels by means of chains. While the machines are tamping they move backward or forward as desired at the rate of 6 feet per minute. Traveling between jobs they have a road speed of 1½ miles per hour.

Wheels have plate steel tires with steel spokes. The steering gear consists of a worm and wheel on a cross shaft, steel cable connected to front axle. Transmission of power is by friction clutches, gears, and chains. Power plant consists of single cylinder 3 H. P. engine.

More complete information on the Power Traction Backfiller, the "Tom Thumb" Backfiller, and Power Traction Tampers is contained in a special bulletin which will be sent upon request.

Earth Tamped With a P. & H. Tamper Is Through Settling.

PAGE-LEWIS SINGLE SHOT RIFLES

American Made

24 inch Round Barrel, .22 L. R. Caliber; Combination Front, Sporting Rear and Peep Tang Sights; Plain Extractor, Steel Frame; Blued; Lever Action, Steel Lever; Tool Steel Hammer and Trigger; Oval Walnut Stock, Varnished, Length 13 1/2 inches, Steel Butt Plate; Walnut Fore-End, Varnished, 7 5/8 inches Long.

Lamps for boudoir or table

1027 Boudoir lamp
Polychrome finished metal base with imported 8-in. hand-painted glass shade. Complete, $8.50

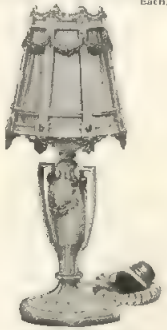
1042 Desk lamp
Combined lamp and incense burner. An unusual lamp and one that will command a ready sale. Finish Royal bronze. Each, $13.00

Petite boudoir light
1004 Shade. Beautiful fancy shape, 5 inches wide, covered in best quality pleated georgette and lined and interlined with silk. Colors: Rose and black, gold and black. Each, $3.50
1005 Base. This lustre vase is the daintiest and neatest boudoir lamp we have ever seen. The fire in the color is wonderful. Colors: Lavender, French blue and burnt orange. Each, $5.50

1150 Writing boy
Same as No. 1149 in another design. These lamps are usually used in pairs and are especially good for children's rooms or on spinet desks and odd tables. Each, $3.30
1154 Shade
Parchment leatherette in delicate shades of blue, rose or gold. Each, $1.10

1149 Reading Girl
A small novelty boudoir lamp made of marble dust and colored to antique ivory. This lamp must not be confused with the cheap breakable terra-alba (white earth) lamps. Height 12 inches. Each, $3.30
1154 Shade
Parchment leatherette in delicate shades of blue, rose or gold. Depth, 6 inches. Each, $1.10

1045 Candlestick
Fully wired for electric bulb. Usually used in pairs. Finish Old Dutch silver effect. Pair, $16.00



1002 Boudoir lamp
A special item. Height 12 inches. Note that shade is lined with shirred silk in rose. The base is of metal finished in polychrome or ivory. Each, $2.90

1041 Boudoir lamp
Height, 14½ inches. The background of the shade is light tan, with dainty colored rosebuds and leaves. The metal base is finished a rich shade of ivory. Each, $11.00

1039 Boudoir lamp
Height, 14 inches. This boudoir lamp carries a glass shade in a soft shell-pink, while the metal base is old ivory finish. Each, $11.00

1047 Electric portable lamp
Total height, 21 inches; extreme diameter of round shade, 16 inches. The subject of this shade is entitled "The Swans." To add harmony to the art of the shade it is mounted on a metal base electroplated in bronze green. Each, $34.00

Lamp cords
Made of pure silk throughout. Designed as shown above. Can be had in the following colors: Sand and gold, old rose and gold, blue and gold and black and gold.
1080 Per cord, $1.00 In dozen lots, $10.00
1081 Per cord, 1.30 In dozen lots, 12.00

1049 Electric portable lamp
Total height, 22½ inches. Diameter of shade, 16 inches. The wildness of the hillside, the rocky roadway leading into the dense forest, the placid sky beyond in the open, is here conveyed, and all in natural colors. It is mounted on a triangular pedestal effect base, electroplated in color of Dresden. Each, $42.00

Exclusive items

PEDOMETERS

For Measuring Walking Distances

To Attach, Slip Over the Top of Your Pocket or Over Your Belt; Will Then Occupy an Upright Position, Which is Necessary to the Working of the Lever Mechanism. If Not Carried in an Upright Position the Works Will Not Operate—It Will Not Register Your Step. Can be Regulated to the Step of the Wearer. The Figures on the Scale on the Back of the Works Represent inches and Each Notch Intervening Between the Numbers Represents One Inch. Can be Regulated for Variations Between 15 Inches and 31 Inches. To Regulate, Measure the Distance You Take at Each Step or Stride from (Heel to Heel). If Your Step Measures 27 Inches, Set the Indicator on Figure 27. If Your Step Measures 28, Move the Indicator One Notch Forward to "Fast." If Your Step Measures 24 Inches Move the Indicator Back Three Notches Toward "Slow," Etc. The Average Step of Persons Measures 27 inches, Therefore is Now Set for a 27 inch Step. Thoroughly Tested and Regulated and it is Expected to be Reliable and Accurate. The Hand Can be Set by Removing the Back and Turning the Hand Set Backward or Forward.

HANDCUFFS

IMPROVED BEAN'S PATTERN

These Handcuffs are Made to Meet the Demand for a Handcuff Combining Superior Quality with Very Light Weight, Overcoming the Defect of the Old Style Bean's Cuff. Locks Can be Removed for Repairs When Cuff is Open; When Closed the Locks Cannot be Taken Out, Nor Can the Cuff be Unlocked by Accident or Without the Key. Can be Unlocked from Either Side. Connecting Swivel Links at Either End. Weight 15 ozs. with Key.

Per Pair

No. 1—Polished Steel. $13.50

No. 1N—Nickel Plated Steel. 15 00

One Pair in a Box

Per Dozen

Extra Keys No. BK. $4 00

TOWER S

Adjustable Double Lock With Patent Lock

The Patent Stop Prevents Locking by Effort of the Prisoner or By Accident Before the Handcuffs are Closed on the Limb. When in Use the Forward End of the Stop Projects Above the Surface of the Bow, and while Allowing the Bow to Enter the Lock Frame Stops it Before the Bolt has Passed into the Notches. When Closing the Shackle on the Limb of a Prisoner, a Slight Pressure on the Top—Simply Passing a Finger Over it When Ready to Lock—Depresses it Even with the Surface of the Bow, Which Then Passes Through and is Self-Locked; Weight 18 ozs. with Key.

Per Pair

No. 2—Polished Steel $14 50

No. 2N—Nickel Plated Steel 16 00

One Pair in a Box

Per Dozen

Extra Keys No. TK. $4 00

Loose

TOWER'S DETECTIVE

Extra Light Weight; Adjustable, Self Locking, Secure and Strong; These Handcuffs are Designed to Meet the Demand for a Very Light Weight Shackle for Those Officers, Detectives and Others Who are Required to Have Their Implements Always with Them, and Find a Few ounces Saved in Their Weight a Matter of Convenience and Comfort; Self-acting Bolt which Cannot be Forced and a Lock so Guarded as to Give Ample Security; Weight 12 ozs. with Key.

Per Pair

PUTTING GREEN MOWERS

PENNSYLVANIA

Heavy Cast Iron Side Plates, Wheels and Gear Casings; Crucible Tool Steel, **Self Sharpening**; Revolving Reel Blades and Stationary Knife; Malleable Iron Reel Braces and Roller Brackets; Adjustable Hardwood Roller; Triple Gearing on One Side; 3½-foot Varnished Hardwood Handle; Painted Green and Red with Gold Bronze Striping.

Complete With Grass Box

Cut Shows Mower with Grass Box Detached

Cut Shows Mower with Grass Box Attached

Note

The Grass Boxes of Catchers which are Furnished with these Mowers are Composed of Two Parts—the Box Proper and the Shield or Deflector, to Deflect the Grass Forward into the Box. They are Made of Sheet Metal with Wood Ends and are Easily Attached and Detached.

The New Fad of Making Putting Greens on Golf Links Wavy or Undulating has Revived a Demand in Some Sections, Originally in Great Britain, and More Recently in this Country, for the Old Roller Type, Forward Cut Lawn Mowers.

The Pennsylvania Putting Green is an Exact Model of the Pennsylvania Grand Horse Mower, Modified Only to Operate by Hand.

The Stationary Knife is Bolted Rigidly to the Frame, Making the Adjustment Entirely with the Cylinder. The Journal Boxes or Cylinder Bearings are Self Wiping, Insuring a Perfect Cutting Edge the Entire Length of the Blades. This Mower Can be Set to Cut ⅛ Inch, and Is Adapted for Putting Greens, Tennis Courts, Cricket Greases, and Other Work Requiring an Exceptionally Close and Smooth Cut. It Can Also be Used as an Edge Trimmer for the Ordinary Lawn. The Front Wood Roller Better Supports the Machine in Mowing Terraces, but Can be Readily Removed if Desired, Leaving Only the Casters as Supports.

All Blades in this Mower are Crucible Tool Steel, Oil Tempered and Hardened.

Diameter of Rollers 7 inches; Diameter of Cylinder 5½ inches; Six Blades.

LAWN TRIMMERS

PENNSYLVANIA UNDER-CUT

This Machine is the Only One to Successfully Replace the Use of Hand Shears. The Slanting Side Plate and Conical Cylinder Make it Possible to Cut all the Grass Left by the Regular Style of Lawn Mower. The Construction of the Under Cut Trimmer Permits Cutting Very Close to a Wall, Fence, Tree, etc., and it will Cut the Grass **under a** Fence or Rock-cut Base of Tombstones, House Foundations and Other Places Hitherto Out of Reach of Anything but Hand Shears. For Cemeteries, it has the Special Advantages of Not **Marking or Smudging** the Tombstones, as the Side Plate Does Not Come in Contact with the Stone Above the Grass Line.

BALL BEARING
Self Sharpening, Light Weight, Four-Blade Cylinder

Each

No. PX—Drive Wheel, 9½ inches. Ball Bearing Cylinder, with Four Tempered Crucible Steel Blades, 7-inch Cut. Shipping Weight, Packed in Crate, 30 lbs. Net Weight 23 lbs., Including Handle. **$22 00**

A Handier Solder

THOSE who have used clumsy bar or solid wire solder with a separate flux, really appreciate how handy Kester *Acid-Core* Wire Solder is.

First:—The tiny pockets inside the hollow wire form of Kester supply a scientific flux at the right time, thereby saving *time, labor* and *material* over the old-fashioned way.

Second:—The pound spools and coils fit one's hand comfortably, leaving the other hand free for using the most convenient form of heat.

Third:—The entire job is always in view, the narrow wire of Kester puts both solder and flux where it belongs without hiding the parts.

"Sample for Test Upon Request"

Sold by live dealers everywhere in one pound coils, in cartons, and on one, five and ten pound spools

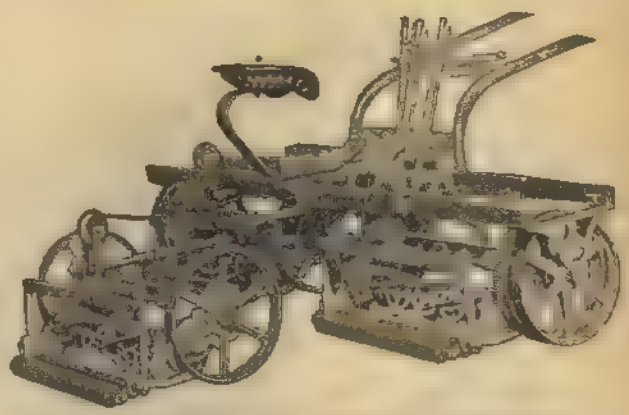
No. F115—38 in. cut, 6 blades, w't 750 lbs., each★ $357.50

ONE IN A CASE

PENNSYLVANIA TRIO MOWERS



CAN BE DRAWN BY HORSE OR TRACTOR

A three-unit type mower; made especially for golf courses, public parks, cemeteries and all grounds where large areas of undulating surface present difficult problems of lawn mowing.

Consists of three specially constructed 30 in. 4 blade mower units, high geared, so yoked to a frame or sulky that a cutting swath of 86 in. is attained.

Each mower unit acts independently of others, being pivoted to frame, enabling them to ride over even surfaces and to closely follow undulation of ground.

Frame supported on two separate ground wheels, thereby relieving cutting units of any extra weight, overcoming objection of wheel marks on turf and also giving mowers greater flexibility and greater efficiency.

SPECIFICATIONS

Automatic Clutch—Each mower unit may be raised separately by means of three levers, and when lifted to highest point the cutting cylinders are automatically disengaged or idled. When lowered, the cylinders are again automatically engaged.

Wheels—17 in. in diam., tread of 2½ in., fitted with automobile type ball bearings.

Cylinders—4 knife, 30 in., 6¾ in. diam. Knives are of crucible steel, oil hardened and water tempered.

Cylinder Bearings—Cylinder carrying knives revolves in universally adjustable, bronze bearing. These bearings can be adjusted for wear and cannot get out of alignment.

Bottom Knife—To insure great rigidity, bottom knife castback is bolted solidly to side plates. This eliminates all chances of the mower becoming twisted or strained. Blade is crucible steel, oil hardened and water tempered.

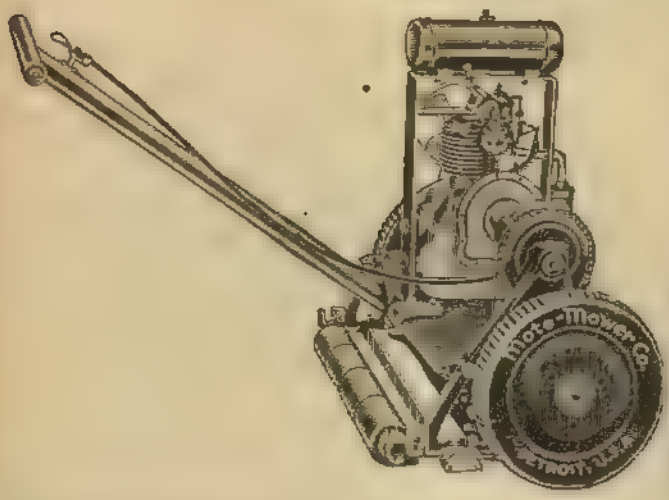
Adjustment of Knives—Instead of usual method of raising bottom knife for wear, all adjustments quickly made by tightening two regulating screws and bringing cylinder closer to bottom knife.

Assembling—Mowers are absolutely interchangeable, will fit in any position. The "sulky" style steel frame may be used for pulling other equipments, such as rollers, seeders and other cultivator tools.

No. F86—Cutting width 86 in., width over all, including sulky or ground wheels 109 in., w't 930 lbs., each★ $760.00

★ Items Marked Thus ★ Are Shipped From Factory Only.

MOTO-MOWERS



For use in parks, cemeteries, public grounds and private places where lawn is too large for hand mower. Will do as much work as five men with hand mowers.

Machine is made from best materials throughout and nicely finished and painted. Cutting Reel has 5 crucible steel blades, carefully tempered and hardened. The motive power is furnished by a 1½ H. P. reversible engine, fully guaranteed. Dry disc clutch in wheels. The power from engine is transmitted direct to cutting reel through chains and sprockets. The Moto-Mower is provided with automatic friction release between the motor and cutting reel.

If a stone, root or other object becomes caught in the machine, this device by automatically slipping, protects the blades against injury or possible breakages.

The Machine cuts as close to trees and other objects, as a hand mower. It can operate on any terrace or hillside on which a man can walk.

MOWER

Dry disc. clutches in wheels.
Control: one or both wheels can be engaged, either together or separately
Reel bearings: Timken roller bearings.
Sectional wood roller, running on steel rod.
Steel wheels.

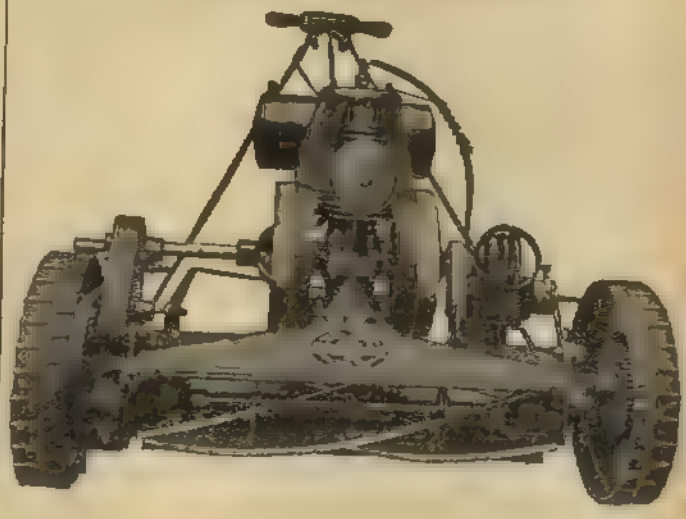
ONE IN A CASE

FOUR-ACRE POWER LAWN MOWERS



For use in parks, cemeteries, public grounds and private places. This is a well constructed machine made throughout from best material and workmanship. It is the smallest most compact and simplest power mower on the market to-day, weighing only 20 lbs. and occuping only a space of 18x25 in. when not in use. It cuts a path 24 in. wide and travels by its own power at a rate of 3 to 3½ miles per hour, and will easily cut four acres per day under ordinary conditions. The mechanical simplicity of this entire mower is such that only the ability to crank the motor and steer the machine are necessary to secure perfect workmanship Power is transmitted from the engine to the traction wheel an cutting reel through two cone typeclutches, working independently of each other. Traction can be obtained without revolving cutting reel, thus making it possible to cross graveled drives, sidewalks and etc. without danger of obstructions injuring knives. In case any sticks or stones become caught in the cutter blades while machine is in operation the reel clutch will slip leaving the knives uninjured.

SPECIFICATIONS

Special Built Motor—1 H. P., 2 cycle, 3 part, 2½ in., bore x 2½ in. stroke.

Speed of Motor—1000 R.P. M. at 3½ miles per hour.

Fuel Consumption—About one gallon gasoline, per full day.

Transmission—Cut gears, Cone type clutches give operator separate control of power on cutting, reel and traction wheels.

Throttle and traction clutch control on handle grip.
Will cut on 30 degree incline.

Finish—2 coats Battleship Grey Enamel one coat color varnish.

No. W424—24 in. cut, complete with grass catcher, net w't 200 lbs. shipping w't 250 lbs. .....each **$440.00**

CANDY DEPARTMENT

One good way to add a lot of profits to your business is to sell more candy. Candy is a line of good profits and many turns and when you buy from these pages you can get better profits and more frequent turns. A well selected candy stock should comprise a good line of chocolate creams of various flavors, a variety of popular chocolate bars and wrapped candies, about twenty kinds of flavored hard candies, cream candies and gum candies in bulk. A candy counter stocked with these can be counted upon to bring an ever-increasing volume to your store, especially if well displayed in neat, attractive form and with the equipment suggested on this page.

TRIP HAMMER

THE "PERFECT POWER HAMMER

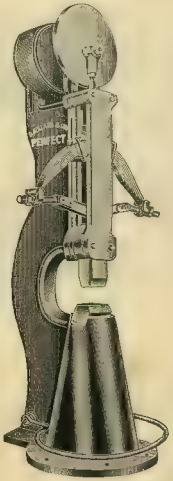
Practical Design

Strong Construction

Friction Clutch Pulley

Phosphor Bronze Pitman

Solid Cast Frame



Simple Adjustment

Direct Vertical Stroke

Long Accurate Guides

Forged Steel Ram

Steel Plow Share Anvil

DESCRIPTION

The Illustration will show to the practical man the Simplicity and Strength of Construction of this Hammer and the Material used, Workmanship employed and Finish attained are of the highest class, in full conformity with the superiority of Design.

The Head, carrying the Spring moves on Planed Guides ensuring a Direct Accurate Vertical Stroke.

The Length of the Guides is 27-in. and they are bolted to the Main Frame.

The Friction Clutch Belt Pulley ensures absolute and instant control of operation, from the slightest tap to the heaviest blow, by Foot Pressure.

The adjustable Connecting Rod has Phosphor Bronze Couplings and is connected to the Spring by a Steel Cross Head.

The Tension of the Spring is Adjustable and there is absolutely no side pull on Hammer Head.

The Head is Forged from Solid Tool Steel, Tempered.

SPECIFICATIONS

Floor Space Required	20 x 30 in.
Height Overall	6 ft. 9 im.
Size of Ram	3 x 3 in.
Weight of Ram	40 lbs.
Will Forge Iron	2½ x 2½ in.
Will Sharpen Shares	Any Size
Size of Pulley	12 x 4 in.
Rev. per Minute	280
Power Required	1 H.p.

"Perfect" Power Hammer

With Plow Share Anvil Die
Shipping Weight 1100 lbs. $600.00

SHAKEPROOF

The Lock Washer with a Bull dog grip—

There are so many uses for the Shakeproof Lock Washer that dealers have no difficulty in turning their stock. People want and need them. Shakeproof do not rust; give equal pressure at all points, are lighter than ordinary types; do not spread; they can be used with shorter bolt lengths

To facilitate quick selling we supply a handsome display stand containing pockets for all sizes; the washers themselves being put up in neat ten-cent packages—a miniature lock washer store. The stand can be either stood up on the counter or hung on the wall—always readily accessible—always right in plain sight without being in the way. Write for details.

Stand, 100 package stock, $6.50.

Stand, 200 package stock, $12.00.

Refills, per gross, $8.64

Refills, per half gross, $4.45

THERE IS MUCH IN A NAME

A STEEL SQUARE MUST BE ABSOLUTELY CORRECT TO BE OF ANY VALUE, AS MUCH DEPENDS ON ITS ACCURACY. IT IS JUST AS TRUE THAT DIAMOND EDGE PRODUCTS MUST IN EVERY INSTANCE BE JUST AS PERFECT. THERE IS NOTHING HALF-WAY OR "JUST AS GOOD" ABOUT THEM. THEIR NAME IS THEIR GUARANTEE AND HAS BEEN FOR OVER HALF A CENTURY. DEALERS WILL FIND THAT IT PAYS TO STICK TO THE ONE LINE, NEVER FAILING TO KEEP IT COMPLETE WITH ORDERS MAILED IN OFTEN.

TOWING CABLES

BASLINE AUTOWLINE

¼ inch Yellow Strand Wire Rope; Composed of 6 Strands of 10 Wires Each. Length 20 feet; Patented Drop Forged Snaffle Hooks; ½ inch Manila Bolt Rope Slings for Attaching to the Axle; Approximate Strength Over 6000 Pounds. Can Easily Pull a 4000 Pound Automobile Up a 20% Grade.

Coiled so that it Can be Carried Under Seat or in Tool Box. Every Auto Owner Should Have a Towing Cable for Emergencies.

Steel Rope, with Patented Snaffle Hooks and Manila Slings

	Each
No. WTR—Length 20 feet, ¼ inch Cable. Weight Each, 4½ lbs	$8 50

Loose

AMERICAN

The American Auto Towing Cable is the Very Latest Article of the Kind on the Market. It Has Many Strands of Wire. Consequently it is Very Flexible.

It is So Flexible that it Can Be Easily Coiled by Any One Into a Very Small Space and Carried in a Canvas Bag.

This Bag is Furnished with the Cable.

It is the Only Wire Towing Cable that Can Be Packed in this Convenient Form.

The Hooks and Loop on the End of this Wire Cable is a Special Feature with the American. It Can Be Quickly Attached or Detached to Any Object. No Knots to Tie. Can Always Be Put On Correctly to Absorb the Greatest Amount of Strain.

The Heavy Rope Loops Protect the Finished Surface of the Automobile at All Times.

Every Automobile Should Carry a Towing Cable. Essential for City Driving, a Tow Rope Comes in Handy Very Frequently. The Saving of One Towing Job will More than Pay for this Towing Cable. Hence Hardly Any Automobile that Does Not Have to Be Towed in at Least Once a Year.

For Country Driving they Are an Absolute Necessity.

Made of Galvanized Flexible Steel Wire Rope, with Forged Steel Double Hooks and Manila Loops for Attaching to Car. Cable Made Light and Flexible so as to be Conveniently Carried in Tool Box.

	Each
No. ATR—Length 25 Feet; Weight Each, 5 lbs	$9 00

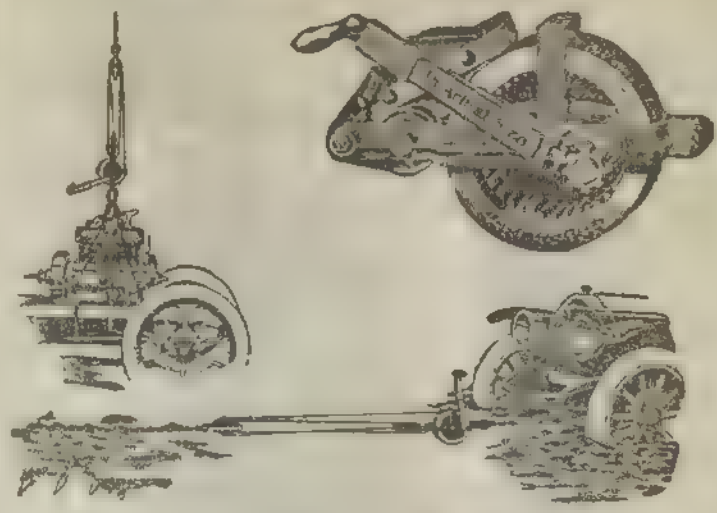
PULLERS AND HOISTERS



PULL-U-OUT

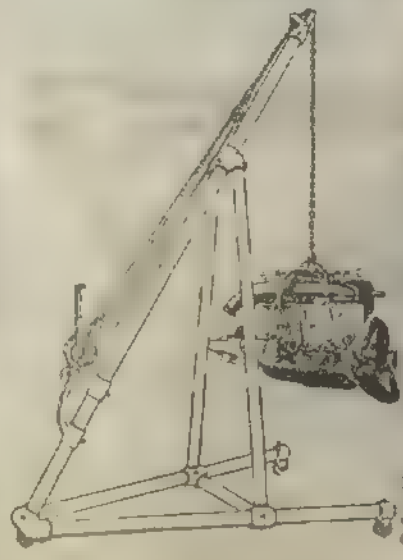
Should be in Every Motorist's Tool Box, Saves Time and Going or Sending for Help When Automobile Skids into Trouble, Turns Over, or Sticks in the Mud. Simply Drive in to the Ground the Three Little Stakes that Come with Outfit and Hitch Puller to Them, Give the Crank a Few Turns and the Car is Pulled Out of Trouble.

It Makes a Wonderful Hoist Because of its Light Weight, Great Power, Low Cost—Because it Will Work in Any Position, and Pull Horizontally as Well as Lift and has a Greater Reach and More Power than a Chain Block.

	Each
No. 1—Equipped with 40 feet of Steel Cable, Two 7 foot Chains and Three Stakes; Weight, 28 lbs.; Lifting Capacity One Ton Dead Weight; Pulling Capacity Over 100,000 Pounds on Wheels; Reach, 10 Feet Lift or 17½ Feet Pull.	$37.50 25.00
No. 2—Equipped with 50 Feet of Steel Cable, Two Extra Heavy 7 foot Chains and Three Extra Heavy Stakes. Lifting Capacity Two Tons Dead Weight. Pulling Capacity 150,000 lbs on Wheels; Reach, 12½ Feet Lift, or 19 Feet Pull; Weight Each 60 lbs.	82.50 55.00
No. 2X—Equipped Same as No. 2, Except that it has 100 Feet of Steel Cable, Giving 25 Feet Lift or 32 Feet Pull.	90 00 80.00

Loose

PORTABLE CRANES



PULL-U-OUT

Equipped with Pull-U-Out No. 1; this Crane Weighs but 250 lbs., Yet it Lifts a Ton 9½ feet. One Man Handles it Easily Lifting Anything Up to 1 Ton Weight, and Moving it Wherever there is a Floor to Roll it On. Beats a Whole Overhead Track System. If Desired, Can be Detached and Used Separately for all Kinds of Hoisting and Pulling.

Other Cranes of Same Capacity Weigh at Least 600 lbs. Lift Only Five feet and Cost Twice as Much as This One.

Built of 2½ inch Extra Heavy Steel Tubing, Enameled Black and Shaped so the Weight Can Not Tip it Over. Base is 3 Feet 3 inches Wide and 6 feet Deep; Total Height 10 feet.

Shipped Ready to Put Together. All Connections are Slip-Joints. Can be Knocked Down or Set Up in Three Minutes with Only a Small S-Wrench.

	Each
No. Pull-U-Out Portable Crane	$135.00 60.00

AUTOMOBILE JACKS

WEAVER TWIN

For Small Cars

Combination Turntable, Transporting Truck, Lifting Jack and Tire Rest.

4¼ inch Wheels; 26 inch Handle; 9 inch Lift; 1-1/16 inch Screws. Capacity 4000 lbs.

These Jacks will save one-half the time, labor and floor space in moving, storing, unloading, painting, overhauling or otherwise manipulating automobiles in the garage repair shop. A car can be pushed sideways, "cut-in" at right angles or turned completely around within its own length.

Ball and Roller Bearing—The casters and lifting mechanism are fully equipped with ball and roller bearings. Very heavy loads can be raised and transported with extreme ease

For Either Axle—The Jacks are designed to take either front or rear axle of the car, even though the latter be equipped with truss rods

Safety—The screw hoisting mechanism precludes any possibility of accident. There are no treacherous ratchets to jar out of engagement, or to be accidently "tripped off" by the workman while under the car

Construction—Malleable and steel construction 1-1/16 inch screws placed 28 inches apart; 34 inches between the wheels; lifting leverage 400 to 1; lifting capacity, 4,000 lbs. each.

Each

No. WST—Weight Each, 50 lbs. **$30 00**

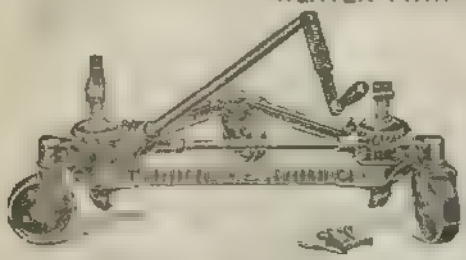
RUBBER TIRED

Each

No. WSTR—Same as WST, Except with Rubber Tired Wheels; Weight Each 50 lbs. **$45 00**

One in a box

WEAVER TWIN



Extra Heavy

For Garage Use

Made for Service under Trucks and very large Pleasure Cars; 7 inch Wheels, 34 inch Handle, 9½ inch Lift, 1¼ inch Screw, Capacity 8000 lbs.

Construction—The caster yokes on this Jack are very strongly designed and made of the best CAST STEEL. The large gear nuts which raise the screws each revolve upon twenty ½ inch steel balls which operate between two very heavy, hard steel thrust bearings. Each wheel yoke revolves upon two sets of steel balls. The 7-inch wheels enable enormous burdens to be transported over comparatively rough floors with almost incredible ease. LARGE ROLLER BEARINGS in the hubs assist in reducing the resistance to the minimum.

Each

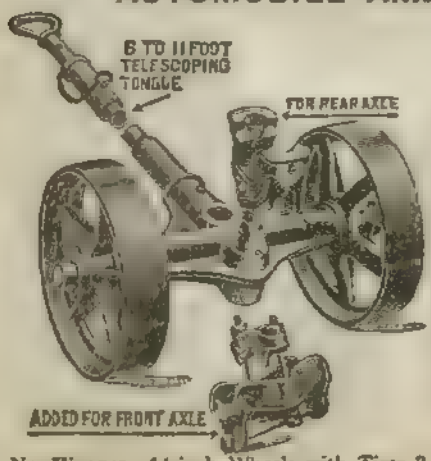
No. WGT—Weight Each, 110 lbs. **$48 00**

RUBBER TIRED

No. WGTR—Same as No. WGT, Except with Rubber Tired Wheels; Weight Each 110 lbs **$72.00**

AUTOMOBILE AMBULANCES

WEAVER



For Economically Transporting Disabled Automobiles to the Repair Shop. The Standard is Adjustable to Height for Any Axle. Furnished with Clamps to Securely Fasten to Front or Rear Axle.

Telescoping Tongue; Adjustable from 6½ to 12 Feet; Heavy Cast Steel Wheels, with Broad Roller Bearings; Heavy 1¼ inch Full Length Steel Axle.

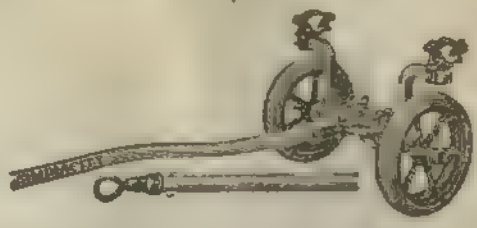
Each

No. Weaver—14-inch Wheels with Tires 3 inches Wide; Weight 145 lbs. **$70.00**

One in a Box

AUTOMOBILE AMBULANCES

SIMPLICITY



Simplicity of Design, Construction, Attachments, Application and Performance. Ambulance comes Complete, Stays Complete, Nothing to Break or Wear Out, no Small Parts to Fall off, Mislay or Lose.

Built Entirely of Steel.

Axle—Best Vehicle Axle Steel, 1½ inches in Diameter.

Wheels—Cast from Virgin Steel, Carefully Machined.

Swivel—Steel, 10 inches in Diameter, Fitted with Locking Device when Used under Rear End.

Yoke—Spring Steel 1½ inches square by 27½ inches wide. Designed to Cradle any Differential Housing.

Saddles—Steel, Interchangeable Fit any Shape or Size of Axle, Front or Rear.

Tires—Standard, Solid Rubber, 16x3.

Tread—Exceptionally wide, 32 inches, Holds the Road.

Pole—Special Design, Bent to Avoid Bumpers, Aprons or Truss Rods, Length 8 feet, Adjustable to 12 feet, Fitted with Strong Eye Bolt.

Lubrication—Self Oiling Splash System, all Dust Proof.

Bearings—High Speed Bronze Bushings.

Each

No. A—Rubber Tired **$170.00**

No. B—Steel-Tired Wheels, 15 inches in Diameter, 3 inches Wide; Otherwise Same Specifications as No. A **100.00**

Weight Crated 210 Lbs.

TOWING POLES

WEAVER

The Brakes of the Towing Car Absolutely Control the Rear Car. No Danger of Jamming on Down Grades or on Sudden Stops in Crowded Streets

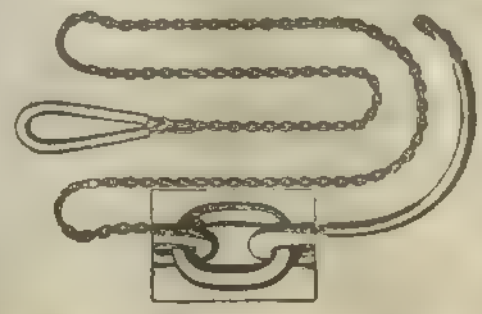
The Heavy Coil Spring Cushion Prevents all Pulling or Ramming Shocks, so there is No Jerk or Jar on Either Car The Connecting Clamps are Composed of Wide Leather Padded Sockets. Heavy Steel Chain with Spring Latch. This Gives the Pole Application to Axle, Spring or Frame of Either Car. The Pole Telescopes from 5 Feet 6 inches to 8 Feet. It is made of Double Strength Steel Tubing.

Each

No. Weaver **$24.00**

Shipping Weight 30 lbs.

TOWING CHAIN



Made of Heavy Proof Tested Electric-Welded Coil Chain With Special Grab Hook; Best Grade Canvas Tubing 24 inches Long on Each End; Chain and Hooks are Cold Galvanized by Special Process; Light Weight Non-kinking

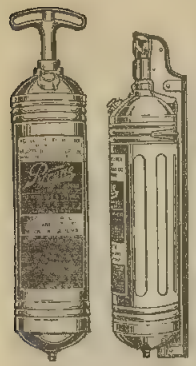
Each

No. ATC—Length 18 Feet; Tensile Strength About 2 Tons, Weight 3 Lbs. **$8 50**

FIRE EXTINGUISHERS

PYRENE

Approved by the National Board of Fire Underwriters.



Extinguisher Only — Extinguisher in Bracket

Will Put Out Every Kind of Fire in its Insipient State, no Matter How it Starts or What is Burning—Curtain Fires, Stove Fires, Chimney Fires, Fires Caused by Overturned Lamps, Etc. It Will Put Out Fires Having Origin in Such Materials as Oily Wastes, Shavings, Turpentine and Shellac It Will Conquer Fires Resulting from the Ignition of Benzine, Gasoline or Acetylene Gas—on Which Water and Ordinary Chemicals are Useless.

Pyrene Liquid is a Combination of Purely Organic Materials, Having an Aromatic Odor and a High Specific Gravity. **Pyrene** Contains Neither Acid, Alkali Salt nor Moisture, and Will not Stain the Most Delicate Fabric or Injure Anything With Which it May Come in Contact, Does not Lose its Strength or Deteriorate With Age; Will not Freeze at a Temperature of 50 Degrees F. Below Zero.

When Subjected to a Temperature of 200 Degrees F. or Over, it is Immediately Transformed into a Heavy, Dry, Cohering, Non-Poisonous **Gas Blanket**, Which Surrounds the Burning Material, Cutting Off the Air Supply Necessary for the Life of the Fire.

The Device is a Double-Acting Pump, Easily Operated by Hand, of One Quart Capacity, **Strongly Built** of Brass and White Metal Throughout. **Pyrene** Extinguishers Will Throw a Continuous Stream to Distance of About Twenty-Five feet.

When Pyrene Fire Extinguishers are Placed in an Automobile the Fire Insurance Will be Reduced 15% by All Fire Insurance Companies. The Saving in Insurance Will Soon Pay for the Extinguisher.

Do Not Rely on Putting Out an Automobile Fire With Water, Sand or a Dry Powder Fire Extinguisher. These Extinguishing Elements are Ineffective Except on the Smaller, More Accessible Fire, and Even in These Cases the Resulting Damage is Often Very Great to the Engine, Upholstery and Varnished Surfaces of Car. **Pyrene** is Non-Damaging and Non-Corrosive.

Every Motor Car and Garage Should be Proctd by **Pyrene Fire Extinguishers.** A Few Shots of **Pyrene**, Even if Directed Through the Radiator, Will Put Out the Most Stubborn Fire—so Quickly That it Will be Surprising

Pyrene is an Effective Extinguisher of Fires in Highly Inflammable Material—Particularly Oil or Gasoline.

Diameter, 3 inches; Length, 14 inches; Weight Filled, 6 lbs.; Always Shipped Filled, Ready for Use.

FIRE EXTINGUISHERS

GUARDENE

Made by Pyrene Mfg. Co.

Approved by the National Board of Fire Underwriters.

Embodies All the Latest Improvements in Soda and Acid Machines.

Made of Cold-Rolled Copper, Burnished Outside and Heavily Plated Inside with Tin to Prevent Corrosion. In the Head is a Bronze Cage which Holds a Bottle Half Filled with Sulphuric Acid. The Tank is Filled with a Solution of Bicarbonate of Soda. A Leaden Stopper in the Bottle Prevents the Acid Deteriorating.

To Use the Extinguisher it is Simply Turned Upside Down; the Lead Stopper Falls Out and the Mixing of the Acid with the Soda Solution Generates a Gas Pressure that will Throw a Stream 40 feet. The Stream Can be Shut Off by Turning the Extinguisher Right Side up Again.

Tested to 350 Pounds Pressure, but the Working Pressure is Only About 100 pounds.

Each Tank is Equipped with the Best Quality Five-Ply Chemical Hose, Attached by a Universal Swivel Joint; Guaranteed Not to Leak. Diameter, 7 inches, Weight Filled, 20 lbs.; Capacity, 2½ Gallons.

		Each
No. G—Complete	$32.00	20.00

One in a Carton

ACME

Approved by the National Board of Fire Underwriters.

Made of Best Grade Copper, Coated with Pure Lead; Sealed with a Lead Stopper, Making it the Simplest and Easiest to Operate.

Tested to 350 lbs. Hydrostatic Pressure Before Leaving Factory.

Fully Charged Ready to Use.

Complete with Hook and Screws to Hang on Wall.

Diameter, 7 inches; Shipping Weight, 21 lbs
Capacity, 2½ gallons

		Each
No. A—Polished Copper	$23.00	

AIR COMPRESSORS

CURTIS—SINGLE STAGE OUTFITS

Pure Air for Your Customer Means Good Service. Because Oil Ruins Tires, and Air Free From Oil Means Fewer Blowouts—Fewer Punctures—Greater Tire Mileage—Less Repairs; Saves Them Many Dollars Up-Keep Every Month.

A Few Curtis Exclusive Features

1. Controlled Splash Self-Oiling System, with Cylinder Oiling Permanently Regulated. No Oil gets into the Tires to Rot them. Compressor will Run Ten to Fifteen Times as Long on the Same Amount of Oil.
2. High and Low Level Oil Filling Gauge, so You can Tell at a Glance the Amount of Oil in the Crank Case.
3. Fan Fly Wheel Assists in Cooling the Cylinder.
4. Valves of Light Weight and Large Area, Inspectable Without Removing Head.
5. Safety Cage Prevents Possibility of Broken Valves Dropping and Wrecking the Machine.
6. Hand Unloader Permits Starting Against Dull Tank Pressure Without Burning Out Motor, Blowing Fuses, Burning or Jumping of Belt.
7. Large Drop-Forged Crank Shafr. Adjustable, Renewable, Die Cast Non-Cutting Bearings.
8. Head Removable Without Breaking Pipe Connections. Only One Gasket.

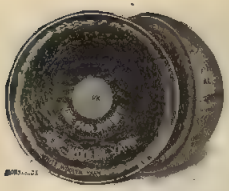
BASE BALLS

REACH



CORK CENTER

The fundamental purpose of the Cork Center in a base ball is not to make it more or less lively, but to increase materially its efficiency—its durability. In other words, the Cork Center permits the manufacturer to offer a ball which will keep its shape absolutely—one which will not beat up soft and one which will not burst or crack. The fact that the Cork Center Ball was the official of the World's Series is a sufficient test of its merits.

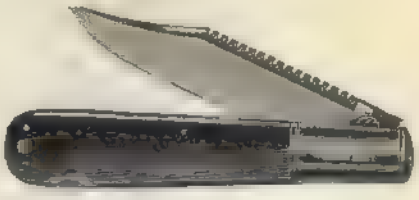
Fisherman's knife, bone handle, one blue glazed blade, steel lining, steel bolster

Packed ½ doz., weight, 1⅝ lbs.....per doz., **$13.50**

R 1613

Fisherman's knife, stag handle, one blue glazed and etched blade, brass lining, nickel silver bolsters.

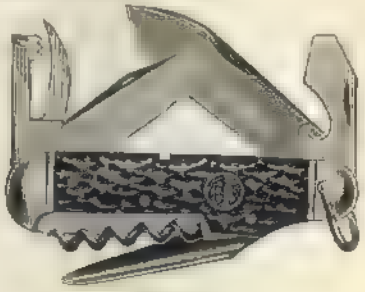
Packed, ½ doz., weight, 1¼ lbs..... per doz., **$18.00**



RB 1630

Fisherman's knife, bone handle, one blue glazed blade, steel lining, steel bolster

Packed ½ doz., weight, 1½ lbs per doz., **$24.00**



R 3843

Sportsman's knife, stag handle, two crocus polished and etched blades, punch blade, screw driver, cork screw, cap lifter and can opener, brass lining, nickel silver bolsters

Packed, .. doz., weight, 1⅝ lbs... per doz., **$42.00**

R S4233

Junior Official Scout knife, stag handle, one crocus polished and etched blade, punch blade and screw driver, cap lifter and can opener, nickel silver lined, nickel silver bolsters.

Packed, ½ doz., weight, 1 lb per doz. **$21.00**

RS 3333

Official Boy Scout knife, stag handle, spear blade crocus polished and etched, punch blade blued and polished, other blades blue glazed, screw driver, cap lifter and can opener, brass lining, nickel silver bolsters.

Packed, ½ doz., weight, 1⅝ lbs.....per doz., **$21.00**

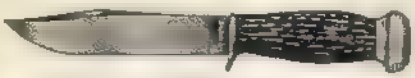
ALBANY HARDWARE & IRON CO.

SHEATH KNIVES

Nos. RH28, RH29

Blades forged from special crucible cutlery steel. Engraved solid hard rubber handles.

No.	Blade	Over All	Packed	Weight	Each
RH28	4½ in.	8½ in.	1	8 oz.	**$2.00**
RH29	5 in.	9 in.	1	8 oz.	**2.25**



No. RH290

Blade forged from special crucible cutlery steel. Indestructible Novo-stag solid handle.

No.	Blade	Over All	Packed	Weight	Each
RH290	5 in.	9 in.	1	8½ oz.	**$2.25**

No. RH30

Double sabre blade forged from special crucible cutlery steel. American bone stag handle, nickel silver guard.

No.	Blade	Over All	Packed	Weight	Each
RH30	5¾ in.	10 in.	1	9 oz.	**$3.00**

No. RH31

Blade forged from special crucible cutlery steel Handle made of leather, brass and colored fibre discs.

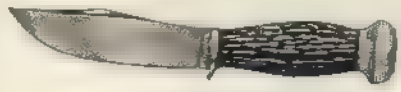
No.	Blade	Over All	Packed	Weight	Each
RH31	3⅞ in.	7¾ in.	1	6 oz.	**$2.50**

This is the type of Sheath furnished with Remington Sheath knives shown here. We do not carry extra Sheaths in stock, but will gladly supply same from factory.

No. RH32

Blade forged from special crucible cutlery steel. Handle made of leather, brass and colored fibre discs.

No.	Blade	Over All	Packed	Weight	Each
RH32	4½ in.	8½ in.	1	8 oz.	**$2.75**



No. RH320

Blade forged from special crucible cutlery steel Indestructible Novo-stag handle.

Blade forged from special crucible cutlery steel Handle made of leather, brass and colored fibre discs.

No.	Blade	Over All	Packed	Weight	Each
RH36	6¼ in	10¾ in.	1	12 oz.	**$4.00**

REMINGTON POCKET KNIFE ASSORTMENTS

In individual gift boxes

RP 123

An assortment of 12 selected knives five with three blades; six with two blades; one junior scout knife; all with stag handles and nickel silver bolsters.

Packed, in carton, weight, 2 lbs..... each, **$18.00**

RP 135

An assortment of 12 selected knives, five with three blades: five with two blades; one with one blade and manicure file; one junior scout knife; all with pyremite handles, assorted colors and nickel silver tips or bolsters.

Packed, in carton, weight, 2 lbs.....each, **$19.15**

RP 144

An assortment of 12 selected high lustre pearl handle knives, three with two blades and manicure file; six with two blades; three with one blade and manicure file; eight have bail or shackle and all are nickel silver lined.

Packed, in carton, weight, 1¼ lbs.....each, **$31.50**

RP 154

An assortment of 12 selected high lustre pearl handle knives, one with four blades; four with three blades; three with two blades and manicure file; three with two blades; one with one blade and manicure file; all are nickel silver lined

Packed, in carton, weight, 2 lbs.....each, **$39.25**

We add to our pocket knife assortments every season, continually keeping our line up to date, we request that you ask our salesman to display his samples.

REMINGTON POCKET KNIVES

No. RJ6

Twelve knives in assorted types of blades and kinds of handles.

Packed, in box, weight, 2¼ lbs. .. ....each ass't, **$9.00**

No. RJ4

This assortment of 12 knives varies in types of blades and handles.

Packed, in carton, weight, 2⅜ lbs. .. .each ass't, **$12.00**

No. RK12

Made of a nickel plated brass Remington cartridge with a high quality steel blade in the bullet. On display card with easel back

Packed, in carton, weight 15 ozs. .....each card, **$3.00**

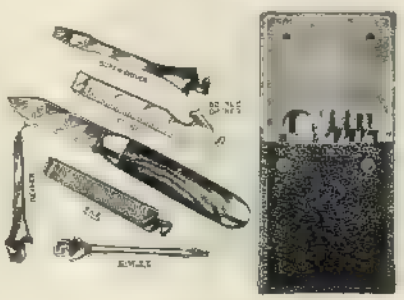
REMINGTON POCKET KNIFE SHOW CASE

No. 36

This is not an assortment proposition. Case is mahogany finished wood; double strength glass front, brass trim, hinges and catches. Green velveteen lined, removable display tray holds 36 knives up to 4 inches long, closed. Three shelves in back for reserve stock. Our salesman will explain how to obtain one.

Wide	High	Base	Packed	Weight	Each
15 in.	13¾ in.	10⅝ in.	in carton	12 lbs.	**$15.00**

POCKET KNIFE TOOL KIT



No. 270

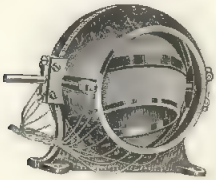
Cocoa handle knife with high grade steel blade and five nickel plated tools of seven uses. Length of knife opened, 6½ inches. Size of kit 3x4½ inches, in black leather case.

Packed, in carton, weight, 5 oz.....per doz., **$30.00**

VARIOCOUPLERS

PIONEER

TYPE PM-2



The Pioneer Variocoupler is molded of genuine bakelite. It is a single layer wound instrument, wound on inside, which gives it the advantage of reducing the electrostatic capacity, also protecting the wires with its molded shelf of bakelite This method of wiring also allows accurate spacing between the primary and secondary windings, which gives greater inductance, less resistance, etc. It is balanced perfectly on a wave length ranging from 200 to 900 meters.

The Pioneer Variocoupler is supported, when mounted on a table mounting, by bakelite support legs. From an electrical standpoint this is an added feature

Finished in mahogany and black

No.		Each
PM-2-VC—Pioneer Variocoupler	.....	.....$7 00

Dials Not Included.

One in a box.

REMLER 180°

NO. 503

Wave Length Range From 180 to 570 Meters

The coupling range is 180 degrees instead of 90 degrees. Primary winding green silk covered wire wound on fibre tube, 4-inch diameter by 2¾ inches deep. Ten taps are provided. Secondary rotor molded from Bakelite. The bearing construction, of special design, is extremely rigid and is backed up with spring tension to insure perfect electrical contact at all times. Primary mounted at an angle of 45 degrees on wooden base, 4x3x⅜ inches. Can be readily mounted on either table or panel. Primary 50 turns. Secondary: 40 turns. Shaft, ¼-inch diameter. Rotor, 3⅝-inch maximum diameter. Over all height, including base, 5¼ inches; total width, not including shaft extension, 4⅞ inches. This coupler will tune over a range of 180 to 570 meters with secondary variometer, and with a secondary condenser of .001 mfd., it will tune to 700 meters.

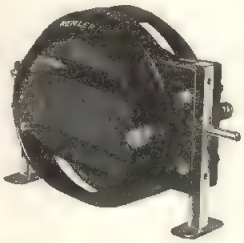
REMLER

MOLDED BAKELITE—NO. 500



Wave Length Range From 180 to 570 Meters

With Internal Pig Tail Connections

The improved No. 500 Remler Variometer is molded entirely of Bakelite, insuring mechanical strength and accuracy of all dimensions and does not permit warping nor shrinking. The stator is molded in two halves with primary winding molded on the inside, insuring an absolutely rigid winding. Stator carries 60 turns No. 21 green silk covered wire, rotor 60 turns No. 20 green silk covered wire. Large dimensions make possible the use of lower resistance windings. Maximum stator diameter, 5¼ inches; maximum rotor diameter, 4 inches; width across stator, 3 inches; shaft, ¼-inch diameter. Bearing bound up with spring tension Terminals are polished nickel binding posts. Panel or table mounting.

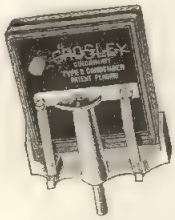
CONDENSERS

CROSLEY



The Crosley variable condenser has been so designed as to provide direct positive metallic contact with the charging plates of the condenser, thus eliminating the serious contact resistance which is introduced by spring and friction contacts in the usual form of variable condenser. The internal resistance caused by imperfect contact between the plates and spacing washers of the rotary and stationary members of an interlocking condenser is entirely eliminated in the Crosley condenser.

Not only has the Crosley condenser many factors designed to improve the over all electrical efficiency but the arrangement of the plates is such that a minimum electric field is produced around the condenser. This condition is of most vital importance where the condensers are employed in circuits which require very delicate and precise adjustment.

With condensers of the usual type the stray electric field is quite strong for the distance of three or four inches from the plates. When the operator's hand is placed in this field the capacity of the condenser is naturally altered, thereby preventing the proper resonant adjustment of the receiving circuit to the most efficient position. In the Crosley condenser, however, this objectionable feature is completely removed. A demonstration of the fact can be made by moving the hand over the condenser while sharply tuned to a transmitting station without the least reduction in signal strength.

The Crosley condenser depends upon a thin sheet of high dielectric material as insulation between the plates. As there is no friction from the opening and closing of the plates, the insulation will last as long as the condenser

Our tests have shown the maximum capacity to never be less than .0008 Mf. Thus frequency runs better than 001 Mf. We conservatively rate these at .0005 Mf.

Each Crosley variable condenser is carefully tested to withstand one thousand volts before shipment.

	Each
Type D Condenser (Dials not included)	$2 25

Packed, 1 doz., weight, 25 lbs.....per doz., **$10.75**

If you want to come to Boston and sell goods, don't think of starting until you get the guide-book to the Boston newspaper situation.

The way is described accurately and impartially in "The Road to Boston." Probably it is the only book about advertising ever put out by a newspaper without any advertising figures in it.

Printed by the Boston Herald-Traveler; we'll be very glad to send you a copy.

The Round Oak copper-fused, boiler-iron "Chief"

A Reputation Builder

The Round Oak "Chief" Range, for coal and wood, is enthusiastically supported by many dealers who have and are building valuable reputations.

Suffice it to say that this range is the *best* that the Round Oak Folks—with all their half-century experience, $4,000,000 facilities and rigid standards of quality—can produce in a product of this type.

As a result, every purchaser becomes a permanent asset to the dealer, a continual endorser of the range and the dealer to her friends.

Furthermore, in its active sale, the dealer is aggressively assisted by Round Oak Co-operation, famous for its liberality and resultfulness.

May we invite your inquiry, quite without obligation?

ROUND OAK

BOILER IRON "CHIEF" RANGE

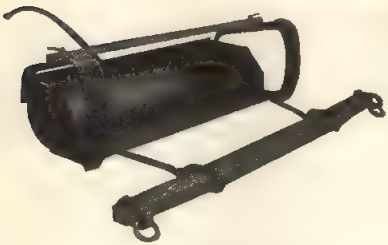
THE BECKWITH COMPANY, Dowagiac, Michigan

"Round Oak Folks" *Established 1871*

All Round Oak products embody traditional Round Oak quality and patented exclusive features: Round Oak Porcelain Coal Range, Round Oak Three-Fuel Porcelain Range; Round Oak Three-Fuel Range; Round Oak Ironbilt Cast Range, Round Oak Gas Ranges, Original Round Oak Heating Stoves, Round Oak Pipeless Heating System, Round Oak Moistair Heating System; Round Oak Ironbilt Furnace—for pipe installation

ROYAL BUCK (Fresno) SCRAPERS

The Standard for the High Grade Contractor



At the left is shown a valuable implement for leveling land, constructing drainage ditches, etc. The construction of the Royal Buck (Fresno) Scraper is first class in every particular. The bit is made of special high carbon steel and is easily replaced at slight expense.

The heaviest Buck scraper made.

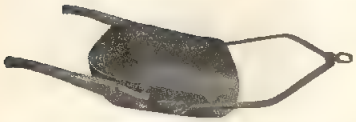
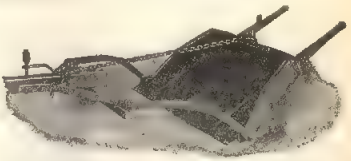
DRAG SCRAPERS



NEW STAR

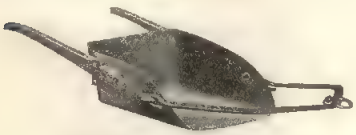
This is an extra value in low priced square back scraper. The handles are firmly bolted on sides with clips, instead of being driven into light sockets. The pan is equipped with double solid steel runner; double bottom; double flanged bottom; or furnished with plain bottom, as ordered.

No. 1 Cap., 3½ cu. ft.; Weight, 75 lbs.
No. 2 Cap., 5 cu. ft.; Weight, 85 lbs.
No. 3 Cap., 7 cu. ft.; Weight, 95 lbs



ROYAL TONGUE (Mormon) SCRAPER

This scraper is well made of good material, and strongly ironed. Has a steel cutting edge easily replaced when worn out. This scraper is useful in filling ditches, leveling roads, etc. Two sizes, 42 inches, weight 115 pounds; 48 inches, weight 120 pounds



CROWN OR DIAMOND SQUARE BACK

We furnish Pressed Bowl Drag scrapers in two styles; the Crown with handles on side, and the Diamond, with round handles on top. Pans are pressed from sheets of heavy scraper steel; solid bowls without lap or joint. Furnished with double steel runners; with flat double bottom or with plain bottom as ordered.

No. 1 Cap., 3½ cu. ft.; Weight, 75 lbs.
No. 2 Cap., 5 cu. ft.; Weight, 85 lbs
No. 3 Cap., 7 cu. ft.; Weight, 95 lbs.

TRADE MARK

Self-Heating Sad Iron

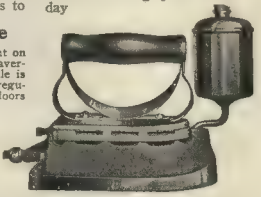
Sixteen years ago a woman did an ironing with the first successful self-heating sad iron ever made.

What an advertiser that woman was—she told all her neighbors to *try* a Royal Self-Heating Sad Iron.

Every neighbor turned *advertiser*—the demand grew each succeeding year. To-day

Over 100,000 in Use

tells how the "Royal" has kept right on pleasing customers. It does an average ironing for 2 cents. The handle is always cool. The heat is instantly regulated. Can be used anywhere—outdoors or indoors.



We supply advertising material that keeps the "Royal" moving. Write for prices.

RELIABLE
BLUE FLAME HOVER

THE BEST YET

More Sales!

Quicker Turnover! — A Strong Sales Magnet!

This late 1923 model Blue Flame Oil Heated Hover reduces chick brooding to a science. Produces larger profits for the small or large poultryman. Makes and holds customers, and gives utmost satisfaction.

Widely Imitated, But Never Equaled

Burns ordinary coal oil or kerosene with clear, even blue flame. No bother—no coal—no odor—no soot—no dust—no noise—no clogging—no overflowing. Easily adjusted; automatically regulated. Saves fuel. Asbestos lighting ring decreases oil consumption 33⅓%. Will burn 24 to 36 hours without refilling. Requires no attention, light it and leave it. Shipped completely assembled. *Made in various sizes. Write for Dealers Terms and Prices*

HIBBARD POCKET KNIVES

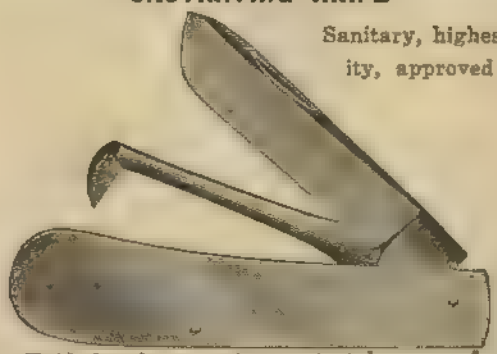
FULLY GUARANTEED TO GIVE PERFECT SATISFACTION

Made by American workmen. Blades are finest quality Crucible Steel, TEMPERED BY A NEW METHOD WHICH INSURES A UNIFORM AND LASTING EDGE. Sharpened ready for use. In whetting, hold at an angle of 18 degrees on an OIL STONE, not a grindstone.

WE ETCH YOUR NAME, FREE OF CHARGE, ON THESE KNIVES WHEN REQUESTED

NICKEL SILVER HANDLE VETERINARY AND CASTRATING KNIFE

Sanitary, highest quality, approved shape.



This Knife has been gotten up to take care of an ever-increasing demand for a knife of this kind, originating not only from the Professional Veterinarian but also from the Farmer and Stockman who himself prefers to perform operations on his live stock.

On account of the handle being made of nickel silver the knife can be freely immersed in boiling water to be sterilized, the handle will not crack or absorb dirt, thereby making this knife **Absolutely Sanitary.**

The shape is of the most approved pattern and comfortably fits the hand. The speying and hook blade are made of the finest Wardlows' English Crucible Cutlery Steel, properly tempered, ground and whetted to a very keen and lasting edge. Every knife is unconditionally warranted.

No. 2541½P—1 large speying blade and 1 hook blade, nickel silver handle, length 3⅞ in. when closed, per dozen **$21.00**

HALF DOZEN IN A BOX

NICKEL SILVER HANDLE SPEYING KNIFE

Sanitary, highest quality, approved shape.

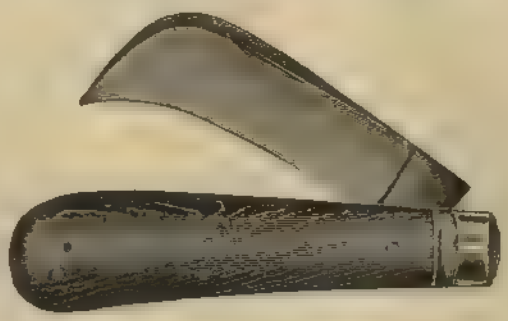
The result of an ever-increasing demand for a pocket knife of this kind.

Perfectly sanitary, can be immersed in boiling water to be sterilized. The shape is of the most approved pattern and properly fits the hand. The Speying blade is made of the finest Wardlow's English Crucible Cutlery Steel, tempered, ground and whetted to a firm and lasting edge. Every knife is unconditionally warranted.

No. 104½—1 large Speying blade, handsomely etched **speying**, nickel silver handle, length 3⅞ in. when closed, per dozen **$10.00**

HALF DOZEN IN A BOX

PRUNING, KAFFIR CORN, MAIZE, LINOLEUM AND ROOFING KNIFE COMBINED IN ONE



Most desirable shape for pruning and trimming shrubbery, trees, etc., for cutting Kaffir Corn and Maize, also for cutting Linoleum, Roofing, Rubber, etc.

The blade is of a very heavy gauge, and is made of the finest Wardlows' English Crucible Cutlery Steel, tempered ground and whetted to keen and lasting cutting edge.

The handle is of the finest South American Cocobola, steel lined, and has hole through end for attaching to chain or rope.

Each knife is unconditionally warranted.

No. 4507P—1 large, length 4 in. when closed, per dozen **$12.00**

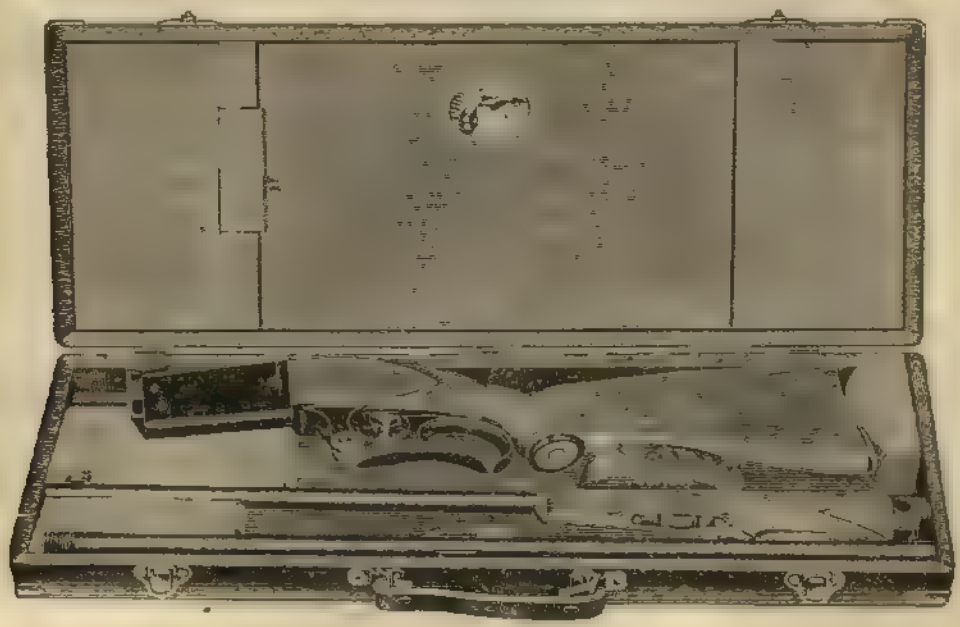
SAVAGE COMBINATION KITS



The Savage Combination Kit is a combination of the Model 1899, 300 Savage take down, pistol grip, 24 in. barrel, rifle and the 410 gauge 24 in. shot gun barrel, put up in an attractive black leatherette carrying case with cleaning rod. This kit offers the retailer an effective display outfit and the consumer a convenient carrying case, as well as a case in which to keep the rifle and extra shot gun barrel when not in use. For this outfit the factory selected the most attractive style of Model 1899 Savage take down rifle with extra full, checkered pistol grip stock and forearm, 24 in. barrel, (our No. 7330TD), chambered for the new .300 Savage Cartridge. There will be NO DEVIATION from the style or caliber of rifle. Cases are not sold separately and will be furnished only on orders specifying complete units of a .300 Savage rifle and extra 410 gauge shot gun barrel as described above. Price of the .300 Savage Combination Kit will be the combined prices of rifle and extra 410 ga. barrel with no additional charge for the case.

No. 40—Savage Combination Kit containing one M1899-300 cal. Savage take down rifle, checkered pistol grip stock and forearm, 24 in. barrel, cleaning rod and 410 gauge extra shot gun barrel, complete with carrying case, w't 13 lbs., each **$97.20**

ALL ABOVE. ONE IN A CASE

NEW SAVAGE .300 CARTRIDGE RIFLES

FOR BIG GAME

The Savage .300 cartridge has been developed in answer to demands made by shooters all over the world for a cartridge attaining the ballistics of the .30 caliber government cartridge, but of distinctly sporting type for use in sporting arms. This cartridge measures only 2⅜ in. over all, while the Springfield government is 3 5/16 in. long. It is of the rimless type, loaded with a 150 grain "Spitzer" point bullet, similar to the 22 S. H. P and 250/300 cartridges.

Ballistics of the .300 cartridges are the same as are obtained from the Government Springfied Cartridges.

	Muzzle	200 yds.	200 yds.	200 yds.
Energy, foot pounds ...	2426	2034	1686	1392
Velocity, foot pounds ..	2700	2465	2244	2039
Mid Range tro-jectory..		.66	2.9	7.1

Recoil is slightly less than that of the Springfield Army rifle and the range far beyond average hunting requirements.

Model 1899—Pistol Grip, Feather Weight

No. 7330FTD— 300 caliber, 24 in. round barrel, take-down, shot gun butt, checkered, full pistol grip stock and fore-arm, corrugated steel butt plate, checkered trigger, white metal bead front sight, flat top sporting rear sight, w't about 7 lbs. 10 oz. .....each $81.20

Model 1899—Regular Weight, Take Down

No. 7006TD—300 caliber, 26 in. round barrel, take-down steel rifle, butt plate, white head front sight, flat top sporting rear sight, w't about 8 lbs. .....each $70.00

Model 1899—Featherweight, Take Down

No. 7020FTD—300 caliber, 24 in. round barrel, take-down, steel shot gun butt plate, w't about 7 lbs., each $73.50

THE .410 GAUGE, SAVAGE EXTRA BARREL

Can be easily adjusted on any model '99 Savage Take-down rifle. Just "take-down" your rifle and substitute the 410 gauge barrel for the regular rifle barrel. The operation is simply and easily done, requires no tools. When ordering be sure to specify if rifle is a feather-weight, take-down or regular, take-down rifle.

No. 410—.410 gauge, for the following model 1899 Savage Rifles: 7322FTD, 7325TD, 7306TD, 7506TD, 7320FTD, 7520FTD, w't each 1½ lbs. .....each **$16.00**

SAVAGE RIFLES

MODEL 23 "SPORTER"

Repeating Bolt action. American walnut one piece stock and forearm, full curve pistol grip, rubbed varnish finish. Detachable, box type magazine holds five cartridges

REPEATING

TAKE-DOWN HAMMERLESS

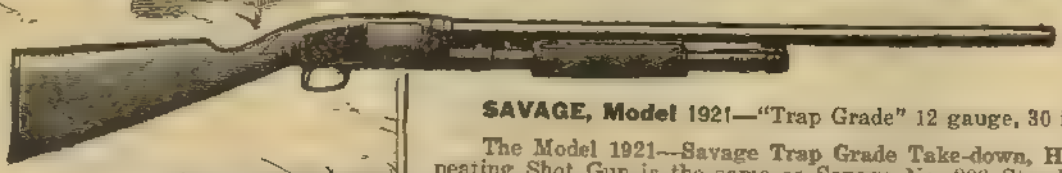
SAVAGE MODEL 1921

Positive top tang safety—when gun is not locked, the safety cannot be applied, thus serving as an indicator that gun is not cocked. Gun cannot be taken down with a live shell in the barrel. Magazine tube and action bar may be locked when taken down by turning down the magazine lever. It is impossible to turn the magazine into locking position unless the magazine tube is fully home. This prevents looseness between barrel and receiver and insures the proper sequence of take-down and assembling operations. The slide handle has steel ferrule at both ends of action slide handle giving increased strength and rigidity.

Solid Breech, solid top and side ejection, take-down, high pressure smokeless steel barrel full choke bore, Walnut stock, half pistol grip, length of stock from trigger to center of butt plate 14 in., drop comb 1½ in., drop at heel 2¾ in., moving parts enclosed, receiver channelled and matted in line of sight; 6 shot, solid rubber butt plate, w't 7 lbs.

No. 200—12 Ga. 30 or 32 in. barrel. . . . . each $53 50

No. 200R—12 Ga., 30 in. barrel, fitted with raised matted rib, full length of barrel, ea. 98.60

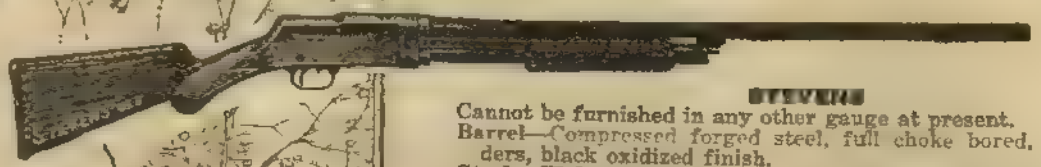


SAVAGE, Model 1921—"Trap Grade" 12 gauge, 30 in. full choke.

The Model 1921—Savage Trap Grade Take-down, Hammerless, Repeating Shot Gun is the same as Savage No. 200 Standard grade gun, excepting that it has a straight grip, checkered stock, varnish finished, with slide handle of selected walnut, checked and a 30 in. matted barrel. Stock specifications are, 1¾ in. drop at heel, 1 9/16 in. drop at comb, 14 in. length, w't 7½ lbs.

No. F201—Matted barrel★ . . . . . each **$113.50**

No. F201R—Raised matted rib★ . . . . . each **$128.60**



STEVENS

Cannot be furnished in any other gauge at present.

SINGLE BARREL AND REPEATING GUNS

ITHACA

"VICTORY GRADE"

The Ithaca Victory Grade single barrel trap gun is a gun the shooters have been looking for—a thoroughbred single barrel trap gun at a popular price. While it is not as elaborately finished as the higher priced guns it has very good lines and is built to "stand the racket" of trap shooting. The Victory Grade gun comes only in the following standard dimensions and absolutely cannot be built to order.

Barrel is 12 gauge, 34 in., fitted with matted, ventilated top rib, brass front and rear sights, tuck straight grip, hand checkered, 14⅛ in. long, 1⅞ in drop at heel, 1½ in. drop at cone, fitted with recoil pad, "Beaver-Tail" hand-checkered fore-end. Frame, top lever, trigger plate, fore-end iron and guard, line engraved. Center position trigger, non-ejector.

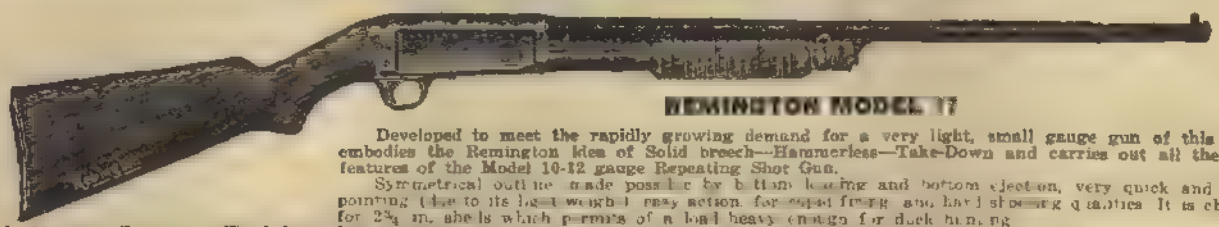
No. F8—12 gauge, 34 in. barrel, w't 8 to 8¼ lbs.★ ....each **$126.90**

NO. 4E GRADE

Barrel—Very high grade of fluid steel, exceedingly tough, hard and strong, especially adapted for nitro powder, ventilated rib, automatic ejector.
Stock—Well finished walnut, full or half pistol or straight grip, carefully hand checkered and figured gold shield in stock, beaver tail fore-end, hard rubber butt plate.
Frame—Engraved with trap shooting scene on one side and American Eagle design on the other, hardened and polished trigger, equipped with lightning lock bolted at three points, will stand the continuous strain of heavy trap loads, hammerless.

No. F4E—12 gauge, 30, 32 or 34 in. barrel, w't 7¾ to 8¼ lbs.★ ....each **$211.55**

REMINGTON REPEATING HAMMERLESS TAKE DOWN



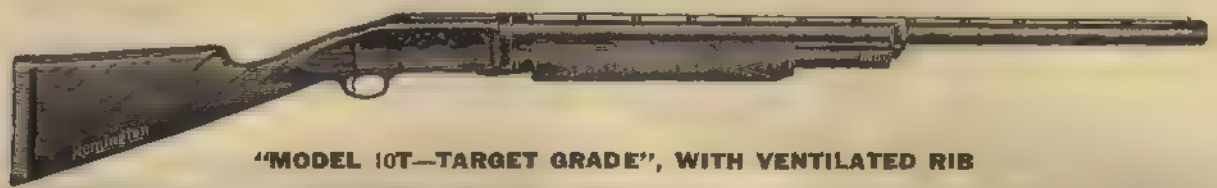
REMINGTON MODEL 17

Developed to meet the rapidly growing demand for a very light, small gauge gun of this type. It embodies the Remington idea of Solid breech—Hammerless—Take-Down and carries out all the popular features of the Model 10-12 gauge Repeating Shot Gun.

Symmetrical outline made possible by bottom loading and bottom ejection, very quick and accurate pointing due to its light weight, easy action for rapid firing and hard shooting qualities. It is chambered for 2¾ in. shells which permits of a load heavy enough for duck hunting.

Barrel—20 gauge Remington Fluid Steel, matted finish, solid breech, chambered to take shells from 2½ to 2¾ in. in length.
Stock—Walnut stock, half pistol grip, length 13¾ in., drop at heel 2⅝ in., drop at comb 1 9/16 in. Walnut fore-end.
Frame—5 shot, Model 17 Take Down, bottom loading and bottom ejection.

No. 2017—Plain barrel, 26 and 28 in. full, modified choke or cylinder bored, weight about 6 lbs. .....**each $85.30**
Will be supplied with 30 or 32 in. barrels for factory shipment only.



"MODEL 10T—TARGET GRADE", WITH VENTILATED RIB

The VENTILATED RIB and BARREL ARE ALL ONE, in other words, they are both built out of the same solid piece of steel, while in most arms of this type the ventilated rib is brazed or soldered on the barrel. The Remington ventilated rib will positively not curl up or buckle as may be the case with a rib brazed or soldered to the barrel.

Sighting—This gun permits the shooter to obtain a full view of the object aimed at, because the ventilated rib is so constructed that the gun shoots high, thus permitting a full view of the target.

A ventilated rib, practically eliminates heat waves, which rise above the barrel during continuous shooting and interfere with sighting, especially in warm weather.

Oil finish on the stock and fore end of this gun is more durable than the ordinary finish applied to most guns.

Barrel—12 gauge, 30 in. full choke, option of modified choke or cylinder bore, fitted with **raised matted ventilated rib.** Rear sight optional, but furnished only when specified.

Stock—Imported walnut oil finish, straight grip with option of half or full pistol grip, neatly checkered, full comb, fitted with soft rubber recoil pad of any make desired. Choice of any dimensions within the following limits—

Lengths from 13½ in. to 15 in.
Drops from 1½ in. to 3½ in. at heel.
Drops from 1½ in. to 1⅝ in. at comb.
Any other dimensions, subject to extra charge.

Fore End—Imported walnut, oil finish, long extension type, neatly checkered and shaped so as to afford a better grip and give better control over swing of the gun on sharp angles. Short fore ends, such as are regularly supplied on Model 10C Trap gun can be furnished if desired.

Frame—6 shot, bottom loading.

No. 190—12 ga., 30 in. Remingtn, full choke, 6 shot bottom loading, w't about 7¾ lbs ★ .... each **$200.80**

★ Items Marked Thus ★ Are Shipped From Factory Only.

The Most Famous Lure In America

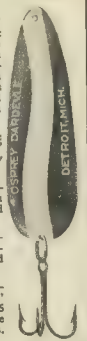
"DARDEVLE" gets them—that is the word sportsmen pass along to each other. And "Dardevle" does get them—that is why this is the most famous and biggest-selling lure in America.

Dealers everywhere report that "Dardevle" outsells any lure they ever handled.

Advertised nationally—all sportsmen know about it, and want it.

Put in an assortment. Liberal discounts. Prices quoted on the retail prices.

"Dardevle" 1 oz.—85 cents. "Dardevlet" 3/5 and 2/5 oz.—85 cents. "Dardevle Imp" ¼ oz.—65 cents.



"Nostealum" Insect Hooks

The Hooks that Hold Live Bait Firmly

EVERYBODY who fishes at all fishes with live bait—and they all have trouble with ordinary hooks by losing bait. They won't lose bait when using Osprey Nostealum Insect Hooks. Scientifically designed to *hold firmly* everything from a housefly to a shiner.

They sell themselves on sight. Order a full assortment. Retail prices from 15 to 55 cents, from which we allow liberal discounts.

"Osprey" Waterproofed Line

YOU'VE known about this line, no doubt. It's been on the market for 20 years. It is so strong and durable, resists the destructive action of either salt or fresh water for a longer time than you think possible. Slides through the guides as smooth as can be.

SHAPLEIGH SPECIAL BICYCLES

DELIVERY SERVICE MODEL

"ORIGINATED BY US"

This Bicycle is Acknowledged to Be the Most Satisfactory Ever Sold at the Price. It is Strictly Up-to-Date, Only Good Material is Used in Its Construction, Has Roller Chain, Shapleigh Special Hanger, Special Handle Bars, Wire Basket, Steel Stand and Good Service Tires. Dealers Will Find It to Be a Great Seller; Every Merchant Wants to Give Quick Service; This Model is the Answer.

SPECIFICATIONS

Basket—Special Galvanized Woven Wire; Size, 15x10x5 inches.

Bearings—Balls: $\frac{3}{16}$ inch in Head; $\frac{1}{4}$ inch in Crank Hanger; $\frac{1}{4}$ inch in Rear Hub; $\frac{3}{16}$ inch in Front Hub.

Carrier—Black Enameled Machine Steel.

Chain—Roller, $\frac{1}{2}$ inch, 1 inch Pitch.

Connections—One Piece Drop Forged Diamond Shape Fork Crown, Nickel Plated; Forged Seat Post; Cluster Bolt and Nut Fastening.

Crank Hanger—Shapleigh Special, One Piece; 7 inch Round Cranks; Highly Nickeled.

Enamel—Four Coats, Hand Polished; Black, with Double Hair Line Gold Stripes.

Frame—20 and 22 inch; One inch, Eighteen Gauge Tubing.

Guards—Front and Rear Enameled to Match Frame.

Handle Bar—Special 21x6; No. 30R Grips.

Hubs—Turned from Solid Bar Stock; Tool Steel Cones and Cups.

Pedals—Rat Trap, No. 1.

Rims—One Piece, Rock Elm; Enameled to Match Frame.

Saddle—No. 27R, with Universal Cushion Springs.

Spokes—14-16 Gauge.

Sprockets—26 Tooth Front, 9 Tooth Rear, $\frac{1}{2}$ inch.

Stand—No. 18, Channel Steel; Can be Raised or Lowered with Foot; Locks Automatically.

Tool Bag—No. 12; Contains Wrench and Pump.

Tires—Good Service **"Oil Proof"** Interlocking Red Diamond Tread No. 7028.

Wheels—28 inches.

Wheel Base—43 inches.

Weight Stripped—17 lbs.

	Each
No. 368—With Coaster Brake (See Specifications Above).....	**$55 30**

One in a Crate; Average Weight, Crated, 55 lbs.

George Cohan Stories for Principal

Lessers Will Produce for a Starter "The Meanest Man in the World," with Playwright Actively Co-operating

George M. Cohan, the famous American author-playwright-composer-producer - actor, has entered into a contract with Sol Lesser, Irving Lesser and Michael Rosenberg of Principal Pictures Corporation whereby that organization will immediately start the filming of Cohan stage successes. All contracts have been signed, O'Brien, Malevinsky & Driscoll representing Mr. Cohan and Nathan Burkan acting for Principal Pictures.

The first George M. Cohan productions to be made by Principal Pictures Corporation will be "The Meanest Man in the World," one of his most recent and most successful productions. Immediately upon his arrival in New York last week Irving Lesser went into conference with Mr. Cohan, and an agreement was made whereby the latter will go to Los Angeles to oversee the production of his plays. He will cooperate in the making of the first for which an all-star cast is now being assembled. A well-known director will supervise the production.

Commenting on the Cohan deal Irving Lesser said: "The deal whereby we become associated with Mr. Cohan involved the expenditure of a lot of money. However, we have every confidence in the future of the open market, and this deal is representative of the big things that we have under way."

Work on the Cohan production will begin shortly at the Principal Studios, formerly known as the King Vidor Studios. This plant was acquired by Principal Pictures Corporation several weeks ago.

Schlank Says Short Stuff Is the Strongest Card of Independents

Returning from a six weeks sales trip, touching practically every distribution centre in the country, Morris R. Schlank, president of the Anchor Film Distributors, Inc., has arrived in Hollywood, his headquarters, enthusiastic over the year's prospects.

In a form letter to prospective and actual producers for Anchor Mr. Schlank states:

"The independent field today offers a better opportunity for producers than the so-called 'national' distributors; that is my honest opinion. I mean by that, that the producer, if his pictures are quality ones through, can get quicker action on his money through state rights distribution than any other channel. The royalties are now being paid in cash and the C. O. D.'s are picked up much better than a year ago. The state rights exchange is prospering and will continue to prosper just as long as the products offered in that market measure up to the standard set by the average 'nationally distributed' picture.

"Short subjects are a state rights exchange's strongest card in bidding for theatre business, and my advice to producers is to 'hit the high spots' on their comedies. The market needs good comedies—especially gag films—and the producer who fills the bill has a fine chance to make exceptionally fine profits."

"April Showers" of Preferred Is Called "Irish Humoresque"

An unusually fine cast is announced for "April Showers," a Preferred Pictures production, released by the Al Lichtman Corporation. This big feature has been termed "The Irish Humoresque." Tom Forman is the director.

Those who will be seen in the production, according to B. P. Schulberg, president of Preferred Pictures, are Colleen Moore, Kenneth Harlan, Myrtle Vane, Priscilla Bonner, Harriet Hammond, Tom McGuire, James Corrigan.

Mr. Schulberg says that "April Showers" will be filled with scenes of splendor as well as screen drama of great dramatic power. Along the impressive features of the production is a submarine cafe which will be made in a set constructed of glass surrounded by water.

Hallroom Boys Are to Satirize Timely Topics and Stories

"Ten Knights in a Hallroom" is the amusing title that has been given a new Hallroom Boys Comedy, one of the popular series of two-reelers which C. B. C. is distributing to the state rights market.

It is announced that Jean Havez, in charge of comedy scenarios for C. B. C., has planned to make each comedy a satire on some timely topic, story, or picture that is occupying attention, and has already lined up the first four comedies he is making on the series, which are promised as real surprises. His first picture, "Day by Day—in Every Way," a satire on the Coue craze, has been attracting attention.

"There is something about a satirical comedy that people love," says Mr. Havez, "because it has a psychological reaction."

Speaking of the fashion in which leading comedians are giving up the making of two-reel comedies and going in for five-reel specials Mr. Havez says he believes this to be a mistake—and that it will only react in creating a great demand for the good two-reel comedy.

"Diversity of program is what has built up the motion picture business," is Mr. Havez's opinion. "A feature or two, a short comedy, a news or novelty reel—these are what the greater majority of the public want. While the leading comedians who have gone in for five-reel comedies make good ones, of course, still in many theatres where a one-feature program is the policy patrons are apt to be dissatisfied if that feature is also a comedy."

Principal Pictures Signs Three Foreign Contracts

Three foreign deals were closed this week by Irving Lesser, eastern manager of Principal Pictures Corporation. Mr. Lesser sold five Mounted Police Northwest plays starring and produced by Irving Cummings to the Educational Pictures, Ltd., of Canada.

S. A. Newman of London this week arranged for the distribution of "The World's a Stage," the Elinor Glyn special, produced by Principal, for the British Empire.

The Overseas Trading Company secured the distribution of "The World's a Stage" and "Environment" in Scandinavia.

Exploiting "Only a Shopgirl"

The Superior Screen Service of Utah, which holds territorial rights on the picture, has selected "Only a Shopgirl" for special advertising featuring above its other output, and has had new envelopes printed with "Only a Shopgirl" imprinted across the entire bottom of the envelope.

"The Red Trail" Is Norca's Third

It Is Described As a Sensational Animal Picture with Unusual Love Story from Pen of Lesley Mason

The third production of Norca Pictures, Inc., it is announced, will be "The Red Trail," a spectacular and sensational animal picture described as a story of chained passions on the edge of the white man's world. The story is by Lesley Mason, a veteran film writer who is thoroughly familiar with the elements that make for appeal to audiences, and Norca has every reason to believe that the production will meet with the success of its two previous features, "Just a Mother" and "Love's Old Sweet Song."

The picture has been screened several times in various exchanges handling Norca productions, and its general appeal and particularly its sensational "animal stuff" has resulted in many inquiries being received by R. C. Cropper, general manager of Norca Pictures, Inc., at his offices in the Loew State Theatre Building at 1540 Broadway, New York.

The hero of "The Red Trail" is John Glyn, who has buried himself for two years in a desolate consular post in the African jungle, following a domestic tragedy. He suspects the friendship of a native princess, the Princess Nyanza, who seems to wield an uncanny influence over beasts of the jungle, and compel them to carry out her desires. Through his battles with the brutes of the jungle, however, Glyn finds renewed strength to overcome his enemies, and there, on the fringes of civilization, finds a great love.

A spectacular electrical storm, animal fights and feats of strength, coupled with the unusual love story should serve to make "The Red Trail" a virile and exceptional screen attraction. Prints on the picture have already been shipped to the various exchanges marketing Norca productions.

Stories of the climb ever upward

Such is

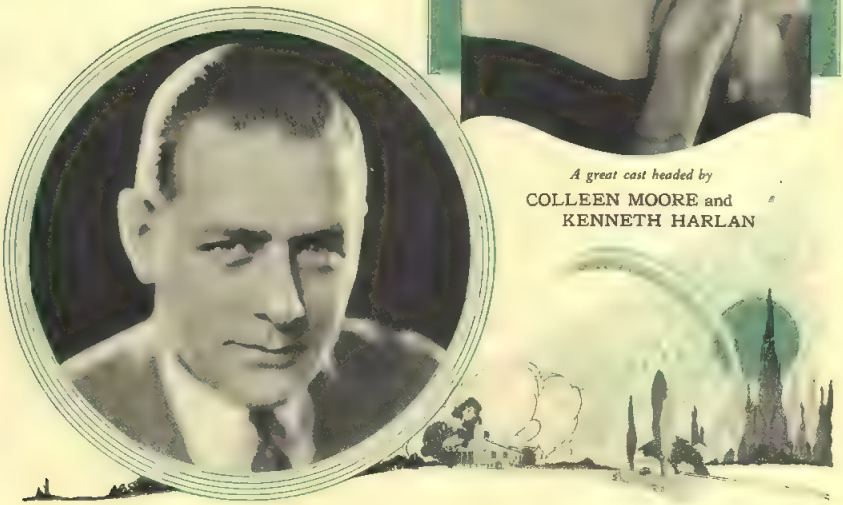
April Showers

Depicting the lives of lowly people struggling from the slums to Fifth Avenue

A drama of thrills and laughter

A great cast headed by

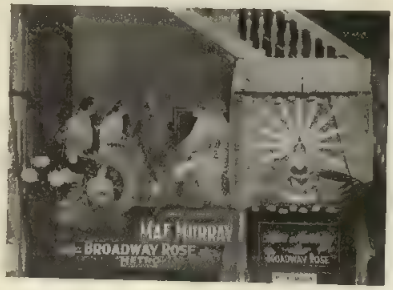
COLLEEN MOORE and
KENNETH HARLAN

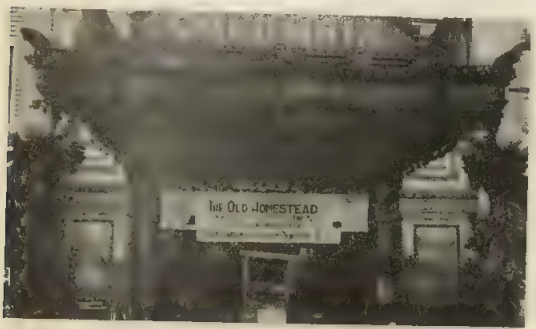


It's a Preferred Picture

Mary Pickford's new "Tess of the Storm Country" was well advertised in Atlanta, Ga., by the Howard Theatre, as testified by this turnout for a performance of the United Artists' release. The walls of the lobby were boarded and painted with scenery typical of the Storm Country.

Advance billing at Loew's Palace, Memphis, Tenn., is usually done by means of cutout or other display in the rear of the lobby. This cut-down 24-sheet for Metro's "Broadway Rose" and a shadow box display was the arrangement which manager A. B. Morrison made for advancing the Mae Murray feature





"Old Homestead" atmosphere in the display for the Paramount offering at the Columbia, Portsmouth, O., was produced with the simple articles to be had from any farmer who grew corn and squash or pumpkins last summer—and what farmer didn't.

Teaser Campaign In Advance of New Griffith Thriller

When D. W. Griffith's mystery picture "One Exciting Night," a United Artists Corporation release, was booked for showing at the Circle Theatre, Indianapolis, Ind., the theatre management put through a tie up with the Indianapolis Star which produced exceptional results.

The tie-up took the form of a symposium, conducted for two weeks in advance of the play date for the picture, by the Indianapolis Star for the best letters from readers describing the most "Exciting Night" in their experiences. Prizes of $1 each for the daily best letters were given by the Star. As the symposium closed all letters were judged again and the best of all won an award of a $50 cash prize.

This contest ended one week before the play date for "One Exciting Night," and immediately following it a teaser advertising campaign was started in Indianapolis newspapers, the copy referring mysteriously to "One Exciting Night," and timed to tie up with the display advertising and announcements just before the opening performance of the picture.

Street Cars and Fire Engines Ballyhoo Picture

The fire department, street railways and other municipal agencies of Owensboro, Kentucky, combined with extensive newspaper advertising and other exploitation mediums, figured in the successful showing of "Quincy Adams Sawyer," at the Grand Theatre in that city.

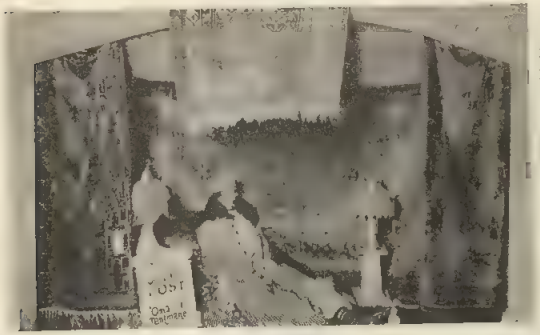
One of the largest automobiles in Owensboro's fire-fighting fleet carried a huge sign, announcing the coming of "Quincy Adams Sawyer the greatest of all super pictures," to the Grand. The assistance of the street railways company was no less important. On each car was fastened one of the one-sheet posters of this production, and window cards were also freely used. Another effective device was the use of an old shay, similar to that in the picture.

All of the leading newspapers carried large advertisements well in advance of the presentation. These announcements emphasized the fact that the showing was among the earliest held anywhere, and G. M. Pedley, manager of the theatre, gave his personal guarantee to his patrons that the photoplay was certain to win their approval.

Dickens Societies Offer Tieup for "Oliver Twist"

Throughout the country are Dickens Societies that take immense interest in any picture or play produced from the works of the English author: and the endorsement of these societies can be a valuable aid in boosting a picture's run.

This was demonstrated during the showing of First National's "Oliver Twist" when the picture played its run at the Tremont Temple Theatre, Boston, Mass. The Dickens' Society of Boston attended a special performance. They not only gave the picture word of mouth advertising but also space in their official magazine.



Through the cooperation of a dealer in Persian rugs the Rivoli theatre, Portland, Ore., was enabled to make a display of rugs estimated to be worth $50,000, a feature which the theatre advertised.

Educator's Endorsement Makes Good Ad Copy

Springfield, Ill.—W. W. Watts, of the Princess Theatre, played up an endorsement for "To Have and To Hold" received from the chief clerk of the Board for Vocational Education in such a fashion that it got receipts.

Mrs. E. M. Tarbet, secretary of the Board, signed a letter written by Bill Danziger, Paramount exploiteer, which was chock full of sales arguments. This was printed as an ad just above the straight display. It created a lot of talk.

Morning Program A Success

A special New Year's morning program was presented at the Parkway Theatre, Baltimore, for the young folks. Every seat in the theatre was occupied. "Little Red Riding Hood" was the feature film. The management of the theatre is much pleased with the results of the performance. It was held from 10:30 A. M. to 12 noon and admission of 25 cents was charged

Lobby of the Cameo Theatre, Pittsburgh, for the showing of Goldwyn's "Brothers Under the Skin." The lighted windows at either side of the entrance make an especially attractive display. Medallions of Helene Chadwick and Claire Windsor were displayed against transparent drapes of three colors. Lights filtered through these draperies. The cutout over the box-office featured the Broadway success angle.

Decorations Blow Down But Rea's Show "Breezes In"

Washington Court House, O.—George Rea of the Colonial came in for a lot of unmerciful kidding when his compo-board "Old Homestead" used as a lobby display, was demolished by the wind.

Rea had spent a lot of money on his front and wanted it to be "the talk of the town" but it was gone before half the folks saw it

What did he do? He simply took a newspaper ad and announced that: "Here's a proof. There's only one real 'Old Homestead.' That's Paramount's You know the Colonial erected an imitation on the side-walk and along came a puff of wind and zowie, the whole works blew down. But in the Paramount picture, 'The Old Homestead' survives the most terrific cyclone ever filmed."

This kind of sportsmanship got a good laugh and folks kept coming in for their second and third visits.

The newsboy quartette used by the Branford Theatre, Newark, N. J., in connection with a lobby display and tie-up for Warner Brothers picture "Heroes of the Street" and local charities. The newsboys sold local papers and their first customer shown in the photo above was Mayor Frederick G. Friedenbach. The proceeds went to charity. Letter boxes were placed beside the box-office to receive other donations.

Prominent Players Seen in Preferred Pictures

Top, left to right—Hal Cooley, Zasu Pitts, Richard Tucker, Tom Santschi, Richard Headrick, Buddy Messinger, Mary Culver and Walter Long. Second row—Madge Bellamy, Gaston Glass, Barbara La Marr, John Sainpolis, Estelle Taylor, David Butler, Claire Windsor, Lon Chaney. Third row—House Peters, Edith Roberts, Harrison Ford, Rosemary Theby, Lloyd Hughes, Colleen Moore, Kenneth Harlan, Marguerite De La Motte. Bottom row—Evelyn Lebue, Carl Stockdale, Ethel Shannon, Frankie Lee, Doris Pawn, William Austin, Martha Mattox and Betty Francisco.

Why Preferred Pictures Stand Out

By J. G. Bachmann,
Treasurer of Preferred Pictures and Al Lichtman Corporation

IN the short time since Preferred Pictures undertook the making of special productions, the company has made such prodigious strides that today it stands comparison with any organization in the field. What are the reasons behind this success?

There are three answers to that question, viz.: (1) Because Preferred Pictures not only has unlimited facilities, but it has a big, compact organization which is remarkable for the "team work" it displays; (2) because it has such directors as Gasnier and Tom Formas, together with actors who rank foremost in the profession; (3) because B. P. Schulberg, president of Preferred Pictures, and those associated with him, have made an intensive study of box-office values, along with artistic values, and their methods of making pictures spell certain success.

Recently I went to the Coast to consult with Mr. Schulberg about financial plans for the ensuing year. There I had an opportunity to observe the production methods followed by Mr. Schulberg and those working with him. What struck me was that everybody around the studio, from stage hands to extras, from officials and directors to principals, was putting everything he or she possessed into the work in hand. That means a great deal. Baseball players who do not work together are usually to be found on teams that stand at the bottom of the percentage columns. A football eleven is valueless unless its members believe in one another and work with one another.

This analogy applies strongly to the production of motion pictures. Let a producer select a good director and let that director select a good company of players who believe in one another; then let them turn out a good story—and you have success on the screen. A star of world-wide fame is not necessary if you have a great story.

The big producing companies are beginning to wake up to this fact, which Preferred Pictures was the first to realize. Our organization believes that the picture-going public wants a powerful story, well acted. Its initial production—"Rich Men's Wives"—bore out that belief. Here is something with tremendous heart appeal, finely acted, splendidly staged. It began by creating a profound impression at the Capitol Theatre, New York, and then swept the whole country. Any exhibitor who has shown this picture can testify to its box-office value.

With the other releases of Preferred Pictures the situation is similar. Eight big productions on the market, without a single failure, is a remarkable record for any producing company. Preferred Pictures is more than proud of that record, and it can point with pride to the fact that seven more big productions are coming, and prophesy with truth that there will not be a single failure in this second group.

No other producing organization can boast of such a record. Preferred Pictures doesn't boast. It merely points to facts and submits those facts to exhibitors, who are unbiased umpires in motion pictures because their decisions are made with the view of getting results for their theatres.

Preferred Pictures takes a pardonable pride in its organization. Why? Because every employee is working for success, realizing that its attainment in the studio means success for those who show the pictures. And success in the theatre reflects itself back, to the studio. Thus it is that with an organization which wants to win, the goal is certain.

Preferred Pictures is demonstrating just what the motion picture industry needs today—the spirit of co-operation. It is turning out pictures with the idea of giving them the strongest possible popular appeal. It is seeking to make money for the exhibitor by winning public approval. And it is doing so with this selfish motive—that in making money for the exhibitor it keeps on making money for itself.

All the Brothers Were Valiant

A Metro-Classic, Released by Metro. Story by Ben Ames Williams. Adapted by Julian Josephson. Cameraman, Robert Kurrle. Directed by Irvin V. Willat. Length 6265 feet.

CAST AND SYNOPSIS

Joel Shore, Malcom MacGregor; Priscilla Holt, Billie Dove, Mark Shore, Lon Chaney; Aaron Burnham, William Orlamond; Finch, Robert McKim, Verde, Robert Kortman, Morrell, Otto Brewer; Hooper, Curt Rehfield; Cook, W. H Moug; Tom, Leo Willis

Mark Shore, elder brother of Joel, was Captain aboard a whaling schooner but when his ship returned to port from the tropical seas he was not aboard. The first mate tells of his sudden disappearance on one of the islands. Joel, who has been working an another ship, asks to be transferred to his brother's ship so that he can try and find him. The request is granted and Joel takes his brother's place as Captain. Before they set sail he marries and takes his bride with him Their family history showed all of Joel's men-folks to have been brave and courageous, but Priscilla thinks that her husband is really a coward at heart. Upon reaching the islands Joel finds his brother Mark who tells of his experiences there. He comes aboard ship and tries to get Joel to change his course and go in search of some hidden pearls that he knows of but the Captain refuses. Mark incites the men to mutiny. Joel handles them all for a while but is soon overpowered. Mark realizes his mistake and tries to force them back but he is hit over the head and falls into the sea Joel attempts to rescue him but his brother disappears beneath the water before he reaches him. The mutiny is quieted and Priscilla sees that her husband does not fall below the standard of heroism of his forefathers.

Here is a story that will send real thrills up and down the spine. In "All The Brothers Were Valiant" there has been produced a picture that most assuredly will stand out in the memory of all who see it. It is one of the best sea pictures that has come on the screen recently and should give entire satisfaction wherever shown.

Points of Appeal.—Although South Sea pictures have been in vogue for some time this story will not fail to delight the audience. It is different, in a way, intensely real and replete with action that makes one fairly clutch at the arms of the chair The love theme that runs through the picture is good, in fact just enough to carry the story along nicely The mutiny aboard ship is exciting and the spectator is never quite sure just which way things will go. The whole picture has a great amount of suspense for this same reason. The scenes showing the harpooning of the whales are interesting. There is a little comedy relief through the picture that is well placed, and the production is thoroughly convincing in every detail.

Cast.—Malcom MacGregor gives a creditable performance. In his role as Joel Shore he is strikingly the boy and at the same time the man that the story demands. Billie Dove is a pleasing heroine. Lon Chaney is excellent as Mark Shore the elder brother. All other members of the cast are also good.

Photography, Lighting, Direction.—The shots that have been used in this picture are all splendid. Unusually good atmosphere is obtained and good lighting prevails. Capably directed.

The Footlight Ranger

Released by Fox. Story and Scenario by Dorothy Yost. Cameraman Jeff Jennings. Directed by Scott Dunlap. Length 4729 feet.

CAST AND SYNOPSIS

Bill Moreland, Charles Jones; Janet Ainslee, Fritzi Brunette, Al Brownley, James Mason; Nellie Andrews, Lillian Langdon, Miss Amelia, Lydia Yeamans Titus, David Marsh, Harry Barrows

Bud Moreland, an idler in a little country town meets and falls in love with Janet Ainslee, a young actress who is stranded in the town with her company. Janet accepts the favors of Al Brownley, son of the richest man in town in hopes of getting enough money from him to carry her back to the city. On the morning the company is about to leave Brownley appears with the tickets but insists that Janet go for a ride with him first. Bill overhears the conversation and interferes. He raises enough money on his three prize dogs to buy tickets for Janet. Janet advises him to come to the city and get a job. Sometime later he arrives in the city and while working is caught in an accident He is sent to the hospital and Janet sends flowers. She has a new "angel" backing her and almost forgets Bill but after he recovers he and her best friend go to a roadhouse and rescue her from the attacks of this other man. Janet is then ready to marry him and they go back to the country.

Here is a story that while its general idea is nothing of a novelty it should give fairly good entertainment wherever it is shown. It contains a satisfactory love element and affords one or two good thrills. In "The Footlight Ranger" there is the usual story of the country boy falling in love with the leading lady of a theatrical company and the unsmooth course of love. In localities where Charles Jones is a favorite the picture should have good success

Points of Appeal.—For the lovers of animals there are a number of good shots of three fine dogs. For the lovers of romance there is a good love story running through this picture. There are also some moments of suspense and for the most part the story holds the interest. The scenes behind the stage are good and lend satisfactory atmosphere to the picture.

Cast. — Charles Jones plays his role well but is better suited to stories that contain more action Fritzi Brunette, as Janet Ainslee is good in her role. The other members of the supporting cast are also good.

Photography, Lighting, Direction.—All of the exterior scenes are pleasing. The interiors are adequate for the story and the lighting good throughout. Although the director has had to cope with triteness of material he had done well and the story affords in holding the interest and developing a good climax.

Dark Secrets

Paramount Photoplay in Five Parts. Story and Scenario by Edmund Goulding. Director, Victor Fleming. Camerman, Hal Rosson. Running Time, Fifty-Five Minutes.

CAST AND SYNOPSIS

Ruth Rutherford, Dorothy Dalton; Lord Wallington, Robert Ellis; Dr Mohamed Ali, Jose Ruben; Murdered Rice, Effen Cassidy; Biskra, Pat Hartigan; Dr. Case, Warren Cook.

Ruth Rutherford is engaged to Lord Wallington. Biskra, army officer, presents her with a magnificent horse named Untameable. Ruth is thrown while riding astride and receives an injury to the spine which cripples her. Unable to walk, she breaks her engagement to Wallington and retires to her estate where he arrives to forget Ruth in scenes of wild dissipation. Later Ruth also goes to Cairo, where she is attended by a faithful servant named Biskra. She attracts the attention of a famous surgeon known as Dr. Ali. The latter promises to cure her on condition that she become his wife. Ruth unwillingly consents. Dr Ali cures her. He attempts to attack Ruth and is slain by Biskra. Ruth, controlled by the dead man's power again becomes a cripple. Biskra appears, having broken from the jail in which he was confined for killing Ali and seemingly tries to assassinate Wallington. Ruth leaps from her chair to protect her lover and suddenly discovers that the spell is broken and that she can walk. The lovers are united.

A plot of decided originality, clever acting by a competent cast, good direction and beautiful photography combine to make "Dark Secrets" an extremely interesting picture. Also, in view of the space given by the daily press to the curing of invalids through the exercise of will power by Coue and his disciples, it carries an up-to-date news appeal which should prove of value in advertising campaigns. The story is altogether out of the ordinary and director Victor Fleming has displayed good judgment in bringing out its salient points, there are many sensational situations in evidence but the most melodramatic of these never degenerates into absurdity, a decisive thrill being achieved without sacrificing probability in ever instance. "Dark Secrets" should make money for the exhibitor. It is the sort of film which suits the popular taste, moves smoothly and swiftly and registers as a feature of decided merit.

Points of Appeal.—The incident where the heroine matches herself against the untameable horse, is thrown and crippled, will assuredly communicate a thrill of horror to all who witness it. The slaying of Dr. Ali by Ruth's faithful servitor is another dramatic situation tense with realism, and her cure through the medium of a shock is wonderfully well done. The Oriental settings and atmosphere of the far East are colorful and convincing.

Cast.—Dorothy Dalton gives an excellent performance as Ruth Rutherford. The role is a difficult one to play without overacting but Miss Dalton is delightfully natural at all times and her impersonation of the invalid girl a charming bit of character work. Robert Ellis wins favor as the hero, Lord Wallington, Jose Ruben is darkly mysterious and impressive as Dr. Ali, Pat Hartigan gives a clever portrayal of Biskra, the native servant, and capable support is rendered the principals by the remainder of the company.

Photography, Lighting, Direction.—There are many beautiful exteriors, including some fine long shots, the interiors are handsome and good lighting prevails. The continuity is unbroken and the action fast.

The Ghost Patrol

Released by Universal. Story by Sinclair Lewis. Scenario by Raymond Schrock. Camerman, Ben Reynolds. Directed by Nat Ross, Length 4228 feet.

CAST AND SYNOPSIS

Terry Rafferty, Ralph Graves; Effie Kugler, Bessie Love, Donald Patrick Dorgan, George Nicholas; Rudolph Kugler, George B Williams; Rasputskin, Max Davidson; Michael McManus, Wade Boteler, Commissioner Manning, Melbourne MacDowell.

For thirty years "Don" Dorgan had patrolled a beat in "Little Hell" and through a spirit of understanding and affection kept peace in the turbulent district. Terry Rafferty, one of the idlers of the scene, had fallen in love with Effie Kugler and was hard at work in an effort to win her father's consent to his marriage. Old Max Kugler, however, insisted on looking on Terry as a loafer despite the pleas of his daughter and old Don. Terry, in despair, goes out and gets drunk and assaults the political boss of the district and is sent to prison for two years. A new police commissioner decides Don is too old for the job and returns him. The new patrolman uses his club freely and fails to get results, so "Don" puts on his old uniform and goes forth to help his people. Moving in the shadows of the night, he becomes known as "The Ghost Patrol." Terry is released from prison and is at once slugged by a gang leader. Don finds him, takes him to his home and gets Effie. Her father vows she can never return. The police commissioner learns of "Don's" ghostly patrol and realizes he made a mistake. He puts him back on the force, but as a captain. At Christmas Kugler forgives under Don's pleas and everything ends happily.

"The Ghost Patrol" affords satisfactory entertainment containing sufficient heart interest to put it over. It carries a double theme, that is to say the romantic element is entirely separate and distinct from the other interests of the story. The plot deals with an old policeman who is retired from the force and later reinstated and also the love affair between a groceryman's daughter and a tough of the neighborhood. It should be generally well received in almost any house.

Points of Appeal.—The benevolent old policeman who has been loved by all in the city's toughest district makes an appealing figure and readily wins the sympathies of the onlookers. Also the love affair between Effie and Terry holds the interest and adds a pleasing touch to the story. The original story was written by Sinclair Lewis, author of Main Street, and this fact should help to fill the house if used in exploitation.

Cast.—Ralph Graves is a likeable hero but is not especially well cast as the tough in this picture. Effie Kugler, as played by Bessie Love, is good. George Nichols in the role as Dorgan gives a good performance but has been shown up to better advantage in other parts that he has played. Other character parts are well enacted and the support is good.

Photography, Lighting, Direction.—The interiors and exteriors are all satisfactory. The lighting has been well taken care of in each set. The story is easily followed and direction capably handled throughout.

B. P. Schulberg *presents*

KATHERINE MacDONALD

The American Beauty in

"THE WOMAN CONQUERS"

ONE of the star's best, and a wondrous tale of a society girl's battle for life and love in the snow wastes of the far North. The story of a girl who told her aristocratic sweetheart, "You are a weakling," only to meet him again in the Arctics, where, in the fight against the raging elements, the wild beasts, and men worse than beasts, he proved himself superior to them all. This is the kind of picture every audience will thrill to. An artistic and entertaining photodrama by Violet Clark and directed by Tom Forman; produced by Preferred Pictures, Inc.

A First National Picture

B.P.Schulberg *presents*

Katherine MacDonald

The American Beauty in the *Lucky Four*. Book them all now and announce them to play a month apart. Pictures that appeal especially to women. Fine for evenings, great for matinees. The last word in artistry and entertainment with the world's most beautiful woman starring.

"THE WOMAN'S SIDE"

Just a girl, forced to fight a woman's battle, against the man who would sully her father's honor and leave her nameless, for the sake of her father and every hope he had in the world, and for the love of a youth brought strangely into her life. A drama of a woman's instinct and a woman's motives. Story and direction by J. A. Barry.

"STRANGER THAN FICTION"

A society girl caught in the toils of a crook and how she escapes with a fight on the wing of an aeroplane, 5,000 feet in the air. A take-off from the roof of a sky-scraper. A parachute jump from a burning plane—a man caught in mid-air in a leap from one airship to another and finally hauled to safety. The greatest air circus ever filmed. Story by Charles Richman and Albert Shelby LeVino; Directed by J. A. Barry.

"HER SOCIAL VALUE"

Here is drama with the ring of the human note—today a sales girl—tomorrow the wife of a society man. And after that the woman who learns the bitterness of the realization that she is "not good enough for her husband." From poor girl to rich wife—here's a theme that will interest everyone in your audience. And Katherine MacDonald makes both portrayals as magnetic as any she has ever done. From the original story by B. P. Fineman and J. A. Barry; scenario by Gerald Duffy and Jerome Storm; Directed by Jerome Storm.

"DOMESTIC RELATIONS"

This is the simple, but tensely dramatic story, of a man who drove a woman from his life but who could not drive her from his heart. A picture which will make both men and women wonder, because they have all seen some of it in their own lives. Gorgeous gowns, sumptuous settings, backing up a real drama that starts where others finish. Your patrons will love it. Story and scenario by Violet Clark; directed by Chet Withey.

First National Pictures

Exploitation Extends "Shadows" Run

Tieup with Newspaper and Big Posting Campaign Gives Lichtman Offering Extra Week at Barbee's in Chicago

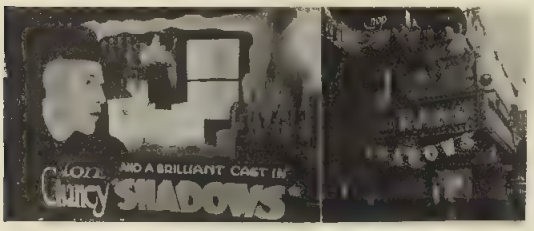
Just what proper exploitation will do in the way of boosting a good picture is illustrated in the case of "Shadows" in Chicago. When William S. Barbee, president of Barbee's Loop, booked this Preferred Pictures production, released through the Al Lichtman Corporation, he said he thought it would bring in good business for a week. Foster Moore, one of the A. Lichtman special exploitation representatives, was present at the time and he said that proper exploitation would keep "Shadows" at Barbee's Loop for two weeks or more.

"Go ahead and tackle it," said Mr. Barbee. Moore did. He plastered the downtown district with billboard advertising. He began a lively newspaper campaign, and rigged up some striking window displays. Then he "sold" the editor of the Magazine Page of the Chicago Journal the idea of running a "Shadows Contest" on that page. The idea of the contest was to publish, in the Junior Journal columns, on the Magazine Page, the silhouettes of four of the principals in "Shadows" under the heading, "Who cast these shadows?"

The terms of the contest were that readers were to write the names of the players under the silhouettes and send them to the Journal. The first prize offered was $10, with four prizes of $5 each, and the names of the winners were to be announced at a special showing of the picture under the auspices of the Journal on Saturday morning.

The silhouettes appeared daily in the Journal in a two-column layout, with the following printed at the bottom:

"And if you're looking for a good show —see 'Shadows' at Barbee's Theatre! It is taken from a magazine story called 'Chang, Ching, Chinaman,' and is all about a Chinaman cast up on the shores of a little Maine fishing village and shows his adventures running a laundry and evading conversion by the local minister. Lon Chaney, who was the 'merry old gentleman,' Fagin, in 'Oliver Twist'; Marguerite De La Motte, whom you have seen in 'The Three Musketeers'; Harrison Ford and an up and coming youngster, Buddy Messenger, are in the production."



Lobby display and marquee arrangement for presentation of "Shadows" at the Strand, Newark, N. J.

Zelda Theatre Develops New Angle for "Fast Mail"

A new angle to the automobile—locomotive street stunts for the Fox special "The Fast Mail" was used by the management of the Zelda Theatre in Duluth, Minnesota. By tieing up with an automobile agency the use of a car and operator was received without any charge to the management.

Prominently displayed on the body of the rubber tire of the locomotive was advertising for the Fox melodrama at the Zelda. The direct tie-up with the automobile company read "Rosendahl's Oakland Car and Service—Speedy as 'The Fast Mail.'"

"Sherlock Holmes" Well Exploited by Road Show House

The Court Theatre, Wheeling, W. Va., plays road shows almost exclusively. "When we do play a picture," says Fred E. Johnson, business manager of the house, in reporting a fine campaign on Goldwyn's "Sherlock Holmes," "the advertising and exploitation is always a difficult matter because people think of the Court Theatre in connection with spoken plays.

"For our recent engagement of 'Sherlock Holmes,' we did exceptionally heavy newspaper advertising, using the layouts furnished in the press book. A large number of posters and window cards were displayed. What proved one of the best accessories used by us was a reproduction of the Bertillion system record card, with finger prints and other data concerning the villain of the play, Prof. Moriarity. People saved these cards as curiosities.

"In executing these stunts we had the help of Bill Robson of the Goldwyn Exploitation Department.

"A number of book stores gave window displays and as a publicity stunt there was a private showing of the picture for the Police Department. Robson asked the Chief of Police for permission to send him a wire saying Sherlock Holmes would be in Wheeling to try to find the Mer Rouge murderers, but since there was objection by the Chief the telegram was sent direct to the Court Theatre and made a good lobby display feature.

"We were especially pleased with the results of the campaign as we not only did a satisfactory business, but there were no patrons registering complaints that the advertising did not make clear exactly what kind of show we were offering."

To Feature Local Talent

Baltimore vocalists are to have their chance to take part in the programs offered by the Century Theatre in that city. It has been announced that in the future the singers who will appear on the program will be selected from local talent if it is possible. Both men and women are eligible. Each Wednesday morning the manager and the musical director will hear those who make application.

The "When Knighthood Was in Flower" march written by Victor Herbert has served as a means of getting window displays in music stores for theatres presenting this Paramount offering. At the left is a window featuring music rolls in a display for the Lincoln Theatre, Troy, N. Y., and at the right a phonograph display for the Olympic Theatre, Pittsburgh, Pa.

The merchants of Birmingham, Ala., had a fine advertising feature in the "mystery girl" stunt used by the Alcazar Theatre in exploiting the Arrow feature "Night Life in Hollywood." A strip of film showing a local girl was added to the picture and the advertising tied-up directly with the theatre's attraction.

Make Special Childrens' Shows Pay

Box Office Returns, Publicity and Prestige Realized on L. R. Towns' Specially Selected Programs for Children

An advertising method which the Strand Theatre of Birmingham, Ala., L. R. Towns, manager, has found profitable is that of having matinees for the children early in the mornings, before opening time. The Strand has had columns of free advertising on this venture and much commendatory comment from preachers, teachers and mothers because they have selected pictures based on good books and books that are calculated to add a bit to the culture of the child. The matinees are held every Saturday morning. Admission is ten cents.

"The value of good feeling from that class of people known as 'solid citizens' to the man in the amusement business, particularly in the business of exhibiting moving pictures, can not be over-estimated," said Mr. Towns. "The Strand has taken this fact into consideration in its exploitation methods and in its selection of pictures.

"These Saturday morning matinees, which will be a regular feature of the program for the rest of the school term have programs suited to the child mind. Every film is passed on by the manager of the theatre before it is given to the screen for juvenile eyes."

The matinees have proved not only good publicity and excellent general exploitation but the volume of business has made them profitable from a financial point of view as well.

For the first matinee which featured 'Huck Finn" and had a number of shorter comedy features, the crowds of children blocked the sidewalk and crowded into the street. On the second Saturday when they showed "Don't Call Me Little Girl," the result was the same. The matinee programs are announced every Sunday in the amusement sections of the papers and mention is made of them several times.

Bank Cooperates With "Name Your Baby Omar" Stunt

Manager H. B. Watts and his staff outdid all previous efforts in their exploitation of "Omar the Tentmaker" when the First National attraction played the Strand, Omaha, Neb.

Ranging from ordinary routine exploitation to a baby naming contest that stands unique among the unusual names of modern infants. Briefly tabulated the stunts were:

1. Use of 2500 Library bookmarks for the "Rubiayyat;" 3. Dunlap hat window tie-up; 3. Persian rug window tie up; 4 Tie up on Omar cigarettes effected despite the state law which prohibits the advertising of cigarettes in windows; 5. Navy recruiting service tie-up; 6. Radio lecture by noted elocutionist; 7. Baby naming contest on "Omar" and "Shireen;" 8. Good fellow tie-up.

Through the courtesy of the Omaha Bee's radio department, a local elocutionist, recited passages from the "Rubiayyat," tying up with the regular radio entertainment.

The Daily News found a good front page story in a tie-up with the First National Bank whereby it agreed to deposit ten dollars in the bank to the account of the first boy born during the week named "Omar." It was agreed that the same sum was to be put to an account for the first girl born during the week to be named "Shireen." In case of mixed twins, one to be named "Omar," the other "Shireen" the deposit was to be $25. The amount was to remain at the bank until the baby became of age with interest compounded semi-annually.

At the left is a novel display for First National's the "Dangerous Age," used at the Capitol, Detroit. The right shows the "safety campaign" in which the city cooperated with the theatre. It is said this is the first time a tieup has been effected with official Detroit by a theatre.

This is the Harold Lloyd "double" who did the ballyhoo work for the showing of Pathe's "Dr. Jack" at the New Portola, San Francisco.

Exploiteer Makes Public Attack on His Tieup Stunt

Iola, Kansas—John J. Friedl, Paramount exploiteer, added a new kink to the stock "Manslaughter" hook-up campaign when the picture played at the Grand Theatre.

The public came in for the tie-up and the "Drive carefully and avoid 'Manslaughter'" signs were placed on every traffic semaphore and standard. Friedl then wrote a letter to the local newspaper signed "curious" and asked why motion picture advertising was permitted on the city property and if the theatre was paying for it, who was getting the money.

Friedl also planted an editorial along the same lines. Then he got an interview from the mayor stating that the city was perfectly willing to co-operate with any business enterprise provided the city benefited.

Everybody was satisfied, especially since not one cent of cash was involved, and the picture had publicity to the tune of an editorial and two front page stories.

While Paris Sleeps

A Maurice Tourneur Production, Released through Hodkinson. Cameraman, Rene Guissart. Directed by Maurice Tourneur. Length 4850 feet.

CAST AND SYNOPSIS

Henri Santados, Lon Chaney; Bebe Larvache, Mildred Manning, Dennis O'Keefe, Jack Gilbert, His father, Harden Kirtland; Father Marionette, Jack MacDonald, Georges Morier, F. Farrell MacDonald.

Henri Santados, a sculptor who has a studio in the Latin Quarter of Paris, harbors an unrequited passion for his beautiful model Bebe Larvache. She meets Dennis O'Keefe, a wealthy young American, who is touring France, through Georges Morier, a mutual friend. They become infatuated with each other. The intense jealousy of Santados is aroused and he enlists the aid of Father Marionette, a fanatical keeper of a wax museum known as "The Chamber of Horrors," to dispose of O'Keefe. O'Keefe's father objects to his son's love affair with Bebe and persuades him to give her up. Her one condition is that she be permitted to have one night of happiness with him during the Mardi Gras festival. The next evening she places herself in a compromising position with the sculptor as O'Keefe enters the studio. O'Keefe rushes out of the studio, heartbroken, believing she is unfaithful. He is inveigled into the "Chamber of Horrors" by the fanatic who places him in a diabolical torture device. Bebe is forced to listen to his groans on the telephone by Santados who gloats over his victim. Georges Morier arrives in the nick of time and they save O'Keefe from a horrible death. He is taken to a hospital and Bebe and Dennis finally receive the father's blessing

"While Paris Sleeps" affords some splendid scenic effects and rich atmosphere. It is, however, a gruesome story but if shown in a house where melodrama is enjoyed it should give fairly good satisfaction. The story is not wholly convincing but it can be seen that the director has realized his lack of material and has bent his efforts in another direction. As a change from the usual run of pictures this one may prove interesting.

Points of Appeal.—Chiefly the atmosphere used will be most enjoyed during the picture. The scenes depicting the Latin Quarter of Paris are excellent and are worthy of a much bigger production. The shots of the wax museum are good and although these coupled with the inventor's death dealing machine comprise some of the weirdest and most revolting moments of the picture they are effective. To those who knew New York of a few years back these scenes will recall to mind the Eden Musee with its famous chamber of horrors which existed at that time.

Cast.—A very good cast has been selected to do this picture. Jack Gilbert, as Dennis O'Keefe, the American, is good in his role. Mildred Manning, as the artist's model, is also pleasing. Lon Chaney is not the Lon Chaney as he is most familiarly known in the public's eye but his work is satisfactory. Others also give good support.

Photography, Lighting, Direction.—The photography through out is clear and well lighted. Many good effects have been obtained. Direction good

Fury

Inspiration Picture, Released through First National. Story by Edmund Goulding. Cameraman, Roy Overbaugh. Directed by Henry King. Length 8709 feet.

CAST AND SYNOPSIS

Boy Leyton, Richard Barthelmess, Minnie, Dorothy Gish; Captain Leyton, Tyrone Power, Looney Luke, Marry MacCollum, Morgan, Pat Hartigan, Boy's Mother, Jessie Arnold

Boy Leyton is second mate on the "Lady Spray," the ship on which his father is captain. Boy is often chided by his father for his effeminacy and more often beaten While in port Boy proposes to Minnie and suggest that she come to Glascow to meet him there to be married. The ship sails and Boy's father learns of his son's intention to marry. He calls him in and tells him about his mother who had deserted him and tries to turn him against all women but Boy refuses to listen. The old captain is suddenly taken ill and dies aboard ship but he makes Boy promise that he will not marry until he has found the man who wronged his mother. He is buried at sea and the ship continues on her course. Upon reaching Glascow Boy tells Minnie what has happened. While at the bar he meets an old woman who comes in begging During the conversation he discovers she is his mother and he forces her to tell who her betrayer was. Boy learns it is the first mate aboard his father's ship and who is now captain. He finds the man and though greatly outweighed he finally succeeds in knocking him down. The stunned man falls from the ship into the sea and disappears. Boy and Minnie are then married when the ship comes back into port.

An excellent sea story that should find favor with all the admirers of Richard Barthelmess and Dorothy Gish. Good suspense is developed through the story and a thrilling climax is built up. There are numerous comedy situations that are well placed and although the story is quite serious this bit of fun is so excellent that it does not detract in the least from the spirit of the picture. There are also many fine touches in direction that are noticeable and praiseworthy. This production should give splendid satisfaction to the majority of patrons.

Points of Appeal.—The realism of the sea is actually felt in "Fury." All of the scenes have been splendidly made and afford practically faultless atmosphere. Likewise the reproduction of the Limehouse district is excellent as are also the Glasgow dock scenes. There are a couple of thrilling fights that take place during the picture. The burial at sea is an unusual shot but possibly it would have been better to have omitted this. The picture is slightly long, although it never drags or fails to hold the interest, yet we feel that some of the prolonged conversations and numerous close ups could very easily have been dispensed with.

Cast.—Richard Barthelmess does a fine piece of work in his role as Boy Leyton. Dorothy Gish is also splendid in her part. The entire cast of characters in fact is excellent and some fine bits of characterization are given.

Photography, Lighting, Direction.—All scenes are good. Ample lighting is supplied throughout, and the direction is first rate.

Are *you* fishing for an attraction?
Here's one that's *real*—the

REVILLON FRERES *production*

Nanook of the North

Read the exhibitors' comments below. Pathe has had *hundreds* just like them!

"We put over 'Nanook' wonderfully I actually believe this product made more honest-to-God friends for the Belasco than any feature I ever bought It's a great and wonderful entertainment "—*Will H. Sohm, Belasco Theatre, Quincy, Ill*

"Wonderful Greatest picture in last 6 months Big business." -*H W Peery, Ogden Theatre, Ogden, Utah,* (quoted in Ex Herald)

"Most unique picture we ever played, making a host of friends and more than satisfactory from a box-office standpoint" *I H Raben, Ruben-Finkelstein Circuit, Minn.*

"Here s a real special Record business Everyone pleased" *Fred Jones, Rialto Theatre, Nelson, Neb*

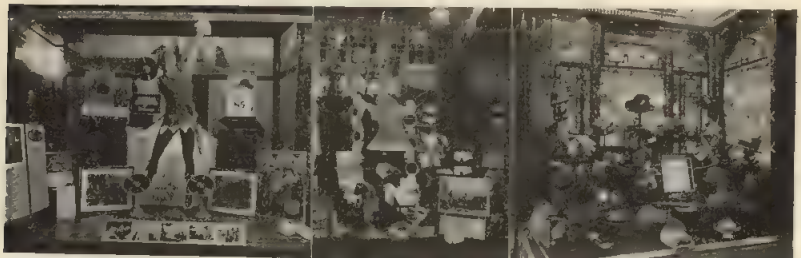
"Exceptiona picture The offering gave better satisfaction than any we have shown in some time "—*Jack Harligan, Jack's, Paynesville, Minn.*

"Broke record in Bakersfield in 4 days showing Did the same thing in Pomona" *Harry C Arthur, General Manager, West Coast Theatres, Los Angeles*

"Most interesting and educationa, picture we have ever shown Pleased patrons 100 per cent It's wonderful "—*J J Sodlak, Bee Bee, Neb*

"Standing room was at a premium for the two days showing and 'Nanook was the talk of the town We heard more favorable comments on t than any picture we have ever shown It was the most natural and life like entertainment we have ever seen "—*John H Raven, Colonial Theatre Co., Mich*

MANY EXHIBITORS ARE GETTING REPEAT BOOKINGS ANY EXHIBITOR WHO DOESN'T PLAY THIS PICTURE IS PASSING UP THE SENSATION OF THE YEAR



The Pittsburgh presentation of Douglas Fairbanks in Robin Hood was accompanied by a campaign which blanketed the city with displays and attractions to sell the public the new United Artists spectacle. Above are some of the window displays. At the left a phonograph store, the center a men's furnishings shop featuring a tieup with the Lion Brand Collars and at the right a hat store, the member of a chain of such shops which featured the "chivalry feather."

"Kindly Act" Tieup Used to Exploit Arliss Vehicle

The "help your brother" angle of the Distinctive Pictures production "The Man Who Played God," starring George Arliss in the role of the man whose bitterness is turned to happiness through performing charities, continues to be the exploitation angle stressed by exhibitors in this country and Canada.

In New York Manager C. Fredrick, of the Union Square Theatre, organized a "Don't Give Up" Association which had a motto of "smile and the world smiles with you" and on which Mr. Arliss was named honorary president. Uplifting messages inviting all his patrons to join the association were sent out by Manager Fredrick. The initiation fee was the price of admission to the show and it is reported a big membership was recorded.

The presentation of "The Man Who Played God" at the Capitol in Montreal was exploited in cooperation with the French language newspaper "La Patrie." A contest was run in which prizes were offered for the recital of the most charitable incident observed by the readers of the paper. Emphasis was placed on the purity of the French used in relating the experiences and the newspaper made a special drive to stir the young people to greater study and use of the French language. The Montreal Herald also helped with a "kindly act" tieup, giving Harry Dahn's theatre a double play on a single exploitation feature.

Publicity But No Profit

M. H. Hustler, manager of the T. & D Theatre, Sacramento, Calif., was held up by burglars and relieved of $500, the evening's receipts for "Sherlock Holmes."

The burglars made good their escape with two bags containing $500 and loose change amounting to $45. The Sacramento papers printed the story over scare heads, and the resulting publicity, of local criminals giving a real Sherlock Holmes problem to solve while the screen "Sherlock Holmes" was being shown, went toward making up a portion of the amount stolen.

New National Tieup for "Robin Hood"

Makers of Nationally Distributed Collars Enter into Scheme to Advertise with Theatres—Tryout in Pittsburgh

Pete Smith, who has directed the exploitation for all presentations of "Douglas Fairbanks" in the large cities, sends word from Pittsburgh, where he launched a campaign for the showing at the Pitt Theatre, that he has perfected a national tieup with the manufacturers of Lion Brand Collars.

The co-operative stunt consists of a special advertising drive for a collar named Robin Hood, the displays and advertising tying up with the theatre's announcements. It had its first workout in Pittsburgh and the Lion Company demonstrated that it is behind the drive 100 per cent.

According to Pete all the exhibitor has to do is communicate with the local Lion Brand dealer when he has Robin Hood booked, supply materials for displays such as paper, stills or whatever, and displays are arranged by the dealer without further bother to the exhibitor.

The tieup with the Columbia Grafanola concern is another which has been used to distinct advantage in all campaigns thus far for Robin Hood. "A stunt that I have been working," continues Pete Smith, "and that can be put over by any exhibitor on any film is a tieup with photograph and camera dealers in Eastman products. On the letterhead of our company I give the store a letter stating that stills for "Douglas Fairbanks in Robin Hood" were made by a Graflex camera and printed on Eastman paper stock.

"Another gag that is always sure-fire on this production is the 'Robin Hood Mark of Chivalry Feather.' I always select the company with the greatest number of hat stores in a city.

"Other window tieups used here were effected with the United Cigar stores, department and book store windows were also effected on the different Robin Hood books, Spalding stores displayed materials used in the production of the picture."

Manager P. F. Schwie is on the high road to fame as a leading impresario of the picture prologue on the evidence of the recent prologue staged at the New Garrick, Duluth, Minn. The prologue illustrated in the above photo was staged in conjunction with First National's "Oliver Twist" during the holidays. The scene opened on the exterior of one of the leading Duluth department stores with an urchin peering through the window at the toys. A fairy queen enters and a wave of her wand is the signal which sends up the front drop. This converts the scene to an interior of the store where the toys become animated and dance. The act concludes outside the store with the appearance of a well-dressed man who takes the child by the hand and indicates he will buy her some of the toys.

A Tom Forman Production

Presented by B. P. Schulberg

SHADOWS

featuring

Lon Chaney
Marguerite De La Motte
Harrison Ford
John Sainpolis
Buddy Messenger
Walter Long
Priscilla Bonner
Frances Raymond

ACCLAIMED the best picture of the year by America's leading critics! A picture you will never forget! Chaney's performance is a milestone in the advancement of the photoplay art. Playing to smashing business everywhere.

A PICTURIZATION of the famous stage play as presented at the Belmont Theatre, New York, by Sam H. Harris. Declared by critics the best written play of 1921.

An exposition of heroism of two kinds; one that thrives on the blare of trumpets and the plaudits of the mob and the other that is marked by deeds of valor for home and family.

A slice of humanness depicting the lives of real Americans!

It's a Preferred Picture

BRUSH BRASS AND BLACK ELECTRIC FIXTURES

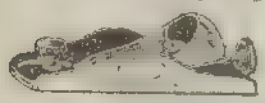
LOW-ANGLE BLOCK PLANES

STANLEY

In the Low-Angle Planes the Cutter Rests on its Seat at an Angle of Only 12 Degrees. This Angle Permits of Great Ease in Working Across the Grain on Hard Woods.

All Cutters are Made of High Grade Steel and are Adjustable Endwise by Means of the Adjusting Wheel at the Rear of the Plane.



Adjustable Throat for Coarse or Fine Work; Length 6 inches; 1⅝ inch Cutter; Weight 1¼ lbs

Each

No. 60 —Nickel Trimmings **$3 90**
No. 60½—Japanned Trimmings..... **3 50**

One in a Box

Solid Throat, Not Adjustable; Rosewood Knob; Nickeled Trimmings; The Cutters are Adjustable Endwise and the Planes are Fitted with the "Hand-y" Feature On Account of their Size and Simple Adjustments, these Planes will Commend Themselves to Teachers of Manual Training.

Each

No. 61—Length 6 inches; 1⅝ inch Cutter; Weight 1¼ lbs.....**$3.30**

One in a Box

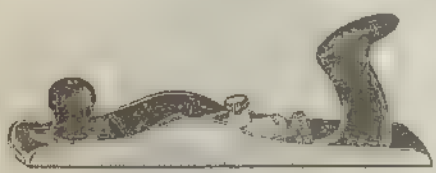
Adjustable Throat for Coarse or Fine Work; with Patented Knuckle Joint. Length 7 inches; 1⅝ inch Cutter, Weight 1⅞ lbs.

Each

No. 65 —Nickeled Knuckle Joint... **$4 50**
No. 65½—Japanned Trimmings ... **3 70**

One in a Box

JACK



This Plane is Especially Adapted for Use in Cutting Across the Grain on Heavy Work, where More Power is Required than can be Obtained by the Use of the Ordinary Block Plane. It is Fitted with a Rosewood Handle and Knob, and is Designed to be Operated with Both Hands.

Japanned Trimmings Each

No. 62—Length 14 inches; 2 inch Cutter, Weight 3⅝ lbs..... **$8 00**

One in a Box

SCRUB PLANES

STANLEY

With these Planes the User can Quickly Plane Down to a Rough Dimension any Board that is Too Wide to Conveniently Rip with a Hand Saw, an Operation that is Sometimes Called "Hogging." This is Made Possible by Reason of the Peculiar Shape of the Extra Heavy Cutter, the Cutting Edge of which is Rounded Instead of Square.

Japanned Cast Iron; Beechwood Handle and Knob.

Each

No. 40 —Length 9½ inches; 1⅝ inch Cutter; Weight 2⅛ lbs. . **$3 50**
No. 40½—Length 10½ inches; 1⅝ inch Cutter; Weight 2½ lbs **4 50**

One in a Box

RABBET AND BLOCK PLANES

STANLEY

Cast Iron, Japanned Trimmings; Rosewood Knob. A Detachable Spur will Easily Change it from a Block Plane to a Rabbet Plane, and Vice Versa, a Combination that will be Appreciated by Many. The Cutter is Adjustable Endwise, and Set on a Skew.

Each

No. 140—Length 7 inches; 1¾ inch Cutter; Weight 1⅝ lbs. **$4 30**

One in a Box

RABBET AND FILLETSTER PLANES

STANLEY

SKEW CUTTER

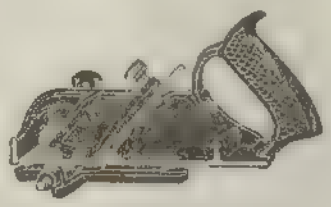
This Plane has an Extra Wide Skew Cutter. An Adjustable Spur is Fitted to Each Side. The Fence and Depth Gauge can be Attached to Either Side; the Plane is Therefore Suitable for Right or Left Hand Work. The Adjustable Fence Slides Under the Bottom, Regulating the Width of the Cut. Remove Arms and Fence, and a Skew Cutter Rabbet Plane is Obtained.

Each

No. 289—Length 8⅛ inches; Handles; Cast Iron; Japanned; 1¾ inch Cutter; Weight 3¾ lbs..... **$5.50**

One in a Box

DUPLEX



This Plane has Two Seats for the Cutter, One for Regular Work and the Other where a Bull nose is Required. It has a Spur and a Removable Depth Gauge. The Adjustable Fence can be Used on Either Side and Slides Under the Bottom, Regulating the Width of the Cut. To Work Same as a Rabbet Plane Remove Fence and Arms.

Each

No. 78—Length 8½ inches; Handled; Cast Iron; Japanned; 1½ inch Cutter; Weight 3 lbs..... **$4.70**

One in a Box

The Sides and Bottom Being Square with Each Other, the Plane will Lie Perfectly Flat on Either Side.

It has an Adjustable Fence which Slides Under the Bottom, Regulating the Width of the Cut.

It is Fitted with Two Spurs, One on Each Side, for Working Across the Grain, Also an Adjustable Depth Gauge.

As Both the Fence and the Depth Gauge can be Attached to Either Side, the Plane is Suitable for Either Right or Left Hand Work.

The Front Part of the Plane can be Easily Detached, thus Providing a Bull Nose Plane for Working Close up into Corners or Other Difficult Places.

The Cutter is Adjustable Endwise. Each

No. 278—Cast Iron; Japanned Trimmings; Length 6¾ inches; 1 inch Cutter; Weight 2 lbs. **$4 60**

One in a Box

RABBET PLANES

STANLEY

CARRIAGE MAKERS

These Planes are Especially Adapted for the Heavy Framing Required in Mining Work, for Carriage or Wagon Building, or in any Work of Similar Nature. They are Constructed Along the Lines of the "Bailey" Plane, Having a Cutter of the Double Type and Being Adjustable Both Endwise and Sidewise.

Length 9 inches; 2⅛ inch Cutter; Rosewood Handle and Knob; Weight 3 lbs.

Each

No. 10½—Flat Bottom..... **$7 70**

One in a Box

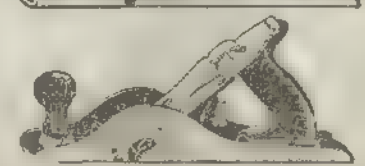
Length 13 inches; 2⅛ in. Cutter, Rosewood Handle and Knob; Wt. 4¼ lbs.

Each

No. 10—Flat Bottom..... **$9.10**

One in a Box

TILTING HANDLE



This Plane not Only has all the Features of Nos. 10 and 10½, but in Addition Both the Handle and Knob can be Tilted to Either Side. This Permits of the Plane being Worked with Ease Close up to Perpendicular Sides of any Height Without Hurting the Hands of the User. It is Also Fitted with Spurs on Both Sides so that it will Rabbet Across the Grain Equally as Well as with it.

Length 13 inches; 2⅛ inch Cutter; Rosewood Handle and Knob. Weight 4¼ lbs. Each

No. 10¼—Flat Bottom.....**$10.90**

One in a Box

TRADE MARK REGISTERED BY THE U. S. PAT. OFFICE.

One in a Box

These will be found to be very convenient for side-rabbeting in trimming dados, mouldings and grooves of all sorts. A reversible nose-piece gives the tool a form whereby it will work close up into corners when required.

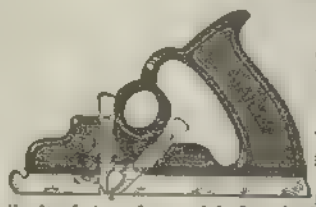
Each

No. 99—Left Hand; Length 4 inches; ½ inch Cutter; Nickel Plated Cast Iron; Rosewood Knob; Weight ½ lb..... $3.20

One in a Box

DADO PLANES

STANLEY



This Plane has an extra narrow cutter, only ⅛ of an inch wide, making it an ideal tool for blind wire grooving, as well as for many other purposes.

It is fitted with a double spur, which prevents splintering when working across the grain and insures a smooth, clean cut.

A depth gauge is also attached allowing a groove to be cut of any desired depth up to limit of the plane—½ of an inch. This Plane will be of special interest to electricians.

Each

No. 239—Cast Iron; Japanned Trimmings; Length 7½ inches; ⅛ inch Cutter; Weight 1 lb. $8.20

One in a Box

The great advantage of these Dado Planes over those made of wood is that they will keep true under all conditions, even in the narrowest widths. They have skew cutters, an adjustable depth gauge, and two adjustable spurs, one on each side of the plane. This adjustable feature permits of the spurs being adjusted to take up wear, as well as for the depth of the cut.

The plane is made in seven sizes from ¼ inch to 1 inch in width. In ordering always give the number (39) and width of cutter desired.

No. 39—Cast Iron; Japanned Trimmings; Length 8 inches.

FARM LEVELS

BOSTROM

Meets every requirement for all kinds of Building, Setting out Farm work requiring a Level.

Telescope is "Achromatic," giving a clear field, and was designed especially for this Instrument; and gives the operator a longer range and clearer sight. You can read the cross on the Target at a distance of about one-fourth of a mile, in any direction, thus being enabled to cover a scope of one-half mile, as the Turret carrying the Telescope revolves.

The line of sight is arrived at by cross hair lines set in the system of the magnifying glasses in the Telescope, and which cannot be dislodged or destroyed. The Turret carrying the telescope and bubble revolves so that the telescope may be pointed in any direction desired, without the necessity of readjusting the level.

Rod and Target composed of a telescopic or sliding target rod, with thumb screw for securing in any position and is graduated to feet, inches and one-fourth of an inch, telescoping to five feet when closed, and to nine and one-half feet when extended, the target is sliding and of the usual form.

Plumb Bob included which adapts the Lever to the use of Architects, Contractors and Builders.

TRIPOD—This is composed of three wooden Legs and Head receiving the Adjusting Head, which supports the Face Plate.

Adjusting Head is screwed on to the Tripod and carries Three adjusting screws for the adjustment of Face Plate and Level to a perfectly horizontal position. Face Plate is attached to the Adjusting Head by a screw and strong spring which presses the Face Plate firmly against the ends of THREE adjusting screws, and at the same time insures a flexible joint, so that the Face Plate can adjust itself to any position. For the purpose of obtaining any angle desired, this Face Plate has a graduated circle, divided into 360 degrees, numbered from zero to 90 degrees in both directions, giving zero points on opposite sides of the circle

Each

No. F—Farm Level Complete with Level, Telescope, Target and a Plumb Bob, all packed in a Neat Wood box; Tripod and Sliding Target Rod Wrapped; Weight Each 11 lbs **$36.00**

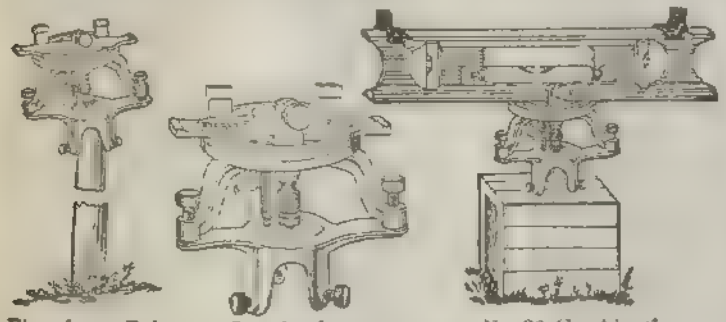
LEVELING STANDS

STANLEY

A Leveling Stand Used in Connection with a Wood or Iron Level and a Pair of Level Sights will be Found in Many Cases a Very Satisfactory and inexpensive Substitute for the More Expensive Surveyors' Instruments. By its use One can Readily Determine Levels from a Given point to One at a Distance Such as Locating or Setting the Profiles for Foundation Work, Ascertaining the Proper Grades for Drains, Ditches, etc. This Stand may be Used on a Reasonably Level Surface or Placed on a Pole or Crow-Bar even when Same are not Exactly Perpendicular. The Base has Three Supporting Arms on which the Stand Proper Rests and by Slightly Adjusting Screws the Swivel Part of the Stand can be Made Exactly Level. A Bolt Passes Through the Stand and is Screwed into the Base Holding the Two Parts together when adjusting the Level for Use. The Swivel is Accurately Machined so that it Works Freely and can be Locked in any Position Desired by the Small Knurled Screw Located Immediately under the Center.



Placed on a Pole. Stand only. No. 39 Combination.

All Parts are Made of Malleable Iron, Nickel Plated.

Each

No. 38—For Use with a Metal Level; 4½ inches Long; 3½ inches Wide; Weight Each 1⅝ lbs. $4.10

MATCHING PLANES

STANLEY

These Planes cut a tongue on the edge of one board to fit a groove in the edge of another board, so that when put together the surfaces of the boards come true.

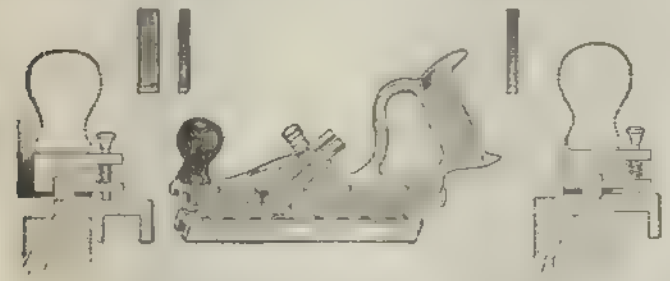
DOUBLE END

These Planes have two separate cutters, a plow, and a tongue tool both governed by one permanent fence. The tongue tool has one edge wider than the other, which overhangs one side when tonguing on center Both tongue and groove are cut by working the tool in the same direction by merely reversing it end for end.

Cast Iron; Nickel Plated; Handles Cast Solid with Body

	Each
No. 146—Cuts 1/8 Groove, on boards 5/16 in. to 1/2 in. Centers on 3/8 in. Weight 1 1/2 lbs.	$5.70
No. 147—Cuts 3/16 Groove, on boards 1/2 in. to 3/4 in. Centers on 5/8 in. Weight 1 1/2 lbs.	6 00
No. 148—Cuts 1/4 Groove, on boards 3/4 in. to 1 in. Centers on 7/8 in. Weight 2 1/8 lbs.	6 40

One in a Box



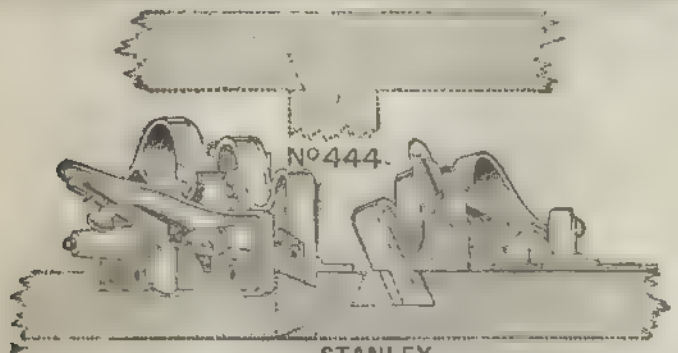
This form has two plow cutters of the same width, and one extra wide cutter. The fence in one setting exposes two cutters for cutting the tongue, and, when reversed, leaves only one exposed for cutting the groove. On thicker boards than the plane works on center, the extra wide cutter is set similar for groove cutter when [illegible] for use.

Cast Iron; Nickel Plated; Rosewood Knobs.

	Each
No. 48—Cuts 5/16 Groove, on boards 3/4 in. to 1 1/4 in. Centers on 1/8 in. Weight 3 3/4 lbs.	$7.50

One in a Box

DOVETAIL TONGUE AND GROOVE PLANES



STANLEY

It will cut any size grooves and tongues to fit with sides at flare of 20 degrees, where the width of the neck is more than one-quarter of an inch and the depth of groove not more than three-quarters of an inch. The tongue and groove are cut separately, and can be made with parallel or tapering sides. The operation of the Plane is simple. A circular containing instructions for assembling and operating is packed with each tool. All parts carefully machined and [illegible]

Three Sizes of Cutters are furnished for forming Grooves; Smaller Size for 1/8 and 5/16 inch Boards; Medium Size for 1/4 and 3/8 inch Boards; Large Size for 1 to 2 inch Boards. One Size Cutter will Cut any Size Tongue.

	Each
No. 444—Nickel Plated Cast Iron; Length 9 inches; Weight 6 lbs.	$15.70

One in a Box

ROUTER PLANES

STANLEY

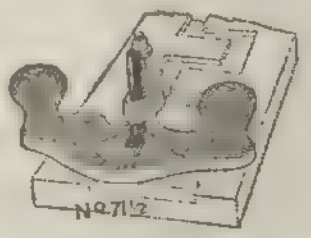
These Planes are for surfacing the bottom of grooves or other depressions parallel with the general surface of the work.

OPEN THROAT

An improved design giving more freedom for Chips and a better view of the work and cutter. Has an attachment for regulating the thickness of the Chip and a second attachment for closing the Throat for use on narrow surfaces. The bottom is designed so that an extra wooden bottom of any size desired can be screwed on, enabling the user to router on larger openings. Cutters have screw adjustment and can be held as shown in illustration or on the back of the cutter Post for **Bull-Nose Work.**

	Each
No. 71—Nickel Plated Cast Iron; Rosewood Knobs; Length 7 1/2 inches; Furnished with one each 1/4 and 1/8 inch Cutters; Weight 2 3/4 lbs.	$5.80

One in a Box



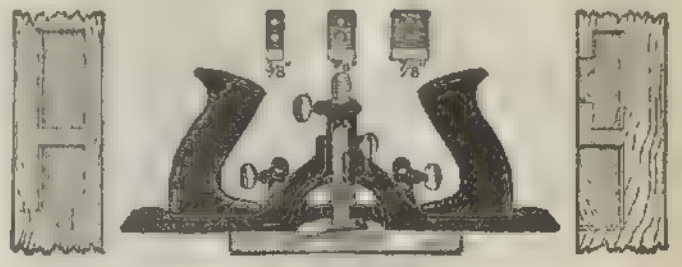
CLOSED THROAT

This is the ordinary form of Router Plane. The bottom is designed so that an extra wooden bottom of any size desired can be screwed on, enabling the user to router on larger openings. Cutters have screw adjustment and can be held as shown in illustration or on the back of the cutter post for **Bull-Nose work.**

	Each
No. 71 1/2—Nickel Plated Cast Iron; Rosewood Knobs; length 7 1/2 inches; Furnished with one each 1/4 and 1/8 inch Cutters; Weight 2 1/4 lbs.	$4.80

One in a Box

DOOR TRIM PLANES



STANLEY

This new Plane will make mortises for butts, face plates, strike plates escutcheons, etc., up to a depth of 3/16 and a width of 3 inches. Its original feature is the method of mounting the cutter, which can be instantly set to work from either end of the Plane or across it. In addition, the cutter is cushioned by a spring which prevents taking a heavier chip than can be easily carried. A fence regulates the position of the cut and insures the sides of the cut being parallel. The depth of the cut is governed by a positive stop.

By removing the fence and locking the cutter post with the thumb screw instead of using the spring a very superior Router Plane is obtained. The bottom is designed so that an extra wooden bottom of any size desired can be screwed on, enabling the user to router on large openings.

	Each
No. 171—Cast Iron, Japanned; Rosewood Handles; Length 11 inches; Furnished with three forged steel Cutters, 3/8, 5/8 and 7/8 inch wide; Weight 3 lbs.	$8.20

AUTOMATIC MILK AND CREAM

This spring balance is intended especially for use in connection with the Babcock test for keeping records of the quantity of milk from individual cows, together with the per cent fat, so as to calculate the butter yield. The scale is provided with a loose pointer, which, by means of a thumb screw, may be set anywhere on the dial to offset the weight of the milk pail, so this does not have to be deducted from the reading.

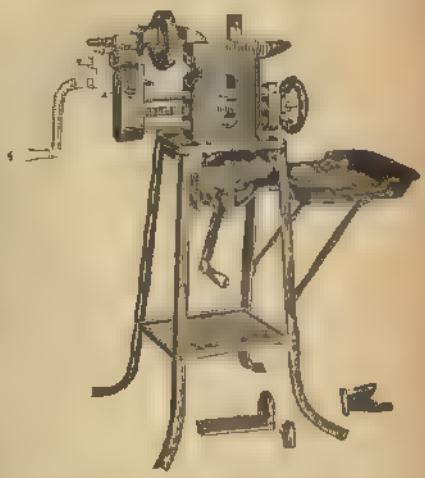
CHAMPION IMPROVED COMBINATION BLACKSMITH OUTFITS



Outfit, equipped with Forged, Vise, Anvil, Pipe Vise, Drill Press and Emery Grinder, strictly a high grade combination tool built for service.

Gears are all cut. Forge pan 12x14 inches, large enough to take a plowshare. Pan cut away so that a plowshare can be put into it. The Blower-head attached is a real cut-gear, high speed outfit that runs silent, is speeded high enough to produce a white pressure heat so that welding can be done on any work.

Emery wheel is screwed on stud between vise jaws attached to high speed gear on this gear box, two substantial bearings—one on each side of vise jaws—support this wheel, making it a rigid, practical, durable grinder.

Screw accurately cut and two heavy shafts support vise so that jaws meet perfectly without lost motion.

Pipe vise operates without any change whatever. No parts are removed or lost and this machine takes pipe up to two inches.

Legs are angle steel, well riveted to top plate and tool tray, two steel rods support forge pan.

Height over all	40 in.
Height to top of Forge Hearth	26 in.

STERNO COOKING UTENSILS

CANNED HEAT

Non-explosive, odorless.
A paste like cream which ignites easily, burns steadily and gives intense heat until consumed.

No. 4006—W't per doz. 4 lbs., per dozen $1.80
ONE DOZEN IN A DISPLAY CASE

STOVES

Aluminum.
Polished aluminum boiler with folding handles, detachable knob, set complete with nickel plated steel collapsible stand and one can of Sterno heat.

No. 5001—Capacity 1 pt., w't each 1 lb. .....per dozen $16.00
TWO DOZEN IN A CARTON

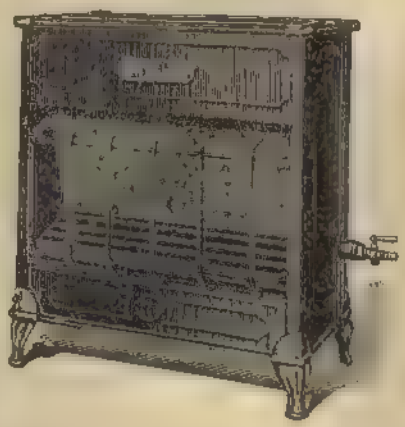
GLOGAU'S ALCOHOL STOVES

For travelers, sick room, camp, chafing dish; manufactures its own gas by first vaporizing the alcohol, produces more heat than any other style of alcohol stove and consumes only one-eighth the usual amount of fuel; absolutely safe—explosions cannot occur; wick is invisible and never requires renewal. It is smokeless, odorless and forms no soot; burns as steadily as a regular gas stove; can support a vessel weighing 100 lbs., capacity of reservoir 7 oz.

No. 75—Nickel plated brass body and bottom, nickel plated steel frame, w't per doz. 7 lbs., per dozen $16.00

"CORCO" GAS HEATERS

Asbestos Back



Entire body made of 26 gauge Polished blued steel. Top corners put together with roll seam and finished with nickel-plated pressed steel corners. Sides, front and top are paneled. Back reflector is on an angle with top towards front of heater and is covered with flake asbestos attached with silicate of soda. Straight iron burner pipe at rear bottom, with special valve connection for attaching gas tubing or ⅜ in. pipe. Side reflectors and fender in front of burner pipe made of pure 10 oz. copper. Removable electric welded wire aluminized dress guards. Lighter hole on same side as valve. Adjustable air mixer on end of burner pipe. Rolled edge on bottom of body forms seat for legs which are bolted on at each corner. Equipped for artificial gas. Extra orifice provided for natural gas use.

SINGLE BARREL TRAP GUNS

L. C. SMITH

SPECIALTY TRAP GRADE

Barrel—Nitro blued steel or Damascus steel, compensating ventilated top rib, automatic ejector, any bore desired, chambered for 2¾, 2⅞ or 3 in. shells.

Stock—Fine quality walnut, full or half pistol or straight grip to order, checkered grip and fore-end.
Frame—Beautifully engraved, hammerless.

SPECIALTY GRADE

The compensating ventilated top rib automatically adjusts itself for the 70 degrees difference between the barrel and rib during constant shooting and so cannot buckle the barrel. The sides of the rib are made parallel to insure quick and accurate sighting.

No. F2ST—12 gauge, 30, 32 or 34 in. barrel, w't 7½ to 8¼ lbs.★ ..... each **$235.90**

EAGLE GRADE

The decoration, while not elaborate, is of a nature to give the style that classes it far above the usual. On the left lock plate appears a ring-necked pheasant in bold relief against a frosted back ground; and on the right a duck in full flight. The top and bottom of the frame are ornamented with scroll work of artistic design.

No. F3ET—12 gauge, 30, 32 or 34 in. barrel, w't 7½ to 8¼ lbs.★ ..... each **$321.20**

CROWN GRADE

The detail of the gold inlay and engraving is delicate and pleasing to the most critical eye.

No. F4CT—12 gauge, 30, 32 or 34 in. barrel, w't 7½ to 8¼ lbs.★ ..... each **$443.30**

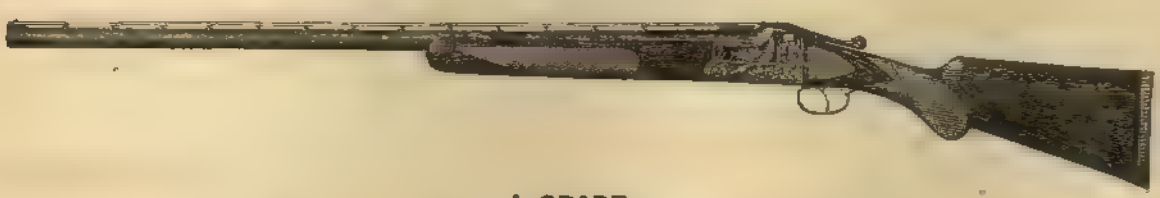
MONOGRAM GRADE

The engraving, embodying scroll and relief work, is of the utmost distinctiveness both in design and execution.

The barrels are chosen of Monogram steel with a view to strength, service, proper balance and quick handling. The stock is from imported walnut, carefully finished, and is in keeping with the entire gun.

No. F5MT—12 gauge, 30, 32 or 34 in. barrel, w't 7½ to 8¼ lbs.★ ..... each **$634.70**

FOX



J GRADE

Barrel—Highest grade Chromox Fluid steel; sliding ventilated top rib; automatic ejector.
Frame—Beautifully engraved; heavy tapered steel cross bolt; one-piece nickel steel hammer; Coil springs throughout.
Stock—Fine quality walnut, full or half pistol or straight grip to order, checkered grip and fore-end.

No. FJTE—12 gauge, 30 or 32 in. barrel, w't 7½ to 8¼ lbs.★ ..... each **$264.50**

A wonderfully, close, even shooting gun with the highest quality of workmanship and finish throughout.

★ **Items Marked Thus ★ Are Shipped From Factory Only.**

STEVENS DOUBLE BARREL SHOT GUNS

HAMMERLESS

MODEL 330

Low in price—High in quality—Light in weight.
Safe in shooting—Fine in appearance.

SPECIFICATIONS

Barrel—Blued, high pressure compressed steel. Tested with Nitro Powder. Matted rib. Right barrel modified, left barrel full choke.

Action—Hammerless. Top lever and bolt in one piece. Coil Springs.

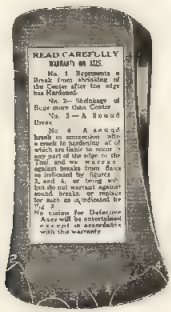
WARRANTY ON AXES



READ CAREFULLY
WARRANTY ON AXES
No. 1 Represents a Break from shoulding of the Center after the edge has Hardened.
No. 2— Shrinkage of Edge more than Center
No. 3—A Sound Break
No. 4 A sound break, or one caused by a crack in hardening at or which are liable to occur any part of the edge in the Tool and we warrant against breaks from flaws as indicated by figures 2, and 4, or lamp will but do not warrant against sound breaks, or replace for such as indicated by No. 3.
No claims for Defective Axes will be entertained except in accordance with this warranty

The steel in all axes, in order to carry a good edge, must be of high temper; and for this reason a good axe is more likely to break than a poor one. Soft steel will first bend, and then break; so it is impossible for an axe that is too soft to hold a good cutting edge. Breaks from flaws are readily known by their angular form, not by the color, while sound breaks (which are no fault of the manufacturer), are always circular in form as shown in illustration.

Our warranty does not cover open or broken eyes, which are clearly the result of axes being used as mauls instead of for chopping. Axes should not be ground on an emery wheel, because the overheating draws the temper from the steel.

No claim for defective axes will be entertained unless in accordance with this warranty.

Defective axes must be returned to us with freight charges prepaid

WEIGHTS

Straight weight axes, 3 and 3½ lbs., and assorted weights, 3 to 3½ and 3 to 4 lbs., take base price. All other straight and assorted weights are subject to the advances listed in the complete classification of weights below. Weight of each axe is stamped on the poll

HANDLED AXES

All of our axes (excepting the Corona) are handled in our own handling department. For weights of handled axes add 16 lbs. per dozen.

AXE RACKS

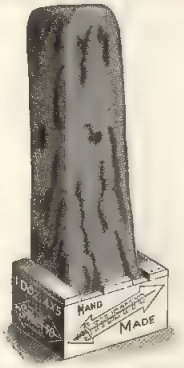
One —Stiletto— rack only is given free with a purchase of three dozen assorted axes of our brands.

Made of Oregon pine, stained light oak, velvet finish. Capacity, 32 handled or unhandled axes.

No.	Height	Length	Width	Wt. each	Each
8	....32 in..	...27 in.....	14½ in.	... 25 lbs.....	.$13.00

One in a crate.

HANDLING OF AXES



All our axes one dozen in a case. Handles securely wrapped in burlap. Our axe handling department is under our own supervision. We employ workmen who know by years of experience the correct shaping and set of the handle. Every axe is handled by a fixed gauge, to insure its being perfect in this respect.

CLASSIFICATION AXE WEIGHTS

Add per dozen to base price on all single and double bit axes.

STRAIGHT WEIGHTS

Stroud Steel Frame Elevating Grader

The best machine on earth for building roads and ditches. Strongest and lightest running.

In the construction of this grader only the best material is used throughout and it is universally known to be the strongest, most durable and smoothest running grader made.

We employ a number of special arrangements or features found exclusively on the STROUD, which enable us to give our machine strength and durability without adding to its weight. The value of the special features will be readily recognized by all those who are familiar with grading and road making machinery.

Flexible Steel Frame

The frame of the Stroud Steel Frame Elevating grader is made of eight inch channel steel, wide enough for strength, thin enough for flexibility and strong enough to withstand any strain that the side hills, ruts and deep furrows may put upon it.

Because of the flexibility all jar is eliminated and the strain equalized; the machine yields freely to its motion, bends to its task, runs smoothly and wears hard.

Notice the **side brace** which prevents the machine from settling down, stretching out and letting the pinion shaft get out of line.

Many Exclusive Features.

The Tongue is made of white oak. The side braces are thin enough, wide enough and strong enough to withstand the most severe strain to which the tongue is put.

The Drum Shaft and **Iron Roller Shaft** are extra large in size and run in specially designed rust proof boxes.

All wood rollers on which the belt runs are turned from the best grade of poplar.

Our **Steel Bolster** is made from steel eye beam, and it will never twist, break, split, nor go to pieces.

Remember it is steel.

Guarantee—Our machines are all made from the best grade of steel, all workmanship guaranteed; they will excavate and place in railroad or levee embankment one thousand (1000) to fifteen hundred (1500) cubic yards of earth in ten hours actual work, or will load from 600 to 800 wagons per day wherever stones or roots are not of sufficient size to impede progress in plowing and where the ground is free from frost and is firm and dry enough to support machine and teams.

The "Little Red" Dump Wagon

This wagon is especially constructed and adapted for railroad contractor's use only in connection with Elevating Graders.

For simplicity, strength and durability the Little Red Wagon has no equal. It is instantly dumped by a touch of the hand and the bottom of the bed closed without stopping the team.

The compound lever foot Brake enables the driver to lock both rear wheels with his right foot though the wagon is heavily loaded, at the same time leaving both hands free to handle the lines.

Capacity 1½ yards water measure without sideboards; 2 yards with sideboards. Tire 4 inches. Ratchet dump and fifth wheel brakes. Approximate weight 1800 pounds. This is the only Dump Wagon on earth built with a 3¾x11 long sleeve skein.

We also furnish this wagon in larger sizes.

Wire or write us.

ERECTOR

"THE TOY LIKE STRUCTURAL STEEL"

The toy with the famous square girders. The gears, pinions, pulleys, side plates, shaftings, angle irons and many other Erector parts are real true to life. With them a boy can duplicate practically any engineering feat. He can build the frame work of miniature sky scrapers, draw-bridges, cranes, battleships, elevators, derricks and thousands of things too numerous to mention, while hundreds of models are illustrated in the book of instructions that comes with each outfit.

With the sets from No.4 up, comes the powerful little Erector motor to furnish power for elevators, derricks, and other moving models. This little motor can be operated on batteries or through a transformer on house current. It can be geared to run slow or fast and is powerful enough to satisfy any youngster.

Erector develops the constructive side of a boy's nature; with it he learns self reliance, becomes observing, practical and at the same time it furnishes him with the kind of fun he demands in all his toys.

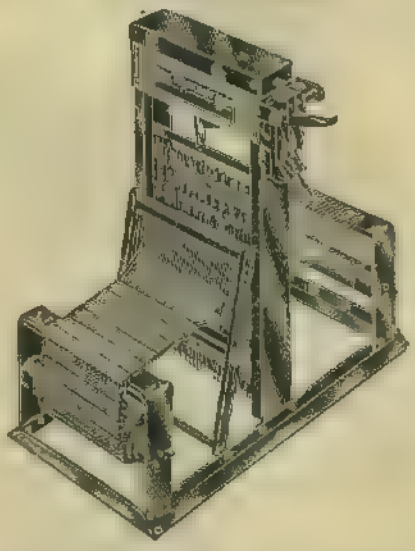
ONE IN A BOX

ARTCRAFT LOOM



Made almost entirely of steel and finished in black and blue enamel. The Loom has two harnesses and the width of the Warp space is four inches. This makes it possible for one to weave runners, neckties, and a great many other attractive and beautiful articles in stripes and checks. The harnesses are operated by two semi-automatic shifting levers a device entirely new and distinctly of Structo design, and which adds greatly to one's ease in weaving.

The base frame of the Loom is 12¾ in. long, its width 6¾ in. and the height is 13 in. It comes with two Shuttles, a Draw-on Hook, and five feet of Warp and is neatly packed in a strong cardboard box with a complete instruction sheet.

Many beautifully combinations of color can be worked out on this Loom.

No. 60—W't each 4 lbs. .....each $6.60

ONE IN A BOX

STRUCTO BUILT-UP TOYS

ROADSTER

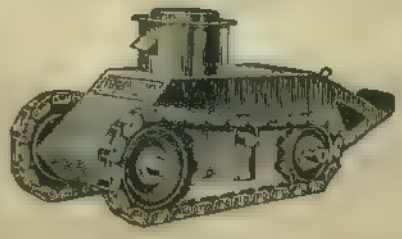
Has the long, low, racy, lines of the latest roadster.

10½ in. long, 8½ in. wheel base, 3½ in. tread. Equipped with artillery type wheels, white tire effect, red spokes, single unit Structo mechanical motor, powerful spring, with machine cut gears and substantial bearings. Auto travels long distance (built of steel solidly constructed) and may be guided in any direction with knuckle steering device.

No. 40—Finished in enamel of brilliant colors, red, trimmed with gold and black, w't each 2¼ lbs., each $3.00

ONE IN A BOX

WHIPPET TANK



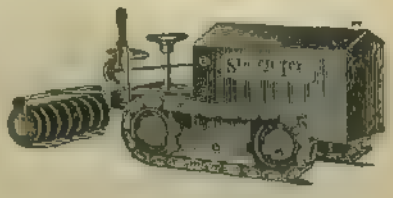
Designed like the famous Whippet Tank.

10½ in. long, 9½ in. wide, equipped with powerful slow speed motor, which drives the mechanical caterpillar smoothly over rugs, carpets or rough surfaces. Caterpillar traction has 2 in. sprocket in front and 1 in. sprocket in rear.

No. 48—Finished in French gray, trimmed with red and gold, w't each 3 lbs. $5.00

ONE IN A BOX

CATERPILLAR TRACTOR



Actually runs on caterpillar.

11½ in. long, 3½ in. tread, equipped with powerful Structo Motor, having controls speed of travel. Equipped with mechanical caterpillar, composed of individual links securely fastened together and travels over steel sprockets.

No. 44—Finished in brilliant colored green, trimmed with red and black, w't each 2½ lbs. $5.00

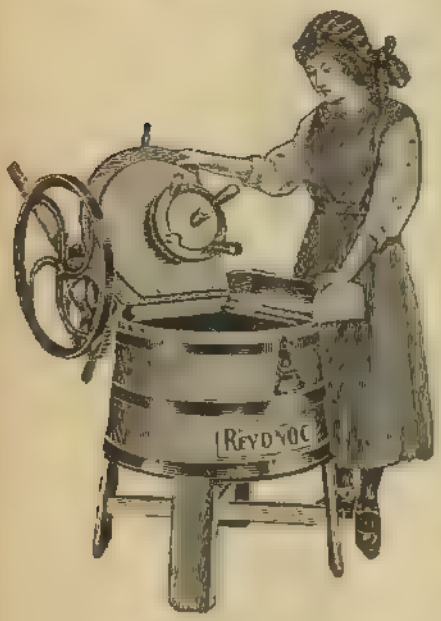
REVONOC HAND WASHERS



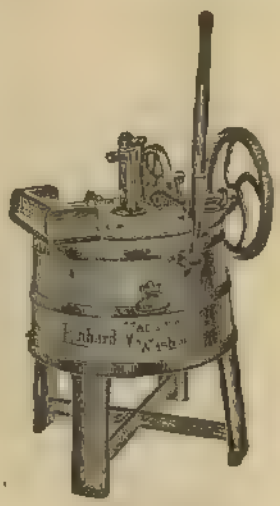
Easy Access to Tub.

Red Louisiana tub, grained, corrugated interior, double top, hinged cover, strong wringer attachment, double handle socket, cross braced legs, absolutely rigid.

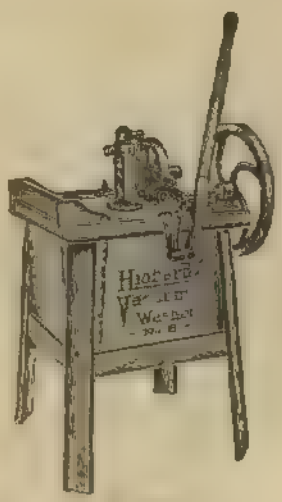
The REVONOC lever arrangement is such, that the machine, when full, may be operated by a child, and the motion is such, as not to grow tiresome when continued. The fly wheel makes seven revolutions to one down ward thrust of the lever. The compound gearing together with the rapid motion of the fly wheel insures a uniform and non-jerking operation of the machine. The top is made double which eliminates warping, and the metal parts are simple and strongly made.

No. W10 REVONOC—Height 30 in, width 23 in., diam. of fly wheel 19 in., w't per doz. 1080 lbs. .....each **$22.00**

HIBBARD BALL BEARING VACUUM WASHERS



No. W8.



No. W8.

Cold Rolled Steel Shafting, Best Quality Malleable and Gray Castings, and Brass Ferrules, Wood Parts of Selected Material, Natural Finish with Three Coats of Varnish, Metal Parts Finished in Bright Red Enamel Ornamented with Gold Bronze, Spiral Cut Gears, Extra Long Bearings on Counter Shaft.

The Hibbard is so designed that a small amount of effort will secure the maximum result in a very short time.

In use, hot suds are put in up to the marked water line together with the same quantity of clothes which are handled in the ordinary washer. The lid is closed, the lever set in motion and wh the plunger head comes above the water line, its chambers are filled with air which is forced out through the fibers of the clothes on the downward stroke. On the upward movement a vacuum is formed in the plunger which sucks the suds back through the garments with a force which brings out all the dirt at a remarkable speed. This vacuum system is rapidly gaining recognition as the most efficient method of cleaning.

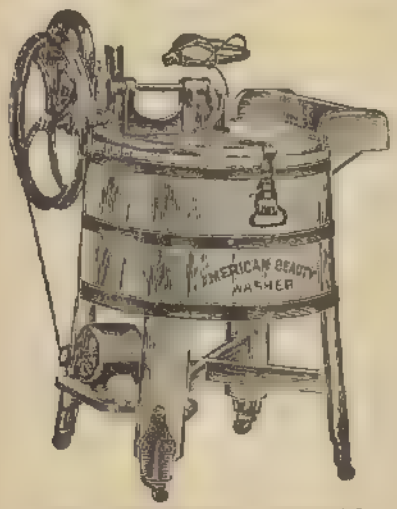
No. W8—Hibbard, Louisiana cypress tub, stave legs with cross braces, double lids, reinforced wringer bottoms, inside of bottom and sides corrugated, height 36 in., width at top 22 in., at bottom 24 in., depth of tub 12½ in., w't each crated 90 lbs., each **$27.00**

ONE IN A CRATE

No. W8—Hibbard, 26 gauge galvanized metal tub, double lids, hinged cover, legs braced with steel truss rods, height 36 in., width at top 22 in., at bottom 24 in., depth of tub 12½ in., w't each crated 90 lbs., each **$25 00**

ONE IN A CRATE

ELECTRIC WASHING MACHINES



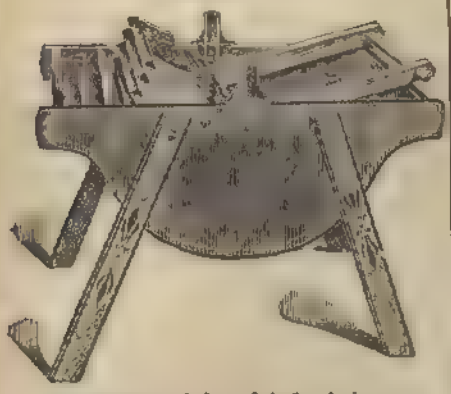
THE AMERICAN BEAUTY

Furnished with ¾ H. P. Standard motor 110 volt, either alternating or direct current. Cypress tub corrugated throughout. Geared to give the dolly 85 full ⅔ turns per minute. Ball bearing casters and 10 ft. cord with separable attachment plug, brass drain faucet.

With each machine an emergency lever is furnished, with which to operate it in an easy way if power for the moment is not available.

No. W17—Without wringer, w't crated 125 lbs. $60.70

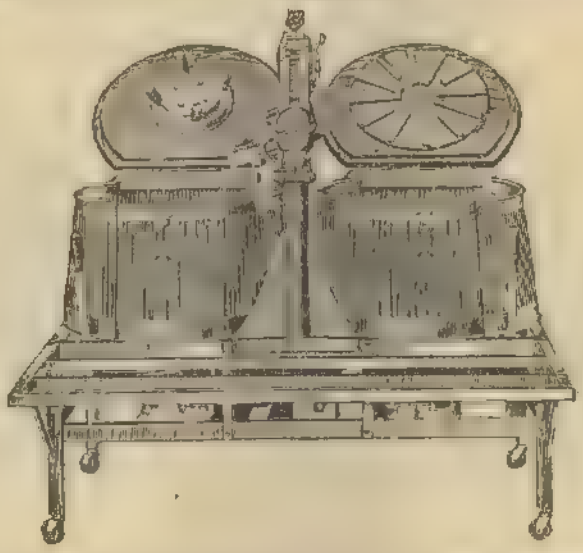
HAND POWER WASHING MACHINES



ADVANCE, kiln dried Arkansas cottonwood, height 24 in., length 33 in., width 21 in., galvanized iron bottom, with removable hardwood corrugated slats, hardwood cylinder and handle, galvanized iron socket guides, four hardwood bolted legs, w't per doz. 480 lbs.

No. W15—From stock, each $9 90

THE IMPROVED DOUBLE TUB Hibbard WASHING MACHINES



The improved HIBBARD Double Tub Electric Washing Machine excels all others. All parts entering into its construction are made of the highest quality material and workmanship, perfectly fitted, exceptionally strong and with proper care will last for many years. It is equipped with accurately cut **gears, completely enclosed,** and operating in hard oil which insures smooth running and prevents wear. This machine will do the work in just half the time of the single machine. Two batches of clothes can be washed at the same time or, if desired, one tub can be used for washing and the other for rinsing. **Tubs operate independently of each other.**

The wringer is mounted on a substantial post that is securely bolted to steel frame, is equipped with special lever that permits swinging and locking **of wringer in any desired position.**

The motor is splash proof type, especially designed for this machine, is full ¾ horse power which insures ample power to operate both tubs and wringer **at the same time.**

Machine is equipped with two wood dollies and one disk which are interchangeable. We recommend the disk for washing the finer pieces and the **dolly for the heavier garments.**

Each machine is furnished with folding bench for two extra tubs. When not in use the bench can be folded down entirely out of the way.

Illustration shows electric model, can also be furnished with flat faced pulley so that machine can be used in connection with gasoline engine.

No. F50—Electric, copper tub★ .....each $192 00

No. F149—Gasoline, copper tub★ .....each 150.00

SEALING MACHINES

STAR

Designed for Use in All Lines of Business, as it Accommodates Perfectly Any Width of Tape, Varying from ⅛ to 3 inches, and Contains About 1600 feet, Making it At All Times Ready to Seal Any Size Package at Minimum Cost.

The Moistening is Done Automatically by a Small Roller.

WHY YOU SHOULD HAVE A STAR SEALER

Because—

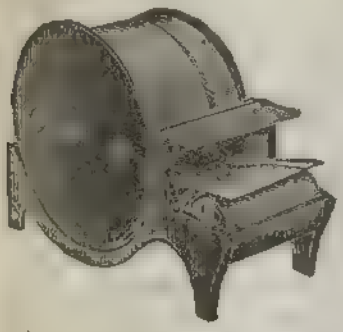
It saves seventy-five per cent of your twine bill,
It saves about one-third of your wrapping paper.
It saves about one-half the time required in wrapping and tying.

The package will not become open and scatter goods along the street, especially when carried by children, and claims are thereby prevented.

Your goods are protected, as a package cannot be opened and a part of the goods taken without breaking the seal.

The advertising feature is the greatest that has ever been presented to the business men of the country. For with the STAR SEALER we can give you 3,200 advertisements on your business and distribute them in the city or country without taking up one minute of your clerk's time, for the small sum of sixty cents, and in quantities for much less than that.

The moistening is done automatically by a small porcelain roller, revolving in a tank of water, which will not create an offensive odor, as in the case of the old-fashioned process of moistening by the use of a sponge.



Large Size, For Store and Factory Use

For Tape 1 to 3 inches; Brass Roller and Tension Knob, Vermilion Red Enameled Body, Black Enameled Discs; Lettered in Gold.

Provided with a Corrugated Metal Cutting Knife which is so arranged that all Dampened Tape is cut off. The Tape used is the Latest Improved and Gives no Offensive Odor as in the Case of Old-Fashioned Processes Utilizing a Sponge.

	Each
✣No. B—Without Tape; Length Over All 12 inches; Height 8½ inches; Width 5 inches; Weight Each 14 lbs.	$11 00

One in a Box

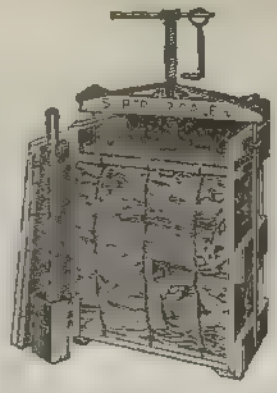
WASTE PAPER BALERS



SUPERIOR

Cross-Beam Strengthened by Truss Rods Making Breakage Almost Impossible. Double Bottom Reinforced by Steel Rod Running from One End of Cross-Beam Entirely Under Baler and Back to the Other End of Cross-Beam, Thus, when Pressure is Applied, the Steel Rod Makes a Complete Support for the Bottom, which is the Weak Point in Most Balers.

The Superior Giant Steel Screw Applies Enormous Pressure, Making as Firm and Compact Bales as Possible with a Hand-Power Baler. The Cross-Beam and Screw are Held in an Upright Position, while Pressure is Being Applied, by Automatic Spring Locks. No Pins or Bolts to Bother with. A Thumb Pressure Releases these Locks, Allowing the Cross-Beam to Automatically Tilt Back, Leaving the Top Entirely Free and Open for Filling. Use Ordinary Baling Wire.

Two Dozen in a Box

TROLLEY FISHING OUTFITS

WAGNER

Trolley Fishing is Well Known by All Lake Fishermen; It is the Best Fishing from Pier or Boat or a High Place Beside a River; It is Done by Throwing Out a Heavy Line with an Automatic Anchor Attached to the End; When Anchor Has Caught, Pull Line as Tight as Possible, then Fasten to a Stick or Tree; Then Let Trolley Run Out in This Line with a Regular Fishing Line and as Many Hooks as You Like. (See Illustration.) Attached to an Alarm Bell Gives You a Chance to Use More Trolleys and a Rod.

AUTOMATIC ANCHORS

For Trolley Fishing, Anchoring Small Boats, When Hunting or Fishing; Also Anchoring Decoys.

Throwing Out This Anchor Opens it Automatically; To Haul in, Pull Line Tight and Let Go at Once, This Will Loosen Anchor and Close it Automatically So it Can be Hauled in Easily

Per Dozen

No. AC—Made of Malleable Iron with Steel Folding Wires; Length Over All, 6¼ inches; Weight Each, 14 ozs.; Weight per Gross, 143 lbs $8 00

RESULTS

—in your office, with your stenographers, doing your kind of work; practical month-in-and-month-out results, under all extremes of working pressure.

The reputation of the Royal is built on results of this kind. The claim of its superiority is based on them—more letters and records typed per day, clean impressions even after long usage, lower office overhead, fewer mistakes, and greater volume.

Whether you are in the lumber business or making motor cars, whether your profession is medicine, law or architecture, whatever you are engaged in, the Royal offers you something definite, tangible, *provable*—the finest possible typing at the lowest possible cost over the longest possible period of time.

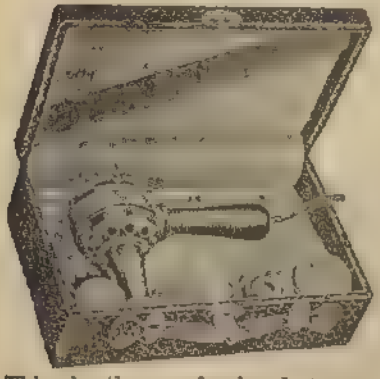
HAMILTON BEACH VIBRATORS

A 300 page book of instructions free with each Hamilton Beach Vibrator.

Designed especially for home use. A beautiful instrument, very compact and strong. Complete with cord and attachment plug (for connecting it to the electric light fixture) and six applicators all packed in a handsome carrying case of black leatherette lined with red satin. A speed-regulating switch enables the motor to be run fast or slow.

No. 20E—Type A, for 110 volt, 60 cycle A. C., w't 6 lbs., each $19.50

ONE IN A CARTON



This is the professional type of vibrator used by physicians, nurses and masseurs. It is of heavier construction and has a more powerful motor than the vibrator designed for home use. The deep, penetrating vibrations produced make it particularly suitable for cases requiring energetic treatment. The vibrator and six applicators come packed in a handsome black leatherette carrying case satin lined.

No. 21E—Type C, for 110 volts, 60 cycle A. C., w't 7 lbs., each $28.50

ONE IN A CARTON

HAMILTON BEACH VIBRATORS

Light, efficient for family or professional use.

Highly polished combination white metal die cast vibrator, no speed regulator, but a push-button in handle to start or stop instantly, seven feet of cord, attachment plug in a satin lined black leatherette carrying case.

No. 23E—Type "D", for 110 volts, 60 cycles, AC or DC, w't 6 lbs., each $16.50

ONE IN A CARTON

HAIR DRYER

The motor being in the center of Dryer balances it perfectly, fully enclosed so there is no danger of catching the hair. Either hot or cold air is available at the turn of the switch.

No. 22E—Highly polished aluminum, universal motor, operates on either AC or DC, 105 to 120 volts, 25 to 60 cycles, complete with 8 feet reinforced cord and attachable plug that will fit any light socket, w't 6 lbs., each $22.50

ONE IN A CARTON

APOLLO MEDICAL APPARATUS

AMERICAN REVOLVING SCREW CASES

These cases are made of the best Tennessee poplar, cherry finish, or oak in natural, orange or antique finish, double top and bottom, with the grain of the wood crossed, glued and screwed together strong enough to bear three times the weight that can be put into them, iron standards screwed firmly into the iron hub in the bottom, making them perfectly true and solid. Front drawers are of best Norway pine provided with stops to prevent removal, each drawer labeled.

The perfect locking device for these cases is so arranged that all the drawers can be locked and unlocked at one time, a lever being attached to the case on the under side, and is only accessible to the person behind the counter. By pressing this lever down it unlocks the drawers and engages in a catch which holds it in this position until it is desired to again lock the drawer, when by a slight touch the lever is disengaged, thus locking the drawers.

When cases are used for fine tools or valuable articles, but one key provided, so only person having key has access.

State style case wanted, poplar or oak; with or without label holders; whether locking device, with or without key.

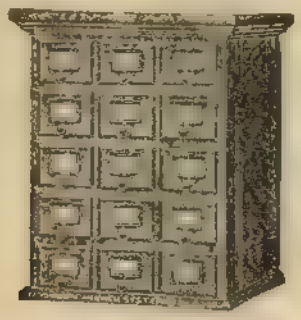
WARREN STANDARD SCREW CASES

The exterior of all Warren Screw Cases is made of oak, antique oak rubbed dull finish, and the interior of soft wood, usually poplar. The backs are made of well seasoned, matched and beaded lumber and varnished. The drawers have sliding covers so arranged that only one compartment is open at a time. By removing drawers from screw case, contents of any particular compartment can be emptied in the hand or on the counter and returned, or goods from original packages emptied into the different compartments without danger of mixing the different sizes. All screw case drawers have pulls, card frame and cards attached to fronts and our inlaid price card on the side of each, where a record of the size, number, cost and selling price of the different sizes can be kept, opposite each compartment.



No. F6100—Case, 19⅜ in. high, 16½ in. wide, 15½ in. deep, contains 15 oak front drawers with sliding covers, with three removable partitions, forming four compartments in each—60 in all—approximate w't packed 70 lbs., each★ ... ...$.....

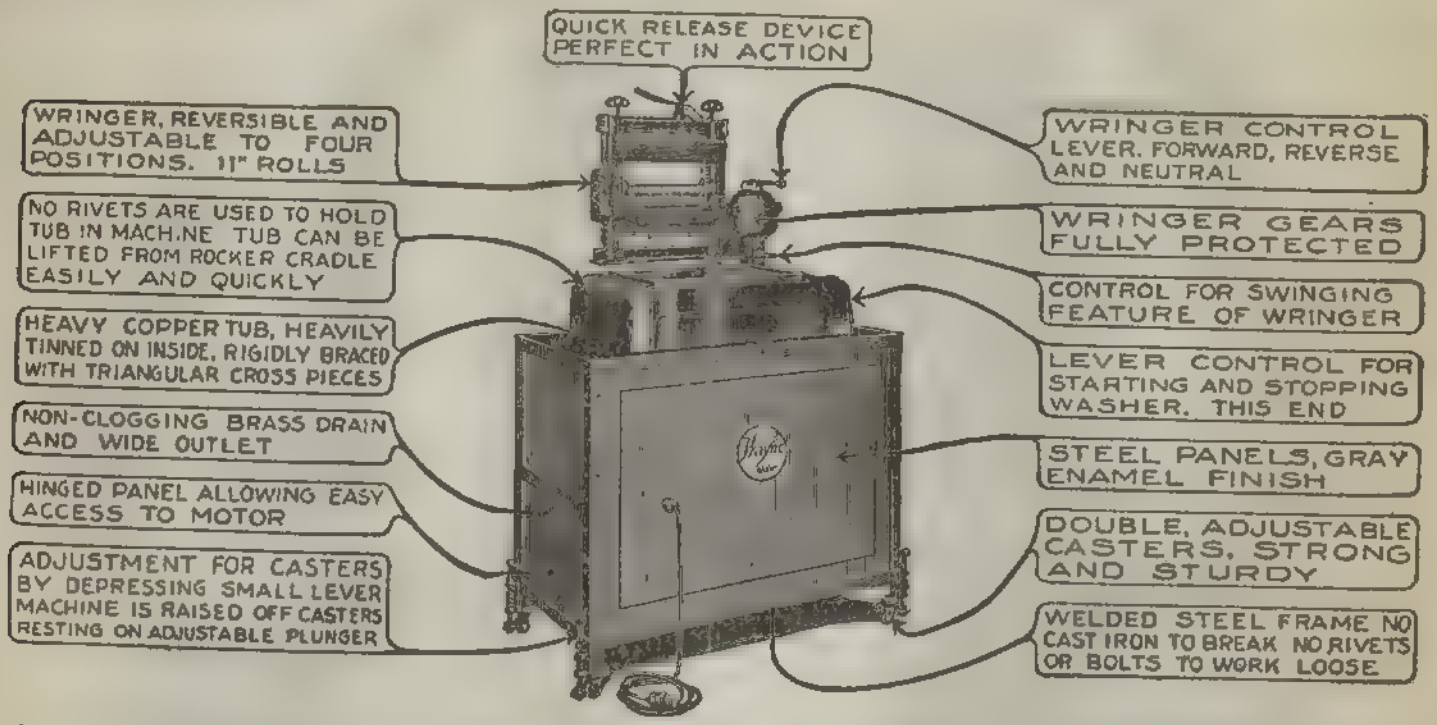
ELECTRIC WASHING MACHINES

WAYNE

ELECTRIC

The Principal of the Wayne is the Same as the Time Honored Method of Washing Delicate Fabrics in a Mason Jar, Just Tossing the Most Delicate Lingerie, the Most Commonplace Household Linens or the Rag Rug Gently Back and Forth. The Rocking Motion is Obtained by Means of Curved Steel Rockers on Which the Removable Copper Tub Rests.



QUICK RELEASE DEVICE PERFECT IN ACTION
WRINGER, REVERSIBLE AND ADJUSTABLE TO FOUR POSITIONS. 11" ROLLS
NO RIVETS ARE USED TO HOLD TUB IN MACHINE TUB CAN BE LIFTED FROM ROCKER CRADLE EASILY AND QUICKLY
HEAVY COPPER TUB, HEAVILY TINNED ON INSIDE, RIGIDLY BRACED WITH TRIANGULAR CROSS PIECES
NON-CLOGGING BRASS DRAIN AND WIDE OUTLET
HINGED PANEL ALLOWING EASY ACCESS TO MOTOR
ADJUSTMENT FOR CASTERS BY DEPRESSING SMALL LEVER MACHINE IS RAISED OFF CASTERS RESTING ON ADJUSTABLE PLUNGER
WRINGER CONTROL LEVER. FORWARD, REVERSE AND NEUTRAL
WRINGER GEARS FULLY PROTECTED
CONTROL FOR SWINGING FEATURE OF WRINGER
LEVER CONTROL FOR STARTING AND STOPPING WASHER. THIS END
STEEL PANELS, GRAY ENAMEL FINISH
DOUBLE, ADJUSTABLE CASTERS, STRONG AND STURDY
WELDED STEEL FRAME NO CAST IRON TO BREAK NO RIVETS OR BOLTS TO WORK LOOSE

By Virtue of the Removable Tub the Wayne is Rendered Absolutely Sanitary and can be Kept Sweet and Clean at all Times. This Tub can, Without the Slightest Trouble, be Lifted from its Cradle, Thus Making it Possible to Keep the Inside of the Machine Free From Dirt and Filth. This also Gives Access to all Mechanical Parts of the Machine, thus Enabling Any Slight Adjustment Which Might be Necessary to be Made. The Tub is Constructed from Selected Copper, Tinned on the Inside and is Absolutely Free from Bolts or Rivets.

The Frame is Welded at Every Joint, thus Making One Solid Piece of Steel Free from Bolts and Rivets, and Impervious to Rust or Wear. The Rocker Cradle is Built the Same Way. The Side Panels are of Steel, Lacquered with Several Coats of Baked On Enamel and Securely Bolted to the Frame thus Enclosing all Moving Parts, Including the Motor.

All Double-Type Castors are Used and Foot Levers are Conveniently Located at Each Corner. When These are Depressed Plungers are Forced Down Lifting the Wayne Just High Enough to Swing the Castors Free from the Floor, Thus Making the Machine Absolutely Stationary.

The Wringer is Absolutely Up-to-Date in Every Respect. It is Reversible, has the Most Modern Quick Release Device, and is Adjustable to Three Positions; Therefore, it can be Used for Wringing Out One Batch of Cloths While the Other is Being Washed. It is Controlled by a Small Hand Lever and can be Operated Simultaneously with the Machine or Separately.

The Wayne is Equipped Throughout with Oilless Bearings, with the Exception of the Motor. This Overcomes the Great Difficulty of Making Women Understand the Necessity of Constant Lubrication, and also Eliminates any Possible Chance of Getting Oil on the Clothes.

The Motor is a One-Quarter Horsepower, and is of the Best Make Obtainable. Though Slightly Larger than Necessary, the Surplus Power Takes Care of Any Possible Chance of Overloads.

An Auxiliary Steel Drain Board Hooks to the Ridge of the Wringer Support on Either Side of the Wood Uprights of the Wringer, Completely Overcoming the Difficulty of Obtaining Perfect Drainage from the Wringer to the Tub.

A Large and Readily Accessable Drain Cock of Solid Brass and Non-cloggable, Carries the Water to a Large Pan. This in Turn Drains Through a Wide Spout which is Sufficiently High to Clear a Three Gallon Bucket. Should the Operator so Desire, a Hose can be Led Through the Drain Spout and Attached to the Drain Cock. By this Arrangement the Tub can be Emptied into Any Near-by Drain.

All Casting are Made from Highest Quality Grey Iron.

The Delicate Color Scheme Worked Out in Baked On Grey Enamel, Instinctively Carries the Suggestion of Refinement, Cleanliness and Durability. The Shining Copper Tub, Visible Above the Graceful Outlines of Frame Work Suggest Maximum Efficiency in a Minimum of Space, and the Concealment of all Working Parts Emphasizes Extreme Simplicity.

SPECIFICATIONS

Dimensions of Frame, 30x18x25¾ inches; Over All Dimensions, 38½x24½x53 inches; From Floor to Top of Frame, 30 inches From Floor to Bottom of Frame, 4¼ inches.

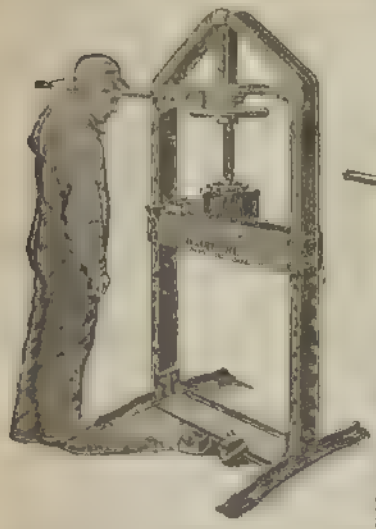
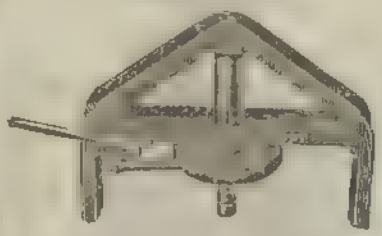
GARAGE PRESSES

WEAVER
Capacity 20 Tons





Designed for Auto Repair Shop and Garage, Adapted to a Great Variety of Operations.

Construction and Operation — The [illegible] Heavy Steel Channel Steel. A Heavy Hand Wheel, [illegible] Provides [illegible] for Ordinary Light Jobs. [illegible] Pressure for Lower Construction, Shown in the [illegible] Cut, is Applied. This Provides a **Leverage of 1500 to 1 and Enables a Pressure of 20 Tons to be Easily Accomplished.**

The Bolster for Height Upon the Uprights of the Frame The Maximum Adjustment is 48 inches Between Plate and Bottom of Screw. The Weight of the Wheel and Screw Rests upon Heavy Ball Bearings which Enables the Wheel to Spin the Screw Up or Down Quickly. The Screw has a Range of Movement of 12 Inches. The Thrust is Directed **Against Heavy Bronze Thrust Bearings.** The Screw Does Not Revolve, which Gives it a Rigid Bearing upon the Work.

Equipment A Pair of Vice Blocks is Provided for Holding Round and Irregular Pieces. Two Channel Blocks [illegible] Required Regularly for Straightening Gears, etc., when being Pressed off of Shafts, etc. The Blocks Shown Protruding to Either Side of the Bolster Furnish a Very Wide Bearing for Straightening Very Heavy Bars of Shafts, etc.

AUTOMOBILE HOISTS

WEAVER

One of the Most Convenient and Useful Articles of Garage Equipment on the Market Now. It is Truly the Overhead Span under the Car, Allowing Ample Room for Two or more Mechanics to Work with Absolute Freedom.

OCCUPIES SMALL AREA

The Peculiar Design of this Hoist Permits it to be Operated in very Cramped Quarters. It can be Run into Position Over a Car in a Crowded Shop without Requiring More than 12 to 14 Inches Space on Either side of the Car.

GREAT RANGE OF APPLICATION

There is No Work Which can be Performed by the Ordinary Block and Tackle or Crane which Cannot be Performed to Better Advantage by this Auto Hoist. This Hoist can also be Adapted to Many Conditions Absolutely Impossible to meet with the Ordinary Hoists.

TELESCOPING FRAME

The Frame is Designed so as to Permit the Height of the Arch to be Increased Approximately 12 inches Allowing the uprights to be Raised to the Desired Height in the Braces on Either side, by Means of the Chain Hoist. This Increased Height Enables the Hoist to Raise the Rear End of a Limousine or a Touring car with the Top up, for Removing the Rear System.

SINGLE SUSPENSION

One Chain of the Hoist may be Carried Over the Pulley in the Center of the Frame for Performing Work which can be Handled to Better Advantage by a Single Suspension than by a Double Suspension from Each Corner of the Frame.

SAFETY

In Designing this Hoist Particular Pains was taken to Provide a very Great Margin of Safety. The All-steel Construction throughout is much Heavier and Stronger than is Absolutely Necessary to Enable it to satisfactorily Perform the Work Demanded of it in the Ordinary Garage.

Each Chain, Before Being Mounted in the Hoist, is Subjected to an Individual Test.

The Hoisting Mechanism is Operated by Worm Drive which is Absolutely Safe and Positive. There are no Gears nor Ratchets to Slip or Break and Allow the Load to Fall.

CONSTRUCTION

Hoist is Carried upon Four Ball and Roller Bearings Casters 5 inches in Diameter Which Permit it to be Transported with Perfect Ease. The Construction Throughout is of Steel Giving the Greatest Possible Strength in Comparison with its Height.

Each

No. WAH—Height 8 to 9 Feet; Weight 500 lbs. **$240 00**

One in a Crate

CREEPERS

An Appealing Device to Those who Have been Compelled to Suffer the Annoyance of Dirt and Grease by Lying on their Backs Underneath a Car; Made Entirely of Steel and Therefore Indestructible; Large Black Enameled Duck Pillow, Filled with Sea Weed.

Each

No. AC—Length 36 inches; Width 15 inches; Weight 15 lbs. **$5 00**

Loose

PULL-OUTS

HOCKADAY

An Absolute Necessity When Traveling on Unpaved Country Roads. Don't Wait for Someone to Pull You Out; Let Your Car do the Work. Outfit Consists of an Iron Drum Pulley that Fastens to Rear Hub, Twenty feet of Half inch Manila Rope and a Steel Pin.

To Attach and Operate:

Take Off Rear Hub Cap on Driving Side of Car, Screw Pull-Out Drum on Hub, Attach One End of Rope to Drum, Other End to Pin, Stretch Rope Full Length to in Front of Car, Drive Stake in Ground, Jack-up Rear End of Car, Turn On Power and the Rope will Wind Around the Drum, Thereby Pulling the Car Out

The Hand Wheel is Geared 3 to 1, with Heavy Enclosed Bevel Gears Operating a 2 inch Diameter, 4 Pitch Acme Screw. The Hand Wheel Being Geared 3 to 1 Gives the Operator Three Times the Power with the Same Effort or Will do the Same Work with One-third The Effort. The Hand Wheel Weighing 57 Pounds, is Used as Fly Wheel to Run the Spindle Up or Down Quickly, Acting as a Quick-Return—a Feature no Other Press has. The Table Can be Raised or Lowered by One Man—Without Pulling Bolts or Pins Out—by Merely Lowering or Raising One Side at a Time in Notch Desired. This Table is Heavier and Stronger than Ordinary Presses and the Bolted Frame Acts as a Safety Device in Case Press is Overtaxed.

Built of 5 inch Channel Steel Uprights. Cross Bars 6 inches Wide, ⅝ inch Thick; Height to Top Frame, 65 inches; Width Between Uprights, 32 inches; Up and Down Travel of Spindle, 9 inches; Occupies Floor Space, 36x39 inches.

10 GALLON VISIBLE AIR PRESSURE PUMP

Visible Glass Cylinder—Is Made of Heavy, Clear Flint Glass, the Figures on Same Being in Bright Red and Black Arrows Indicate Liquid Level Line. The Cylinder is Protected by a Metal Screen Which is Removable.

Cabinet—The Cabinet or Pump Housing is Made of Sheet Metal, the Door being Lowered to Open Cabinet.

Pump—Is Our Long Distance Type, Adjusted to Measure gallons. Requires but a 5 lb. Air Pressure to Fill Glass Container. Air Pressure is Secured from Compressor Used for Filling Tires. The Pump Measures the Exact Amount Desired into the Glass Container, the Latter Merely Acting as a Check on the Pump and to Show Customer Just What He is Receiving

Gallon Meter—Keeps an Accurate Check on All Gasoline Drawn Up to 100,000 gallons.

Filter—Is Mounted on Pump Plate and All Gasoline is Filtered and Strained from Water and Other Impurities Before it Enters Glass Cylinder. The Accumulation of Foreign Matter May be Drained from Filter at Will.

Automatic Hose Drain—An Automatic Drain Valve is Attached to Pump Which Allows Hose to Drain Out Clean as Soon as Flow Stops.

Hose and Filling Nozzle—With Each Pump We Furnish a 10 foot Metal Hose, Rubber and Cotton Covered; Fitted with Adjustable Brass Couplings.

Shut Off Cock—Pump is Equipped with an Instantaneous Shut Off Cock, by Merely Raising or Lowering the Lever the Supply Line is Opened or Closed

Electric Lamp—A 10 inch Semi-Indestructible Globe is Furnished. Wires are Ready for Connecting to Local Circuit. No Lamp Bulbs Furnished.

Finish—Pump and Cabinet are Highly Finished in Vermilion and Black, Other Colors at the Option of Purchaser.

Dimensions of Pump—Height, 10 feet, 8 inches; Diameter, 20 inches; Shipping Weight, 550 lbs.

GASOLINE OUTFITS

WESTERN 5 GALLON VISIBLE CURB PUMP WITH COMBINATION PISTON AND VISIBLE PUMP

VISIBLE GLASS CYLINDER—Is made of heavy, clear flint glass, the figures on same being in bright red and black arrows indicate liquid level line. The cylinder is protected by a metal screen which is removable. Cylinder is securely fitted to top and bottom castings by six stay rods and by removing the nuts from bottom of stay rods, cylinder may be taken down at any time inside should require cleaning.

The cabinet or pump housing is made of sheet metal, the door being lowered to open cabinet, when door is raised it automatically fastens and is locked by a brass padlock. The door slides work in grooves and door is raised and lowered with little effort.

PUMP—Is Long Distance Piston type, adjusted to measure 1, 2, 3, 4, or 5 gallons at a stroke, 3-inch seamless brass cylinder., ⅝ inch brass piston rod., heavy brass valves and stuffing box., cut steel gears, bronze bushed and protected by gear guard., case hardened bearings and spindles. The pump measures the exact amount desired into the glass container.

AUTOMATIC GEAR SHIFT—For quick return of rack bar, which can be reversed in a ratio of one reverse motion to five forward turns.

GALLON METER—Keeps an accurate check on all gasoline drawn up to 99999 gallons at which point it reverts to 00000, making it a continuous meter. The figures are large and legible stamped into the metal, it is built with the precision of a watch.

FILTER—Is mounted on pump plate and all gasoline is filtered and strained from water and other impurities before it enters glass cylinder. The accumulation of foreign matter may be drained from filter at will.

An automatic drain valve is attached to pump which allows hose to drain out clean as soon as flow stops.

With each pump is furnished 10-ft. of 1-inch metal hose, rubber and cotton covered and having adjustable brass couplings, the filling nozzle is fitted with fine brass removable strainer.

Pump is equipped with an instantaneous shut off cock, by merely raising or lowering the lever, the supply line is opened or closed.

A 12-inch canteen shaped globe is furnished, fitted with socket inside for lamp and two weather proof fibre sockets are located on top on either side of glass cylinder. Wires are ready for connecting to local circuit. No lamps furnished.

Handle may be shipped off and carried inside of building, making pump fool and meddler proof.

QUANTITY STOPS—For, 1, 2, 3, 4 and 5 gallons are located in front on pump standard., to change measurement it is but necessary to push in the nickeled disc stamped with the quantity desired, turn pump handle and the exact amount is discharged into glass container above.

Pump and cabinet are highly finished in vermillion enamel, with nickel trimmings and gold lettering.

DIMENSIONS OF PUMP—Height 9 feet, 9 inches, diameter 15 inches, shipping weight 350 lbs., 2-inch suction pipe.

Outfits guaranteed to be as represented and the manufacturer agrees to make good any defects in material or workmanship which may develop within one year from date of sale.

Are built of either 12 or 14 gauge galvanized steel, welded thruout except the flanges which are riveted and welded to tank, thus making a leak proof tank. Furnished complete with double brass foot valves, suction pipe in tank, 3¼-inch by 2-inch reducing plug, double full pipes with strainers, lock cap, lock and keys and with measuring stick to determine amount in tank. Each tank is fitted with three flanged openings, 2-inch for full pipe, 1 inch for overflow return pipe and 3¼ inch for reducing plug and 2-inch suction pipe. Tanks are inspected and bear the approval label of a National Board of Fire Underwriters.

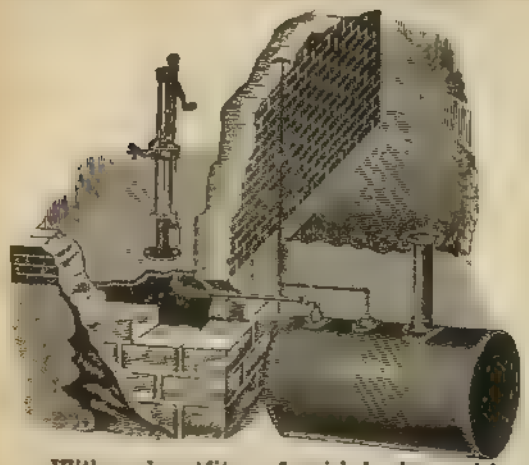
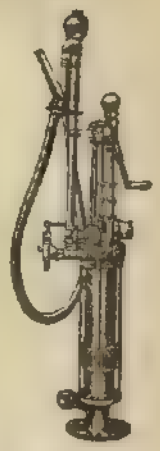
Prices on Application

IMPERIAL LONG DISTANCE





The pump is adjusted to measure gallons, half-gallons, quarts or pints at a stroke, is built of cast and wrought iron with cylinders, valves, stuffing-box, and piston rods of brass. Gears are all cut steel. Furnished in vermilion enamel with nickel trimmings.

The pump is equipped with **discharge register** which automatically tallies every gallon up to 10 that is pumped; has **safety automatic shut-off cock** and **locking device.** Requires but two and one-half turns of the handle to discharge a gallon, giving an actual pumping capacity of ten gallons per minute.

Tanks are built of galvanized steel, riveted and soldered throughout and protected by three coats of rust-resisting paint. Each tank is filled with **heavy brass double foot valves, double fill pipes** with strainers and lock cap.

With each outfit we furnish **locks and keys, bolts for fastening pumps, measuring stick** for tank, **two 1¼ inch pipe unions** and complete instructions for installing. **We do not furnish pipe.**

Pumps and tanks are tested, labeled and **approved by the National Board of Fire Underwriters. Equipment guaranteed** against defect in material or workmanship for a period of three years.

Savings Banks

For Young and Old. Illustrations Reduced. Prices Each

Nos. **5+7209, 5+7210, 5+7211,** and **5+7212** Banks work like a cash register. They add the value of each coin deposited and register the total upon a dial on the front of the Bank. They are constructed of strong steel parts, enclosed in substantial cases which are lithographed in a very beautiful and artistic manner.

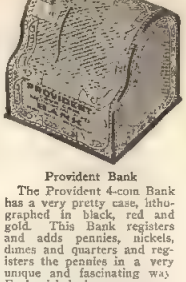
The attractive appearance and novel methods of registering make these Banks as popular with parents as with children. All are fascinated and take delight in watching the Banks register and seeing their savings grow.

These Banks are very simple to operate, it being necessary only to drop a coin in the slot, pull down the lever and the value of the coin is added to the amount already deposited and the total is shown on the dial. When the deposits amount to $10.00, a door on the bottom of the Bank opens automatically and the contents can be removed, after which, the door may be closed, when it automatically locks the bank and another $10.00 can be saved.

Commonwealth Bank

Three-coin Bank. Artistic case lithographed in colors. Registers and adds nickels, dimes and quarters.

5+7209 Each **$2.70**



Provident Bank

The Provident 4-coin Bank has a very pretty case, lithographed in black, red and gold. This Bank registers and adds pennies, nickels, dimes and quarters and registers the pennies in a very unique and fascinating way. Each nickel, dime or quarter that is put into the bank registers as soon as the lever is pulled down, but the pennies do not register until the fifth one has been deposited. It is not necessary to deposit the pennies consecutively in order to have them register accurately. A penny can be deposited and the lever pulled down and other coins deposited before other pennies are put in, and when the fifth penny is deposited 5 cents will register.

5+7210 Each **$3.60**

Home Bank

The Home 5-coin Bank has a very handsome lithographed case, in oxidized copper and gold. This Bank registers and adds pennies, nickels, dimes, quarters and halves.

5+7211 Each **$5.35**

Security Bank

Five-coin Bank. The case on this bank is "Ech-Kraft," a finish that is exclusive combining beautiful color effects with an actual brass finish, showing a perfect etched effect in colors that makes it the most attractive of all registering banks and one in keeping with the furnishings of any home, regardless of how elaborate they may be. The Security Bank registers and adds pennies, nickels, dimes, quarters and halves.

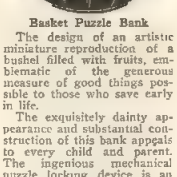
5+7212 Each **$6.25**

"White City" Trick or Puzzle Safe

Not a Combination Bank

Without a doubt the most artistic and best finished bank ever put upon the market. They are of gray iron, highly nickel plated throughout, and so constructed that money cannot be shaken out. You cannot solve the problem of how these banks are opened without first being shown. Directions and solution of puzzle are packed with each safe. We guarantee each safe to be perfect, and it is utterly impossible for one of them to get out of repair. They are highly engraved with pictures of the "World's Fair" buildings, also the great Ferris Wheel. 5 in. high, 4¼ in. wide and 3¼ in. deep.

5+7213 Each **$1.60**



Basket Puzzle Bank

The design of an artistic miniature reproduction of a bushel filled with fruits, emblematic of the generous measure of good things possible to those who save early in life.

The exquisitely dainty appearance and substantial construction of this bank appeals to every child and parent. The ingenious mechanical puzzle locking device is an exclusive feature and cannot get out of order.

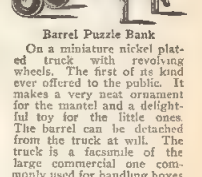
Size, 3 in. high, 3½ in. in diameter oxidized finish.

5+7214 Each **$1.70**

Barrel Puzzle Bank

These are new and novel designs and have proven to be good sellers. They are of gray iron, highly nickel plated, and so constructed that the money cannot be shaken out. It is impossible to solve the problem of how these banks are opened without first being shown. Directions and solution of the puzzle are packed with each safe. It is impossible for these banks to get out of order or repair, as is the case with all combination and key banks on the market at the present time. 5¼ in. high and 3¼ in. diameter.

5+7215 Each **$1.85**



Barrel Puzzle Bank

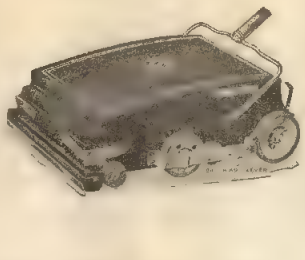
On a miniature nickel plated truck with revolving wheels. The first of its kind ever offered to the public. It makes a very neat ornament for the mantel and a delightful toy for the little ones. The barrel can be detached from the truck at will. The truck is a facsimile of the large commercial one commonly used for handling boxes and barrels. They are handsomely nickel plated thruout. Instruction how to open sent with each bank.

5+7216 Each **$1.85**

The M. & E. Vacuum Cleaner

The Combination Sweeper and Vacuum Cleaner

This is an all-steel combination vacuum sweeper with a special lever brush adjustment for light or deep sweeping. It has the de luxe front fiber roller feature for perfect adjustment of the dust nozzle to the floor, and rides lightly on and off rugs and can't scratch the floor. Its all-steel leak and warp-proof vacuum box insures the full measure of the strong and steady suction from its triplet bellows. The dust bag, which is of the most adaptable material, has a two-inch opening and is formed over a stout steel frame of steel, easy to empty without soiling the hands. It is only 6 inches high and will go under all modern furniture. It is equipped with correctly designed brush 9 inches wide of genuine bristles and the two dust pans dump as one from one lever.



The nozzle clamps are of extreme simplicity and cannot get jammed, and the hinged dust nozzle attachment automatically prevents wrong replacement. All the bearings are the best ball type, and the wheels have heavy rubber tires set in flanges of steel. No tires to come off. Easy to replace when worn. An ample bumper of braid over front and sides of nozzle protects the furniture.

Dressed in a durable coat of fine mahogany enamel and the exposed parts are well nickeled 42-inch hardwood handle. The special knob grip on end makes sweeping easy on your hands. Height, 6 inches; length, 17 inches; width, 12 inches, weight, 9¾ pounds.

5+7222 Price complete.....**$10.00**

One in a Package

GUN MATERIAL

When Repairs for Foreign-made Guns, Rifles and Revolvers are wanted, it is Necessary for us to have the Arm or broken part, as the parts for these Arms are **not interchangeable** and have to be made by hand; consequently the cost is largely in excess of the price of parts listed in this Catalog.

When one match hammer is wanted, it is necessary for us to have **both** locks and the hammer that is to be matched. When two hammers for the same Gun are wanted, if for Muzzle-loading Gun, we will have to have the Gun; if for a Breech-loading Gun, the stock will answer.

When goods are shipped to us for repairs or for any other cause, mark your **full name and address** on the package and advise us by mail.

All Guns sent to us by express should be packed in a box, as the Express Company is not responsible for loss or damage if shipped without being boxed.

All claims must be made on receipt of goods or they will not be considered. We cannot assume any responsibility for Guns bursting when using Nitro Powder, shooting buckshot, or having an obstruction in the barrel. In all claims of this nature it is necessary to submit the case to the manufacturers, who will pass on same.

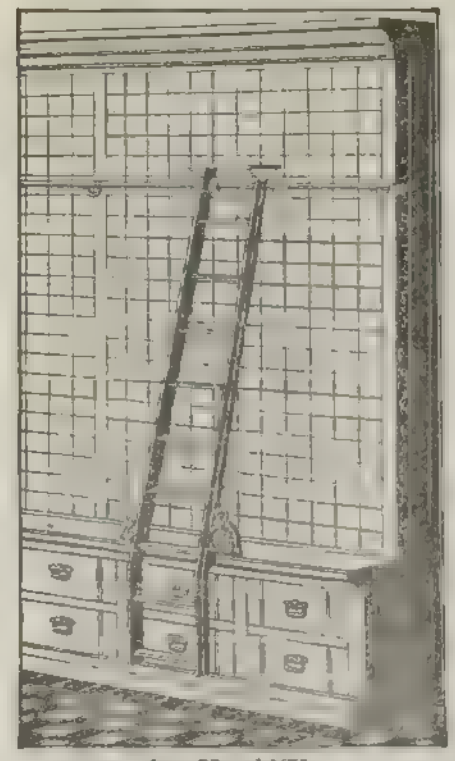
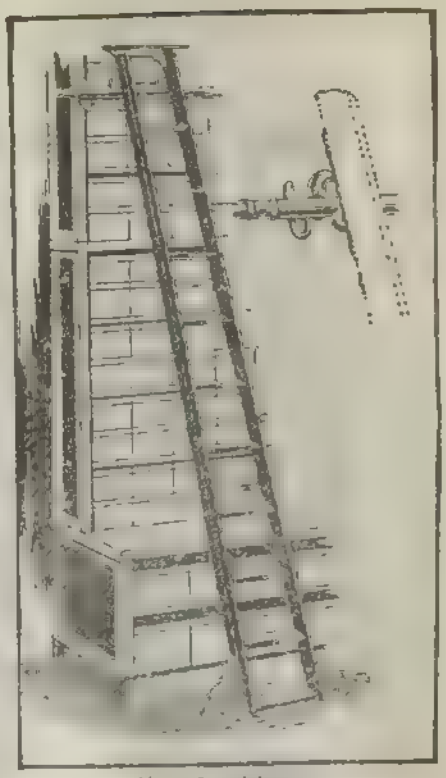
BENT FLOOR LADDERS



Nos. 75 and N75.
BENT BASE LADDERS



Nos. 85 and N85.
STRAIGHT FLOOR LADDERS

Made of Selected Oak, Natural Finish, Varnished

In These Styles the Track is at the Bottom, Either on the Base Shelf or on the Floor, [illegible] Entire Weight of the Ladder and Operator is Supported from Below on a Solid Foundation, and Not Suspended. Refer[illegible]ing, or of Suspended Shelving. The Top [illegible] Turned Pole to Guide the Upper [illegible] ing it; Stout Hood [illegible] Weight Rests on This Pole. **The Great Success of the Bicycle Ladder is Due to the User Stands Directly Over the Wheels and There is No Side Friction at All, and the Ladder Goes as Easily as Any Other Bicycle.**

The Ladders All Have an Extra Wide Shelf at the Top for Convenience in Handling Stock, and the Wheels are Provided with [illegible] to Prevent Dropped Articles Rolling Out of Reach, Leaving Small [illegible] Left in Their Way.

The Track for Bicycle Ladders is Made Extra Wide. At the Upper Part [illegible] Turned Pole is Attached by Stout [illegible] to Support the Upper End of the Pole, and to the Base Shelf or the Floor, is Fastened a Small [illegible] Which Rests on the Pole and Holds the Upper End of the Ladder Firmly in Position. The Lower End [illegible] Floor Shelf Is Provided with Small Steel Rollers Running in Grooves Turned in Brass Bushings. The Rollers Revolving in Bushings Reduce the Friction to a Minimum. **Either Nickel Plated or Japan Finish.**

The Track for the Floor is So Small (but Three-Sixteenths of an inch in Height) That it Can Cause No Inconvenience.

Both the Floor Track and the Base Shelf Bicycle Ladders Have a Simple Device Which Instantly Prevents the Wheels from Coming Off the Track Unless They Are Lifted Off.

INTERNATIONAL SILVER CO.

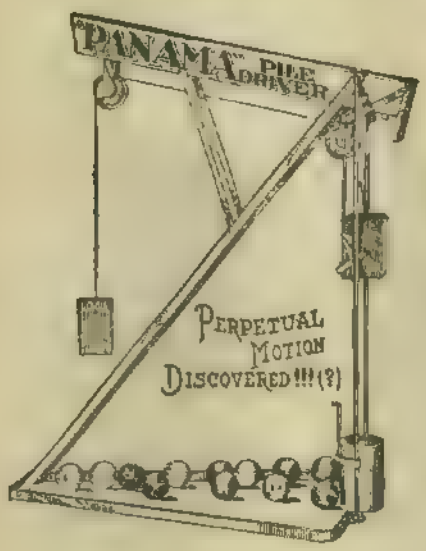
PANAMA PILE DRIVERS



The sharp tap, tap, tap of this clever Automatic Pile Driver is a scource of wonder and delight to every child.

It is a most intersting construction toy, that does something automatically when set up.

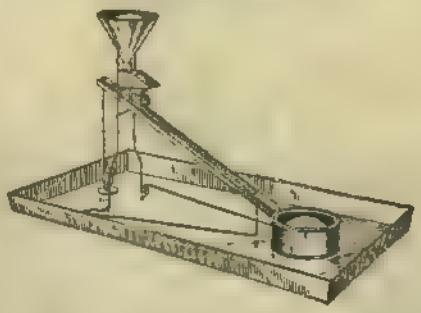
The operation is extremely simple.

Placing the marbles in the chute at the top and giving the hammer a start downward, puts the Panama into rapid action.

No. 102—Frame work of bright tin plated steel, sheet metal parts decorated in bright colors, joints locked when set up, extra heavy, 12 colored marbles, height 16¾ in., with full directions, shipping w't per doz. 29 lbs. .....per dozen *$18.00*

ONE DOZEN IN A CARTON

SANDY ANDY



Pour sand in the hopper and **Sandy Andy** does the rest. The car is drawn up the track by the weight until it opens a swinging shutter on the bottom end of the hopper allowing the sand to run into the car. When the car is nearly full the added weight of the sand causes the car to run down the track and automatically dump the sand. The weight then again pulls the car up for another load and this operation is automatically continued as long as there is sand in the hopper.

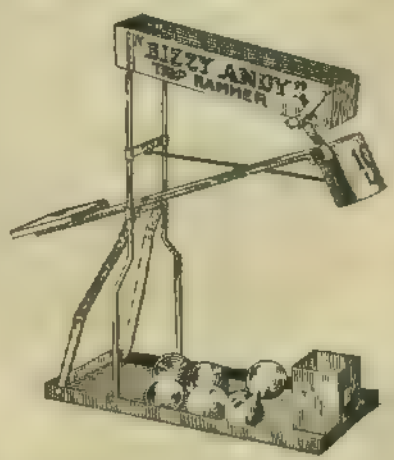
No. 76—Size tray 14¾×18×2¼ in., height 13¼ in., w't per doz. 31 lbs., per dozen *$12.00*

TWO DOZEN IN A CARTON

No. 100—Size tray 20¾×22½×2¾ in., height 17¼ in., w't per doz. 40 lbs., per dozen *$18.00*

ONE DOZEN IN A CARTON

BIZZY ANDY TRIP HAMMER



Stimulates the action of a real trip hammer and operates with rapid tap, tap, tap.

Simply put the marbles in the chute, give the hammer a start and it keeps pounding in an energetic fashion.

No. 56—Callapsible, six colored marbles, height 10¼ in., w't per doz. 15 lbs. .....per dozen *$9.00*

ONE DOZEN IN A CARTON

BOWLER ANDY MILL

Put marbles in the chute, give the car a start and the fan wheel continues to revolve in one direction, while the car keeps running up and down as long as marbles are kept in the chute. This is accomplished by the ingenious combination of an escapement system and a rolling shaft friction ratchet system. It is believed this toy employs an entirely new mechanical movement.

No. 67—Height 21½ in., eight colored marbles, 19×4¾×3 in., w't per doz. 28 lbs. .....per dozen $31.30

SAND CRANE

A wonderful motion Toy that pleases and interests every child. When the hopper is filled with sand, and the toy started, the shovel arm swings round in a semi-circle, the little engineer swings in his seat and "pulls" the cord in real, life-like motion, and the sand is dumped into the can or tray. This action continues as long as sand remains in the hopper, and repeats when the hopper is again filled.

No. 103—Size tray 15¾×22¾×3 in., height 14¼ in., w't per doz. 38 lbs., per dozen *$18.00*

ONE DOZEN IN A CARTON

BIZZY ANDY JUNIOR

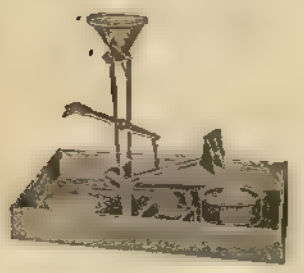
A popular priced Automatic Marble Toy of wonderful action and quality. Operates automatically by the weight of eight marbles which are furnished with the toy.

Fast, snappy action that pleases the youngsters. Attractively decorated in colors and each toy in a carton with marbles.

No. 58—Height 7 in., w't per doz. 3 lbs. per dozen $3.70

ONE DOZEN IN A CARTON

DUMPING SANDY



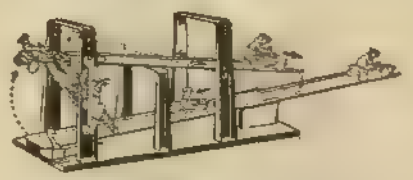
Dumping Sandy is another of these extremely popular Sand Toys. Sand is poured into the hopper, and Dumping Sandy will dump it automatically into the can or tray as long as any sand remains in the hopper. The vertical action of the dumping bucket is fascinating to all youngsters. The Toy may be moved slightly to cause each load of sand to be dumped in a different spot, or it may all be dumped in one place.

A supply of clean, dry, white sand in a friction lid can is included with each Toy, but any clean, dry sand will operate it. The carton in which the toy is packed opens flat to form a tray to catch and hold the sand. Sand scoop is also included with each Toy.

No. 59—Height 12 in., w't per doz. 21 lbs. .....per dozen $9.70

ONE DOZEN IN A CARTON

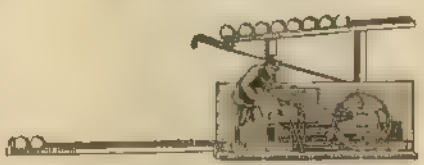
OVER AND UNDER



20 in. long, 6 in. high. Driver in racing car runs down the upper incline, drops to the lower track and continues to the end, then reverses to opposite end where the motor raises the car to the upper incline for the next trip. This is repeated many times on one winding.

No. 28—Per dozen .....$....

JOE ON THE JOB



23 in. long, 8½ in. high. This toy represents a mechanical shovel run by a gas machine. Eight marbles furnish the motor power. The beam moves up and down and the engine's fly wheel turns back and forth. The toy is attractively finished in colors, the engine and the engineer being attractively lithographed.

No. 52—Per dozen .....$....

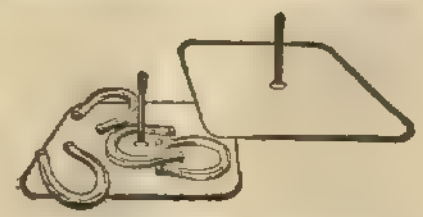
RADIO TINKER

An exact reproduction of a real radio outfit. It is 8 in. wide, 7 in. high, and 2½ in. thick. Made of heavy sheet steel, lithographed in bright colors, genuine hardwood mahogany finish. The dials all turn the telegraph key, imitates code messages, and another makes appliance sound like static. With the loud speaker, the child can imitate music of all kinds, as well as speeches, stories, market reports, etc

No. 43—W't per doz. 14 lbs., per dozen $12.00

HALF DOZEN IN A BOX

"PITCH EM" HORSE SHOE GAME



Indoor game, play in the parlor or on the lawn.

For Pitching.

"These will make ringers"

ORIGINAL Drop Forged Steel Shoe. Regulation size and weight, perfectly smooth and well balanced. This is not a casting but forged from special steel Hardened and will not splinter. Gilt finish to prevent rusting.

Have been on the market for one year and are giving entire satisfaction. Guaranteed for one season. Pair consists of two shoes.

No. 22—Size 7x7½ in., w't 2½ lbs., per pair $3.50

ONE PAIR (2) IN A BOX

JUNIOR

For Ladies, Children and Boy Scouts.

This is a light pattern of Horseshoe drop forged steel shoe, designed for those wishing to pitch a light shoe. Gilt f'nish.

Very neat, just the thing for ladies, children and Boy Scouts.

There is no better sport than pitching horse shoes; it tends to develop the whole physical anatomy; also trains the eye for distance. Pair consists of two shoes.

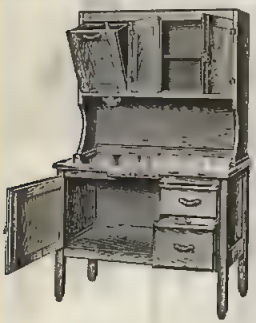
No. 22J—Size 6¾x6⅜ in., w't 1½ lbs., per pair $2.60

ONE PAIR (2) IN A BOX

KITCHEN CABINETS

Sturdily constructed with all the latest improvements by one of America's leading cabinet makers. Under the maker's name plate you would pay at least 25% more than these quotations.

Rounded corners and edges, all joints mortised and tenoned, guaranteed not to sag or fall apart. All white enameled cabinets are finished with high grade "Satin" white enamel. All doors and drawers have the dust tip construction and are finished inside. High grade refrigerator style hardware and three ply panel backs on all cabinets.



"Our Leader"

MATERIAL—Solid Indiana oak

SIZE—Ht 68 in., top 25x40 in.

FEATURES—Tilting metal flour bin with sifter, bread board and cake or bread box with ventilated metal sliding top.

P8648—Golden oak inside and out, stationary wood top. Crated, 175 lbs. Each. **$15.75**

X-RAY REFLECTORS

X-Ray Reflectors are the most powerful reflectors made. They are of a high grade glass, heavily plated with pure silver which is protected by a special green backing which will not peel, crack or blister. It is because of this powerful reflecting quality that they are standard for show window lighting all over the world.

JUPITER

For 100 watt Mazda Type "C" gas-filled lamp.

The JUPITER is a powerful concentrating reflector which will perfectly illuminate windows whose height equals about twice their depth. It has similar dimensions to the JOVE reflector and uses the same shade holder. Hence, when used together alternated they make a neat appearance in the window. They are made as small as possible to secure proper results.

Install in windows 10 to 15 ft. high and one-half to two-thirds as deep.

No. 610E—Width 10 in., depth 10½ in., height including neck 7¾ in., holder 3¼ in., form "A,"
each, reflector only *$6.00*

TWELVE IN A STANDARD PACKAGE
WEIGHT 35 LBS.

BEEHIVE

For 75 watt Mazda "C" lamp.

(Also may be used with 25, 40, 50 and 60 watt Mazda "B" lamps by using 2¼ in. form "O" holder).

A small distributing X-Ray reflector of pleasing lines, principally adapted for localized lighting, such as drop cord and bench lighting in shops, over counters and work tables, and for general illumination from comparatively low ceilings, as, for instance, bowling alleys, basements, store rooms and corridors.

No. 535E—Diam. 5¾ in., 2¼ in. holder, form "H," height 5¼ in.,
each *$2.00*

TWENTY-FOUR IN A STANDARD PACKAGE. WT 18 LBS.

BEEHIVE

For 100 watt Mazda "C" lamp.

A popular reflector for the 100 watt Mazda "C" lamp. It effectively conceals the lamp and gives a broad light distribution. A special system of spiral and vertical corrugations produces a practically even and well distributed light, eliminating all streaky effects.

No. 570E—Diam. 7⅝ in., 3¼ in. holder, form "A," height 6⅞ in.,
each, reflector only *$3.50*

SIXTEEN IN A STANDARD PACKAGE
WEIGHT 32 LBS

Our reputation founded on over sixty-eight years' business stands back of the [illegible] brand.

All goods branded [illegible] are guaranteed to be of highest quality material and workmanship and free from imperfections.

In selling [illegible] articles there is a profit for you and satisfaction to your customers.

JOVE

For 100 watt Mazda Type "C" gas-filled lamp.

The JOVE is a scientifically correct window lighting reflector with high temperature backing, designed especially for use with a 100 watt Mazda "C" lamp. This reflector and lamp gives the highest intensity of uniform store window illumination ever produced with 100 watts. Its shape completely hides the intensely bright filament and the special corrugations properly break up and distribute the light.

The JOVE has been designed for windows of average proportions, those whose height is one to one and one-half times their depth.

No. 600E—Width 10 in., depth from front to back 9 13/16 in., height including neck 7¾ in., holder 3¼ in., form "A."
each, reflector only *$6.00*

TWELVE IN A STANDARD PACKAGE
WEIGHT 35 LBS.

BEEHIVE

For 200 watt Mazda "C" lamp.

This reflector should be used for efficient, direct lighting of average, large working spaces. The spread of light from this reflector with a 200-watt Mazda "C" lamp will give good, general lighting in a space of 20 feet square at average hanging height.

No. 575E—Diam. 9¾ in., 3¼ in. holder, form "A," height 8 in.,
each, reflector only *$4.25*

EIGHT IN A STANDARD PACKAGE
WEIGHT 14 LBS.

X-RAY REFLECTORS

SCOOP

For 75 watt Mazda Type "C" gas-filled lamp.

The SCOOP is a scientifically correct reflector, designed for use with the 75 watt Mazda "C" lamp. It is designed for small show windows, particularly those whose height is equal to the depth.

The reflector is small in size, requires little head-room and makes a very neat appearance. If very bright illumination is desired, install reflectors on 12-inch centers. For average conditions, reflectors on 18 to 24-inch centers give good results.

Install in windows 8 or 10 ft. high and 6 or 8 ft. deep.

No. 778E—Width 7 1/16 in., depth from front to back 6 1/16 in., height including neck 6 5/16 in., holder 2¼ in., form "O,"
each, reflector only *$4.00*

TWENTY-FOUR IN A STANDARD PACKAGE. W'T 30 LBS.

POKE BONNET

For 25, 40, 50 and 60 watt Mazda Type "B" lamps.

Install for low deep windows. A 6 in. window drape, moulding or sign will hide it.

No. 750E—Depth 7¼ in., length 14 in., complete with adjustable fork, 18 inches of re-inforced cord, plug, twin sockets and reflector, no lamps,
each *$12.00*

X-RAY REFLECTORS

Prices on Application

FLOOD LIGHT

For use with the 200 or 250 watt G-30 Mazda "C" flood lighting lamp.

Projector being small is particularly adapted for use on the sides of buildings, brackets, and other places difficult of access.

It has been widely and successfully used for protection lighting and for facilitating night operations in large spaces, both inside and outside.

The unit is weather-proof, perfectly ventilated, and not affected by heat, cold, rain, snow or ice.

No. P51XE—Finish gray, diam. 11½ in., depth over all 9¾ in., swivel and tilting base supplied with unit for bolting to supporting surface, size of base 2x4 in., with two ¾ in. holes 2⅝ in. on centers, **without lamp,**

WATER FILTERS

ZANESVILLE STONE FILTER

The Process of Filtering is by Percolation Through a Porous Natural Stone from the Upper to the Lower Jar Simply by the Force of Gravity which is Nature's Own Process of Filtering.

The Filtering Discs are a Natural Stone Quarried from the Earth, which is of Such a Nature that it Does Not Allow the Filth it Extracts to Enter its Pores; but Retains All Impurities Upon its Surface Whence they are Removed in Cleaning, which is as Simple an Operation as the Cleansing of an Ordinary Jar or Pail. Filter Disc can be Cleaned in two Minutes Ready for Use, when it is the Same as New.

Every Part is Easily Gotten at for the Purpose of Cleansing.

Filter is All Stone and there is Nothing to Rust and Corrode or Become Foul and Never Become Water Soaked, the Water in them Retaining its Sweet, Natural Taste.

They Have Been Fully Tested and Their Merits Established as Possessing Every Practical Adaption for Family Use, Rendering the Most Impure and Foul Rain, River or Hydrant Water Free from all Organic Matter, Gases, Taste or Smell.

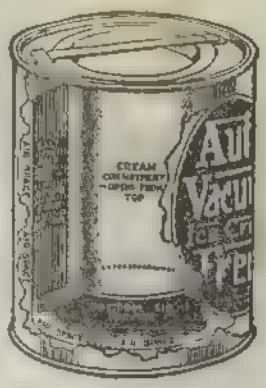
ICE CREAM FREEZERS

AUTO VACUUM



Made of Heavy Tin; White Enameled

So Simple in Construction that it is Practically Impossible for it to Get Out of Order. Its Successful Use Does not Depend upon any Special Skill of the Operator. It Does its Work in Accordance with Scientific Principles and is as Nearly "Fool-proof" as it is Humanly Possible for Such a Utility to be.

Single Unit Construction

Aside from the Two Lids or Covers, the Freezer is in One Piece. Freezer is in Form of a Metal Cylinder Finished in White Enamel. This Cylinder is Constructed with a Double Wall, which Creates a "Dead Air" Space to Insulate and Protect Contents of Freezer from Outside Temperature. Within this Outer Cylinder is an Inner One—the Cream Compartment. Opening of Cream Compartment is at One End of Freezer, and Opening of Outer Cylinder—the Ice Compartment—is at Other End. This Construction Makes it Impossible for Any Ice or Salt to Seep into Compartment Containing Cream.

Ice and Salt are Packed into Ice Compartment at One End of Cylinder, which is then Turned Upright, and Ingredients are Poured into Cream Compartment at Other End. Lids or Covers are Securely Fastened Down with Clamps and Gaskets, and Freezer Allowed to Stand for 45 Minutes At End of that Time Ingredients are Frozen into Smooth, Rich, Delicious Ice Cream. Contents of the Freezer are Insulated or Protected from Outer Air and Temperature by "Dead Air" Space, Created by Double Wall, Enables Ice and Salt to do Their Work of Freezing Cream Without Aid of Turning or Cranking. Scientific Principle by which the Ice Cream Freezes is the Same One Whereby Familiar Vacuum Bottle Keeps its Contents Hot or Cold for Many Hours

*JERSEY ICE CREAM FREEZERS

Showing Hinged Cover and Locking Device

Sectional View Showing Interior Construction

DOUBLE ACTION

NOTE—The Can and Dasher Revolve in Opposite Directions; Automatic Twin Scrapers.

ENCLOSED GEARING

The Revolving Dasher Forces the Cream from the Center to the Sides of the Can, where, as it Freezes, it is Removed by the Scrapers.

Extra Heavy XXXX Tin Can, with **Drawn Steel Bottom;** They will not Leak, and the Bottom will not Break or Fall Out of the Body of Can; Not Liable to Injury, as are Tin Plate or Cast Iron Bottoms.

The Top of Can is Strongly Wired and Turned Over, while the Lower Part is Made to Fit Over and Under the Drawn Steel Bottom by Machinery; The Cans are the Strongest Made, and are not Liable to Collapse or to be Crushed Out of Shape.

The Gears are Completely Covered so that Neither Ice nor Salt Can Get in Cogs, Nor the Fingers be Accidentally Caught in Them; The **Hinged Cover** Can be Raised Out of the Way Without Removing it From the Tub; The **Locking Device** is Controlled by a Single Cam, is Simpler and Easier to Operate than Any Other, and Locks the Cover Immovably.

All Inside Parts Coming in Contact with the Cream are Heavily Tinned; all Outside Parts are Smoothly and **Heavily Galvanized;** The Ice Space is Arranged to Use the Least Possible Amount of Ice to Freeze in the Least Possible Time; Selected White Pine Tubs, with Electrically Welded Galvanized Steel Wire Hoops, which Will not Fall Off Nor Break.

*JERSEY ICE CREAM FREEZERS

GIANT SIZE

For Use of Confectioners, Ice Cream Parlors, Soda Founts, Hotels, Restaurants and Boarding Houses.

The Construction is Similar to the Regular Jersey Freezers, but Heavier and Stronger; The Gear and Shaft are Connected by Clutches which Engage or Disengage by Simply Raising or Lowering the Cross Bar; The Fly Wheel or Pulley Remains Stationery at the Side of the Tub.

The Cross Bar is Made to Swing Up Out of the Way to Take Out Cream or can be Entirely Removed.

The Cans are Made of **Heavy Tinned Steel** with Tinned Malleable Iron Bottom; The Tub is Made of Selected White Pine with Electrically Welded Steel Wire Hoops, which will Not Drop Off or Break.

KEROSENE GAS LAMPS

COLEMAN KER-O-LITE

Ker-O-Lite is a Pressure Lamp Making its Gas from Kerosene Instead of Gasoline. It Operates on the Same Principle as the Air O-Lite, Uses Two Small Rag Mantles and Gives Just as Bright a Light. It Requires More Frequent Cleaning Because Kerosene is a Heavier Oil, but to Make This Easy the Ker-O-Lite is Constructed With a Quick Detachable Generator.

Equipment Furnished With Each Lamp: 2 Mantels, Lighter, Pump, Wrench, Hanger, Extra Generator and Set of Cleaning Tools for Removing Old and Inserting New Filter.

10 inch Ribbed Opal Shade; 8 inch Nickel Plated Brass Fount; Fount Capacity, 4 pints; Height, 22 inches; Produces a Light Equal to 300 Candles.

ROLLING STORE LADDERS

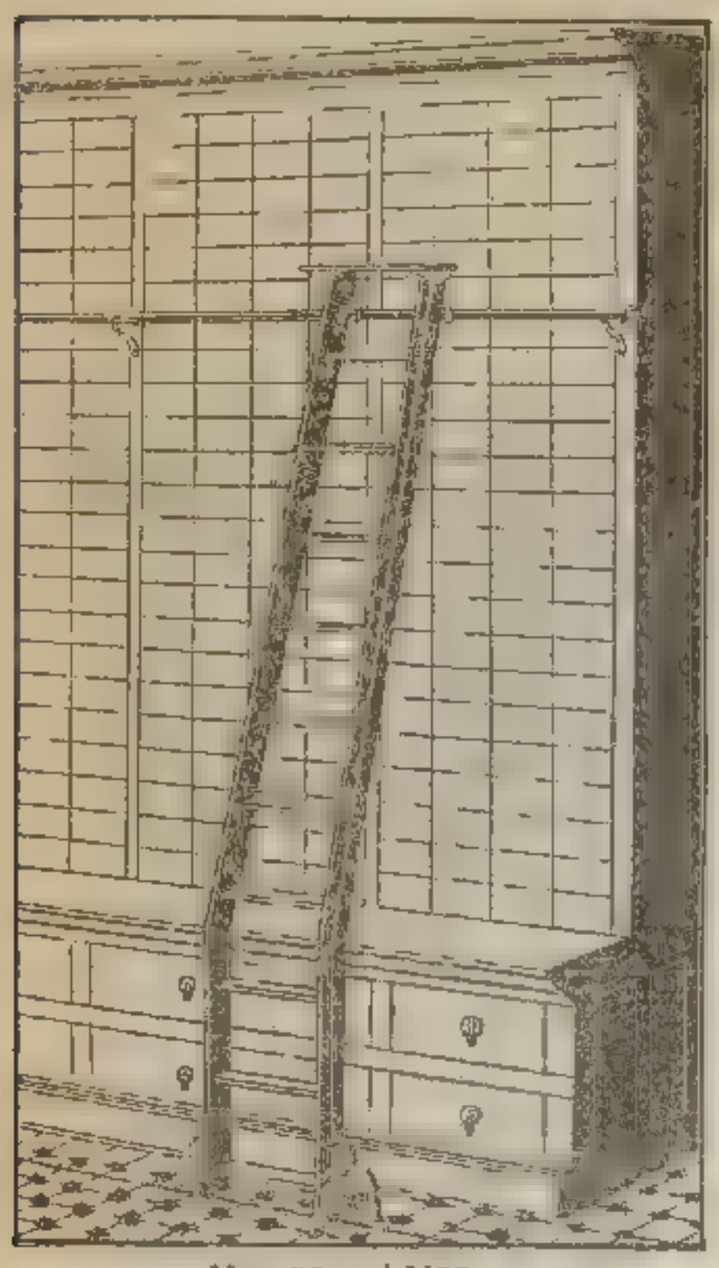
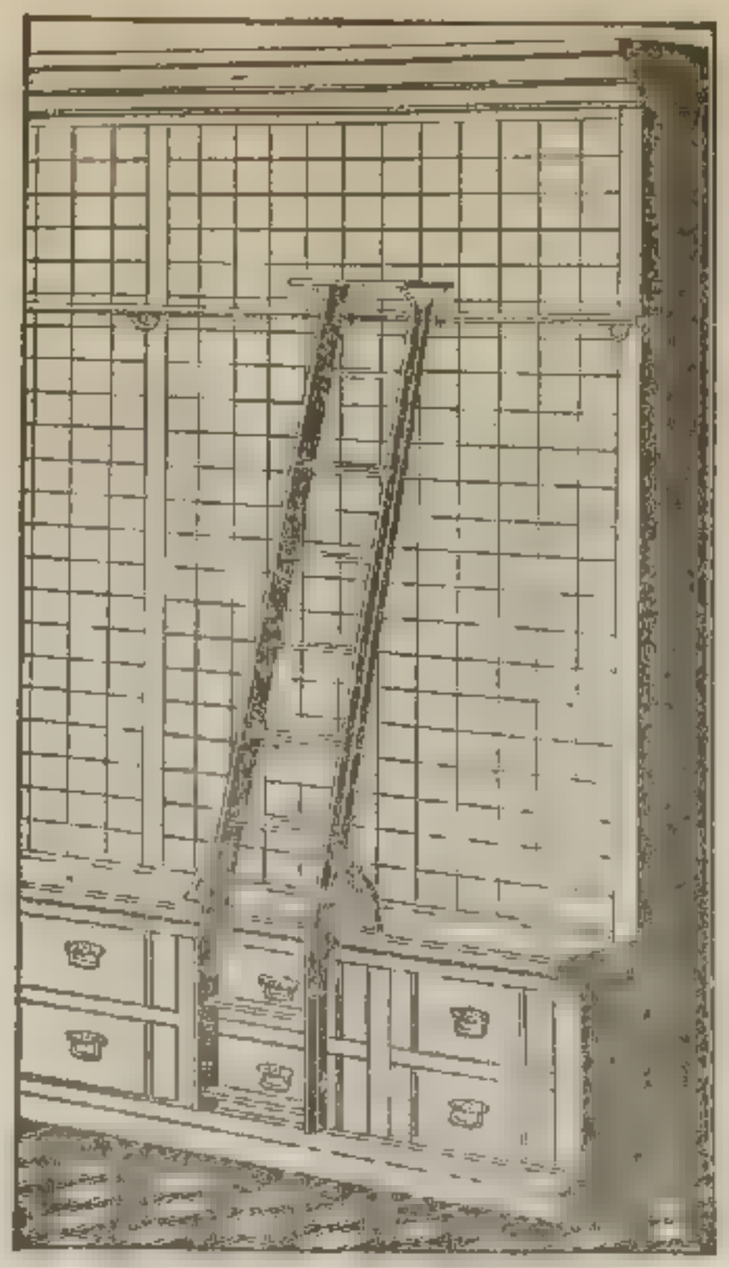
BICYCLE

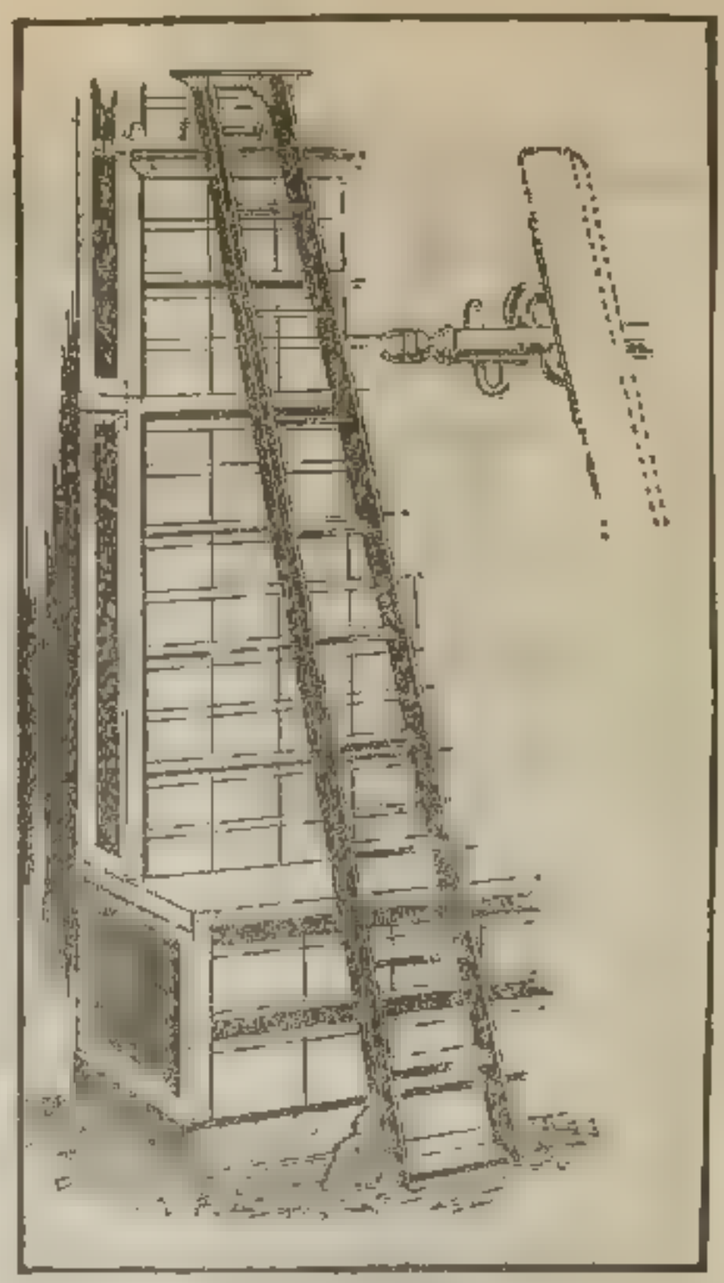
Made to Order Only



Nos. 65 and N65.
BENT FLOOR LADDERS



Nos. 75 and N75.
BENT BASE LADDERS



Nos. 85 and N85.
STRAIGHT FLOOR LADDERS

Made of Selected Oak, Natural Finish, Varnished

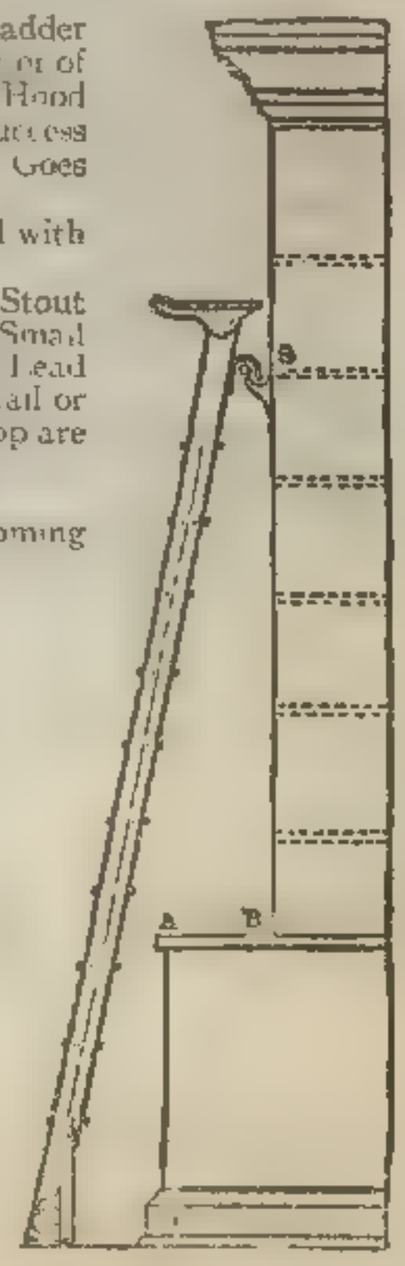
In These Styles the Track is at the Bottom, Either on the Base Shelf or on the Floor, So That the Entire Weight of the Ladder and Operator is Supported from Below on a Solid Foundation, and Not Suspended by Rods or Wires Attached to the Upper Part of the Shelving. The Ladder Has a Stout Turned Pole to Guide the Upper End of the Ladder in Moving, a Stout Hood to Cover Rivets to Prevent the Ladder from Hooking Backwards, But Not a Pound of Weight Rests on This Pole. The Great Success of the Bicycle Ladder Is in That **User Stands Directly Over the Wheels** and There is **No Side Friction** at All, and the Ladder Goes as Easily as Any Other Bicycle.

The Ladders All Have an Extra Wide Shelf at the Top for Convenience in Handling Stock, and the Wheels are Provided with Fenders to Prevent Them from Running Over Any Object, However Small, That May Have Been Left in Their Way.

The Track for Bicycle Ladders is a Double Track. At the Upper Part of the Shelving a Neat Turned Pole is Attached by Stout Malleable Iron Brackets, Serving to Guide the Top of the Ladder, and at the Bottom on the Base Shelf or the Floor, is Fastened a Small Half-Round Rail on Which the Wheels Run, Carrying the Bottom of the Ladder. The Bottom Rail is Little Larger Than Half of a Lead Pencil and the Upper Guide is a Little More Than One Inch in Diameter. The Lower Track May be Either "Noiseless" Brass Rail or Smooth Steel Rail, Nos. 5 to 9, Inclusive, Either in Bronze or Polished Nickel Plating. The Brackets Holding the Pole at Top are Either Nickel Plated or Japan Finished.

The Track for the Floor is So Small (but Three-Sixteenths of an inch in Height) That it Can Cause No Inconvenience.

Both the Floor Track and the Base Shelf Bicycle Ladders Have a Simple Device Which Entirely Prevents Them from Coming Off the Track Unless They Are Lifted Off.



LADDERS ONLY

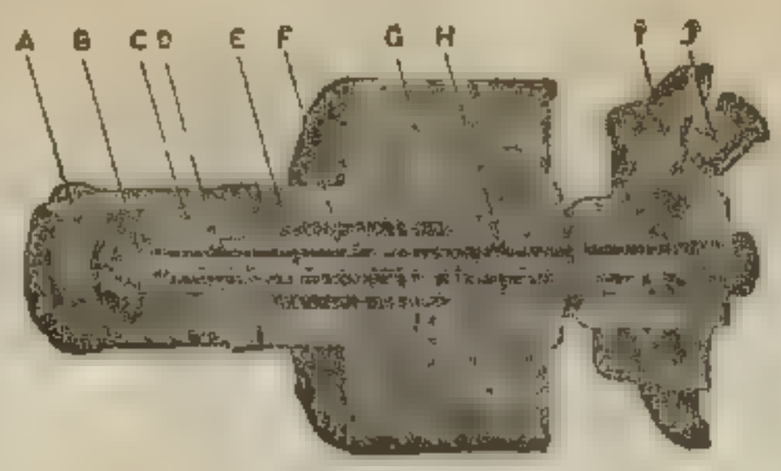
FAN MOTORS

EMERSON

Emerson 1923 Model Desk Fans and Oscillators are packed one in a Box and are supplied by the Factory complete with Ten Foot Parallel Cord and Rotating Edison Plug, attached to Motor, with Direction Sheet, ¼ pint Can of Oil and Five Year Guarantee Coupon attached to Motor.

The Illustration Herewith is a Photograph of an actual Cross Section of the Emerson Induction Armature, Fan Hub and Shaft. This Bearing is Entirely Different in principle from the Bearings of Ordinary Types of Desk Fans. Instead of a Rotating Shaft of Soft Steel, to which the Armature is Pinned, the Shaft of the Emerson Fan is a Hollow Steel Spindle (F) Pressed Firmly into the Rear Housing of the Motor (I). The Armature (G) Rotates upon this Shaft and is Entirely Separate from the Shaft. A Stud (E) passes through this Shaft and Holds a Retaining Screw with Washers (B) at the Front end to keep the Armature in position.



The Armature Hub (C) is threaded at the Front End to Receive the Fan Hub (A) which is Screwed on Firmly Against a Leather Washer which makes an Oil-Tight Joint Between the Solid Fan Hub and the Armature Hub. Thus, the Front end of this Bearing is Sealed Oil-tight, Eliminating any Possibility of Oil Reaching the Fan Blades to be Scattered Over Furnishings or Decorations.

The Simple and Wonderfully Effective arrangement for Lubricating this Bearing has been Largely Responsible for its Success During the Fifteen Years it has been in Use. Oil is Inserted through the Oil-Cup (J) and Runs into the Center of the Hollow Shaft, through the Slotted Holes (D-H) in the Shaft, Directly to the Bearing Surfaces of the Armature, where it is needed.

The Combination of Wearing Surfaces in this Bearing has been proven by Experience to be Highly Satisfactory for a Bearing of this Character. The Hollow Shaft or Spindle is of Case Hardened Steel, while the Armature Hub Running on this Spindle is of Soft Cast Iron. It Seems that no Better Combination of Wearing Surfaces can be Procured.

The Soft Porous Iron Absorbs the Oil, and in a Short Time the action of the Hardened Steel Surface of the Shaft Develops a Glaze on the Iron which is an Ideal Bearing Surface. Tests made on Fans which have seen many years of Continuous Service show this Bearing to be in even Better Condition than when the Fans left the Factory.

It will be noted that the Armature Hub Midway Between the Bearing Surfaces is Recessed, Leaving a space between the Shaft and the Cast Iron Hub. This Recess is Filled with Lubricating Grease when the Fan Motor is Shipped, Insuring Perfect Lubrication for Some considerable Time Even should the User Fail in the Ordinary Precaution of Supplying Oil to the Bearing.

One of the Secrets of the Success of this Bearing is the fact that it is Sealed at the Front End and Practically Sealed, so far as the Entrance of Dirt is Concerned, at the Rear End. Oil Remains on the Bearing Surfaces Until its Lubricating Qualities are Exhausted, and Dirt, Sand and Dust Floating in the Air Cannot Enter the Bearing to Cut and Grind it.

All Types and Sizes of Emerson Alternating Current Desk and Oscillating Fans are Equipped with the Hardened Steel Oil-Tight, Dust-Proof Bearing Described Above.

All Sizes of Emerson Desk and Oscillating Fans for Both Alternating and Direct Currents are Equipped with Fan Blades of a Patented Design Selected after Exhaustive Experiments with Blades of Different Characteristics. The Original Parker Design used on Emerson 12 inch Fans has been Successfully Modified to Meet the Requirements of 8 inch Fans and 16 inch Fans, but Retains the Essential Features which have Made this Design so Valuable.

The Parker Blade is a Rigid Sheet of Brass with a Curved Cutting Edge. The Rear Edge is so Shaped as to Minimize the Vibration which Results in the Hum of Ordinary Desk Fan Blades.

The Smallest Emerson Fan May be Converted to the Bracket Position without Extra Parts

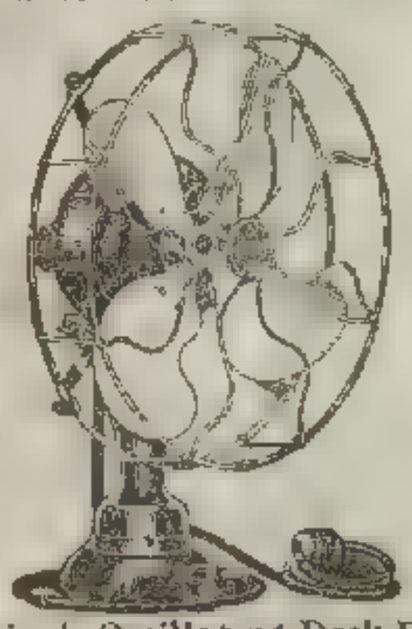
Where Necessary this Blade is Made unusually wide near the Hub to Project Air from the Center as well as from the Outer Circumference of the Fan. The Pitch or Dip of Parker Fan Blades is Considerably Greater than Found in a majority of Competitive Makes, Enabling these Fans to Project Air to a Great Distance without Objectionable Noise

All Emerson Fans for Alternating Current are Fan Motors of the Induction-Type. This is the Simplest Known Form of Motor and, in the Design Employed for Emerson Fan Motors, has Neither Brushes nor Commutator, nor Moving Contacts of any Kind.

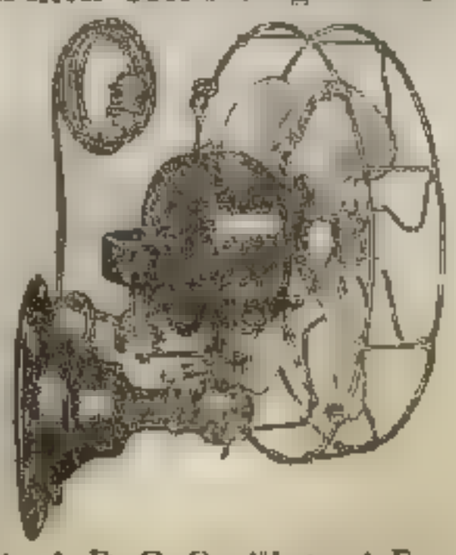
Emerson 1923 Models Oscillators have valuable Improvements in the Mechanism, by which the Range of Oscillation may be varied from 15° to 90°, of the stationary position secured by adjusting a Single Thumb Lever below the Gear Case. The Mechanism has been greatly Simplified and all loose parts eliminated.

A new feature is the Adjusting Collar beneath the Motor, by which the direction in which the breeze is thrown may be instantly changed to put the breeze where it is wanted without re-adjusting the Base. This feature is particularly valuable where the Motor is installed as a Bracket Fan with Base fastened to the Wall. The Adjusting Handle in the Collar points in the direction in which the breeze will be thrown.

These Oscillators are Equipped with a Hinged Base Permitting the Blades to be Tilted Up or Deflected as may be Desirable. By Withdrawing the Thumb Screw at the Hinge, this base may be Adjusted to the Angular Position, and the Base Fastened Directly to the Wall. The Hinged Joint is so Designed that the Motor would not be Damaged by Falling Forward, Even Should the Thumb Screw be Fastened Insecurely. When Used as a Bracket Fan the Blades May be Tilted Up or Deflected as well as when Used as a Desk Fan, Permitting the Oscillators to be Placed Well Above the Occupants of a Room and Tilted Down to Distribute the Breeze over Many Persons, without Annoyance to those Nearest to the Fan.



12 inch Oscillating Desk Fan



12 inch D. C. Oscillating Fan in Bracket Position
(Blades may be Deflected to Throw Breeze Down when Mounted on Wall)

Owing to the Wide Diffusion of Air Secured with Oscillating Fans, the Blades of Emerson Oscillators are Adjusted to Throw a Stronger Breeze than Thrown by Non-Oscillating Fans of Corresponding Styles. As a Result, Emerson Oscillating Fans Consume a slightly Larger Amount of Current than Corresponding Sizes of Emerson Swivel-Trunnion Fans, but for any Extra Current Required by the Motor the User Receives Full Value in Increased Volume of Air Delivered.

All Emerson Oscillating Fans are Three-Speed Positive-Acting Geared Types, not Dependent on air Reactions for their Swinging Movement. As a Result these Fans Oscillate Steadily in any Position as Desk or Bracket Fans.

Emerson Oscillators have all the Other Valuable Features of Emerson Swivel-Trunnion Fans, Described on Previous Pages. They are Induction Fans without Brushes, Commutator or moving contacts of any kind Motors of this kind, Equipped with the Oil-Tight, Dust-proof Bearing of the Emerson Fan, are sure to give long Service.

These Fans Should not be Confused with Oscillators Depending on Moving Vanes and Uncertain Air Reactions for their Swinging Movement.

ELECTRIC FANS

EMERSON

NON - OSCILLATING — SWIVEL TRUNNION — DESK OR BRACKET — THREE SPEED

For Alternating and Direct Currents

Specifications

Parker (Patented); Brass; Four Blades; Heavy Steel Guards; Black Enameled.

BALL BEARING—HIGH SPEED
Details of Tub Construction

Tub—Tub Made of Best Quality Selected Southern Cypress. Inside Corrugations. Cypress will Last Longer and Give Better Satisfaction in a Washing Machine than Any Other Wood. The Tub is Finished Nicely in Natural Wood Finish with a Good Quality of Varnish and is Very Strong in Construction, the Stave Legs Being Well Braced to Prevent Leakage.

All Gears are Underneath the Tub where they are Entirely Out of the Way; no Danger of Catching or Tearing Clothing.

On account of the Special Ball Bearing, Together with the Double Lever and Walking Beam Construction, this Washing Machine Actually Does Run Easier when Loaded Than Any Other High Speed Washer.

Note—This Machine can be Operated Either in a Sitting or Standing Position. Operating Handle is Provided at Lower End with a Metal Stirrup so that Both Hand and Foot Power May be Applied.

Mechanical Principle—The Novel Mechanical Principal of Construction, that is the Double Lever with Walking Beam Connection, not only Equalize the Power, but give Greater Speed to the Agitator than Any Other High Speed Washing Machine.

Ball Bearing—The Ball Bearing Used is Simple, Set up in Vaseline, so that it will not Need Oiling for Years and is Without Question the Easiest Running Bearing Used on a Washing Machine. It is Simple and Cannot Get Out of Order.

Balance Wheel—Extra Heavy; This Part of the Mechanism Actually Takes Off the Major Portion Muscle Power Required to Operate the Old Style, Low Speed Washer.

Castings—All Castings Made of Best Quality Steel, and Every Metal Part of the Machine is not Only Carefully Made and Extra Heavy and Strong, but is Finished with the Electro Galvanizing or Sherardizing Process This Finish Does not Peel or Crack as Paint will Do and Effectually Prevents Rust.

Each

No. 22—Inside Dimensions—Diameter at Bottom 23 inches, at Top 20 inches; Depth 12¾ inches; Height to Top of Tub 28½ inches; Height Over All 44½ inches; Length of Wringer Board 15½ inches, Tub Made of Best Quality Cypress, Natural Finish and Varnished; Inside Corrugated, Giving a Perfect Rubbing Surface; All Metal Parts Electro Galvanized Finish, Legs Securely Bolted to Body and Strengthened by Heavy Cross Braces..... **$36.00**
One in a Crate; Weight Crated 100 lbs.

WASHING MACHINES
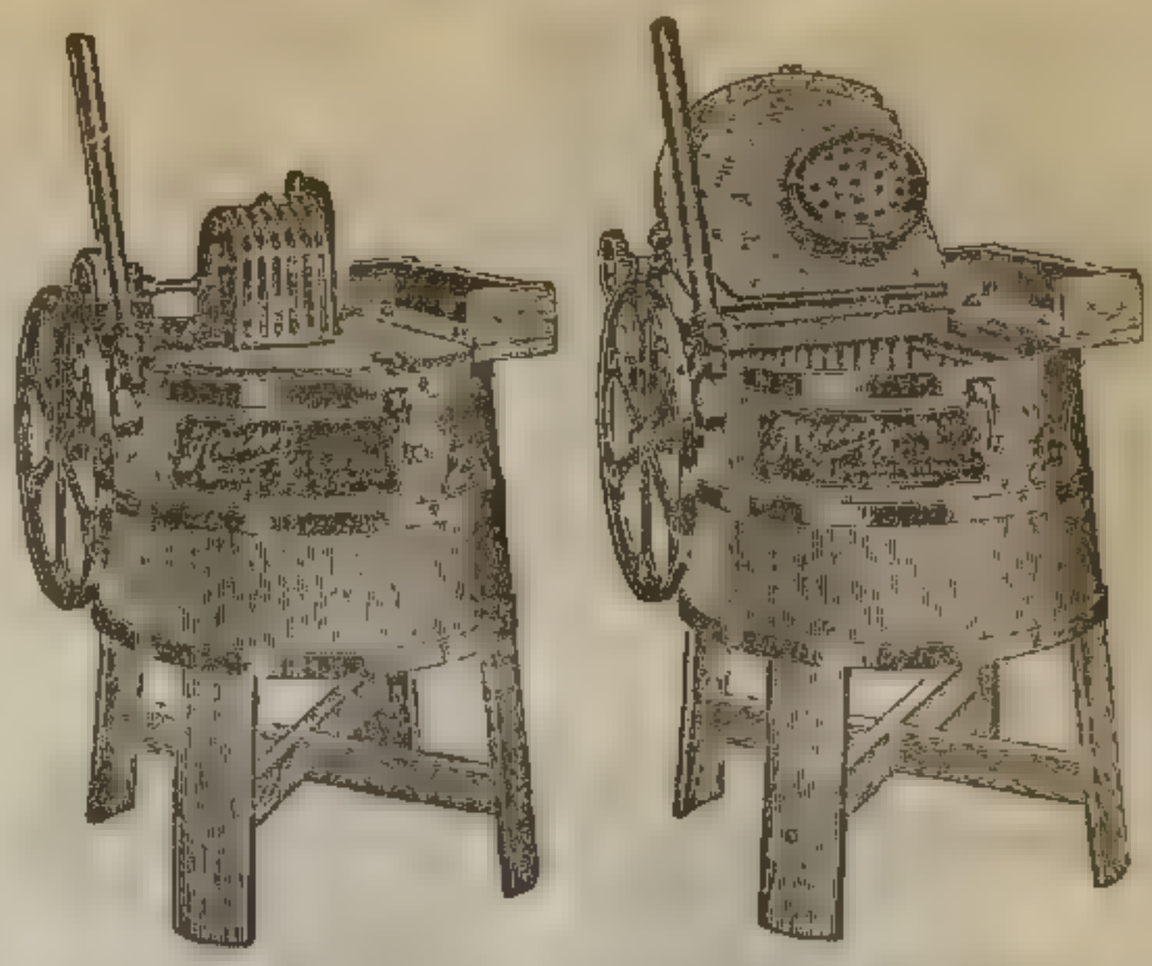
HORTON VACUUM



In This Washer the Plunger, or Agitator, Does 50% More Work with the Same Effort than on Other Machines, Because it Makes 2½ Strokes to Each Stroke of the Operating Lever. This High Speed is Made Possible by the Frictionless Cut Gears and the Well Balanced Mechanism.

Each One of the Many Perforations Acts as a Valve to Let in Air for Suction Each Time the Plunger is Raised Out of the Water.

So Much Agitation is Produced by this High Speed Method, that the Lid of the Machine Must be Securely Closed to Keep the Water and Suds in the Tub.

There are More Real, Common-sense Features in the **Horton Vacuum** Than in Any Hand-power Washer on Earth. It Does the Work Speedily and Noiselessly No Matter How Big the Load.

Anybody can Operate the **Horton Vacuum.** The Operating Lever can be Placed in Either of Two Positions, Suitable for Either Child or Grown Person.

Mechanism Driving Gears are CUT Instead of Cast, Causing the Teeth to Mesh Perfectly and Reduces Friction to a Minimum It also Makes the Machine Run Much Easier, Perfectly Noiseless, and it Will Wear Much Longer.

Tub—The Tub is Made of the Highest Grade Louisiana Red Cypress (the Wood Eternal), Thoroughly Seasoned. It is Made Larger on Account of the Easy Running Mechanism, Enabling the Work to be Done Much More Quickly. It is Fully Corrugated on the Inside by a Special Process to Avoid Splinters.

Finish—The Mechanism (Except the Fly Wheel) is Gold Bronzed. The Fly Wheel and Hoops are Green Enameled. The Tub has Three Coats of Coach Varnish and the Name is on a Beautiful Decalcomania Transfer. These Combinations Give the Entire Machine the Appearance of Parlor Furniture.

Each

No. 35—Weight Crated, 95 lbs..... **$29.00**

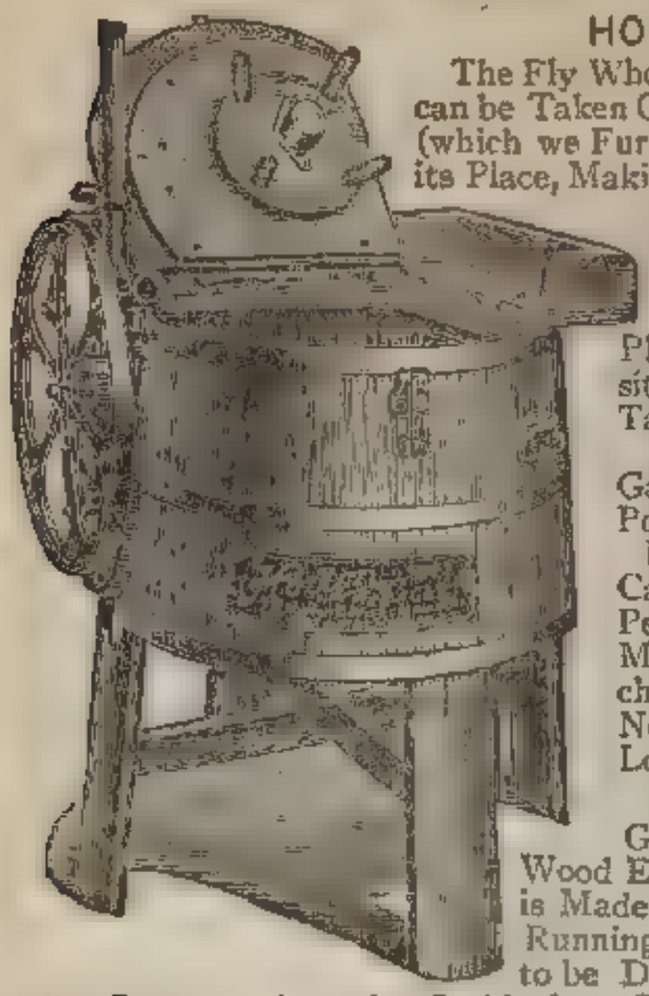
WASHING MACHINES

HORTON MIRACLE



The Fly Wheel on the Regular Miracle Washer can be Taken Off Instantly and a Pulley Wheel (which we Furnish at Small Cost) can be Put in its Place, Making a Gasoline Engine Power Machine. And the Belt Need not be Removed Each Time Lid is Opened.

The Operating Lever can be Placed in Either One or Two Positions Convenient for a Short or Tall Person, Adult or Child.

The Dolly Post is Guarded by a Galvanized Cup, Eliminating all Possibility of Tearing Clothes.

Driving Gears are Cut Instead of Cast, Causing the Teeth to Mesh Perfectly and Reduces Friction to a Minimum. It also Makes the Machine Run Much Easier, Perfectly Noiseless, and it will Wear Much Longer.

The Tub is Made of the Highest Grade Louisiana Red Cypress (the Wood Eternal), Thoroughly Seasoned. It is Made Larger on Account of the Easy Running Mechanism, Enabling the Work to be Done Much More Quickly. It is fully Corrugated on the Inside by a Special Process to Avoid Splinters.

CLOTHES WASHERS

RAPID

Makes Clothes Washing Easy. Saves the Knuckles, Saves the Clothes, Saves One-half the Soap. Just the thing for Washing Curtains and Other Delicate Fabrics. The Heavy Part of the Washing is Quickly Done by Placing the Clothes, or Fabric, to be Washed in a Tub of Water or Suds (the Water can be Boiling Hot), and Agitating the Water by a Vertical Motion of the Washer. Fifteen Minutes Time to a Tub of Clothes. This Forces the Water Through the Fabric, and Removes the Dirt.

WONDERFUL EFFICIENCY

THE SHAPLEIGH HARDWARE CO. PRIDES ITSELF ON THE EFFICIENCY OF ITS MAIL ORDER DEPARTMENT - WHILE NOTHING PLEASES THE EMPLOYES IN THAT DEPARTMENT MORE THAN TO SHOW HOW QUICKLY AND CORRECTLY THEY CAN "EAT UP" A LOT OF ORDERS. THEY ARE ALL PICKED MEN, TRAINED AND EXPERT IN THE WORK IN WHICH THEY ARE ENGAGED AND SELDOM FAIL TO GIVE TO CUSTOMERS ENTIRE SATISFACTION. IF YOU HAVE NOT BEEN IN THE HABIT OF ORDERING BY MAIL WE SUGGEST A TRIAL ORDER AND KNOW THAT YOU WILL BE SO PLEASED WITH THE SERVICE THAT YOU WILL CONTINUE IT

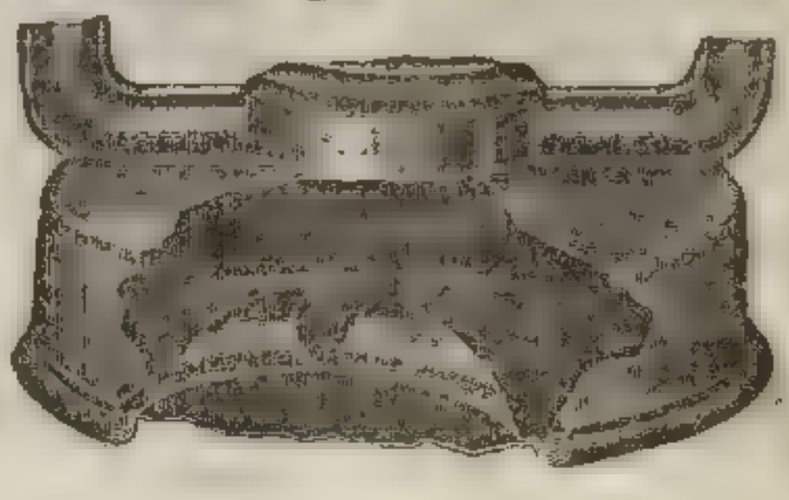
Cut Illustrates the Standing Handle and High Ring Used on **Norleigh Diamond** Cold Blast Styles; Handle Remains in Upright Position When Set on the Ground; Also Very Handy When Hanging Lantern on High Hook.



The Above Illustration Shows Some of the Features of the Fount in Our No. 0 Norleigh Diamond Utility Lantern. This Mammoth Fount Holds Sufficient Oil for the Lantern to Burn 56 Hours. Note the Provision for Long Wear. IXAA Prime Tin Plate. Sides are Spun on, Preventing Leaks.

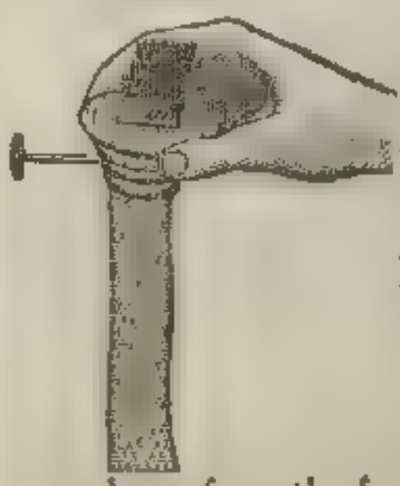
Cut Shows **Tag on All Norleigh Diamond** Lanterns. A Concise List of Selling Hints for the Retail Salesman is Printed on the Reverse Side.

Cut Shows Label on all **Norleigh Diamond Lanterns** Giving Instructions How to Obtain Best Results.

THE PROPER CARE OF LANTERN WICKS

A cotton wick serves but one purpose in lantern or lamp, and that is to convey the oil from the fount up to the point of combustion.

A lamp wick or lantern wick is a loosely woven bundle or bunch of cotton fibers, of proper size to fill the wick tube of the burner. The lower end of the wick resting in the fount becomes quickly saturated, and then by means of capillary attraction the oil is lifted and carried up through the burner to the point of combustion. It is, therefore, clear that any change in the character of the fibers which constitute the wick will affect their usefulness as a means of conveying the oil by attraction.



The illustration shows one of the wicks and burners taken from a tested lantern. You will observe that the upper end of the wick is charred for a distance half the length of the thumb. This charring comes as a result of being exposed directly to the flame. It shows that the business end of the wick for a distance of an inch or more is badly charred. That means that the cellular character of the wick fibers had been *destroyed by fire*. The black portions are simply the ruins of fibers, the mineral-like residue or ashes from which all absorbent properties have been eliminated. This inch and quarter of charred wick is almost useless, because it cannot properly perform the functions of a wick.

Every experienced lantern user is very careful to avoid bringing about such conditions as described above, well knowing that it is useless to expect a steady, dependable light with so imperfect a wick. Where these conditions exist, it is necessary to trim all blackened portion of the wick away, and begin again exposing only the tip end of the wick to the flame. A wick properly trimmed once every few days will give absolute and entire satisfaction, always provided that the perforated globe rest is kept reasonably clean and the fount at least moderatly filled with kerosene oil of the ordinary grade which the market affords.

We do not apologize for our lantern construction. It is the best in existence. We don't ask any special treatment for our lanterns. They don't need it, but we do insist upon ordinary cleanliness and a glimmer of common sense in the use of our lanterns or any other of our specialties.

THE ORIGINAL STYLE NORLEIGH DIAMOND COLD BLAST

"ORIGINATED BY US"

The Norleigh Diamond Lantern Will Produce the Greatest Volume of Light, Without Smoke or Blow-Outs, Because We Produce Perfect Combustion.

The Fresh Air is Taken in at the Disc, Goes Down Through the Tubes, and is Fed in at the Bottom of the Burner, as Soon as the Oxygen is Consumed from This Air, it Goes Out at the Top of the Lantern. This is So Perfectly Timed as to Produce the Most Perfect, Steady, Non-Flickering Flame Possible **and Will Not Blow Out in the Most Severe Gale.**

Large Heavy Ring, Stands Erect Always Ready to Insert Finger.

Dome, Heavy, Made to Protect the Flame from Wind and Rain.

Tubes, Made With Lock Seams. Heavy and Perfectly Smooth at Elbow.

Inside Cylinder, Made Strong from One Piece of Tin, Riveted, Not Soldered.

Cling Globe Guard, Holds Globe Securely When Thrown Back for Trimming Wick and Cleaning Burner. Does Not Crack the Globe.

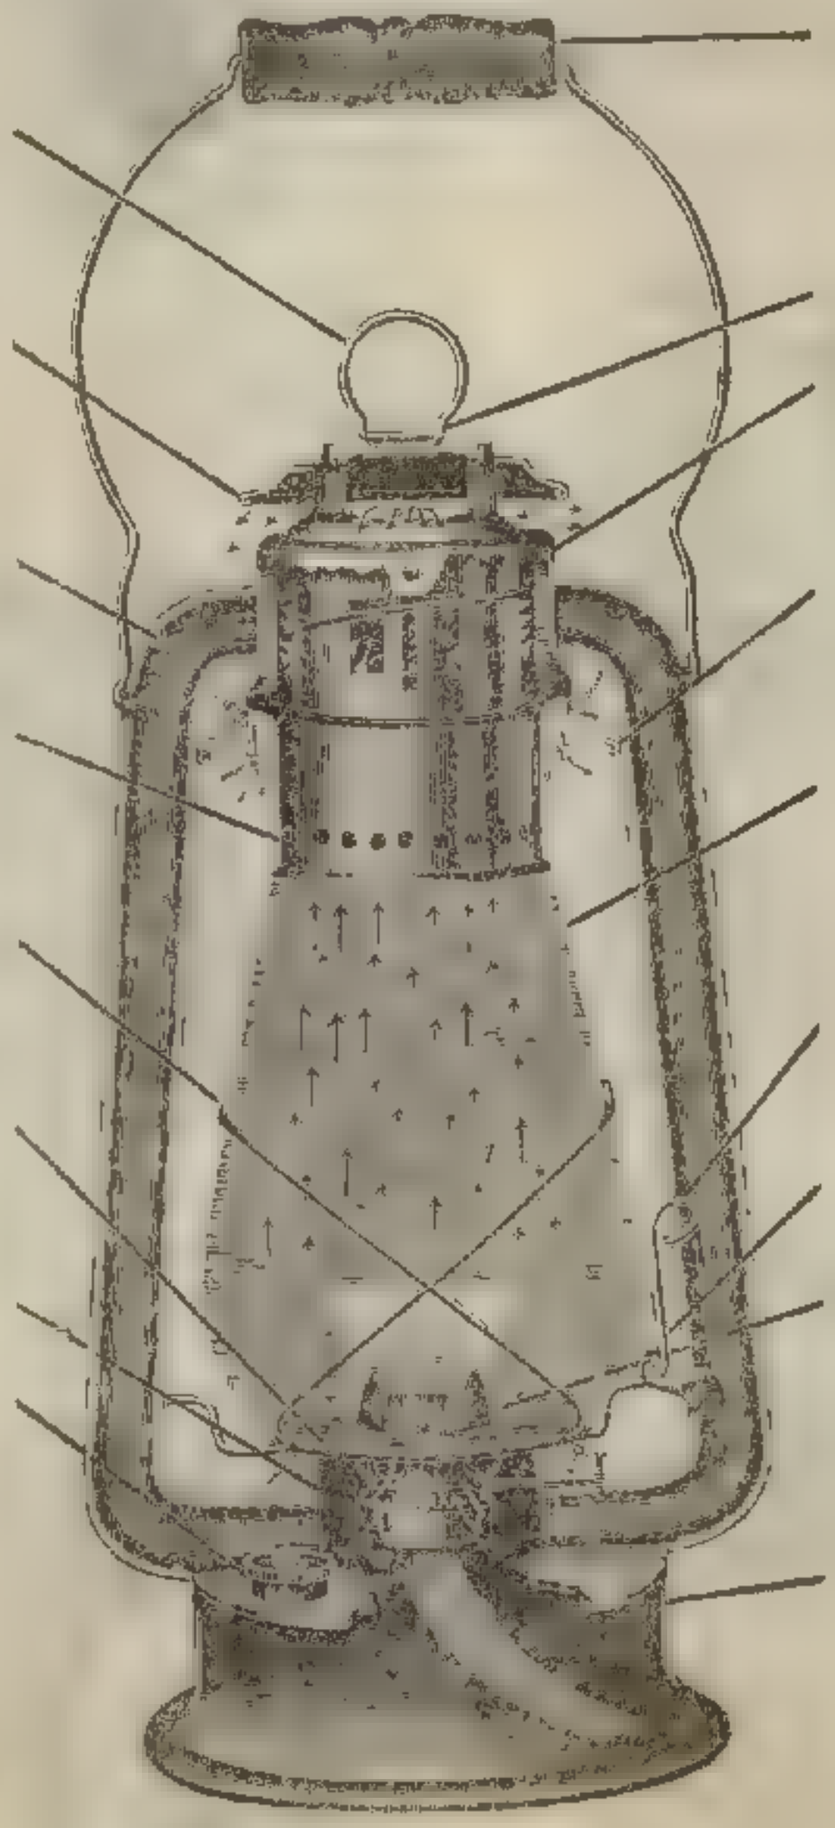
Globe Rest, Wired Edge; Perforations Keep Globe from Becoming Superheated.

Air Chamber, Larger and Stronger Than Other Makes.

Oil Hole, Big Mouth Brass Oil Hole Set Into Fount and Clinched Under; No Funnel Required to Fill. Broad Flange Cap, Easy to Turn.

25% More Light

Same Oil



New Idea Wood Ball Handle Stands Automatically Erect.

Strong Clip, Which Holds Ring Securely

Outside Cylinder, Heavy, Made from One Piece of Tin, Reinforced on the Inside.

Disc, Heavy Rolled Edge, Fastened Securely to Tubes, This Strengthening the Lantern.

Globe, Made from Special Mould; Full Weight; Selected; Perfect. Ground Top and Bottoms.

New Idea Inside Globe Lift, Simple and Positive. Entirely Out of the Way.

Lift Lock, Made of Heavy Steel. Forced in the Tube. Cannot Work Loose.

Burner, No. 2, of Extra Heavy Reinforced Steel, Tinned and Retinned and Lacquered, Will Last Much Longer Than Brass Locked to Fount, Will Not Come Loose When Globe is Raised. Wicked Ready to Light.

Fount, Much Larger Than the Majority It is Drawn from One Piece of Tin and Redipped. The Bottom is Spun On, Not Soldered, and is Tested by Compressed Air.

The Norleigh Diamond is Made of Heavy IX AA Quality of Tin Redipped After Forming (Not IC or Common IX) and Tested by Compressed Air. They Never Leak. Notice the Large, Wide Open Mouth Oil Hole. It is Not Necessary to Use a Funnel in Filling. These Superior Points and Many Others Make **the Norleigh Diamond** Lantern the Best on Earth.

BIMOCYCLE MODEL 1919

"ORIGINATED BY US"

TRADE MARK REGISTERED IN THE U. S. PATENT OFFICE

TRADE MARK REGISTERED IN THE U. S. PATENT OFFICE

FOR OVER 25 YEARS RUGBY BICYCLES HAVE BEEN THE QUALITY LINE OF AMERICA

THE QUALITY ALWAYS THE SAME NOTWITHSTANDING THE PRICE

This is the Best Looking Bicycle Ever Produced, That Has the Appearance of a Real Motorcycle. Special Attention is Called to the Truss Frame Construction, Which Has a Drop of Two inches at the Rear End. This Drop Reduces the Regular 20 and 22 inch Frame to 18 and 20 inches, Respectively, But We Will Call the Frames 20 and 22 Instead of 18 and 20 inches, Which Are Their Actual Measurements.

We Call Special Attention to the Possibilities of the 20 inch Frame, Which Can be Ridden by the Boy Who is Just at the Age When He Wants the Most Elaborate Bicycle. In the Past This Boy Has Been Forced to Ride an 18 inch Juvenile with 26 inch Wheels. He Can Now Ride the 20 inch RUGBY BIMOCYCLE with Full Size (28 inch) Wheels and Feel That He Has a "Grown-Up" Mount. Equipped with Roller Chain, Genuine Rugby Hanger, Motorcycle Style Handle Bars, Motor Bike Style Saddle, Square Check Rubber Pedals, Motorcycle Style Mud Guards, Motorcycle Stand and Good Service Tires.

Illustration Shows No. 601R Bicycle

CROSS CUT SAWS

E. C. ATKINS & CO.

Made of High Grade Crucible Steel, Evenly Tempered, Carefully Ground, Sharpened and Set; Polished and Etched; Segment Grinding Consists in Grinding Away the Central Portion of the Plate, Extending from the Back to Within About Two Inches of the Cutting Edge, Leaving the Saw Strong at the Ends and Allowing for Wear on the Tooth Side Without Making the Saw Thinner in the Center Than at the Ends.

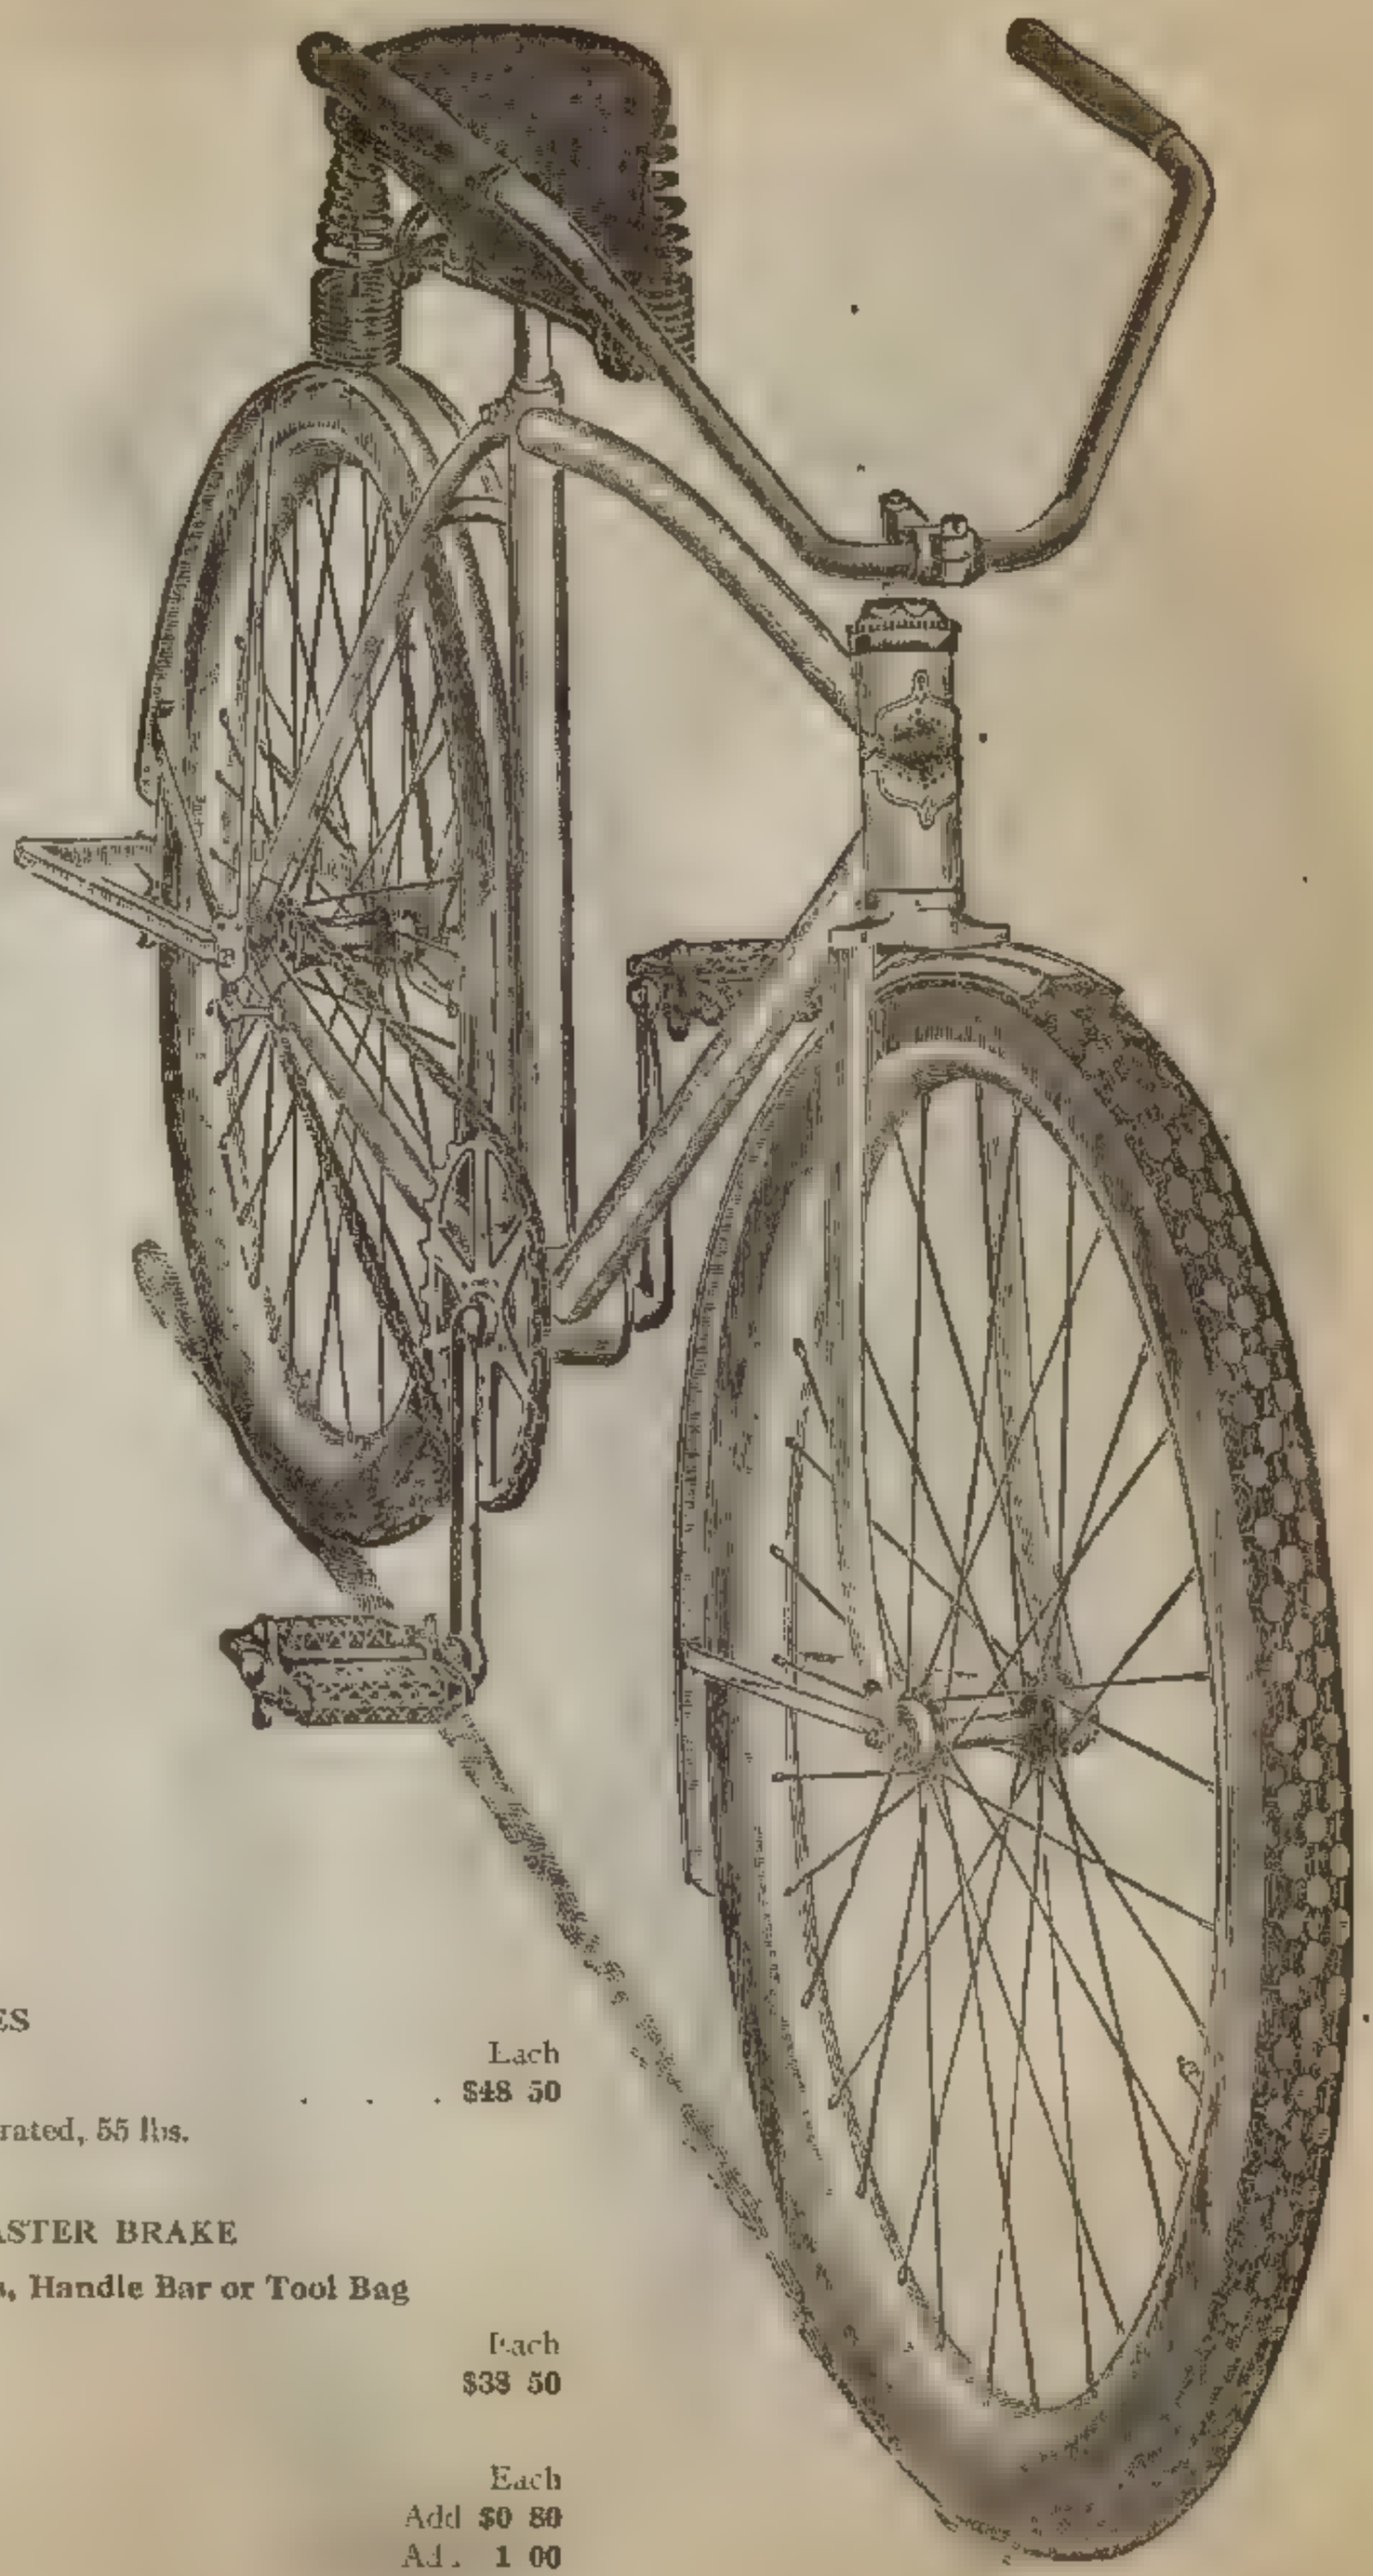
WONDER BICYCLES

"ORIGINATED BY US"

This is One of the Latest Developments in Bicycle Manufacture. A Very Substantial Bicycle, Similarly Constructed to Bimocycle Pattern, Except That the Lower Top Bar Has Been Eliminated.

We Call Special Attention to the Possibilities of the 20 inch Frame, Which Can be Ridden by the Boy Who is Just at the Age When He Wants the Most Elaborate Bicycle. In the Past This Boy Has Been Forced to Ride an 18 inch Juvenile with 26 inch Wheels. He Can Now Ride the 20 inch Motor Bike with Full Size (28 inch) Wheels and Feel That He Has a "Grown-Up" Mount. Complete with Roller Chain, Wonder One Piece Hanger, Checkered Rubber Pedals, One Piece Rock Elm Rims and Non-Skid Tires.



SPECIFICATIONS

Bearings—Balls: $\frac{5}{32}$ inch in Head; $\frac{5}{16}$ inch in Hanger Coaster Brake; $\frac{3}{16}$ in Front Hub.

Chain—Roller, $\frac{1}{16}$ inch; 1 inch Pitch.

Connections—Arch Fork Crown, Nickel Plated, Forged Seat Post; Cluster Bolt and Nut Fastening

Crank Hanger—Wonder One Piece; 7 inch Round Cranks, Highly Nickeled.

Enamel—Four Coats, Hand Polished; Blue with Gray Head

Frame—20/18 inch Only; 1 inch, 18 Gauge English High Carbon Seamless Tubing.

Handle Bar—No. MB2; BD Grips

Hubs—Turned from Solid Stock; Tool Steel Cones and Cups.

Pedals—No. 20; Square Checkered Rubbers.

Rims—One Piece, Rock Elm, Enameled Aluminum with Red and Blue Hair Line Stripes

Saddle—No. 27R.

Spokes—14-16 Gauge.

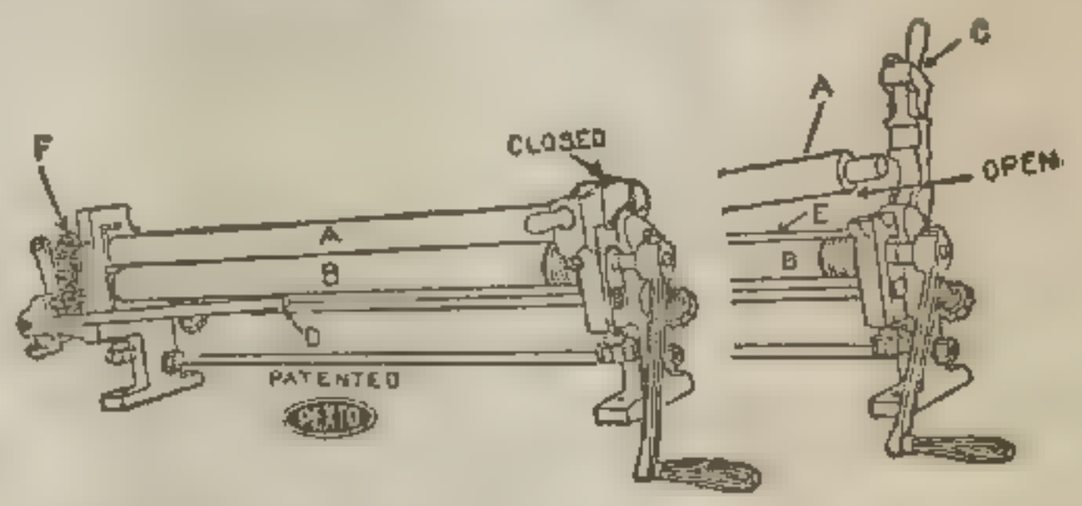
PATENT SLIP ROLL FORMERS



New Original Pexto Features are Embodied in These Forming Machine Patterns that Place Them in a Class by Themselves. They are Greatly Improved Over Our Old Slip Roll Pattern Forming Machines and Those Which the Present Market Offers. A Careful Study of the Illustration Shows the Time and Steps Saved Through Being Able to Perform All Operations at One End of the Machine, the Convenient End Where the Crank is Fitted. Without Necessitating the Changing of Positions the Sheet to be Formed is Placed Between the Gripping Rolls (A) and (B). The Cylinder Formed, Open Latch (C), Then by Means of Lever (D) raise Upper Gripping Roll (A) and Slip the Formed Cylinder From the Roll (A). It will be Readily Seen that all Operations are Performed at the Crank End of the Machine—a Pexto innovation that Can be Well Appreciated by the Mechanic Who Has Operated the Old Pattern Slip Roll Former. Rolls (A) and (E) are Adjusted with Knurled Screws, and Once Adjusted They Cannot Slip. The Gears (F) are Steel, Machine Cut, Running More Smoothly Than Cast Iron Gears Without Danger of Slipping or Breaking with Whatever Thickness of Metal is Used.

The Roll Raising Mechanism in These Machines is so Balanced that the Roll (A) is Easily Lifted with a Slight Pressure on the Lever (D). The Latch (C) is Released and Closed with one Movement, and is Self-Locking.

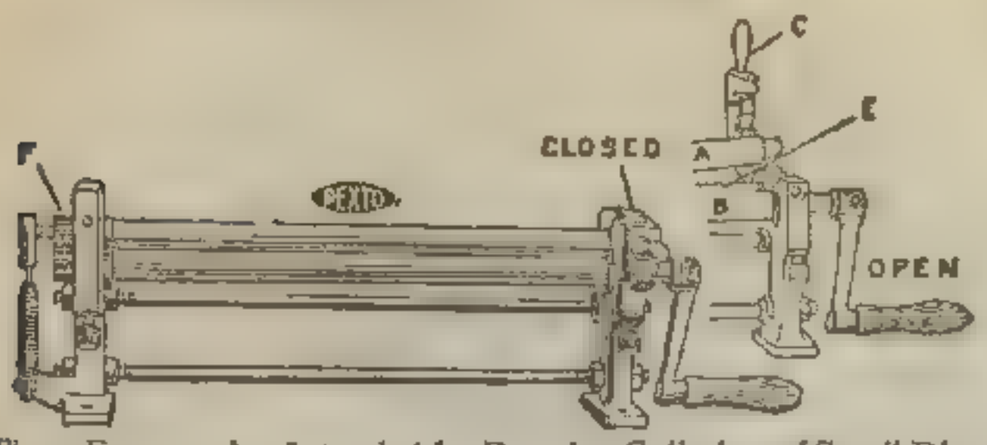
TINNERS TOOLS

PECK, STOW & WILCOX

PATENT SLIP ROLL FORMERS



These Formers Are Intended for Forming Cylinders of Small Diameters and are an Improvement Over Our Old Slip Roll Tin Pipe Forming Machines and Those Which the Present Market Offers. All Operations are Performed at One End of the Machine—the Convenient End, Where the Crank is Fitted.

After the Cylinder is Formed the Latch (C) When Opened Permits the Upper Roll (A) to Raise Automatically. The Formed Cylinder Can then be Removed from the Roll A, Without Distorting It. The Latch (C) with the Roll (A) is Released and Closed with One Movement and is Self-Locking. Rolls (B) and (E) are Adjusted with Knurled Screws and Once Adjusted They Cannot Slip. The Gears (F) are Steel Machine Cut.

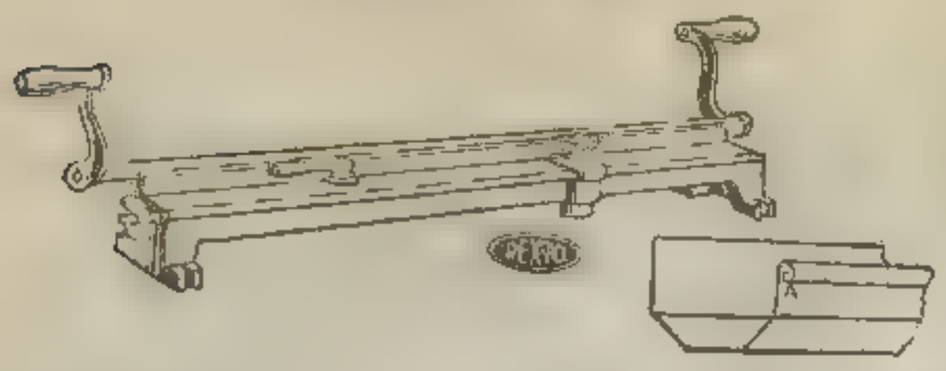
GUTTER BEADERS

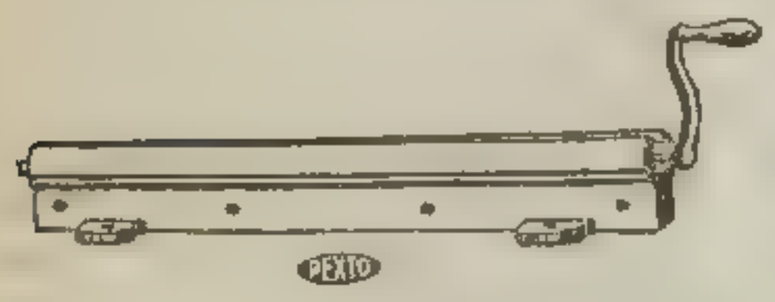


Gutter Beaders are Intended for Forming a Bead on the Edges of Gutters. This Machine is so Constructed that it can be Easily Adjusted to be Used with Rods from ⅜ to ⅛-inch in Diameter. The Thickness of the Metal is Determined by the Size of the Rod. It has a Gauge or Stop on the Left-hand End, so that after Adjusting the Jaws and Setting the Gauge for the Size of the Rod to be Used, the Jaws can be Easily Opened to Remove the Work and Rod, and then Closed in Exactly the Same Position as when the Bead was Formed, so that the Operator can Form any Number of Beads of Exactly the Same Size. The Jaws are Adjusted by a Hand Wheel with Rack and Pinion, which Adjusts Both Ends of the Movable Jaw.

Each

No. 700—Length 31 inches; Diameter of Rod ⅜ to ⅛ inch; Weight Each 75 lbs..... **$42.00**

One in a Box



The Jaws on these Machines do not Open for the Purpose of Removing Rod and Work. The Rod is Enclosed, and They are Adapted for the Size Rod Ordered.

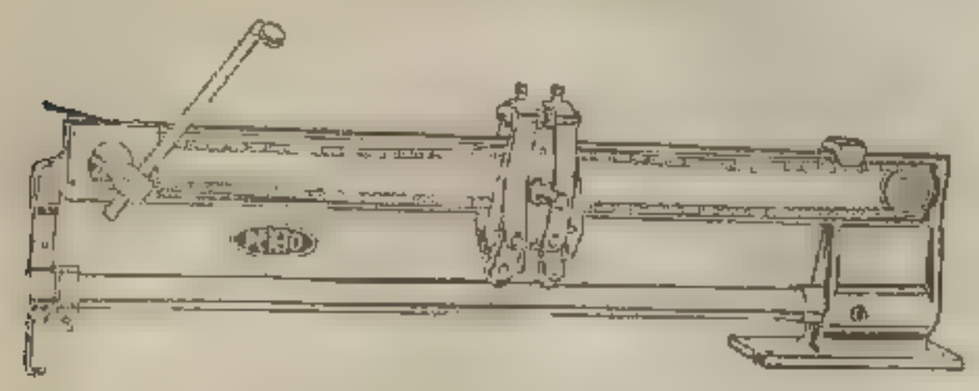
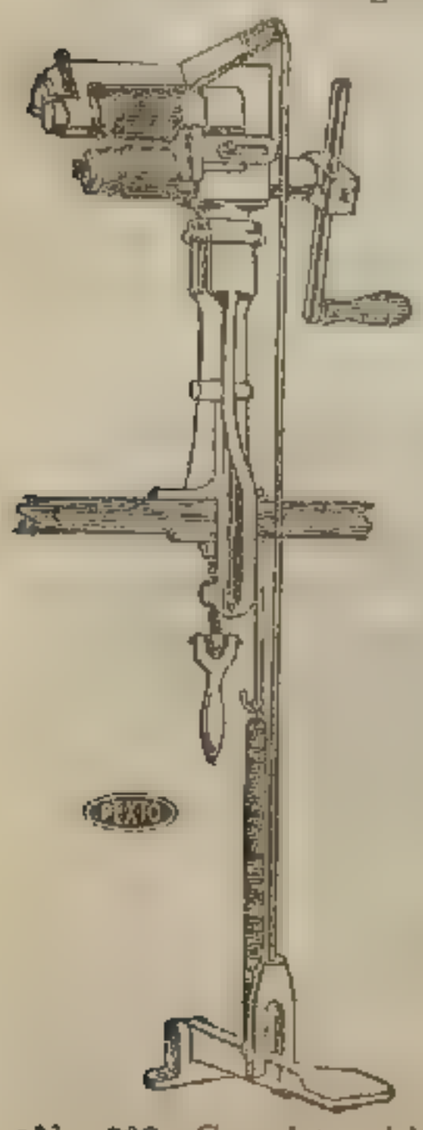
GROOVING MACHINES



Improved Automatic; More Rapid than the Ordinary Groover, in that Operator Does Not have to Change His Position in Inserting and Removing Work from the Machine; Has Adjustable Stop on Upper Bar for Work of Different Lengths; May be Used on All Cylinders, Not Less than 2 inches in Diameter; Adapted to Metal Not Heavier than 24 Gauge.

	Each
✣No. 518A—Will Groove Work up to 30 inches; Size of Grooving Rolls; One Each 3/16, 7/16, and 15/32 inch; and Two 5/16 inch; Also One Flattening Roll; Weight Each 200 lbs.	$136.50

One in a Box



CRIMPING AND BEADING MACHINES

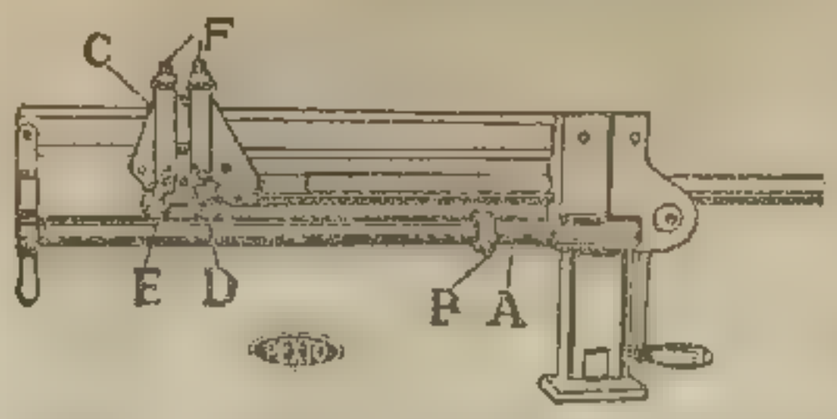
With Foot Treadle; for Depressing Rolls; Contact of Upper Beading Roll is Adjustable by a Lever; Lever Also has an Independent Adjustment for Raising Upper Beading Roll, and Taking Same Out of Contact with Lower Roll, when Crimping Only is Desired, thus Obviating the Necessity of Substituting Blank Collar for Beading Rolls; Capacity, 24 Gauge Iron and Lighter; Crank is Adjustable to Suit Light or Heavy Work.

	Each
✣No. 602—Complete with Standard and Foot Treadle, Like Cut; Weight Each 38 lbs.	$58 80

One in a Box

TINNERS TOOLS

PECK, STOW & WILCOX
GROOVING MACHINES



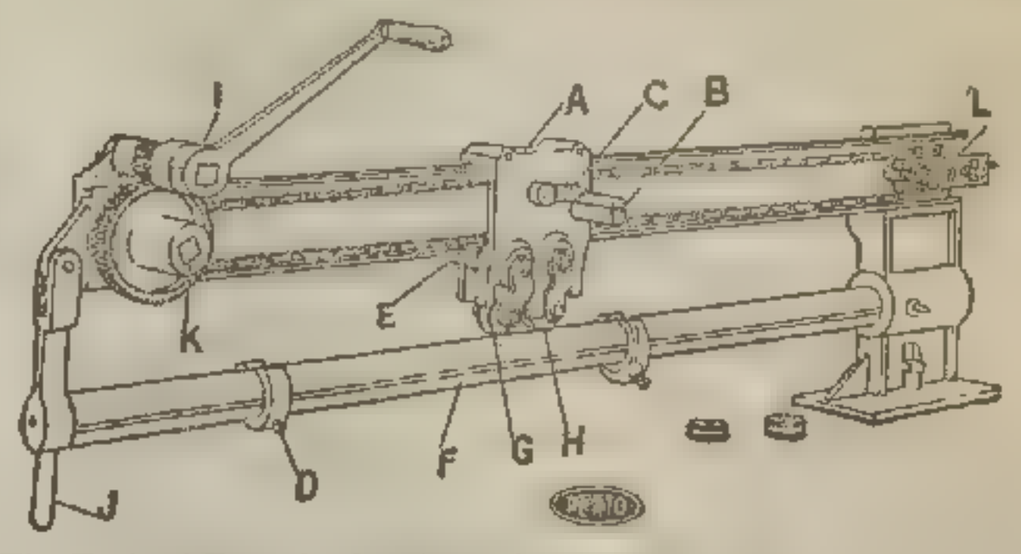
These Machines are Constructed for General Grooving and Have an Improvement Consisting of an Attachment Which Grooves and Flattens the Seams of Cylinders in One Operation. Lower Bar or Horn (A) is Reversible, so that Either the Flat Surface of One of the Grooves Which is Planed into the Horn can be Turned Upward, Permitting for the Locating of Seams on the Inside or the Outside of the Work. The Seam is Put on the Inside of Work by Means of Flat Roll which Presses the Seam into One of the Grooves Planed in the Horn, Outside Grooving is Done in the Usual Manner by Using the Grooved Rolls on Flat Surface of Horn. An Adjustable Stop Collar (B) is Fitted on Lower Horn (A) to prevent work Slipping while Being Grooved.

An Improved Feature will be Found in the Carriage (C) which Holds Flattening Roll (D) and Grooving Roll (E). The Flattening Roll (D) Runs Idle on the Outward Run and the Grooving Roll (E) Runs Idle on the Backward Run. In other Words, Both Rolls do Not Press on the Seam at the Same Time, which Makes for Easy Grooving. The Old Style Friction Spring and Roll for Tension are Not Used, the Tension Being Secured Through a More Simple Arrangement at (F), which Permits for Greater Uniformity in the Seams Grooved and Eliminates Frequent Spring Breakage.

Nos.	506-A	507-A
Length Grooving Horn, inches	33½	43½
Weight Each, lbs.	151	175
Each	$105.00	115.50

One in a Box

GROOVING MACHINES



The Trained Eye of a Mechanic is Not Necessary to Claim for These New Patterns a Masterpiece Machine for Grooving and Flattening the Seams in Heavy Sheet Metal Work. The More Important Principles Embodied in the Construction of this Machine are Original, Making for a Greatly Serviceable and Convenient Machine for Light as well as Heavy Work.

(A) is the Grooving Carriage that Moves on a Chain Through Gears; (L) is a Take-up Attachment, if the Chain Should Stretch after Long and Constant Use; (C) is a Release Lever, Disengaging the Carriage from Chain. When so Disengaged the Carriage (A) can be Worked Backward and Forward by the Handle (B) for Lightning Grooving on Light Material. The Position of Hand Crank (I) offers a Direct-acting Motion. Putting the Crank (I) in the Large Gear (K), the Machine Becomes Back Geared for Greater Ease when Grooving Heavy Iron. Pressure of the Grooving Roll (G) and Flattening Roll (H) is Secured Through Eccentrics and which are Quickly and Easily Adjusted Through a Turn of Knobs (E). The Flattening Roll (H) Runs Idle on the Outward Run and the Grooving Roll (G) Idle on the Backward Run. The Two Rolls do Not Press the Seams at the Same Time, Therefore Easy Grooving is Assured. Lower Bar (F) is Reversible, so that Either the Flat Surface or One of the Grooves which is Planed into the Horn can be Turned Upward, Permitting for the Locating of Seams on the Inside or the Outside of the Work. The Stop (D) is Steel and Prevents Work Slipping while the Grooving is Taking Place.

The Combination of Features Described Offers an All-around Grooving Machine for Light and Heavy Work up to 36 inches and No. 20 Gauge. The Big, Busy Shop Cannot Afford to be Without One.

IRON BENCH PLANES

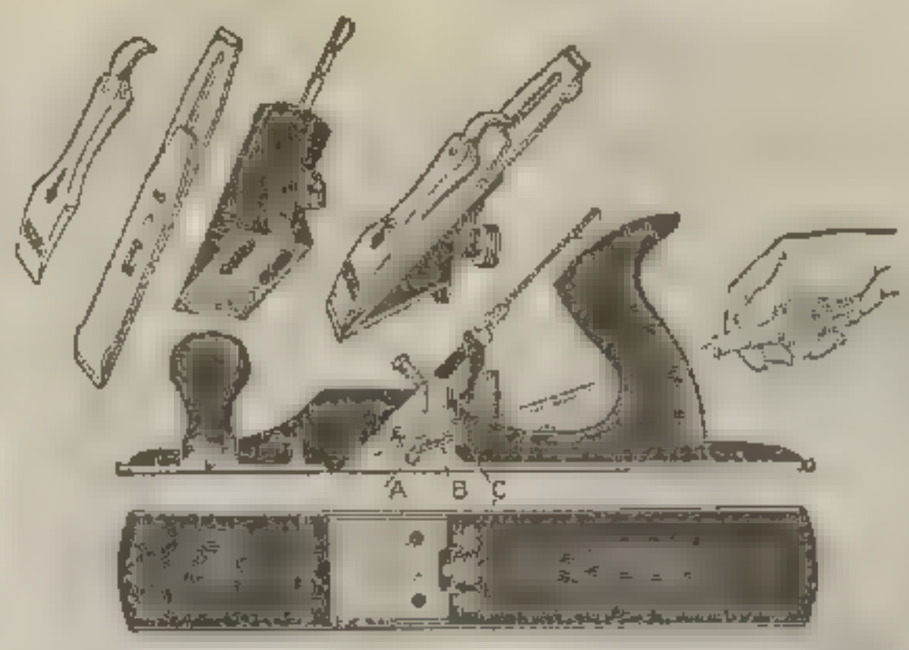
STANLEY



"BED ROCK" ADJUSTABLE

The cutter frog and bottom are so designed, machined and fitted that they are practically one solid piece of metal, thus preventing any chance of vibration. Particular attention is called to the shape of the side. This new and distinctive feature adds greatly to the strength of the plane as well as affording large bearing surfaces when the plane is used on its sides.

The frog may now be adjusted either forward or backward without removing the lever and cutter, simply slacken the tension of the two frog clamping screws "B," and with a screw driver adjust the frog as desired by means of the frog adjusting screw "C" in the center, and then tighten the frog clamping screws.

The cutter is adjustable endwise by means of the adjusting wheel at the back of the frog. It is also adjustable sidewise by lever located near the top and at the back of the cutter.

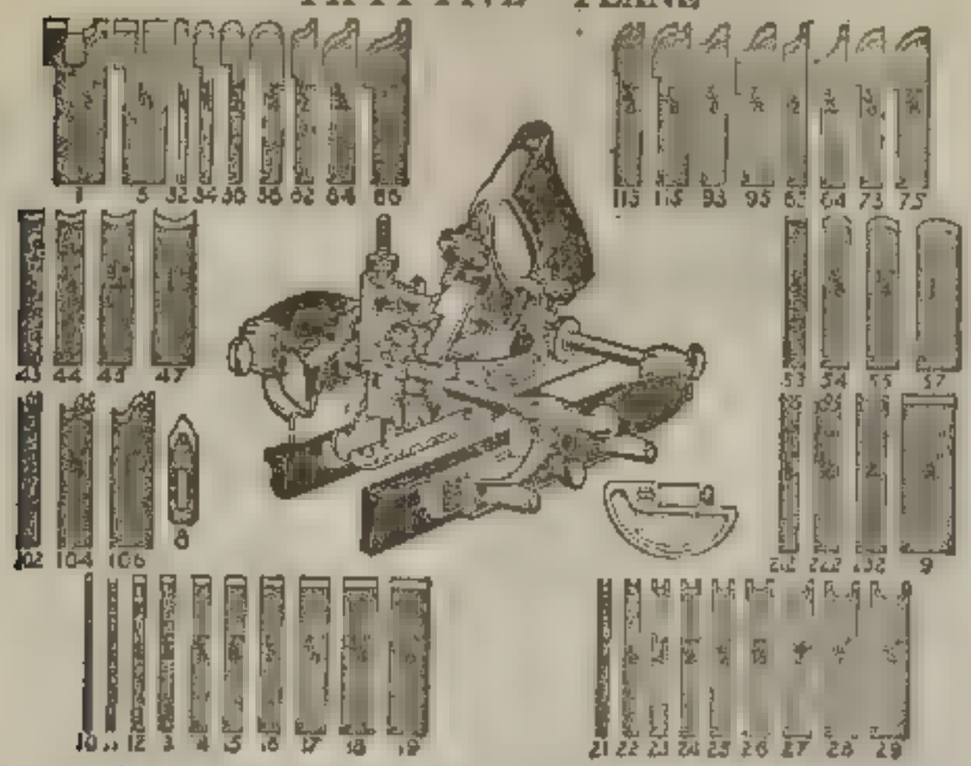
COMBINATION PLANES

STANLEY

"FIFTY-FIVE" PLANE



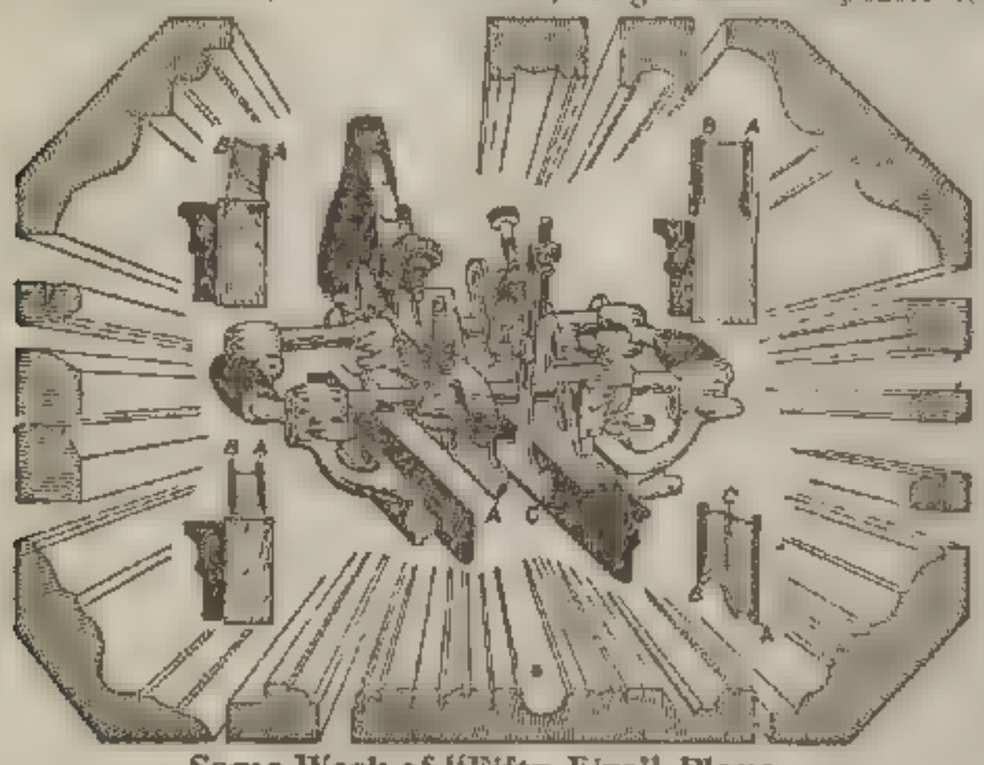
This Tool, in Addition to Being a Beading and Center Beading Plane, a Plow, Dado, Rabbet, Filletster, and Match Plane, a Sash Plane and a Slitting Plane, is also a Superior Moulding Plane, and will Accommodate Cutters of Almost any Shape and Size. In fact, it is **"A Planing Mill Within Itself."**

The Regular Equipment Sent with the Plane Comprises Fifty-two Cutters, all of which are Shown in the Cut. These Cutters, Together with the Plane and all its Attachments, are Packed in a Neat Steel Box.

All Metal Parts of the Plane are Nickel Plated. The Handle and Fences are Made of Selected Rosewood, and Every Part is Well Finished.

Each

No. 55—Nickel Plated, With 52 Cutters; Weight Each 17½ lbs.. **$43 50**



Some Work of "Fifty-Five" Plane

The Samples of Work Illustrated, Show Some of the Mouldings that can be Made with Cutters Regularly Furnished with this Plane.

When it is Considered, that in Addition to the Fifty-two Regular Cutters and the Forty-one Special Cutters, the Plane will Take Practically any Form of Cutter Desired, its Wide Range of Work will be Appreciated.

The Plane has: A Main Stock, "A", which Carries the Cutter Adjustment, a Handle, a Depth Gauge, a Slitting Gauge, and has a Steel Bottom Forming a Bearing for One Edge of the Cutter. A Sliding Section, "B", with a Steel Bottom Gives Bearing for the Other Edge of the Cutter and Slides on Arms Secured in the Main Stock. This Bottom can be Raised or Lowered so that, in Addition to Allowing the Use of Cutters of Different Widths, Cutters can be Used having One Edge Higher or Lower than the Edge Supported in the Main Stock. An Extra Support or Stop is Necessary for Cutters which First Enter the Wood at a Point Between the Outside Edges, and is a Benefit for Such Cutters which, if the Plane were Accidentally Tilted, Would Tend to Gouge the Work. The Auxiliary Center Bottom, "C", which can be adjusted for Width or Depth, Fulfills this Requirement. Fence, "D", has a Lateral Adjustment, by means of a Screw, for Extra Fine Work. The Fences can be Used on Either Side of the Plane, and the Rosewood Guides can be Tilted to any Desired Angle up to Forty-five Degrees, by Loosening the Screws on the Face. Fence, "E", can be Reversed for Center Beading Wide Boards.

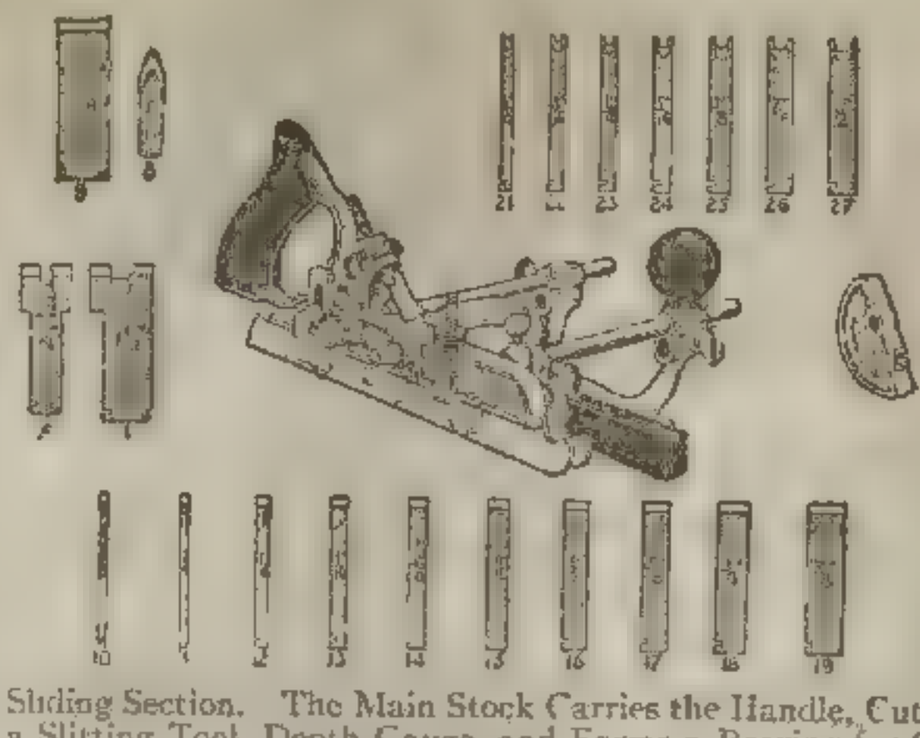
The Plane is Fitted with Spurs for Working Across the Grain, and a Special Cam Rest, to be Located on the Front Arm when Working at a Distance from the Edge of the Board, to Keep the Fence from Sagging, or on the Rear Arm on Certain Work, to Prevent the Possibility of the Plane Rocking. All parts are Interchangeable.

The Four Small Cuts in the Corners, Show how the Bottoms Should be Set for Different Forms of Cutters and the Great Importance of Having the Fences Adjusted so that the Cutters will Not Run.

COMBINATION PLANES

STANLEY

"FORTY-FIVE" PLANE



Seven Tools in One in Compact and Practical Form. 1—Beading and Center Beading Planer. 2—Plow. 3—Dado. 4—Rabbet and Filletster. 5—Match Plane. 6—Sash Plane. 7-Slitting Plane.

The Plane has Two Principal Parts; a Main Stock and a Sliding Section. The Main Stock Carries the Handle, Cutter Adjustment, a Slitting Tool, Depth Gauge, and Forms a Bearing for One Edge of the Cutter. The Sliding Section Slides on Two Arms Secured in the Stock and has a Bearing for the Other Edge, Allowing Cutters of Different Widths to be Used. A Fence also Slides on These Arms for Use when Working as a Plow, Beader or Filletster, to Gauge the Distance from the Cutter to the Edge of the Board, and to Keep the Cutter at Right Angles to Same. When Used as a Filletster, the Fence Slides Under the Bottom of the Plane and Determines the Width of Cutter Exposed to the Work.

The Plane is Fitted with Spurs for Use Across the Grain, etc., and can be Used either Right or Left Hand.

With Each Plane are Furnished Twenty-one Cutters, all of which are Shown in the Cut. The Cutters, Together with the Plane, are Packed in a Neat Steel Box.

All Metal Parts are Nickel Plated. The Handle, Knob and Fence are Made of Selected Rosewood. For Beading at a Distance from the Edge of a Board, Attach Cam Rest (see Cut at Right of Plane) to the Front Arm Between the Sliding Section and Fence to Prevent the Fence Sagging. In Certain Work Attach same to the Rear Arm to Prevent the Plane from Rocking

Each

No. 45—Nickel Plated, With 21 Cutters; Weight Each 9½ lbs..... **$22.00**

One in a Box

PLOW, DADO, FILLETSTER AND MATCHING

Skew Cutters are the Feature of this Plane. It Consists of a Main Stock Carrying a Spur, a Depth Gauge and a Slitting Cutter, a Sliding Section Carrying a Spur and Forming an Extra Sole for the Plane, and a Fence Rosewood Face, which can be Set for Either Plow or Filletster Work.

Each

No. 46—Nickel Plated Cast Iron; Rosewood Handle and Knob; Length 10½ inches; Eleven Cutters, Comprising 8 Plow and Dado Bits, 3/16, ¼, 5/16, ⅜, ½, ⅝, ¾ and 1" inches; 1½ inch Filletster Cutter, a ¼ inch Tonguing Tool, and 1 a Slitting Cutter; Weight 7 lbs. **$15.50**

One in a Box

DADO

This is the Main Stock with Spur, Slitting Tool, Depth Gauge and the Sliding Section with Spur, Used in Plane No. 46, but Without the Fence, and with Fewer Cutters.

Each

No. 47—Nickel Plated Cast Iron; Rosewood Handle and Knob; Length 10½ inches; Six Cutters, Comprising 5 Dado Bits, ⅜, ½, ⅝, ¾ and 1¼ inch; also one Slitting Cutter; Weight 3¼ lbs. **$12.20**

One in a Box

COMBINATION PLANES

STANLEY

PLOW, BEADING OR MATCHING

This is a very handy tool for light work. It consists of a main stock carrying a spur and a depth gauge, and forming a support for one side of the cutter; a sliding section, carrying a spur and forming a support for the other side of the cutter, and a fence with a 6-inch adjustment. The handle is metal, being a part of the main stock.

Each

No. 50—Nickel Plated Cast Iron; Length 9¼ inches; Fifteen Cutters, comprising 7 plow and dado bits, ¼, 5/16, ⅜, 7/16, ½, ⅝ and ⅞ inch; 7 beading tools, ⅛, 3/16, ¼, 5/16, ⅜, 7/16 and ½ inch; and a ¼ inch tonguing tool; Weight 3½ lbs..... $12.00

SPECIAL BOTTOMS FOR "45" PLANES

In order to work Hollows and Rounds, or a Nosing Cutter in the No. 45 Plane, it is necessary to substitute for the sliding section especially formed bottoms, which are called by the same name as the cutters they are designed to carry, that is: Hollows, Rounds or Nosing Tools.

A Hollow and its Cutters will form a **Round** on the Mouldings being worked. A Round and its Cutters will form a **Hollow**. A Nosing Tool and its Cutters will form what might be called an exaggerated Round. It is very largely used for shaping the edges of stair treads. Hollows and Rounds are made in four sizes and are usually sold in sets, a set comprising one Hollow, one Round and two Cutters. The price of a Nosing Tool includes one Cutter.

Per Pair

No. 6—Hollow and Round; 1/8-inch Cutters; Work 1/4-inch Circle. **$3 30**

No. 8—Hollow and Round; 5/16-inch Cutters; Work 1 -inch Circle. **3 30**

No. 10—Hollow and Round; 3/4-inch Cutters; Work 1 1/4 -inch Circle **3.50**

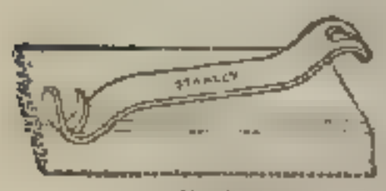
No. 12—Hollow and Round; 1-inch Cutters; Work 1 1/2-inch Circle **3.50**

Each

No. 5—Nosing Tool; 1 1/4-inch Cutters; Work 1 1/4 inch Circle....**$2 60**

CORNERING TOOLS

STANLEY



These tools are used by Pattern Makers and all wood-workers for rounding sharp edges. They have a different size cutter at each end and their form is such that no depth gauge is required.

Polished Tool Steel; Length 5 1/2 inches.

Per Dozen

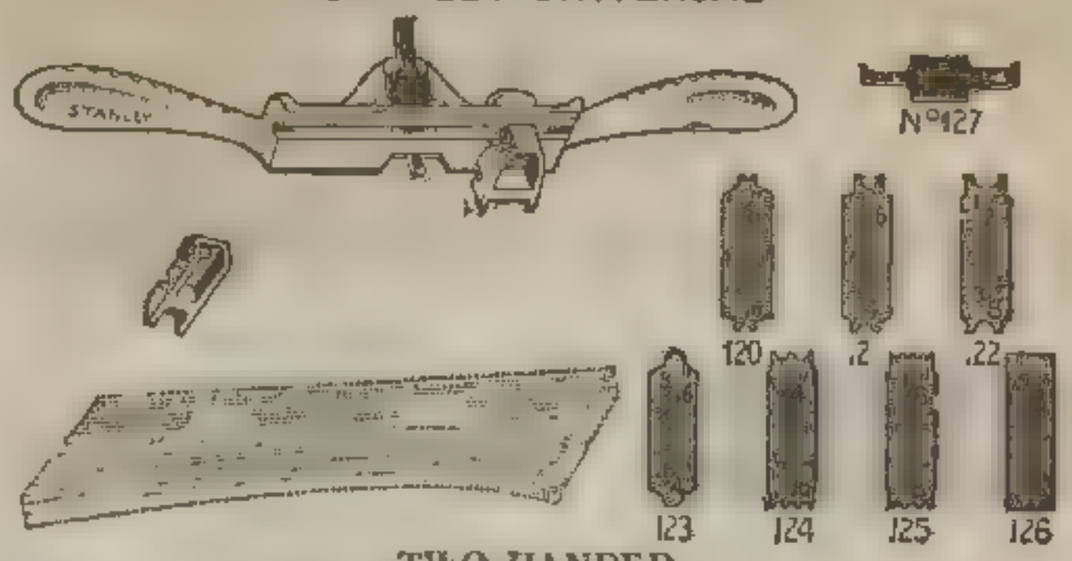
No. 28—1/8 and 1/4 inch Cutter; Weight per Dozen 1 1/2 lbs.....**$2 50**

No. 29—1/4 and 3/8 inch Cutter; Weight per Dozen 1 1/2 lbs.....**2.90**

Half Dozen in a Box

BEADING TOOLS

STANLEY UNIVERSAL



TWO-HANDED

This is an excellent tool for beading, reeding or fluting straight or irregular surfaces and for light routering. The sample illustrated shows some of the work that can be done with its use. With each beader are furnished a square guage for straight work and an oval gauge for curved work. There are also furnished eight cutters sharpened at both ends and embracing the following assortment, 6 single beads, 1/8, 3/16, 1/4, 5/16 3/8 and 1/2 inches; 2 fluting tools, 3/16 and 1/4 inches; 4 reeding tools, (2 beads 3/16 inch, 3 beads 1/4 inch, 3 beads 1/8 inch and 4 beads 1/8 inch), 2 routers 1/8 and 1/4 inch, and a 5/8 inch blank, which latter cutter the owner can file up as he desires.

The handles are curved so as to insure ample room between the workman's hands and the surface of the work.

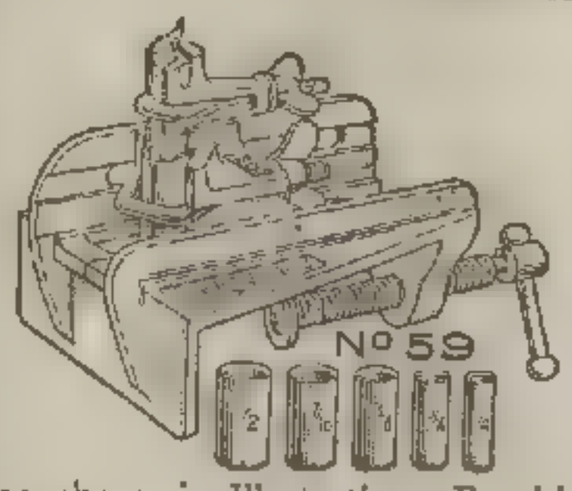
Per Dozen

No. 66—Iron, Nickel Plated; Length 11 1/2 inches; Eight Cutters; Weight Each, 1 1/2 lbs.....**$27.70**

Twelve in a Box

DOWELING JIGS

STANLEY



This Tool is made for the purpose of enabling the user to Bore Dowel Holes in the Edge End of Surface of Work with the greatest Ease and Accuracy. It will Cut any thickness of Material up to 3 inches.

It also will be found an excellent Bit Guide for Mortising. When making Dowel Holes with the Doweling Jig the Steel Guide is Automatically Set to guide the Bit properly when the Jig is Clamped to the work as shown in Illustration. Furnished with Five Steel Guides 1 1/4 inches Long; One each 1/4, 5/16, 3/8, 7/16 and 1/2 inch. To allow for Variations in Size of Bits the Guides are made 1/100 inch Larger than the Sizes given.

Each

No. 59—Nickel Plated Cast Iron Body, 5 1/4 inches Long; Weight each 1 1/2 lbs.....**$4.00**

One in a Box

DOWEL SHARPENERS

STANLEY

This Tool is the Reverse of the Countersink and can be Sharpened with equal Ease. By its use Dowel Pins can be Sharpened Rapidly and Uniformly.

Per Dozen

No. 22—Made of Malleable Iron; Nickel Plated; Sharpens Dowel Pins up to 1/4 inch; Weight per Dozen 1 1/4 lbs.....**$6.90**

Half Dozen in a Box

DOWEL PLATES

Used for Making Wood Dowel Pins

Made of High Grade Tool Steel; Full Polished and properly Tempered.

Per Dozen

No. 79—Has Holes for making Five different Sizes of Dowel Pins, 1/4, 5-16, 3/8, 7-16 and 1/2 inch Diameter; Size of Plate 6x1 1/2x3/8 inch; Weight each 1/8 lb.....**$13.20**

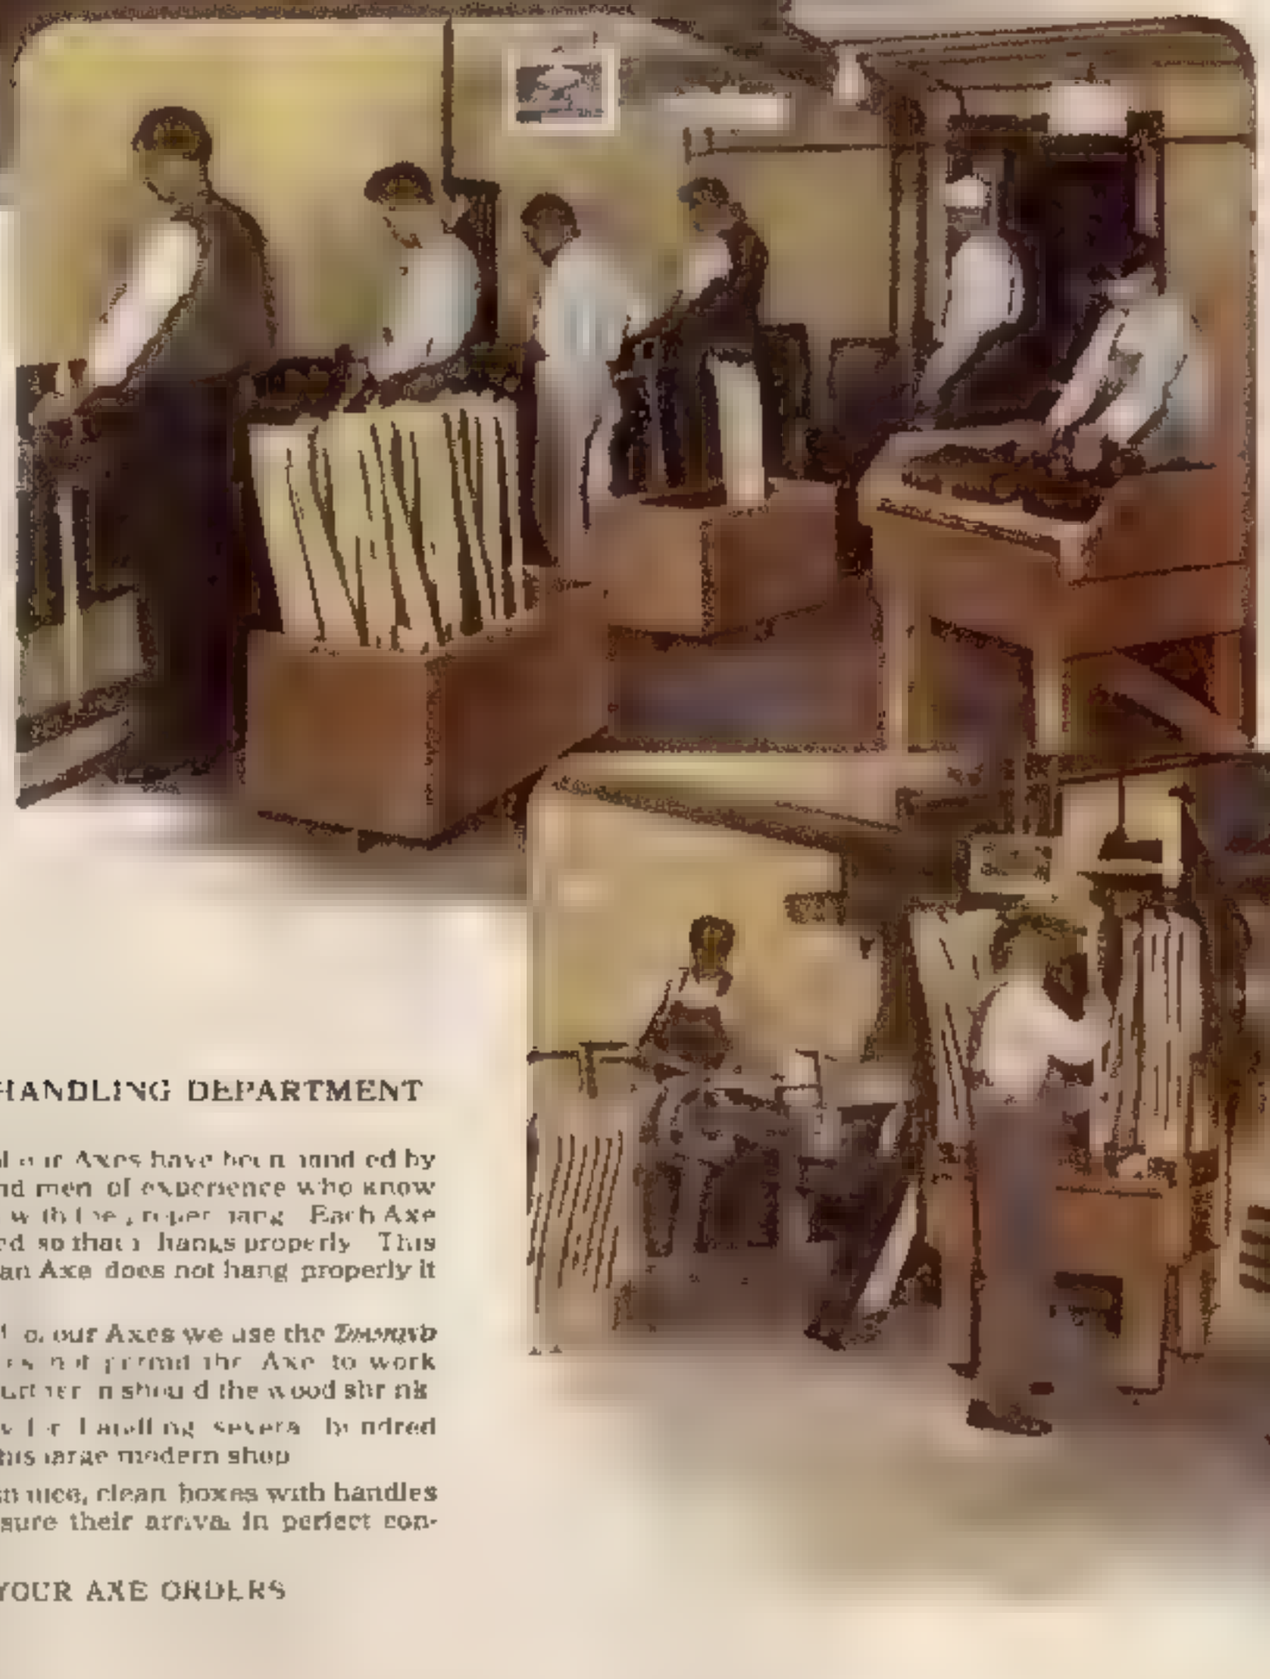
VIEWS OF OUR AXE HANDLING DEP'T.

OUR WEDGE



READY FOR SHIPMENT

A MODERN AXE HANDLING DEPARTMENT

For many years all of our Axes have been handled by up-to-date machinery and men of experience who know the art of handling Axes with the proper hang. Each Axe is gauged as it is handled so that it hangs properly. This is very important for if an Axe does not hang properly it cannot cut properly.

In the handling of all of our Axes we use the *Diamond Edge* Wedge which does not permit the Axe to work loose. It can be driven further in should the wood shrink.

We have a capacity for handling several hundred dozen Axes per day in this large modern shop.

All Axes are put up in nice, clean boxes with handles carefully wrapped to insure their arrival in perfect condition.

TRADE MARK REGISTERED IN THE U. S. PAT. OFFICE

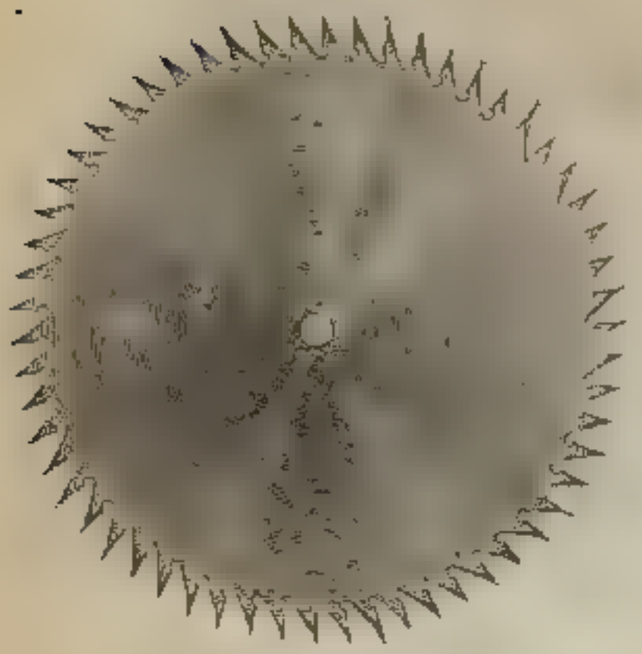
CIRCULAR CORDWOOD SAWS

ATKINS



SOLID TOOTH

Made of Special Analysis Steel, Particularly Adapted for Cordwood Sawing. Ground, Tempered and Polished.

Special Notice—Orders for Saws **Not of Standard Gauge or Hole,** as Described in List Below, or Irregular in Any Particular, will be Accepted **Only with the Distinct Understanding** that they are Subject to Delay in Making, and **are Not Subject to Cancellation** Under any Circumstances.

Using a Cold Chisel for Retoothing a Saw is Almost Certain to **Crack** the Plate, and Corners Filed Square in the Gullet of the Tooth will Frequently Produce the Same Result, Particularly in Frosty Weather; **Our Warranty Does Not Cover** Saws Breaking from Such Causes.

Warranty—Each Saw is Warranted Free from Flaws and Seams and as Nearly True as it is possible to Make it. If Found Defective in Above Particulars, it May be Returned (**Always Advise Us and Get Our Reply and Shipping Instructions Before Returning**), and if, on Examination, it is Found the Saw is at Fault, all Necessary Repairs will be Made or a New Saw Given in Exchange, Provided it is Returned **Within 30 Days** from Date of Shipment.

The Speed of Circular Saws is a Most Important Thing to Watch. If Speed is too High it Cannot do Good Work, as it Generates Heat, and the Centrifugal Force Causes it to Stretch and Become Limber and Not Cut Straight.

Circular Saw Machines Not Carried in Stock, Can Only be Furnished by Shipping Direct from Factory, F. O. B. Rockford, Ill.

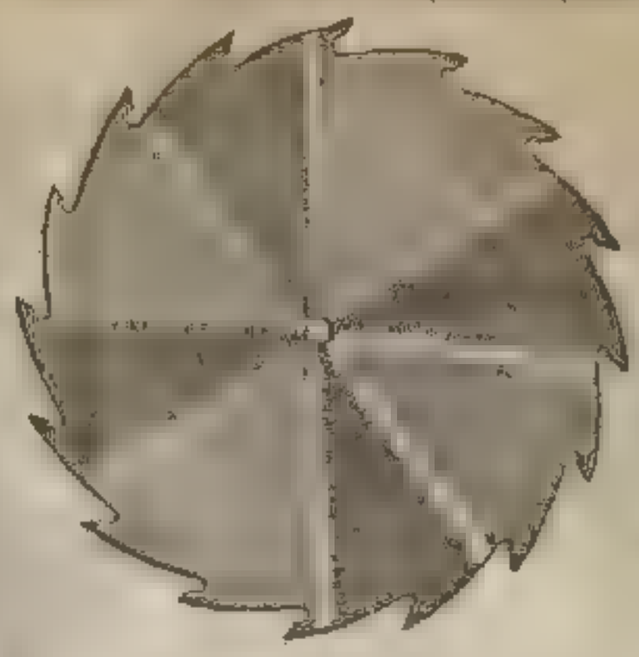
CIRCULAR SAWS

NOTE—All Prices on this Page are Manufacturers Lists. Prices Quoted upon Request. When Ordering, State whether Rip or Cross Cut.

Left Hand

HAND OF SAWS

Circular Saws 30 Inches and Smaller are Made Flat on Both Sides and are Used as Either Right or Left Hand; Saws Larger than 30 inch, When Bevel Ground, with the Center Thicker than the Outer Edge on One Side and Perfectly Flat on the Other, are "Handed;" Place the Saw in Front of You with the Teeth Running Toward You and the Flat Side of Saw Names the "Hand." The Log and Carriage Run off the "Hand" Side as they Move Away from You.



SOLID TOOTH

Right Hand

DIRECTIONS FOR ORDERING

State Diameter in inches. Gauge at Rim, Gauge at Center; Right or Left Hand; Number and Kind of Teeth; Size of Mandrel Hole; Size of Pin Hole; Distance Between Pin Holes from Center to Center; Greatest Feed at Each Revolution, in inches; Kind of Lumber to be Sawed; Number of Revolutions per Minute. When Ordering Bolting Saws, State Whether Rip or Cross-cut. Saws 40 inches and Larger have 2 inch Mandrel Hole, ⅝ inch Lug Pin Holes, 3 inches from Center to Center; if Wanted Differently Send Pattern of Holes.

Polished Crucible Steel, Patent Ground and Tempered.

Special Notice.—Orders for Saws Not of Standard Gauge or Hole as Described in List Below or Irregular in Any Particular, will be Accepted **Only with the Distinct Understanding** that they are Subject to Delay in Making, and **are Not Subject to Cancellation** Under any Circumstances.

Warranty. Each Saw is Warranted Free from Flaws and Seams and as Nearly True as it is Possible to Make it. If Found Defective in Any Particular, it May be Returned (**Always Advise Us and Get Our Reply and Shipping Instructions Before Returning**), and if, on Examination, it is Found the Saw is at Fault, all Necessary Repairs will be Made or a New Saw Given in Exchange, Provided it is Returned Within 30 Days from Date of Shipment.

Cross-cut Saws are Not Warranted Against Cracking.

Using a Cold Chisel for Retoothing a Saw is Almost Certain to Crack the Plate, and Corners Filed Square in the Gullet of the Tooth will Frequently Produce the Same Result, Particularly in Frosty Weather. **Our Warranty Does Not Cover Saws Breaking from Such Causes.**

(This Price Does Not Include Detector Tube, Headset, Antenna, Storage or "B" Batteries.)

The Following Accessories are Needed to Complete This Set: 1 Detector Tube, 1—22½ Volt "B" Battery, 1—6 Volt Storage Battery, (90 Amperes or Over), 1 Head Set and 1 Indoor or Outdoor Aerial; Outdoor Preferred

Amplifier Unit

9½ inches Long, 8 inches Wide, 6½ inches High; A Two Stage Amplifier Designed and Finished as a Companion Piece for Use With No. T16 Tuner and Detector Unit. This Unit Positively Will Not Receive Signals Unless it is Hooked Up With a Detector Unit.

Each

No. A2—Weight Each, 4 lbs.....**$73.70**

One in a Carton

The Following Accessories are Needed When Annexing This Set to No. T16 Detector: 2—Amplifier Tubes, 2—22½ Volt "B" Batteries.

"ECHO PHONE" RADIO APPARATUS

(Licensed Under Armstrong Patents)

The "Echo Phone" Regenerative Set is Composed of "Echo Phone" Tuner and Detector Unit and "Echo Phone" Two Stage Amplifier, Sold Either Together (Two Units) as Complete Set or as Separate Units. The Very Latest Word in Radio Development, with Improvements Which Simplify Construction and Operation. Eliminates Frying Tube Noises and Enables Very Fine Selective Tuning. The Wide Receiving Range, Varying from 150 Meters to 1600 Meters is Ample to Provide for Any Increase in Broadcasting Wave Lengths That May be Allotted by the Government. This Set Presents an Attractive Appearance and Affords Unusual Ease of Operation. It is the Ideal Home Set, Beautiful as it is Efficient and Priced Within the Reach of All. Is a Very High Grade Set Throughout in Both Material and Workmanship.

Detector-Tuner Unit and Amplifier Unit Combined

Specifications

Cabinet—Solid Mahogany, 24 inches Long, 6½ inches High, and 8 inches Wide.

Panel—Formica, Satin Finish, Gorton Engraved.

Dials—Engraved Solid Nickel Silver

Variable Condensor—Aluminum 7 Plate.
Plug for Head Set Furnished with Each Set.

Antenna Inductance—Bank Wound.

Circuit—Fundamental Armstrong Regenerative.

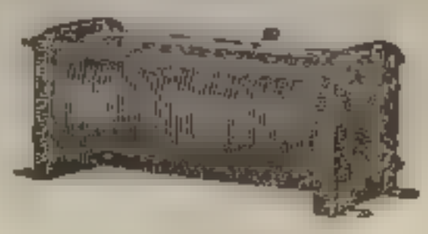
Each

No. TA16—Weight Each, 11½ lbs **$183.70**

One in a Carton

The Following Accessories are Needed to Complete Set: 1 Detector Tube, 2 Amplifier Tubes, 1—6 Volt Storage Battery (90 Amperes or Over), 3—22½ Volt "B" Batteries, 1 Indoor or Outdoor Aerial, Outdoor Aerial Suggested as Best Results are Obtained from This Type.

CRYSTAL DETECTOR SET



This is An Efficient Unit of the Two Slider Type with Phone Condensor on the Inside.

The Crystal Detector Mounted on the End of Tuner is Made With a Universal Joint. The Tension of the Cat Whisker Against the Galena is Adjustable. Galena Crystal Furnished With This Set is Tested and Will be Found Very Sensitive.

All Metal Parts are of Solid Brass With Silver Nickel Finish.

The Tuning Coil is Wound with Enameled Copper Wire on a Seamless Tube. Within a Range of 25 Miles of Broadcasting Station, Music and Voice are Brought in Clear With Minimum Static Interference.

No. 1K Crystal Set, With Crystal, Less Phones and Antenna; Length, 9 inches; Height, 4 inches; Weight Each, 2½ lbs..... **$4.80**

MONROE REGENERATIVE RADIO - RECEIVERS

(Licensed Under Armstrong Patents)

Monroe Radio Apparatus is Ingeniously Designed to Provide a High Degree of Efficiency at Moderate Cost.

The Construction is Thoroughly Up to Date in All Respects; All Component Parts are Standard in Quality and Approved by Radio Experts.

In as Much as the Spell of Radio is Progressive and the Student of Its Fascinating Mysteries Usually Begins His Experience with a Modest Investment and as His Knowledge Advances, Adds Amplification and Consequent Increased Power, We Present Herewith a Perfectly Simple and Thoroughly Satisfactory Group of Sets Which Enable the Desired Enlargement of Range and Capacity Without the Necessity of Throwing the Original Investment Into the Discard.

Thus No. D1 for the Beginner is the Foundation Unit to Which No. D2, When Added, Gives the Full Power and Efficiency of No. D3 Which is Merely a Combination of the Two in One Single Cabinet.

Detector

Specifications

Cabinet—Mahogany Finish; Length, 11¼ inches; Width, 7⅝ inches. Height 7 inches.

Panel—Formica, Shielded with Grounded Aluminum Plate to Prevent Body Capacity.

Dials—Composition Plainly Marked.

Condenser—Eleven Plate Rotary Variable.

Rheostat—Filament Control Permitting Sensitive Adjustment.

Socket—Composition Rubber.

Vario Coupler—Wound with Oversize Double Silk Covered Copper Wire.

Binding Posts—Nickel Plated, Non-Loosening, Marked with Connections.

Circuit—Single, Regenerative.

Wave Length—180 to 685 Meters.

Each

No. D1—Weight Each, 8 lbs..... $52 00

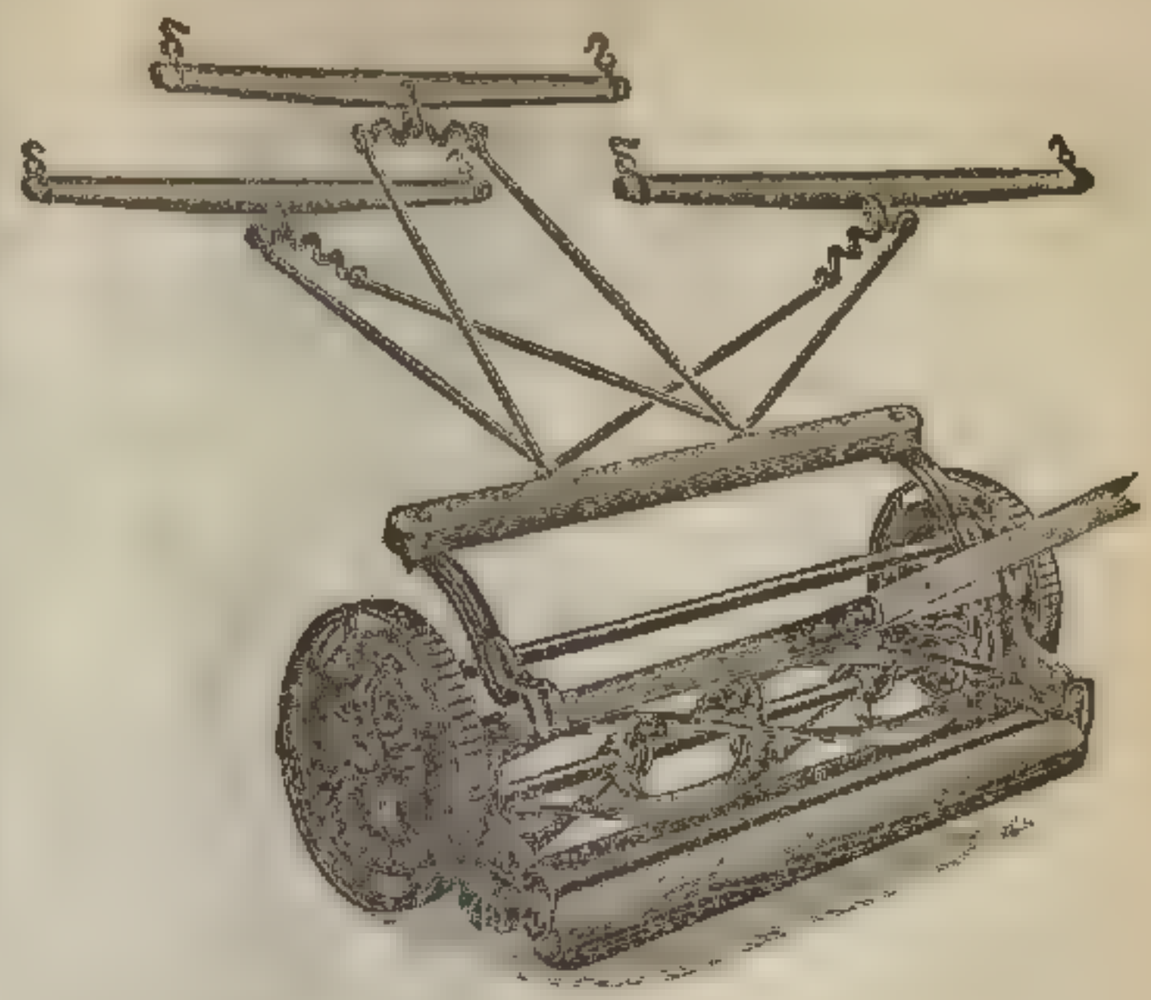
TELL THINGS IN ADVERTISING

IT IS WELL TO MAKE IT A POINT TO "TELL THINGS" IN ADVERTISING, AVOIDING "GLITTERING GENERALITIES." TALKING RATHER IN A STRAIGHTFORWARD, EASILY UNDERSTOOD MANNER, TELLING CUSTOMERS JUST WHY THEY SHOULD PATRONIZE YOU. ABOVE ALL, DON'T TAKE ANY CHANCES OF BEING SOLD OUT, AND COMPELLED TO OFFER EXCUSES. KEEP YOUR STOCK UP BY MAIL ORDERS AND BE ALWAYS PREPARED TO CARE FOR THE TRADE WHICH YOUR ADVERTISING BRINGS.

PONY LAWN MOWERS

CRESTLAWN

BALL BEARING



The Construction of this Machine is Positively the Very Best on the Market and is as Near Perfect as Can be Made. The Parts Making the Frame are all Lathe Turned and the Cast Bed Plate is Machined into the Side Plates, Forming an Automatic Interlocking Adjustment which Cannot be Jarred or Twisted out of Alignment.

Pony Mowers are Often Used by Hand Power and the Crestlawn is Particularly Good for this Purpose, as it has **Ball Bearing Drive Wheels.** This Makes the Machine Easy-running and very little Harder to Operate than Many Hand Machines.

The Reel is Made with Four Revolving Cutters and is Ball Bearing. The Ball Bearing Parts are Automatic in Action and Never Need to be Touched by the Operator. The Revolving Cutters are, Therefore, Held in Position Under all Conditions and will Give a Clean Shear Cut at all Times.

The Steel Bed Knife is Made with Raised Lip, which Adds Strength and Rigidity.

All Material is First Grade and the Very Best that Money Can Buy.

Drive Wheels 10½ inches high. Diameter of Reel 6 inches. Reel Axle ¾ inch. Adjustable to Cut Grass to Lengths of ¼ to ½ inch. Cuts Grass Standing 7 inches High

Handle and Roller of Hardwood Maple, Thoroughly Seasoned and Finished.

Horse Attachment

Each Mower is Equipped with our Patented Horse Attachment. This Can be Adjusted Quickly and in Such a Manner that in Operation the Mower is Held to the Ground and the Disagreeable "Tipping up" of the Rear of the Mower is Impossible. The Draft of the Mower is Just the Same When Operated by Either Horse or Hand. Without Attachment the Horse Can Walk in the Middle, Front or to Either Side of the Mower and Yet Maintain a Central Draft at all Times.

Sold on an Absolute Guarantee to Give Satisfaction

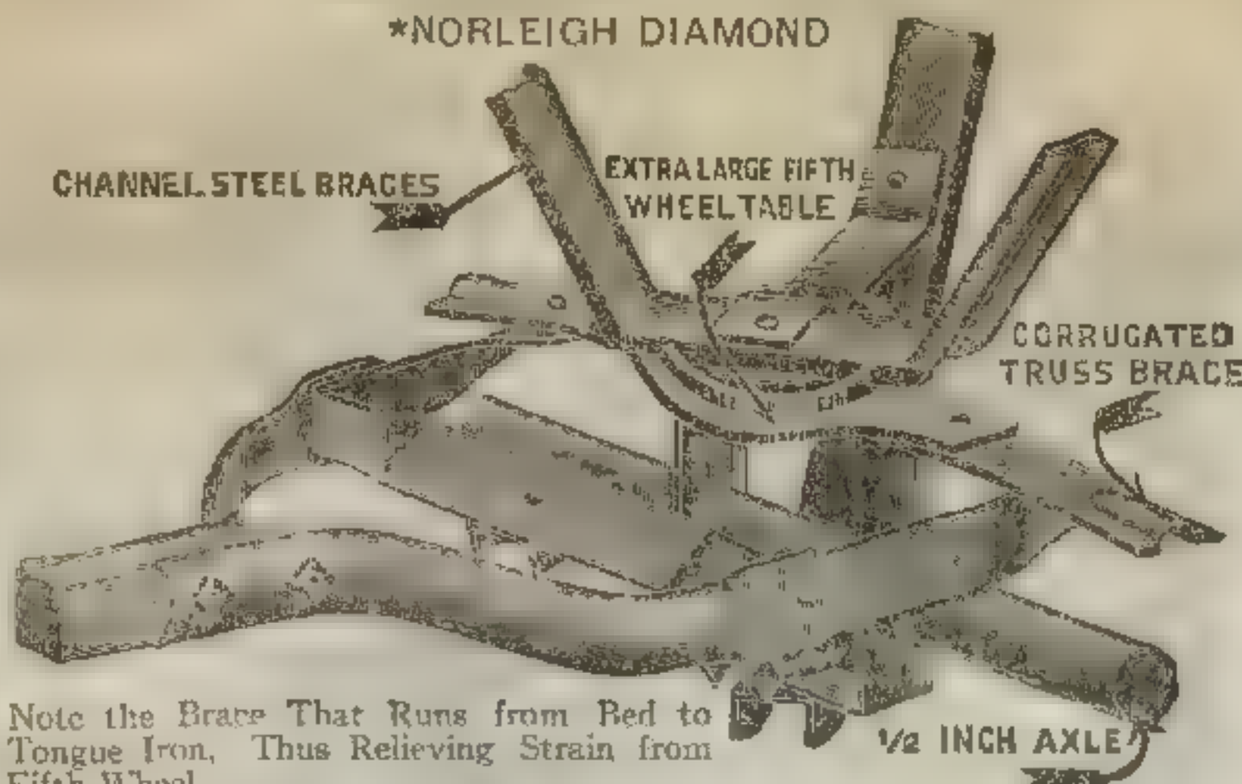
BOYS STEEL WAGONS

*NORLEIGH DIAMOND



Note the Brace That Runs from Bed to Tongue Iron, Thus Relieving Strain from Fifth Wheel.

TRADE MARK REGISTERED IN THE U. S. PATENT OFFICE

Illustration Shows Norleigh Diamond Fifth Wheel and Gear, Which is the Strongest and Most Practical

It is Different From All Others Made From Extra Heavy 10 Gauge Channel Steel. Others Use Light 12 or 14 Gauge Steel

We Use 1½ inch Steel Axles—Ordinary Wagons Have ⅝ inch.

The Top Part of the Fifth Wheel is Turned or Welded (Not Riveted) Around the Lower Part.

Has Three Reinforcing Channel Steel Braces; One Runs From Bed to Extreme Bottom Part of Fifth Wheel, One From Top of Fifth Wheel to Rear Brace, and the Other From Bottom of Fifth Wheel to Handle Iron.

This Construction Makes it Possible for the Norleigh Diamond Fifth Wheel and Gear to Support a Weight of More Than 200 pounds While Others Crush Down Under 100 pounds.

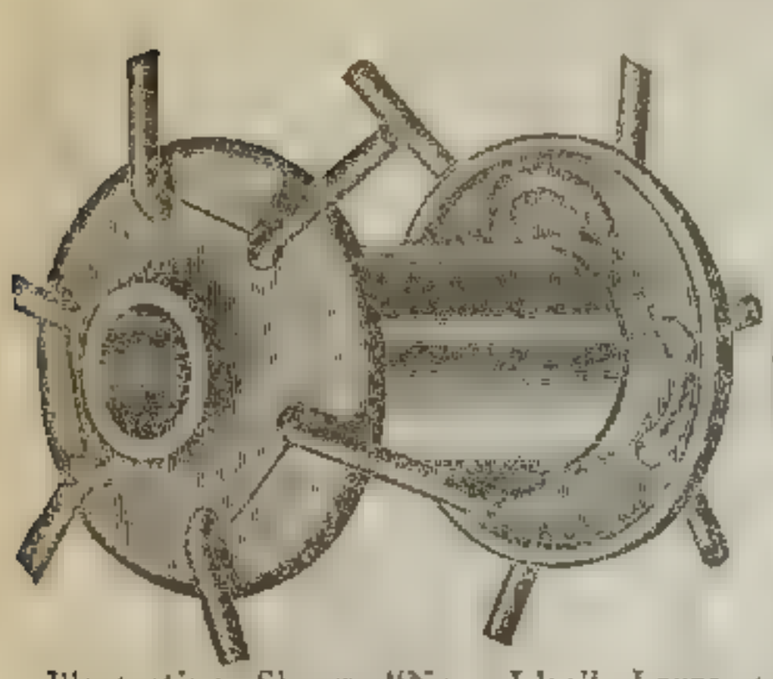


Illustration Shows "New Idea" Large Barrel Anti-Friction Outer Bearing Hub, Used on Norleigh Diamond Wagons.

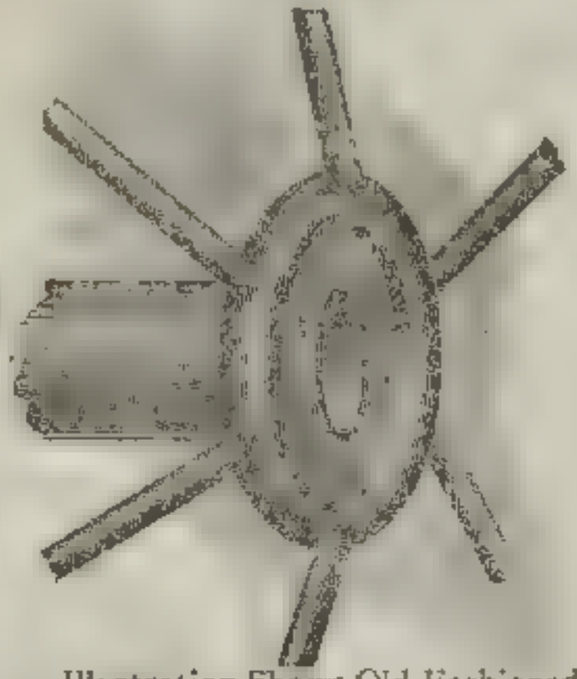

Illustration Shows Old Fashioned Small Spindle Hub, Used on All Other Boys Wagons

Illustration Shows Width and Thickness of Norleigh Diamond Tires.

Illustration Shows Tires Used on Other Wagons.

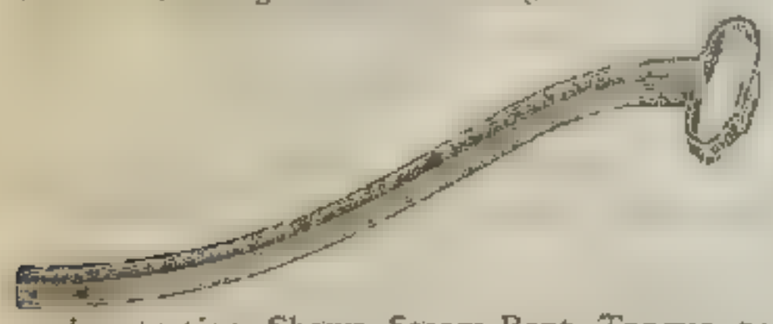

Illustration Shows Stream-Bent Tongue as Used on All Norleigh Diamond Wagons. These Tongues Will Always Stand Back Against Bed of Wagon and Will Not Fall Down to be Tripped Over, Stands Back Far Enough to Enable Child to Sit in Rear of Wagon and Steer With Tongue While Coasting

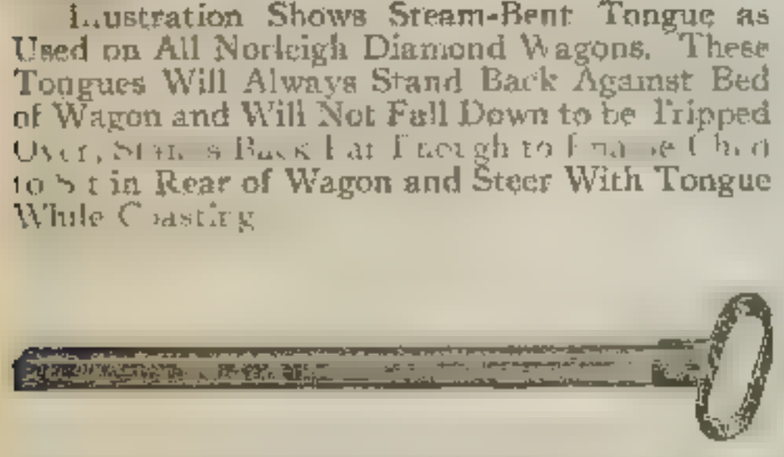

Illustration Shows Straight Tongue Used on Ordinary Wagons. Will Seldom Stand Back Against Bed of Wagon; a Source of Danger in Children Tripping Over the Tongue When Down on the Ground.

Four 1½ inch Reinforcing Cleats Used on All of the Six Largest Sizes of Norleigh Diamond Wagons.

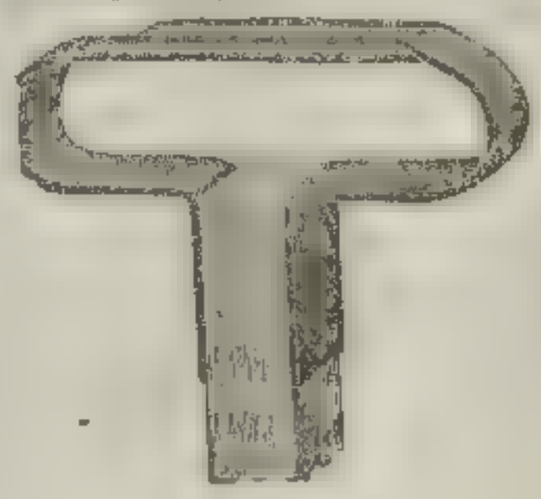

Illustration Shows Tongue and New Idea" Seat Lap Used on Norleigh Diamond Wagons.

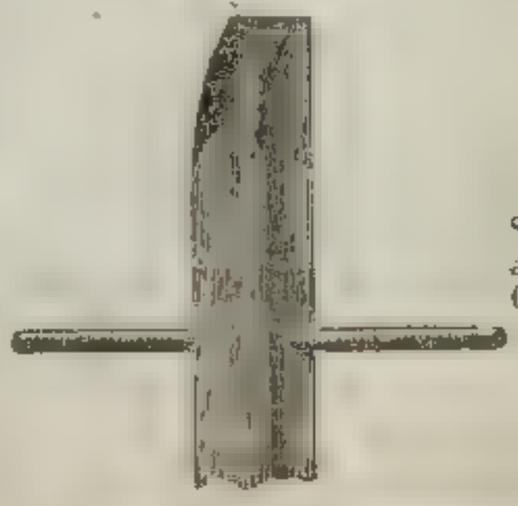

Illustration Shows Tongue and Pin Used on Other Wagons.

Steel Washers Under Head of the Bed Bolts Prevent the Bolts From Being Forced Through the Bed Bottom.

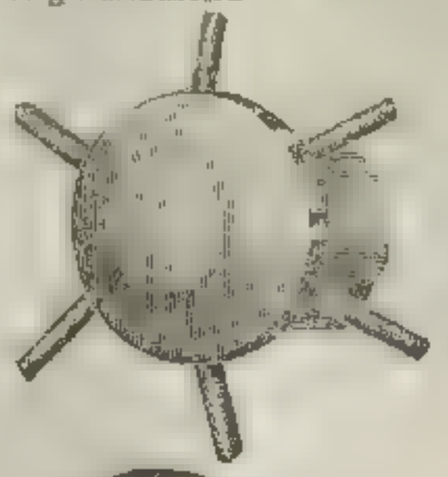

Illustration Shows Hub Cap Furnished on Norleigh Diamond Wagons.

Illustration Shows Common Iron Axle Nut Furnished on Other Wagons.

Illustration Shows Lock Washer Used on Norleigh Diamond Wagons.

Norleigh Diamond "New Idea" Packing Steel Tired Wagons. Sixth Dozen in Fiber Carton, All Carefully Wrapped in Extra Heavy Paper to Preserve Enamel. Cartons are Made of Heavy Fiber and Thoroughly Protect Wagons in Transit.

HARMOGRAPH TALKING MACHINES

PLAY ANY DISC RECORDS MADE

TONE

Harmograph Talking Machines Have Long Had a Reputation for Being Marvelous Tone Reproducers. The Softest Strains of the Violin, the Clear Notes of the Soprano, the Full Rich Melody of Orchestras as well as the Syncopating Jazz Bands Are All Reproduced Perfectly and Naturally. This is Due, Principally, to the Scientific Construction of the Harmograph Tone Chamber.

CABINET

Harmographs are Designed Along Lines that Please the Artistic Eye. They Are Symmetrical in Dimensions and Compare Favorably with Any Phonograph on the Market. All Panels are 9/16 inch Thick, 5 Ply, Genuine Veneers. The Finish is Unexcelled. None but Thouroghly Seasoned Especially Selected Panels Used.

EQUIPMENT

Tonearm, Especially Designed and Constructed Along Our Own Ideas. Equipped with Universal Sound Box Which Permits the Playing of All Makes of Disc Records.

Motors are Simple, Durable and Efficient; Can be Wound While Playing.

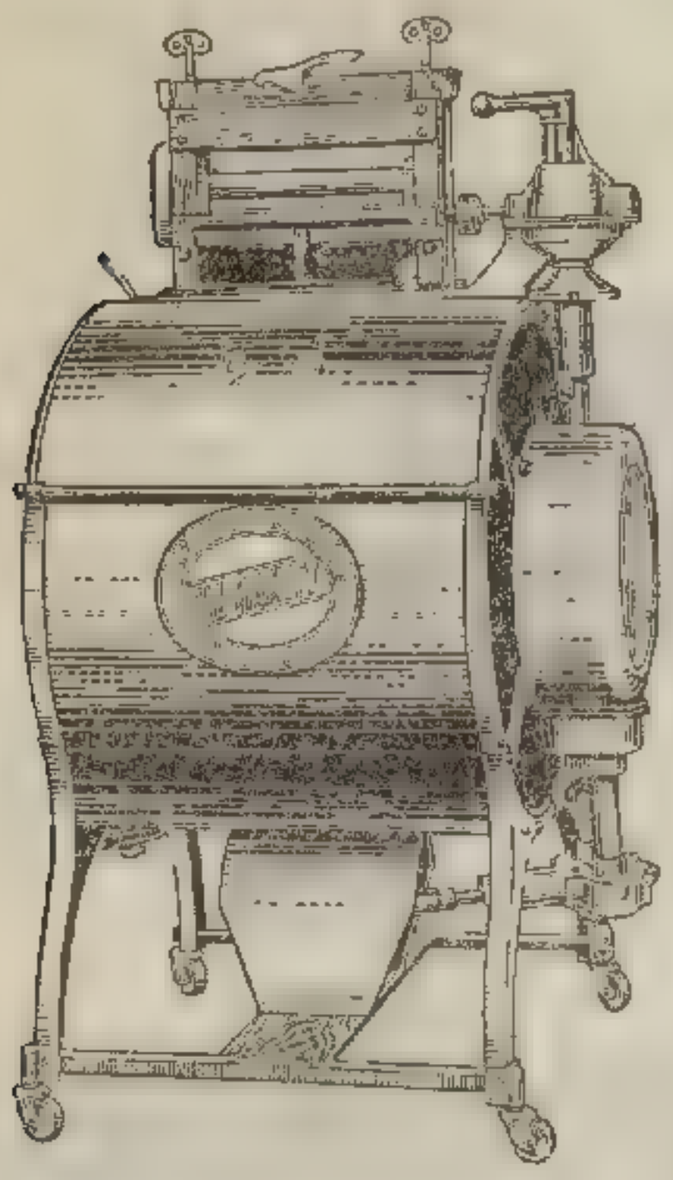
ELECTRIC WASHING MACHINES

HUMANITY

The Humanity Electric Clothes Washer has Combined the Two Best Known Ways of Washing into One, Namely the Oscillating and Cylindrical, and Affords the Most Desired Results.

The Humanity Washes the Daintiest Garments Without the Slightest Wear or Tear.



The Cylinder is Made of Aluminum. The Holes are **Cupped Out,** which Strengthens the Cylinder and Acts the Same as a Suction Pump, Forcing the Water Through the Clothes Both Ways.

All Units are Self Lubricating with Oilless Bearings which has Sufficient Oil to Last at Least a Year.

All Units are Interchangeable and any Part can be Replaced in a Short Time.

Swinging Wringer, is Electrically Operated, is Rigid Self Supporting and Swings in a Complete Circle, has Four Locking Positions. Has 12 Inch Rolls and a Safety Release. Both the Wringer and Washer can be Operated at the Same Time or Separately.

Motor—Be Sure to Specify Alternating or Direct Current.

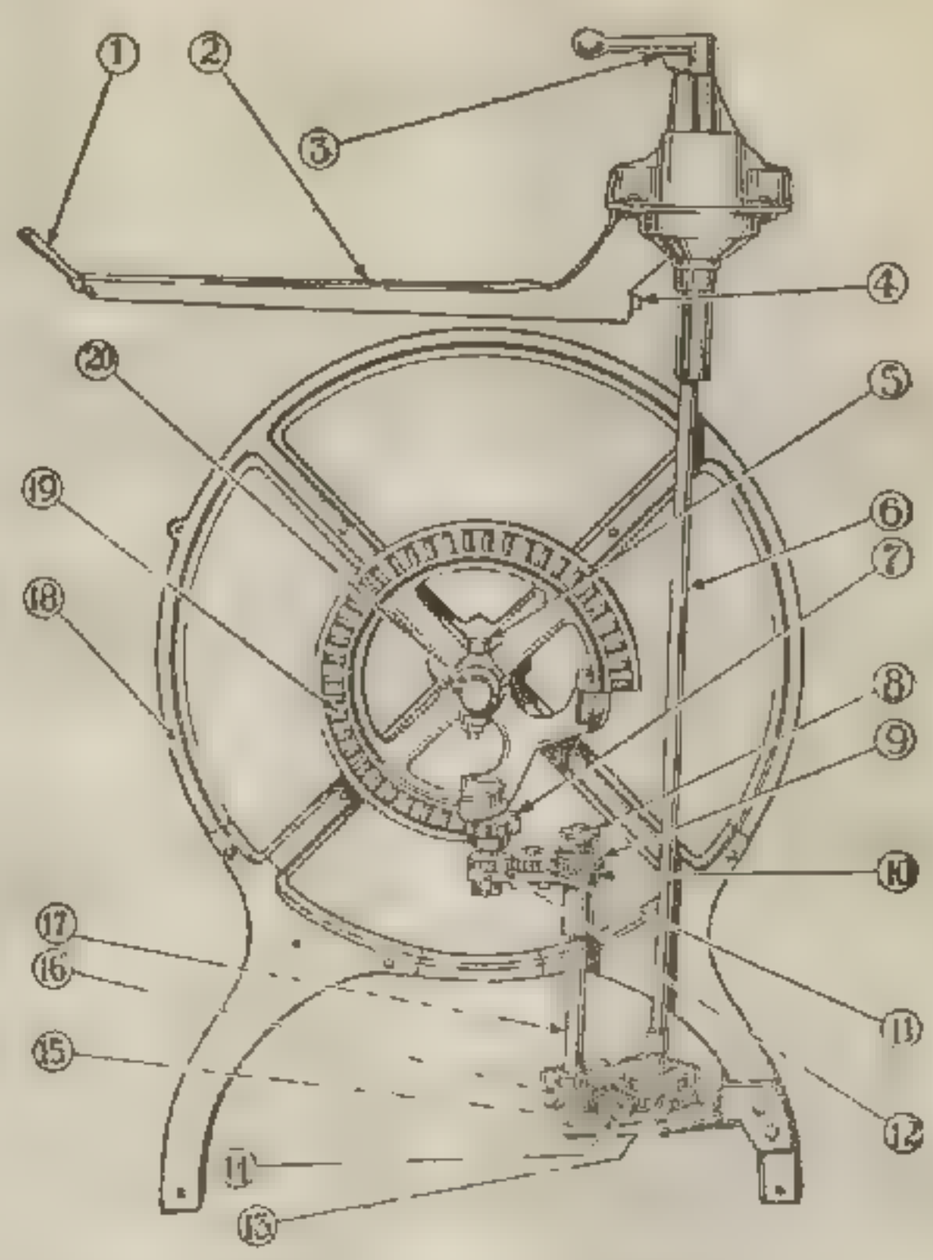
Motor—110 Volts, 60 Cycle, ¼ Horse Power.

No Springs—No Belts; All Moving Parts are Enclosed; Water can not get into Gear Case; Gearings are Made of Cut Steel and Run Noiseless.

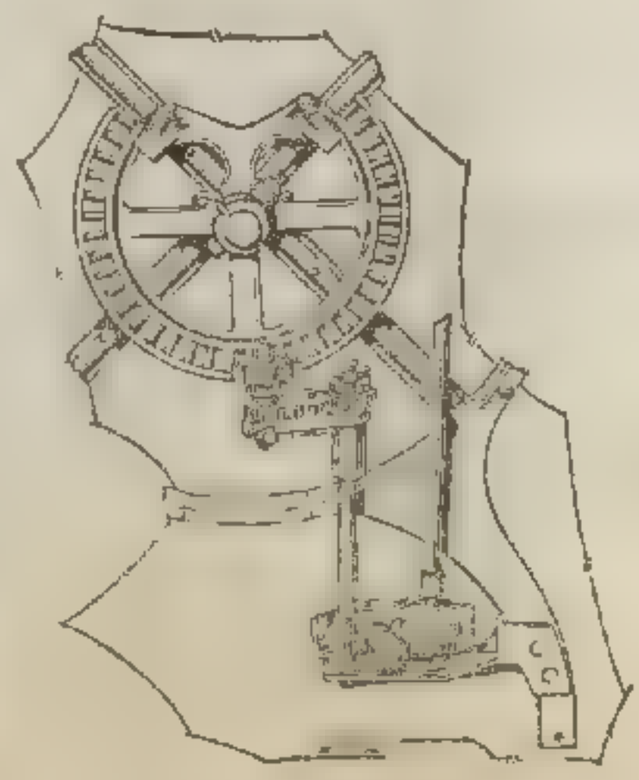
The Humanity Machine itself has the ⅞ Movement, which Gives the Cylindrical Effect, and as it Reverses on a ⅞ Movement, it Gives also the Advantages of the Oscillating Type, and this ⅞ Movement Prevents the Clothes from Turning Over, which is the Only Disadvantage of the Full Cylindrical Type.

		Each
No. HGT—Galvanized Tub, Aluminum Cylinder.....	$185.00	**$202.50**
No. HLT—Copper Tub; Aluminum Cylinder.....	150.00	**225.00**

PATENTED MECHANICAL FEATURES



1 Wringer Latch Control
2 Swinging Wringer Support
3 Wringer Control
4 Wringer Pivot
5 Oilless Bearing
6 Wringer Drive Shaft
7 Malleable Star Gear
8 Steel Clutch
9 Steel Clutch Pinion
10 Swinging Arm
11 Steel Idler Gear
12 Steel Cylinder Drive Pinion
13 Steel Wringer Worm Wheel
14 Ball Bearing Worm Thrust
15 Bronze Worm
16 Steel Cylinder Drive Worm Wheel
17 Cylinder Drive Shaft
18 Steel Frame
19 Malleable Master Wheel
20 Steel Trenion Shaft



THERE IS NOTHING TO GET OUT OF ORDER

This Patented Mechanism Insures No Sudden Stopping of Gears in Reversing the Cylinder, as it is a Continuous, Frictionless Drive.

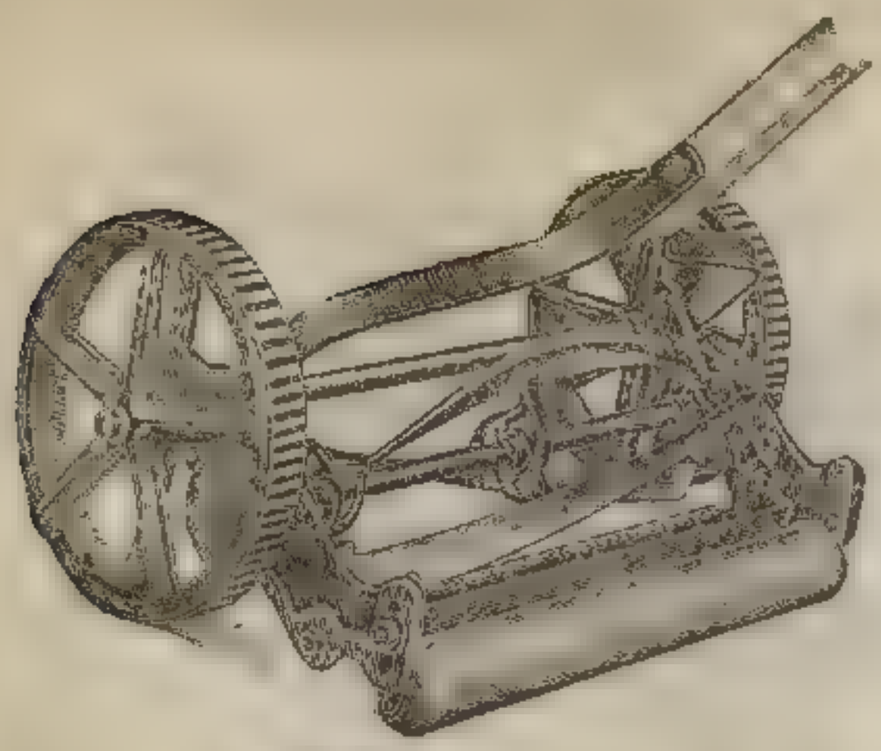
PLAIN BEARING



Bed Plate Adjustment

This Mower is a Popular Design of the New Open Type Construction. Very Light and Easy Running, Yet Built with Refined Castings That are Thoroughly Strengthened. Holes are Drilled Through the Center of the Side Plates, by Two Operations to Insure Exact Dimensions, Through which a Piece of Accurately Rolled Steel Shafting Passes, Forming a Shrub Guard and an Axle for the Drive Wheels, Enabling them to Turn on Steel Bearings. The Fit Between the Shafting and Side Plate Holes is so Perfect that there is Absolutely no Play and with a Set Screw Passing Through a Lug on Each Side Plate and Fastening into Recesses in the Shafting, Makes a Strong and Immovable Frame Construction. These Recesses in the Shafting are Accurately Placed, so that the Side Plates will be at Right Angles with the Cutter Bar, Making a True "Four-squared" Frame. The Drive Wheels are Held in Place by a Malleable Lock Washer and Spring Cotter.

Adjustable Malleable Iron Roller Brackets. Reel Braces are of Malleable Iron Securely Riveted to the Cutting Blades and Steel Shaft, which Passes Entirely Through the Reel, Producing the Strongest and Most Rigid Reel that is Possible to Build The Reel is Equipped with Adjustable Brass Bearings and Device for Taking Up all Wear.

Screw Adjustments Throughout. A Positive and Durable Ratchet Geared on Each Side. Good Quality of Materials and Workmanship. Fully Guaranteed. Far Better Quality and Value for the Money is Offered in this Machine than in any other Lawn Mower Made.

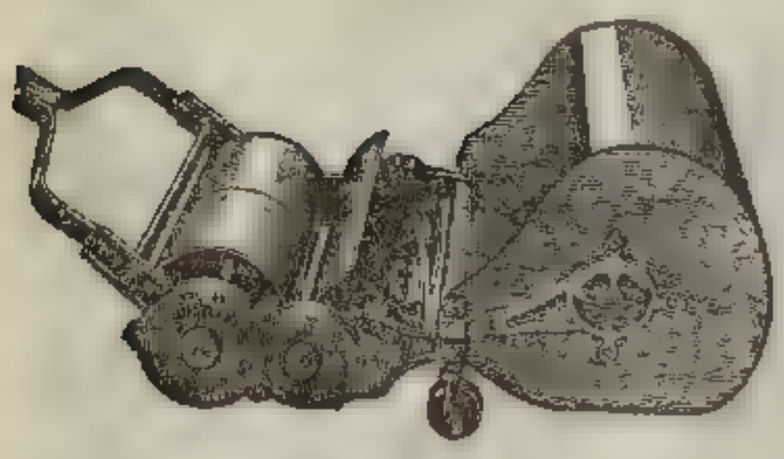
PUTTING GREEN MOWERS

PENNSYLVANIA

Heavy Cast Iron Side Plates, Wheels and Gear Casings; Crucible Tool Steel, **Self Sharpening**; Revolving Reel Blades and Stationary Knife; Malleable Iron Reel Braces and Roller Brackets; Adjustable Hardwood Roller; Triple Gearing on One Side; 3½-foot Varnished Hardwood Handle; Painted Green and Red with Gold Bronze Striping.

Complete With Grass Box

Cut Shows Mower with Grass Box Detached



Cut Shows Mower with Grass Box Attached

Note

The Grass Boxes of Catchers which are Furnished with these Mowers are Composed of Two Parts—the Box Proper and the Shield or Deflector, to Deflect the Grass Forward into the Box. They are Made of Sheet Metal with Wood Ends and are Easily Attached and Detached.

The New Fad of Making Putting Greens on Golf Links Wavy or Undulating has Revived a Demand in Some Sections, Originally in Great Britain, and More Recently in this Country, for the Old Roller Type, Forward Cut Lawn Mowers.

The Pennsylvania Putting Green is an Exact Model of the **Pennsylvania Grand Horse Mower**, Modified Only to Operate by Hand.

The Stationary **Knife** is Bolted Rigidly to the Frame, Making the Adjustment Entirely with the Cylinder. The Journal Boxes or Cylinder Bearings are Self-Aligning, Insuring a Perfect Cutting Edge the Entire Length of the Blades. This Mower Can be Se to Cut $\frac{1}{16}$ of an inch, Adapting it for Putting Greens, Tennis Courts, Cricket Creases, and Other Work Requiring an Exceptionally Close and Smooth Cut. It Can Also be Used as an Edge Trimmer for the Ordinary Lawn. The Front Wood Roller Better Supports the Machine in Mowing Terraces, but Can be Readily Removed if Desired, Leaving Only the Casters as Supports.

All Blades in this Mower are Crucible Tool Steel, Oil Tempered and Hardened.

Diameter of Rollers 7 inches; Diameter of Cylinder 5½ inches; Six Blades.

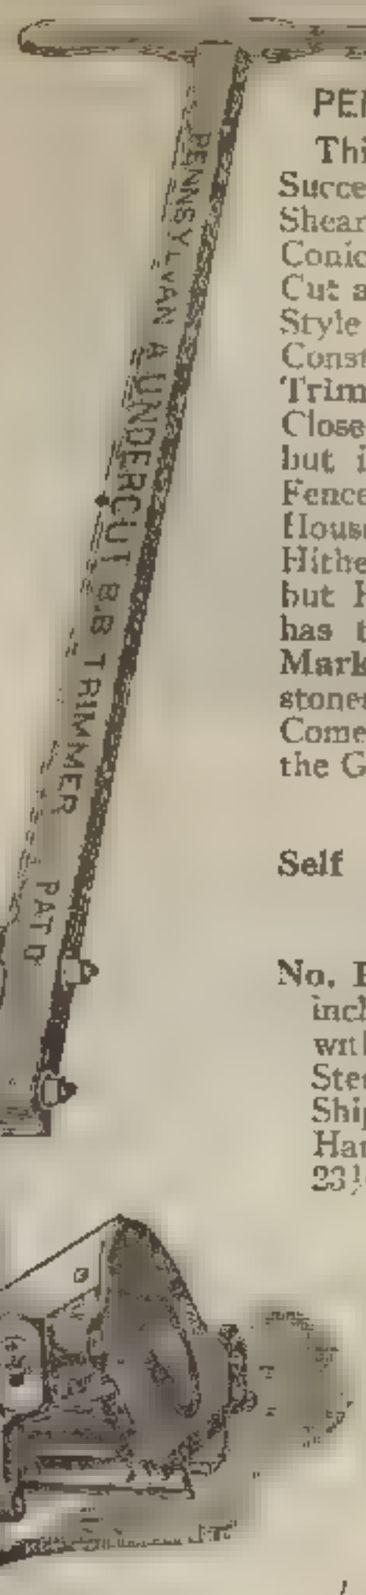
LAWN TRIMMERS



PENNSYLVANIA UNDER-CUT

This Machine is the Only One to Successfully Replace the Use of Hand Shears. The Slanting Side Plate and Conical Cylinder Make it Possible to Cut all the Grass Left by the Regular Style of Lawn Mower. The Unique Construction of the **Under Cut Trimmer** Permits Cutting Not Only Close up to a Wall, Fence, Tree, etc., but it will Get the Grass **under** a Fence or Rock-cut Base of Tombstones, House Foundations and Other Places Hitherto Out of Reach of Anything but Hand Shears. For Cemeteries it has the Special Advantages of Not **Marking** or **Smudging** the Tombstones, as the Side Plate Does Not Come in Contact with the Stone Above the Grass Line.

BALL BEARING

BOYS STEEL WAGONS

★NORLEIGH DIAMOND

"Norleigh Diamond" High Grade Boys Wagons are Original in Construction and Distinctive in Appearance. They are Better Ironed, Better Finished and Much Stronger Than Any Other.

The NORLEIGH DIAMOND Boys Wagon is **Better Ironed, Better Finished** and **Much Stronger** Than Any Other Wagon On the Market Just Compare Our Gear With Any Other and Verify This Statement; Where Other Front Gears are Riveted Once or Twice the **Norleigh Diamond is Riveted, Welded** and **Reinforced** at **Nine Different Places.**

Note the Practical and Powerful Fifth Wheel and Gear; Note That the Tongue is Ironed—this Obviates All Tongue Trouble—Tongue Remains Where You Leave It—Does Not Fall to the Ground; Examine the New **Idea Steel Hand Loop,** Which is the Best and Most Practical Ever Used.

The NORLEIGH DIAMOND Gear and Heavy Iron Work, Together with the "New Idea" Large Barrel, Anti-Friction Outer Bearing Hubs and Extraordinary Heavy Spokes and Wide Tires, Enables the NORLEIGH DIAMOND to Withstand Heavy Loads and Rough Usage Where Other Wagons Break Down.

Body—24 Gauge Steel (Others Made of 29 Gauge). Double Beaded or Swedged. Top Edge Reinforced With Heavy Steel Wire; Bed Substantially Fastened to Gear by Eight Steel, Copper Plated Bolts and Nuts, With Washers Under Heads to Keep Them From Pulling Through.

Finish—Enameled, Varnished and Decorated by Hand in **Four Different Color Combinations,** as Follows: Red Outside, Green Inside, Green Gear and Wheels, Green Outside, Red Inside, Red Gear and Wheels; Blue Outside, Red Inside, Red Gear and Wheels; Red Outside, Green Inside, Black Gear and Wheels; Gold Letters and Decorations

Washers—Lock Washers Used on All NORLEIGH DIAMOND Wagons.

Wheels—Steel, Highly Finished to Match Gear, **Fitted with Extra Heavy Spokes and Wide Tires;** "New Idea" Large Barrel Outer Bearings; **Anti-Friction Hubs** and **Brass Plated Hub Caps.**

Gear—Extra Heavy 10 Gauge Channel Steel (Others Made from 14 Gauge, Which is Much Lighter), Enameled to Match Wheels; "V" Shaped Channel Steel Braces; Improved Style Reinforcing Brace on Rear Axles, Extra Large and Strong Fifth Wheel Braces.

Tongue—Made of Select Closely Grained Bent Hard Wood and Will Reach Back Far Enough to Allow Coasting; Finished in Oil; Fitted With "New Idea" Steel Hand Loop.

Packing—All NORLEIGH DIAMOND Gears, Wheels and Tongues are Packed in the Wagon Bed; this Eliminates Battered or Broken **Wheels and Lost Tongues;** This Also Means a Lower Freight Rate.

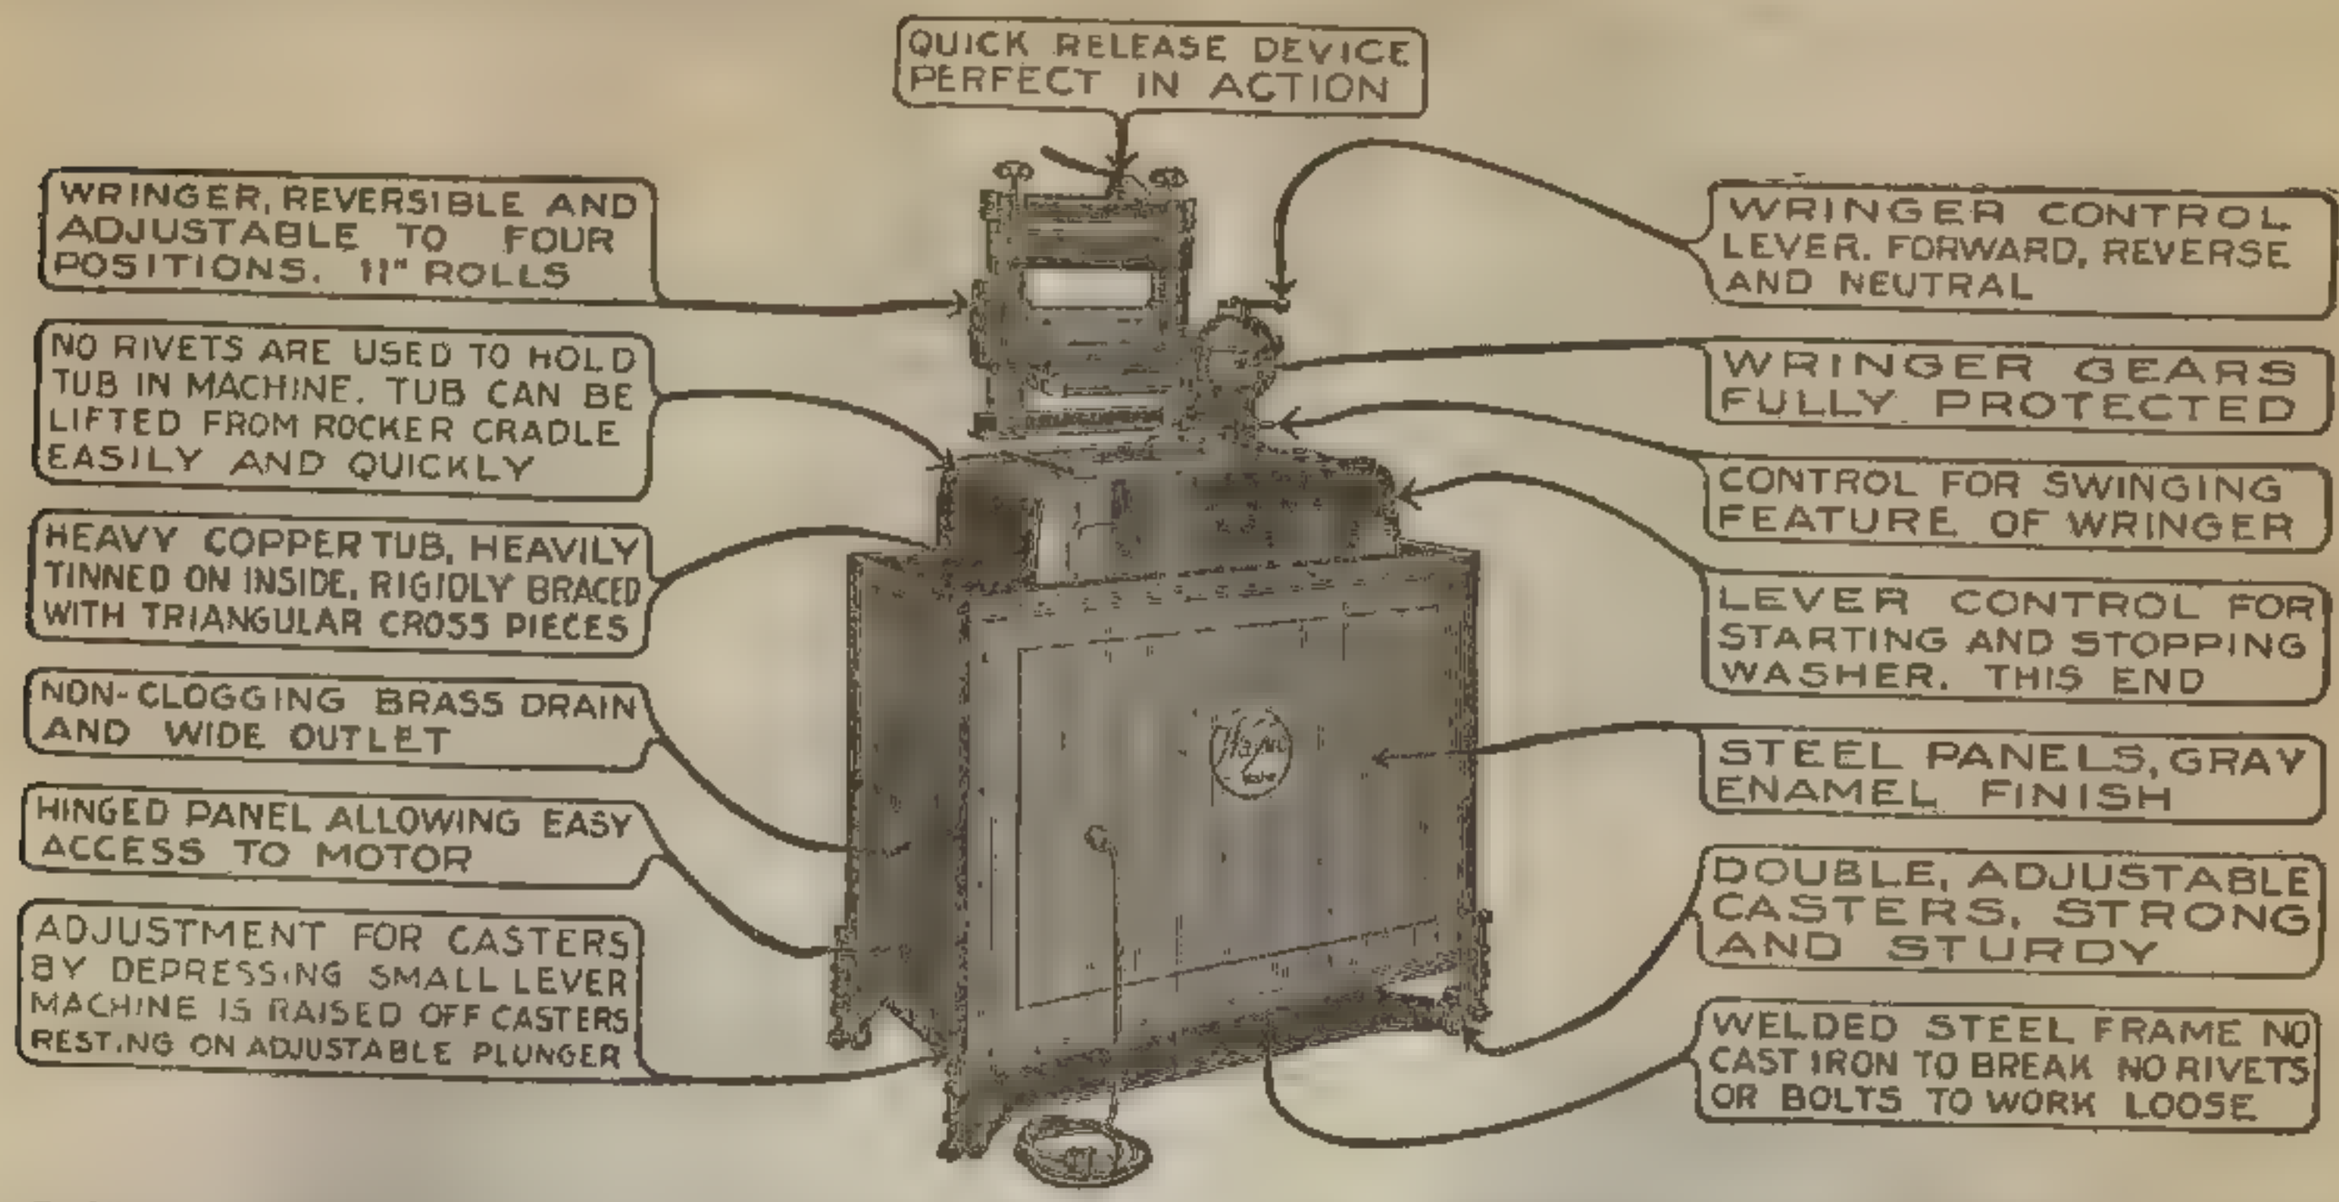
ELECTRIC WASHING MACHINES

WAYNE

ELECTRIC

The Principal of the Wayne is the Same as the Time Honored Method of Washing Delicate Fabrics in a Mason Jar; Just Tossing the Most Delicate Lingerie, the Most Commonplace Household Linens or the Rag Rug Gently Back and Forth. The Rocking Motion is Obtained by Means of Curved Steel Rockers on Which the Removable Copper Tub Rests.



QUICK RELEASE DEVICE PERFECT IN ACTION
WRINGER, REVERSIBLE AND ADJUSTABLE TO FOUR POSITIONS. 11" ROLLS
WRINGER CONTROL LEVER. FORWARD, REVERSE AND NEUTRAL
NO RIVETS ARE USED TO HOLD TUB IN MACHINE. TUB CAN BE LIFTED FROM ROCKER CRADLE EASILY AND QUICKLY
WRINGER GEARS FULLY PROTECTED
CONTROL FOR SWINGING FEATURE OF WRINGER
HEAVY COPPER TUB, HEAVILY TINNED ON INSIDE, RIGIDLY BRACED WITH TRIANGULAR CROSS PIECES
LEVER CONTROL FOR STARTING AND STOPPING WASHER. THIS END
NON-CLOGGING BRASS DRAIN AND WIDE OUTLET
STEEL PANELS, GRAY ENAMEL FINISH
HINGED PANEL ALLOWING EASY ACCESS TO MOTOR
DOUBLE, ADJUSTABLE CASTERS, STRONG AND STURDY
ADJUSTMENT FOR CASTERS BY DEPRESSING SMALL LEVER MACHINE IS RAISED OFF CASTERS RESTING ON ADJUSTABLE PLUNGER
WELDED STEEL FRAME NO CAST IRON TO BREAK NO RIVETS OR BOLTS TO WORK LOOSE

By Virtue of the Removable Tub the Wayne is Rendered Absolutely Sanitary and can be Kept Sweet and Clean at all Times. This Tub can, Without the Slightest Trouble, be Lifted from its Cradle, Thus Making it Possible to Keep the Inside of the Machine Free From Dirt and Filth. This also Gives Access to all Mechanical Parts of the Machine, thus Enabling Any Slight Adjustment Which Might be Necessary to be Made. The Tub is Constructed from Selected Copper, Tinned on the Inside and is Absolutely Free from Bolts or Rivets.

The Frame is Welded at Every Joint, thus Making One Solid Piece of Steel Free from Bolts and Rivets, and Impervious to Rust or Wear. The Rocker Cradle is Built the Same Way. The Side Panels are of Steel, Lacquered with Several Coats of Baked On Enamel and Securely Bolted to the Frame thus Enclosing all Moving Parts, Including the Motor.

All Double-Type Castors are Used and Foot Levers are Conveniently Located at Each Corner. When These are Depressed Plungers are Forced Down Lifting the Wayne Just High Enough to Swing the Castors Free from the Floor, Thus Making the Machine Absolutely Stationary.

The Wringer is Absolutely Up-to-Date in Every Respect. It is Reversible, has the Most Modern Quick Release Device, and is Adjustable to Three Positions; Therefore, it can be Used for Wringing Out One Batch of Cloths While the Other is Being Washed. It is Controlled by a Small Hand Lever and can be Operated Simultaneously with the Machine or Separately.

The Wayne is Equipped Throughout with Oilless Bearings, with the Exception of the Motor. This Overcomes the Great Difficulty of Making Women Understand the Necessity of Constant Lubrication, and also Eliminates any Possible Chance of Getting Oil on the Clothes.

The Motor is a One-Quarter Horsepower, and is of the Best Make Obtainable. Though Slightly Larger than Necessary, the Surplus Power Takes Care of Any Possible Chance of Overloads.

An Auxiliary Steel Drain Board Hooks to the Ridge of the Wringer Support on Either Side of the Wood Uprights of the Wringer, Completely Overcoming the Difficulty of Obtaining Perfect Drainage from the Wringer to the Tub.

A Large and Readily Accessable Drain Cock of Solid Brass and Noncloggable, Carries the Water to a Large Pan. This in Turn Drains Through a Wide Spout which is Sufficiently High to Clear a Three Gallon Bucket. Should the Operator so Desire, a Hose can be Led Through the Drain Spout and Attached to the Drain Cock. By this Arrangement the Tub can be Emptied into Any Near-by Drain.

All Casting are Made from Highest Quality Grey Iron.

The Delicate Color Scheme Worked Out in Baked On Grey Enamel, Instinctively Carries the Suggestion of Refinement, Cleanliness and Durability. The Shining Copper Tub, Visible Above the Graceful Outlines of Frame Work Suggest Maximum Efficiency in a Minimum of Space, and the Concealment of all Working Parts Emphasizes Extreme Simplicity.

SPECIFICATIONS

Dimensions of Frame, 36x18x25¾ inches, Over All Dimensions, 38½x24½x56 inches, From Floor to Top of Frame, 30 inches; From Floor to Bottom of Frame, 4¼ inches.

Dimensions of Top, 26x14½x14½ inches; Opening in Tub, 17 inches Long, 11¾ inches Wide, Capacity of Tub, 6 Full Sized Sheets or 12 Shirts; Size of Wringer Rolls, 1¾x11 inches.

Machine is Furnished with 110 A. C., 60 Cycle, Motor on 110 and 32 Volt Direct Current Motor. You Must Specify the Kind or Voltage of Motor Wanted; Odd Cycle Motors and Higher Voltage can be Furnished on Special Quotation.

Logical!

definition—Logic—(loj-ik) N. the science of correct reasoning; the power to think correctly

Consider Northern Ohio

with a population of over 3,200,000, which is divided into 688,566 families, residing in 13 cities of over 25,000 population, 111 towns of over 1,000 population, 1,559 hamlets and hundreds of farms, the valuation of which approximates $563,000,000. Northern Ohio has 19 jobbing centers and 11 distinct Merchandising zones. An indication of the tremendous Buying Power of this market lies in the fact that there is an automobile for every 2½ families. Transportation facilities are of the best—10 of the country's most important railroad systems, and five interurban lines, together with 58 bus lines traverse this rich, progressive market!

If you haven't already received a copy of The Plain Dealer's Book for 1923, "Cleveland's Three-Million Market," write for one. Address MERCHANDISING DEPARTMENT.

The Plai

Cleveland's Greatest Salesma

remember—

Cleveland—the gateway to this great area—is the second city of the United States in diversified industries, with only three newspapers which could have any influence whatsoever in Northern Ohio. But there is only ONE which actually covers it—

The Plain Dealer

—for it has 10,000 MORE Daily circulation, and 40,000 MORE Sunday circulation than any other Cleveland newspaper.

isn't that logical?

Proof!

In 1922 The Plain Dealer achieved an overwhelming leadership in National advertising among Cleveland newspapers. 50.3% of the total lineage appeared in The Plain Dealer alone—a greater volume than all other Cleveland newspapers combined!

Northern Ohio Is YOUR Market—

The Plain Dealer Is YOUR Medium

In the spring

more people ride in buses

IN THE SPRING while some still wear their overcoats and others leave them off — more people hail the buses on the street corners and along the interurban routes.

More riders mean more buses—new buses to meet a type of traffic that is increasing yearly; new buses to replace those worn out last year.

The peak loads of last year are the normal loads this year. Purchases of equipment for new peaks are being made now.

Bus line operators are studying *Bus Transportation* to learn of better operating methods and to see what economies manufacturers have to offer through the equipment they advertise.

Successful agents and dealers are weighing their own lines of buses and equipment against those of other makes.

Bus manufacturers and body builders are getting ready for the expanding market for new buses and specialized bodies.

Service station operators are already placing orders to meet the increasing demand for bus servicing and supplies.

These men read and use *Bus Transportation*, because it is devoted exclusively to transportation and maintenance engineering.

BUS TRANSPORTATION

A McGraw-Hill Publication — — Tenth Ave. at 36th. St. New York

Purchases of new bus equipment for this year's service are being made now.

MOTOR BUSES average from 30,000 to 40,000 miles per year. Pleasure cars average less than 6500 miles.

The bus uses from two to three complete sets of pneumatic tires each year.

In interurban service, brakes have to be relined every 10,000 miles. In the city, single-deck buses require new brake linings every 3000 miles and double-deckers, every 1500 miles.

The high ratio of the requirements of buses compared with the needs of pleasure cars holds true also for lubricants, parts and supplies.

The bus transportation industry is a real market!

the only publication devoted exclusively to this enthusiastic industry

JUST as surely as a good housewife is judged by her back yard, so a newspaper is judged by its local advertising and circulation. Well informed buyers of space know that THE CLEVELAND PRESS leads in almost every important local advertising classification in the daily field—total local advertising and total advertising. THE PRESS also leads the only other evening newspaper in Greater Cleveland circulation by over 36,000.

In Men's Furnishings, for instance, THE PRESS publishes about twice as much advertising as its only evening contemporary. Here are the daily figures for 1922:

THE PRESS .	**356,164 Lines**
Plain Dealer .	**316,300 "**
The News . .	**180,131 "**

Here is impressive evidence of THE PRESS local rating as the dominant business producing newspaper of Cleveland.

"OVER A

...and how

THERE is no mystery attached to the CHICAGO HERALD & EXAMINER'S sensational circulation drive .... a tremendous campaign which made the Sunday circulation grow steadily from approximately 650,000 to over 1,000,000 .... *and leadership!*

We merely practiced what we preach .... we *advertised.* And our advertising story was concentrated chiefly in newspapers. In an ably directed campaign of five months' duration we spent over

$300,000.00

advertising what we know is the BEST newspaper in Chicago. And this intelligent, carefully planned advertising campaign shattered all circulation records in the Central West. Today .... over a million

Chicago Herald

Sunday circulation .... OVER A MILLION
lowest milline rate of any newspaper
west of New York .... daily or Sunday

MILLION"

we got it!

prefer the CHICAGO SUNDAY HERALD & EXAMINER at 10 cents a copy .... a 50% higher price than that of its morning contemporary.

Proving .... that if you have a *real* product to sell you can sell it .... with *good* newspaper advertising.

Proving .... that if you have a *superior* product to sell you can dominate your market (irrespective of selling price) with *good* newspaper advertising.

And we have the SUPERIOR product!

The result? Just this ....

Over 1,000,000 people pay over one hundred thousand dollars every week for the Sunday Chicago Herald & Examiner .... a yearly total of over $5,000,000.00

Turks and
Turkish
Towels

WITH due respects to the Editorial Department, Mrs. Jones doesn't always turn hurriedly to the big news story about what the Turks are doing, when she picks up the daily paper.

More likely than not she hurries to the page ad that tells the bargain price on Turkish Towels. Which only shows that not all the news is in the news columns. And if you have a real story to tell in your advertising, you can depend upon the Mrs. Joneses and Mr. Smiths of Baltimore to read it.

Advertising is news—and the Sunpapers carry most of it.

1922

—and it Was a record

The States was the only New Orleans newspaper to gain advertising lineage in 1922. Both the Item and Times-Picayune lost.

The reasons? Intensive circulation in New Orleans and the immediate trading area served by the New Orleans stores. Maximum productiveness per dollar invested. Circulation, daily and Sunday, constantly increasing and as constantly adding to the value of the space cost.

The record of the New Orleans States in gaining over a million lines in 1921 is probably unequalled in the South. It could not have happened had not the States unquestionably proved its power, its value, and its title to the *Confidence and Contract* of everyone wishing to sell New Orleans and vicinity.

Open Letters to Advertising Agents

THE NATION'S BUSINESS

Published by
The Chamber of Commerce of
the United States of America

Washington

March Twenty-seventh.

Dear Mr. Newell:

A few years ago agents and advertisers tried to avoid duplication in building a list.

Now they insist on the right kind of duplication.

The reason is obvious:

When an agent today thinks of a mass audience he sees immediately an audience of two million people and in that group he frequently has in mind one particular market on which he must get duplication if possible.

If business men are the men he wants most to influence he welcomes a publication like The NATION'S BUSINESS that will duplicate on business men exclusively and reach again the best customers for his client, - because that means strong additional pressure exactly where he wants it.

The price of this direct pressure may be a factor, yet it can hardly weigh against such important additional selling, particularly when in its strongest terms - twelve powerful double pages a year - it only totals $14,400.

And the bull's-eye on which you get this repetition is 100,000 leading business executives.

I know you had such considerations in mind in planning the Western Electric Company's campaign, and placing a strong schedule in The NATION'S BUSINESS.

With heartiest good wishes.

Victor Whitlock

Mr. C. B. Newell, Pres.,
Newell-Emmett Company,
New York City.

Victor Whitlock
Director of Advertising.

FROM THE NATION'S BUSINESS

SELL It to

Sweeney Wants Everything!

"THERE is no use," says many a business man, "in advertising to that class of people—they can't afford it!"

But bootleggers sell eighteen dollar hootch a long way from Wall Street. Office boys play pool at a dollar an hour. An impoverished family in a factory town will spend a thousand dollars for a funeral. There are fifteen-thousand-dollar-a-year bachelors in New York City who can't afford to marry, and five-dollar-a-day laborers who can. A hostler sports a diamond horseshoe pin, but can't afford an overcoat. A working girl will pass up lunch, but must have a fur coat.

What is the answer? The bootlegger gets the money because somebody *wants* the hootch. The office boy prefers the click of ivory on the green table to the clink of coin in the tin bank. The poor family *wants* the funeral. The laborer *wants* the girl. The distinction of diamonds is worth more to the hostler than warmth in winter weather. Hudson seal means more to the working girl than ham sandwiches or hot soup. A human being is a customer for anything that he or she wants badly

Sweeney!

enough. High desire discounts the cost and discovers some way to overcome it. Somebody wants something all the time.

Isn't the first job of your advertising to sell your product to people who want it? Then, why not advertise to the Sweeneys—the average man, the average woman, the average family—the mass market in New York? The Sweeneys want everything! Their wants are limited only by what they do *not* know! . And the Sweeneys buy things that, by incomes and statistics, seem out of their reach. But when they want them *enough*, they buy.

Sell it to Sweeney—the mass market of New York—in The News. A market that is first in the world in point of concentrated population, high per capita income and earning power; a market that affords cheaper, more efficient, more rapid distribution; quicker turnover, and a larger potential volume of business than any other market in the world. And a medium that covers a third of New York City in the morning field, that has higher attention value, reader interest and responsiveness, and because of its tabloid page makes advertising space and advertising dollars more effective. Get the facts!

THE Sweeney series has been reproduced in individual folders. Write for the full set.

Detroit News Is Also the Grocer's Medium

The two largest grocery firms in Detroit use The News exclusively.

THE DETROIT NEWS leads in practically every selling classification of advertising because it not only has the greatest week-day and Sunday circulation, but also because that circulation is largely home circulation.

The News goes into the home and stays, becoming the buyer's guide. Naturally such a paper will be the best medium for the grocers—a fact well substantiated by the following figures. In 1922 The News published 866,824 agate lines of grocer and food products advertising, while the next paper published only 449,918 lines, a little more than half; and the third 266,840 lines; less than a third. To sell food products in Detroit, consider these facts.

The Pla

Cleveland's Greatest Sales

The National Advertisers and Advertising Agencies of the United States bought $200,000,000.00 of newspaper space during 1922.

The territorial alignment of this great expenditure represents the highest type of scientific space-buying known to American advertising. Every market, every newspaper and every dollar is impartially appraised and apportioned by men whose sole business is to get the utmost from advertising. Only certainties survive such a gruelling test.

During 1922 these scientific space-buyers concentrated their Cleveland advertising in The Plain Dealer as never before. Hundreds of them used The Plain Dealer exclusively. Together they bought more space in The Plain Dealer than in all other Cleveland newspapers combined.

During 1922 the National Advertisers used 7,124,614 lines of space in Cleveland newspapers—50.34 per cent. of which appeared in THE PLAIN DEALER alone.

	Lines
THE PLAIN DEALER	3,586,646

When Wedding Bells chime in

Philadelphia

will Spring brides treasure your goods?

Closing of the Lenten season will be the signal for a host of Spring weddings—and for the buying of extensive trousseaux and the purchase of innumerable gifts of every kind.

If you manufacture clothing, shoes, hosiery or other articles of women's Spring apparel, or turn out products suited for wedding gifts, you can convince the prospective brides, members of their families and friends that your goods should play a big part in the coming weddings, through advertising in the favorite newspaper of Philadelphia women—The Evening Bulletin.

The Bulletin every day goes into nearly every home, office and workshop in Philadelphia, Camden and their suburbs.

Dominate Philadelphia

Create maximum impression at one cost by concentrating in the newspaper "nearly everybody" reads—

Philadelphia's Newspaper—

The Evening Bulletin

"In Philadelphia nearly everybody reads The Bulletin"

The circulation of The Philadelphia Bulletin is larger than that of any other daily or Sunday newspaper published in Pennsylvania and is one of the largest in America.

1922 net paid average circulation: 493,240 copies a day.

Oklahoma's All- that is run

Poultry raising pays farm women one-seventh the value of cotton

POULTRY money, in large measure, provides the hundred and one home conveniences, the "pin money" and the clothing purchased by Oklahoma farm women.

Poultry raising is generally left to the women on the farm, but on that account it is none the less important. Frequently the receipts from the sale of poultry and eggs marks the difference between "breaking even" and making a good profit on the year's crop.

The year 1919 furnishes a fair picture of the poultry industry. The value of poultry and eggs produced that year amounted to more than $24,800,000—more than one-seventh of the total value of the cotton crop for that year, and a bumper year, too.

And each year has seen a constant increase in the number of fowls and number of eggs produced.

If any doubt exists as to the future of the poultry industry on Oklahoma farms, the sales of incubators, brooders, baby chicks, setting eggs, and breeding

Selling the Investor, too

LEADING financial and investment houses in the United States now realize that to maintain the market for investment securities and provide for the success of future issues, it is essential to promote the absorption of securities by "ultimate consumers"—individual investors.

This is most efficiently and economically done by advertising in those mediums that most influentially reach the greatest consumer markets. In Chicago the medium is The Daily News,* which by reason of its large home circulation and influence in the "family councils" of financially competent Chicagoans most completely and effectively reaches the great outstanding consumer market in its territory.

Realizing this, the following representative financial houses have each placed in The Chicago Daily News, since January 1, 1923, more than 1,000 lines of financial display advertising.

Investment Bankers, Bond Houses and Brokers

THE CHICAGO DAILY NEWS

First in Chicago

*The FINAL EDITION of The Chicago Daily News gives its readers the COMPLETE story of the financial day TWELVE HOURS EARLIER than the same reports are supplied by any morning newspaper.

Profit Industry by women

stock during the past year point the way to a bigger, healthier, more profitable source of revenue.

Each year the poultry industry grows. Each year the profits are larger. And the farm woman spends her money little differently from her city sister.

The Oklahoma Farmer-Stockman for years has stressed the economic soundness of raising poultry on every farm. Column after column has been devoted to this important phase of farm life. Today there is a flock of poultry on 92% of the farms in Oklahoma—visible evidence of reader confidence.

This is another example of the practicable editorial policy of the Oklahoma Farmer-Stockman and how this policy is surely improving the economic condition of its 140,000 readers.

Your copy in The Chicago Tribune during the Chicago Show

—will reach manufacturers of automobiles, parts, and accessories;

—and dealers—thousands of the biggest from a score of states;

—and owners and prospects—hundreds of thousands of them—distributed over such a vast, rich section that your newspaper copy becomes the very best of national advertising.

DURING show week all major factors in the automobile industry are concentrated in Chicago and read The Chicago Tribune every day.

Furthermore, news of the show and automobile advertising, appearing in great volume in The Tribune, generate the highest degree of interest on the part of the public. The Chicago Show is not a mere exhibit. It is the world's greatest automobile market yielding a tremendous volume of immediate sales.

That The Chicago Tribune is the one dominant medium to use on this critical occasion is manifested by the fact that the automobile industry spends more money for advertising in The Tribune than in the five other Chicago papers combined.

Hit hard in The Chicago Tribune during the Chicago Automobile Show and you will bowl over at one blow the manufacturer, the distributor, the dealer and the user.

Resort Advertising Inspires Vacationists

BALTIMOREANS are fond of diversion. Vacations and pleasure trips are to a considerable extent as popular with them in winter as in summer.

It is not surprising, then, that when the NEWS and AMERICAN published their special Resort and Travel numbers in the early summer and at the beginning of the winter season in 1922, Baltimoreans found in them the inspiration and assistance they needed in formulating their pleasure-seeking plans.

And right there the Resort Bureau of the NEWS and AMERICAN took up the idea. These Resort sections were published in booklet form, and through promotional advertising that started even before the special sections appeared, the Resort Bureau was kept busy answering inquiries and requests for literature as well as giving information concerning vacation centers.

Thus, in rendering this twofold service, the NEWS and AMERICAN have demonstrated again their buying power and their selling power in the Baltimore territory—carrying a volume of 143,917 lines of Resort, Hotel and Travel advertising in 1922 against 128,324 lines in 1921. This increasing lineage reflects steadily more satisfactory experience with elements of high buying power—another index of NEWS and AMERICAN value to the general national advertiser

Here is an issue for every progressive among us whether in politics or not.
(*from an editorial*)

YOUR CHILD is being cheated unless he gets the kind of education that will give him a fair chance when he begins active life. "A School Where They Hate to Quit," is the first of a series about pioneer schools with something better than the old system. Your child has a right to *better* education, not merely more of it.

In more than a million homes every week Collier's is read by intelligent men and women who want to know how they may help make their country a better place to live in. These millions of Collier's thoughtful readers are a powerful force in America's daily life, as an increasing number of important advertisers are learning each week.

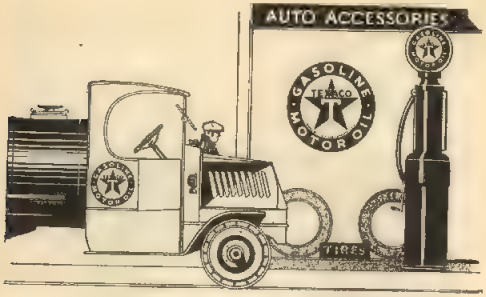
In 1922 The News carried more than 25,000,000 lines of paid advertising, which was 8.3% in excess of any other Detroit paper and third largest volume of all American newspapers. The News could have carried a much greater advertising lineage but for restrictions made necessary to enlarge the volume of news matter published. The News is now carrying over 50 columns of news matter per day as against a 60-column minimum in 1920 when this paper was the largest carrier of advertising in the country.

The Detroit News

Greatest Circulation Daily and Sunday in Michigan

"Always in the Lead"



This "Good-Ad" Sign is not only used on dealers' windows, but also on the pumps, trucks and tanks of the Texas Co.

"Good-Ad" Signs
of
DECALCOMANIE
that *"Goes on Forever"*

—because of its strength and excellent texture, serves many manufacturers for various distinct purposes.

There is a triple use for the *"Good-Ad" Sign* that emphasizes the economy of its use. The same sign may be used on—

1. *The Dealers' windows.*
2. *Sides of trucks and wagons.*
3. *Outdoor display boards or display racks inside the store.*

One appropriation thus serves several purposes, resulting in further economy of time and money—making more significant the long proven superiority of DECALCOMANIE TRANSFERS.

Send for actual Decalcomanie samples to try—also, for illustrated literature and details of non-obligating, free sketch offer.

We have some particularly interesting information for advertising agents

This Is Motor-Boat-Show Week

THE Annual Motor Boat Show is running this week at the Grand Central Palace. If you haven't been there yet don't neglect to run up and look it over before it closes Saturday night

You'll enjoy the fine boats and engines exhibited. You'll be impressed by the size and activity of this industry. Perhaps you'll get an idea of a big market you've overlooked.

The popularity of boating is growing tremendously. Its importance as a national recreation and as an industry may be judged from the success of the magazines devoted to the subject.

For example, the February issue of MoToR BoatinG contains 220 pages, with over 172 pages of advertising. The March issue has 106 pages of advertising. During 1922 MoToR BoatinG averaged over 82 pages of advertising per issue, against 75 pages per issue for 1921. Other magazines in this field average 50 to 60 pages of advertising per issue.

Boating is growing and MoToR BoatinG is growing. Its circulation is the largest—nearly double that of other boating magazines. As the foremost magazine in the marine field MoToR BoatinG offers you the opportunity to cover a rich and growing market with peculiar effectiveness.

May we tell you about this market?

MOTOR BOATING

Complete Advertising Service—

How Prosperous Is Milwaukee-Wisconsin?

These facts for 1922 concerning Milwaukee-Wisconsin are given by the Babson Statistical organization in a recent supplement—and offer proof of this great market's prosperity—

Number of Wage Earners
263,949

Number of Manufacturing Establishments
10,393

Annual Payroll
$290,440,561

Value of Products—1922
$1,846,984,307

Value Added by Manufacturer
$719,709,346

The number of industrial workers in Milwaukee at present is 32% greater than a year ago.

Wisconsin farmers got $269,264,000.00 for their 1922 crop—an increase of 20% or almost $54,000,000.00 over the previous year.

Milwaukee-Wisconsin is a territory of unusual financial resources and stabilized buying power. It has always maintained its steady, normal prosperity even when waves of business depression affected other parts of the national market.

Milwaukee-Wisconsin is most economical for advertising effort. With the Journal alone, you can reach 4 out of every 5 English-reading families in Milwaukee—and at the same time relay your advertising message to the buyers in Wisconsin's most important sales centers—a half million daily readers.

Baltimore Women Favor Independent Political Thought

EVER since Lady Baltimore cast her first ballot in 1920 and began to make her power felt in civic affairs, her leaning toward independence in political opinion has well-nigh upset the shrewdest calculations of party "bosses" on both sides.

In keeping in touch with the great, live issues of the day, in forming her political decisions, she has learned to rely upon the newspapers that she knows to be independent in political thought and fearless in political action — the papers that are committed to no interests except the best good of Baltimore and her people — the NEWS and AMERICAN.

It is these papers, going into the worth while homes of Baltimore — and reaching practically all of them every day — that are read through and through by the women in these homes.

Yes, Baltimore women read a whole lot more in the NEWS and AMERICAN in addition to the columns of political news and comment. They follow closely the pages that are devoted solely to their interests, as the BUYERS in their homes they are particularly attracted to the advertising columns of their favorite papers. It is the close reader contact that the national advertiser finds so valuable in his NEWS and AMERICAN campaigns.

Co-operation in Educational Advertising

SCHOOLS, colleges and many other educational institutions throughout the eastern section of the United States have found valuable assistance in the NEWS and AMERICAN way of handling Educational advertising.

To reach practically all of the worth while homes in Baltimore and vicinity through the special Educational Numbers, which were published at the beginning of the fall and winter semesters, was mighty productive in itself.

But the Educational Bureau of the NEWS and AMERICAN went farther than that. Reducing the special section, with its many interesting articles on educational subjects to booklet form, they invited inquiries concerning schools and colleges from prospective students, through intensive promotional advertising in their own columns (note typical copy above) mailed out the booklet upon request, classified the thousands of inquiries received and turned them over to the institutions that had advertised with them.

Co-operation? Yes, and the schools recognize the value of it, having used 51,522 lines of advertising in 1922 against 46,253 lines in 1921.

Wouldn't it be a wise business investment to let the NEWS and AMERICAN tell of your product in these thousands of buying homes that they reach in and near Baltimore?

In this article you will find the thing Collier's has called "the raw material for thought and action." It is typical of Collier's method which is to go there, get the facts, write them clearly and hit hard—and always on the side of sincere and sane progress.

In more than a million homes every week men and women read Collier's with a warm, personal interest because it tells people not what to think, but what to think about; because it seeks not to make up people's minds but to shake up people's minds.

These millions of Collier's thoughtful readers are a powerful force in American life, as an increasing number of important advertisers are learning each week.

Are You Like Washington?

IN 1773, when George Washington wanted to sell his twenty thousand acres of land in the region of the Ohio, he proclaimed the fact by an eight-inch single column advertisement in the first issue of the Maryland Journal and Advertiser, the immediate predecessor of the BALTIMORE AMERICAN.

To back up his sales argument, he opined that "it may not be amiss further to observe that if the scheme for establishing a new government on the Ohio in the manner talked of should ever be effected, these must be among the most valuable lands in it."

In those days, Baltimore was a "mere village." Now it is the great eastern port and center of distribution for those cities teeming with mighty industries that have risen in the vast area that Washington once owned, and its surrounding territory in the Middle West—cities and industries that radiate their products into all parts of the world.

Are you like Washington—have you something "out West" to sell? The successor of his advertising medium, the AMERICAN, with its afternoon associate, the NEWS, can put the story of your product into practically every worth while home in and near Baltimore—and at a combination rate for 1,000 lines or more, of 30 cents daily, Sunday, 35 cents; Sunday American rotogravure 35 cents per line flat.

HUNDREDS of letters from Collier's readers have gone into the making of William G. Shepherd's article on inheritance. You can see in those he quotes the kind of private thinking that multiplies itself into the greatest power in the world—public opinion.

EVEN SPORTS can be humdrum to the humdrum player. For the others, Walter Camp says that Coué's famous formula has its application to games. He tells some amazing things that happened when famous athletes used their imaginations.

In more than a million homes every week men and women who lead interesting and *interested* lives welcome Collier's because it helps them to a fresh perspective on the great affairs and events about them. The minds of these millions are alert and open to receive your message through Collier's advertising pages.

Baltimore Churches Believe in Advertising

BALTIMORE is a city of churches that believe in advertising. They find that it pays.

Baltimore churchgoers have learned to depend on the NEWS and AMERICAN each week for the advertising news of their churches. For the NEWS was one of the very first papers in the United States to develop religious advertising on a big scale, putting Baltimore a step or so ahead of other cities in the reader interest that has been created in this important field.

During 1922, the NEWS and AMERICAN published 172,559 lines of religious advertising a gain of 15,170 lines over the year 1921—a showing that classes these papers among the first in the country for volume of religious advertising.

The papers that have trained their readers to depend on their religious advertising have taught them to depend on them for all other advertising, too. And readers know that the advertising accepted and published by these papers can be relied upon.

It is that sort of reader faith in the NEWS and AMERICAN that makes their columns such a profitable investment for the national advertisers.

In Baltimore the Sunpapers Carried Over Six Million Lines of Classified in 1922 - - - - (A Gain Over 1921 of 328,491.)

The papers that people run to with the news of the birth of a potential President—or the sad news of the loss of a loved one; the papers that had to devote over six million lines to Baltimore's "classified" story—there's a lesson in that for "display advertisers."

Everything in Baltimore Revolves Around

preferable, in advertising Timken Roller Bearings, to such trite headlines as "Are You Expert at Driving Your Car?" or "Do You Steer Professionally?" There is such a difference in the way thoughts are worded!

It has been said that headlines can be created, so strong in their imaginative qualities, that art work is unnecessary. They are pictures in themselves.

Very often a catch-phrase is responsible for the success of an advertising campaign, representing, in itself, as has been suggested, a selling argument as potent as pages of descriptive copy.

Perfection Motor car heaters, for making automobiles comfortable in winter, employ a phrase which possesses the peculiar quality of instantly impressing the reader. This combination of words is: "The Heat Is There—Why Not Use It?" These eight words represent a quiet, well-mannered reproach. An attachment makes it possible for you to save lost heat actually generated by your own motor. Why not be comfortable? Why not be comfortable at zero, if you can be, so easily?

Building headlines or catch phrases represents one of the most important phases of advertising. Words and ideas should be weighed carefully, and the most gotten out of them.

A. H. Oman Returns to S. C. Beckwith

A. H. Oman, formerly with the Philadelphia *Inquirer* and the S. C. Beckwith Special Agency, newspaper advertising, has returned to the Beckwith organization.

William M. Baldwin Joins Chicago Agency

William M Baldwin, recently with the advertising department of the Pierce-Arrow Motor Car Company, Buffalo, has joined Henri, Hurst & McDonald, Chicago advertising agency.

Boston Globe First

During 1922 **the total number of Real Estate advertisements** printed in Boston papers having Daily and Sunday editions was

GLOBE 92,009
Second paper . 20,934

Write to Advertising Manager, Boston Globe, for information about the Boston territory.

The Globe Should Be First on Your Boston List

inspiring a pictorial theme which formed an important tie-up unit.

This phrase, to be used throughout the year, is, "Shake Hands with Health Every Day." The same idea could have been expressed as follows:

"Prunes Eaten Every Day Improve Health."

"A Daily Diet of Prunes Is Healthful."

"Eat Prunes Daily and Be Healthy."

But when a headline suggests that you can "shake hands" with Health, the conventional message is delivered in a far more modern and sprightly manner.

When Fab, with an illustration of many little children, in neat woolen garments, playing under big trees, employs the caption: "Babes in the Wools," the public senses at once an ingenious paraphrasing of a popular and well-known nursery story title.

The United States Cartridge Company believes that the very life of firearms depends to a great extent upon the ammunition used, and the basic thought to get across, therefore, was the connecting link between good ammunition and the vigor of the rifle or shotgun. Sportsmen would be inclined to display more interest in this blend of ideas than in a mere praise of the ammunition alone.

How would you express this thought? Are these suggestions powerful enough:

"The Right Ammunition Protects the Rifle."

"Firearms Given Longer Life Through Use of Quality Ammunition."

"Guns Kept in Good Condition by Best Cartridges."

Such headlines or catch-phrases would certainly tell the story and have nothing against them, but do they represent the most original and striking interpretation of the thought, for a wide-awake audience? This advertiser went a step further, and finally selected the far more spirited wording: "They Keep Your Rifle Young!"

"Are You a 'Nice-Steerer'" is

The Second Peak

During 1921 The Boston Herald carried more national advertising in its daily editions than any other American newspaper. During 1922 it has not only continued that leadership, but has, we believe, also carried more national advertising in its daily and Sunday editions than any other seven-day American newspaper.

Its unquestioned twofold leadership among Boston newspapers is demonstrated by the following report of lineage, from figures furnished by the Boston Newspapers' Statistical Bureau:

First in National Advertising
Daily Newspapers

Herald	3,200,680 lines
Post	2,796,963 lines
Transcript	2,188,092 lines
Globe	1,729,754 lines
American	1,420,795 lines

First in National Advertising
Daily and Sunday Newspapers

Herald	4,114,174 lines
Post	4,064,214 lines
Globe	2,340,476 lines
Advertiser	1,414,840 lines

The Boston Herald

Now First in National Advertising

Both Daily and Daily and Sunday

The Herald Is First or Second in Practically Every Classification of Display Advertising

We operate America's most versatile and effective sales service department. If you have merchandising problems in Boston, probably we can help you.

Boston!

"Boston? We recently increased our sales 550% there and in the entire New England territory, by a short selling campaign of three weeks. And I'd suggest that any sales manager who has his doubts about that part of the country get on the ground and find out the facts, like I did. Don't judge Boston by hearsay, or by prejudice."

This observation on the part of Mr. Sydney S. Goldberg, sales manager of Scotts Preparations, New York City, is one that applies to Boston precisely.

(Reprinted from "Sales Management," January, 1923)

This selling campaign was backed by intelligent advertising which ran exclusively in the Boston Herald and Traveler. Have you a Boston sales problem we can help you solve?

"BUFFALO IS A TWO-PAPER CITY"

The Squirrels Are Looking For Him!

Any newspaper man who claims that Buffalo can be covered by one newspaper needs protection not only from these little animals but from his own fevered imagination.

Here Are The Facts:

The American Association of Advertising Agencies gives 4.1 persons to a family. The 1920 census gave Buffalo 568,000, about 124,000 families. Conservative estimates and building reports show an increase of from 10,000 to 15,000 families since 1920, which are verified by the official Housing and Population Figures for Buffalo as furnished by the Department of Health

Number of homes in Buffalo, 100,000.
Single houses about 70,000, No. of families 70,000
Double houses about 28,000, No. of families 56,000
Apartment and tenement houses about 2,000
Number of families, estimated..... 12,000

Total number of families in Buffalo.....138,000

Official Washington U. S. Census reports show less than 4,000 families in Buffalo in which English is not habitually used for reading and writing 4,000

English reading families in Buffalo.....134,000

The Buffalo Evening Times is now selling over 60,000 papers daily in the City of Buffalo alone. Take the A. B. C circulation of any other Buffalo newspaper and figure for yourself how any newspaper can cover even 50% of Buffalo alone.

Boy! Page the Keeper from the Booby Hatch and prepare the padded room for the Buffalo one-paper man.

Circulation Facts

There is ONLY ONE Chicago afternoon newspaper that has a circulation of more than 400,000—

The Chicago Evening American.

And there's nothing "approximate" about it.

Its A. B. C. circulation.

Your selling effort is concentrated principally on people under forty and those who THINK under forty.

The Chicago Evening American is made to order for them.

CHICAGO EVENING AMERICAN

A *Good* Newspaper

Merchandising Service in Chicago

The logical place to go for effective merchandising service is to the newspaper whose advertising leadership in its community gives it greatest influence with dealers. In Chicago that newspaper is The Daily News.

Cooperation of the dealer is easily secured by The Chicago Daily News because it means to him a repetition of merchandising success that has so consistently increased his profits.

It is the routine of good business with him. He knows The Chicago Daily News is as distinctly a part of his business as his own show window—that his customers habitually shop through it.

The day after day, year after year, advertising leadership of The Daily News in Chicago has established it in the minds of Chicago people as the great shopping medium—the market directory of Chicago, through which they buy and upon which they depend to keep up-to-date regarding desirable merchandise.

Accordingly, the first step in merchandising in Chicago is use of The Daily News' advertising columns.

The second is use of The Daily News' merchandising service.

Building Bigger Business in Chicago

is a "business" with The Chicago Daily News. Its success in this direction is amply attested by the growth in Chicago of those business enterprises that place the preponderance of their advertising in The Daily News.

The indubitable testimony of authoritative figures establishes The Chicago Daily News not only as the most **efficient** but, in many instances, the **sufficient** medium for covering Chicago and its suburbs and "building bigger business" therein.

The following statistics, issued by the Advertising Record Co., an independent audit bureau maintained by all the Chicago newspapers, show the distribution of display advertising among Chicago daily newspapers from January 1 to December 31, 1922:

	LINES	COMPARISON LINES
The Chicago Daily News	**13,779,569**	**13,779,569**
The Daily Tribune	**10,525,259**	**10,525,259**
The American	**8,064,865**	
The Daily Herald-Examiner	**4,232,869**	
The Post	**4,446,923**	
The Journal	**4,270,771**	
The Daily News' excess over the next highest score, that of The Daily Tribune	***3,254,310***	

Those who purpose to *"build bigger business in Chicago"* may well follow the lead of experienced and successful advertisers and advertise first of all in

The Chicago Daily News

FIRST in Chicago

cost of production farm incomes

debt, except for productive purposes, is another. Co-operative marketing of major crops where feasible is a third.

Each of these three objectives is essential to the stabilization of farm incomes from year-to-year. And stable incomes will eliminate the ups-and-downs of the farm market for manufactured goods of every kind.

Compare such a workable "grass-roots" editorial program with a "sow-in-the-spring, harvest-in-the-fall" farm paper editorial policy. Is it any wonder that readers of The Oklahoma Farmer-Stockman cling to the farm paper that constantly demonstrates its adaptability to their problems and its ability to help increase their profits?

Isn't this a vital point for Oklahoma farm paper advertisers to consider?

Lineage—Lowest Rate

One of the "400"

There are only three afternoon newspapers in America with circulations in excess of 400,000—one in New York, one in Philadelphia—and

The Chicago Evening American.

Average daily net - paid circulation for February 426,324.

Speaking of coverage!

CHICAGO EVENING AMERICAN

A *Good* Newspaper

Another Smashing Gain

Lineage figures covering total display advertising in Chicago newspapers during February tell another interesting story for national advertisers.

The Chicago Evening American's lineage gain for February, 1923, as against February, 1922, was 30.2%. The other leading afternoon newspaper gained 14.4%.

Which shows the way the advertising wind is blowing in Chicago.

CHICAGO EVENING AMERICAN

A *Good* Newspaper

The Largest Farm Paper

Breeders of Pure-Bred Cattle Read The Farm Journal

Frank K Nelson.

Breeder of Red Polls; Director of the Red Poll Cattle Club of America; Director, Secretary and Treasurer of the Ohio Red Poll Breeders Association; Secretary and Treasurer Ohio Good Roads Federation; Associate Editor Red Poll Journal; Member Farm Bureau, Grange, National Geographic Society, Luther Burbank Society and American Institute of Agriculture. His real sideline, however, is organizing Farm Bureaus. Just now he is "doing it" in Virginia.

It Pays and Proves It Pays

Miss Mary Bayne

(and 76,000 of her sisters)

They do say the Evening American is favored by the young woman who works.

Not surprising. Its youth, vigor and flashing spirit appeal strongly to their independence.

They like its dash, its aggressiveness, its "punch."

There are in the Loop alone 76,000 of Miss Bayne and her sisters. They earn $100,000,000 a year, and spend $30,000,000 of it on wearing apparel.

CHICAGO EVENING AMERICAN

A *Good* Newspaper

Youth Will Be Served!

(Even In Washing Machines)

The Chicago manager of a well known washing machine company has averaged the estimated age of his customers over a period of six months.

He finds that the average age of purchasers of washing machines is 33 years.

Something to think about for the manufacturer who has merchandise to sell to up-and-coming families, and not to those who have about finished the race.

The Chicago Evening American is the favorite newspaper of Chicagoans under forty—the aggressive and not-to-be-denied youth of the second greatest market in the United States.

CHICAGO EVENING AMERICAN

Youth Still Calls

Manufacturers who sell chiefly to people under forty (and most of them do), should remember that in Chicago, The Chicago Evening American is the favorite newspaper of this group.

It is made for them

Its "dress," its treatment of news and features—from cover to cover it expresses the spirit and ideas of vigorous, fearless youth.

CHICAGO EVENING AMERICAN

A GOOD NEWSPAPER

Is The Chicago Evening Post *On Your Schedule?*

It Should Be

If you are advertising an article that appeals to the higher intelligence or the more capable pocketbook.

This is demonstrated by the fact that it has for a number of years carried more business from several lines of high grade advertising than any other Chicago evening paper, such as passenger automobiles, electric automobiles, motor trucks, financial, railroads, music and musicians, insurance, etc.

Why not imagine that you are sending a personal representative to interview the prospective customers for your article? The *success* of your selling campaign would depend on the amount of sales as compared with the cost of calls, and it costs no more to call on a prospect financially able to become a customer than it does to call on one who has neither the money nor the ability to appreciate articles of merit. Would you send your salesmen to everyone listed in the Blue Book or would you attempt to cover the names in the City Directory? This is a fair comparison of THE CHICAGO EVENING POST, the class paper of Chicago, with the mass circulation papers.

"Chicago's Best and Cleanest Paper"

THE FARM JOURNAL—1,150,000

A Self Starter of Maryland

Down in Wicomico County, Maryland, most farming improvements start with W. F. Allen, and what he starts he puts across. He first grew cantaloupes commercially—now they're all doing it, shipping 25 to 30 cars a day. The soil needed nitrogen, so Allen grew soy beans; now he's promoting a soy bean mill so all farmers can grow them profitably. Also he's testing varieties and methods.

A cotton seed mill was needed to make cotton profitable—Allen got one built. (He's agricultural director of the Salisbury Chamber of Commerce and makes it mean something.) Most of the time a dozen demonstrations are being carried on around Allen's farm—spraying, dusting, fertilizing, pruning, selection of seed, and other tests desired by the farm bureau.

Whatever he learns, he willingly passes on—and his neighbors believe him when he says it pays, for Allen has won a huge success in farming. He borrowed $15 to buy his first strawberry plants when a boy on his father's farm, 41 years ago. Six years later he started for himself on 50 acres, heavily mortgaged. Now he has 1,000 acres in orchards, crops and strawberry nurseries, conservatively valued at $100,000.

He believes that farming education pays. All his sons are college graduates and the three at home are better farmers for having the education.

Mr. Allen has been a reader of The Farm Journal for almost 40 years and says that he would give up a good deal before he'd let it go.

The Farm Journal

NEW YORK PHILADELPHIA CHICAGO

BELIEVED IN FOR 46 YEARS

Lincoln was Right

TAKE ADVERTISING VALUES for example. A newspaper might make a big showing in the circulation columns of the directories without indicating how the circulation was secured, or where it is, or what buying power it represents. Another might have voluminous Sunday editions, and practically no home circulation during the six business days of the week. Skillful presentation of the figures in both cases could make them more impressive than their true significance would justify. But

"You Can't Fool all the People all the Time"

The CINCINNATI TIMES-STAR daily, without Sunday editions, for fifteen consecutive years has gone into four of every five of the 141,000 homes in the city (40,000 of them owned by the families that occupy them) with an average of 6,273,153 lines of display advertising per year, being an excess of 1,362,626 lines per year over the second paper.

IN 1922 THE TIMES-STAR PUBLISHED

10,459,407

LINES OF DISPLAY ADVERTISING

Almost two million lines more than the second paper.

The TIMES-STAR not only dominates in high-class local advertising, but also in national advertising. It is the exclusive medium for one hundred and fifty national advertisers.

CINCINNATI TIMES-STAR

CHARLES P. TAFT, *Publisher* C. H. REMBOLD, *Manager*

Member of Audit Bureau of Circulations

150 National advertisers use it exclusively!

THE mere fact that advertisers use a newspaper means it is a good publication. But when they use it *exclusively*, it is proof that the paper is dominant and adequate in its field.

One hundred and fifty national advertisers use the CINCINNATI TIMES-STAR *exclusively* to reach the Cincinnati market. They have learned from experience that this means the most satisfactory results; for the TIMES-STAR delivers the full purchasing power of this market.

This exclusive preference of national advertisers is confirmed by all of the large local advertisers, who, though, of course, using all of the papers, accord the great bulk of their display advertising similarly to the TIMES-STAR!

Cover Cincinnati with *one cost* — in the TIMES-STAR!

CINCINNATI TIMES-STAR

CHARLES P. TAFT, *Publisher* C. H. REMBOLD, *Manager*

Member of Audit Bureau of Circulations

FIFTEEN YEARS
of
DOMINANT SUPREMACY

The uninterrupted, proven preference of advertisers, both local and national for the CINCINNATI TIMES-STAR was evidenced again in the year 1922 by

10,459,407 LINES OF DISPLAY ADVERTISING.

This is 1,921,031 lines more than the lineage published by the second paper, including both daily and Sunday editions—or six days against seven.

1921 was the banner year in the history of the TIMES-STAR, with 182,497 lines more than 1922. Yet this amount, by which the year just closed falls short of its 1921 record, is less than one-tenth of the amount by which it still leads its nearest competitor

The display advertising published by the TIMES-STAR in 1922 is

1,880,823 lines more than the largest amount ever published by any other paper in the city

8,578,584 lines having been published by the second paper in 1920.

That the dominant leadership of the TIMES-STAR is not temporary, accidental or fluctuating, but that it is continuous, progressive and permanent is proved by the display advertising space records for the past 15 years:

	TIMES-STAR Total Display Lines	EXCESS OVER Second Paper Lines	EXCESS OVER Third Paper Lines
Year 1922	10,459,407	1,921,031	3,949,463
Average 10 years	7,439,714	1,734,459	2,425,881
Average 15 years	6,273,153	1,362,626	1,941,186

THE CLEVELAND PRESS not only publishes more local business than any other Cleveland daily Newspaper but leads in every important local advertising classification.

In 1922 THE PRESS published more Hardware, Furnace and Stove advertising than The News and Daily Plain Dealer combined. Incidentally, this includes both foreign and local.

The figures for the entire year of 1922 are as follows:

THE PRESS .	**115,077 Lines**
Plain Dealer .	**61,488 "**
The News . .	**45,826 "**

Local merchants prefer THE PRESS because it thoroughly blankets and dominates the greater Cleveland market.

The CLEVELAND PRESS

DOMINATES GREATER CLEVELAND

THE PRESS regularly publishes more Men's Clothing advertising than either The News or daily Plain Dealer.

The figures for the entire year of 1922 are as follows:

THE PRESS	. .	**795,473 Lines**
Plain Dealer	. .	**652,259** "
The News	. .	**533,716** "

Not only is THE PRESS first in local advertising—the local merchant's first choice—but in total paid advertising as well. Here is conclusive, definite and authoritative proof of the complete local supremacy of THE PRESS.

79 Per Cent of THE PRESS total circulation of 182,548 is distributed in Greater Cleveland. It is significant that THE PRESS stands fourth in the entire country in the highly important factor of intensive coverage.

Vital Advertising Lesson Taught by Wireless ~

The great broadcasting stations send out their messages to half the world, but these messages are RECEIVED only by the instruments tuned to the proper wave length.

In a spectacular way, this demonstrates perfectly the important business paper principle of *selective* circulation. The good business paper automatically selects and sifts out of the mass all the men or concerns interested in the same materials or processes. It segregates them in one group just as certainly as though gathered in one room.

Moreover, the business paper reader must *voluntarily* tune in. He voluntarily indicates his desire to receive the messages, and pays money for the privilege.

THE ASSOCIATED BUSINESS PAPERS, INC.
100% A. B. C. Audited — Reaching 54

AND in Amusements such as Theatrical and Moving Picture THE PRESS publishes far more advertising than either The News or Daily Plain Dealer. Just a leader in one more important classification that shows which way the wind blows in an advertising way in Cleveland.

Here are the figures for the entire year of 1922:

THE PRESS .	442,026 Lines
Plain Dealer .	375,009 "
The News . .	430,809 "

Year in and year out local merchants indicate their faith in THE PRESS by using more space in this great selling medium than in any other Cleveland daily newspaper—conclusive proof of the responsiveness of PRESS circulation.

How Campbell Soup Reduced Its Selling Expense

WHEN the Campbell Soup Company first started to make soup it was also making 200 other products. The first year's output on soup was 500,000 cans. Today the company has discarded the 200 products, and its output of soup has run as high as 18,000,000 cans a week.

When it started the soup business the expense for salesmen was 7½ per cent of costs and for advertising 14 per cent—a total of 21½ per cent for sales and advertising. Today expense for salesmen is 2 per cent of costs and for advertising less than 3 per cent—a total of less than 5 per cent.

The company is giving consumers soup at twelve cents a can that could not be made by the individual for several times that. And the cost of advertising in a single can of soup is *seventeen one hundredths of one cent.*

Before the company started to advertise the farmers near its factory were dependent on a fluctuating demand for their produce. Today advertising has made demand so staple that farming has almost ceased to be a speculation. In addition advertising has made it possible for the company to maintain agricultural experimental laboratories wherein the farmer's problems are worked out to his great benefit.

Dr. J. T. Dorrance, President of the Campbell Soup Co., in the March issue of PRINTERS' INK MONTHLY

"In 1800 The Center of Population was 18 miles west of Baltimore. By 1850 it had reached the Alleghanies. Then the Moving Finger passed the crest, and in 1870 was near Cincinnati. For a half century it has pointed its way westward, across Ohio and Indiana. Today it marks a spot only a short distance east of St. Louis; and in a few more years it will reach 'The City Surrounded by the United States.' It is moving more slowly now, and scientists tell us that it will never go farther than fifty miles to the west of St. Louis; because it is a *Center*—not a *rim*—and the two oceans, the gulf, the desert, and the cold north set their own limitations."

Paul V. Bunn, General Secretary, St. Louis Chamber of Commerce in *Greater St. Louis:* Dec., 1922.

—And the map below shows how one newspaper covers the St. Louis trade area (radius 150 miles). No other St. Louis newspaper even claims such coverage.

Globe-Democrat

Largest Daily of St. Louis

"Git Thar Fustest with the Mostest"

IN those words General Nat Forrest, the Confederate cavalry genius of the American Civil War, is said by military authorities to have stated the whole science of war.

The same words forcibly cover the science of newspaper making. The newspaper that succeeds—wins the reader's interest and confidence—is that which "Gits thar fustest with the mostest" news.

For a specific instance consider the market and financial pages of The Chicago Daily News.

The Daily News has taken advantage of its opportunity to give its readers the COMPLETE story of the Financial Day, in its "Final Edition," TWELVE HOURS EARLIER than this same news is supplied by any morning newspaper.

Inevitably readers know and appreciate this service and inevitably they prefer to read the news while it is new—as well as complete and reliable.

An increasing army of readers is making The Daily News financial and market section its directory and guide in matters of investment.

Your advertisement in this section will reach the potential investor when his investment interest is at its peak.

You will "git thar fustest with the mostest."

THE DAILY NEWS

First **in Chicago**

The population of Des Moines, Federal census of 1920, was 126,468.

Here is the present circulation of the Daily Capital:

City	**Over 30,000**
Country	**Over 34,000**
Total	**Over 64,000**

The Des Moines Capital is in a position to serve any national advertiser exclusively in Des Moines with a complete coverage of the city and tributary territory. The Capital is the best newspaper it has ever been from the standpoint of quality, and the circulation, city and country, is the biggest in the history of the paper. One can readily see from the population of Des Moines, as given above, that nearly every one in Des Moines sees the Capital every night.

We will be much pleased if advertisers interested in the Des Moines newspaper situation would make inquiry for further information, and particularly ask to see sample copies of the Capital.

Breaking The Barriers That Bar The Buying

CREDITING Coué with discovery of a sixth sense is incredible! Advertising Men, and Typographers *who prove it with proofs*, have for these many, many moons signalled that self-same sense—the seat of all senses: Evoking the eye by invoking beauty of line, grace of design, dignity and balance, light faces for right places, and dark faces in stark places, the mind is made into a receptive mood—then the message, of truth tersely told, repeated "day by day," *forces* that impulse of the sixth sense to Break the Barriers that Bar the Buying.

Iowa, That's Where the Tall Corn Grows

"Gold Grows in Iowa"—that's literally true.

Iowa's corn crop is invariably the largest produced by any state. In 1922 Iowa grew 455,355,000 bushels of corn. Iowa also ranks first in production of oats, hogs, eggs and poultry.

Iowa's per capita wealth is the greatest in America. And Iowa leads every other state in literacy.

Iowa is an intelligent state, a newspaper reading state. If it wasn't, The Register and Tribune couldn't have the largest circulation of any newspaper in the world published in a city the size of Des Moines.

Include Des Moines and Iowa in your next advertising campaign. The pennies you invest in newspaper advertising in Iowa will grow into dollars.

The Des Moines Register and Tribune is the backbone of practically every successful advertising campaign in Iowa. It is read by over 125,000 Iowa families.

The Des Moines Register and Tribune

Daily 135,788—127,922 Sunday

February Net Paid Average

Des Moines is an important Distributing center

The Vacuum Oil Company recognizes that the trade of Iowa centers in Des Moines.

The Goodyear Tire & Rubber Company has recently made Des Moines zone headquarters for Iowa, southern Minnesota and a part of Illinois.

The Chevrolet Motor Company has opened a zone office in Des Moines with supervision of Chevrolet sales in Iowa, eastern South Dakota and eastern Nebraska.

A network of highways and railroads makes Des Moines and all Iowa one big market. Not a farm home in Iowa is more than twenty minutes by automobile from a railroad station.

The most direct route to the Des Moines and Iowa market is via The Des Moines Register and Tribune. It blankets Des Moines and reaches one thousand Iowa cities, towns and villages.

Net Paid Circulation Exceeds

Remarkable Automotive Advertising Leadership

Smashing all previous records of leadership in automotive advertising carried in Show Numbers, The Sunday Detroit Free Press of January 21, outmatched, outclassed and outdistanced its competitors by the largest lineage leadership it has ever been privileged to carry. Here are the figures:

SUNDAY FREE PRESS...85,512 lines
Sunday Detroit News.....63,882 lines
Sunday Times.....27,510 lines

A LEAD OVER THE SUNDAY NEWS
OF 21,630 LINES OR 33.8%

A LEAD OVER THE SUNDAY TIMES
OF 58,002 LINES OR 210%

This amazing record of preferred patronage again clearly demonstrates the clean-cut superiority of The Detroit Free Press as an advertising medium of unquestioned, unsurpassed worthiness.

238,139

In 11 Weeks Sunday Free Press Circulation Has Increased 59,953

SUNDAY FREE PRESS circulation is smashing its way forward to greater gains than were ever before made by any newspaper in Michigan.

And the most remarkable part about it all is the fact that these gains are being made continuously—there has been no let-up in circulation growth since January 1st.

SUNDAY MARCH 18th THE CIRCULATION OF THE SUNDAY FREE PRESS REACHED A HIGH WATER MARK—238,139—A GAIN OF 11,592 OVER THE PREVIOUS WEEK.

These remarkable increases define and explain the unusual results now being obtained by Sunday Free Press advertisers.

Read—Not Merely Circulated

THE Detroit Free Press is read at the breakfast table—not tossed away on the streets.

It hits thousands of the very best Detroit homes each morning—85% of its great home-delivered circulation remains in the home all day. It is a newspaper that commands the attention of the actual buying power of Detroit.

Yet the appeal of The Detroit Free Press is universal. It caters to no sect, class or creed. Its readers are bankers, merchants, manufacturers, professional men and women clerks, mechanics, stenographers, laborers.

No campaign in Detroit can be successful, complete or efficient if it omits the use of this newspaper that reaches a majority of the worth-while homes in America's Fourth City.

The Detroit Free Press is *read*, not merely circulated.

"Lift Up the Latch and Walk In"

ANY advertisement failing to reach good homes attracts about as much attention "as a dirty fingernail in the third grade."

How can you be sure your advertising message will "lift up the latch and walk in" to good homes, in Detroit? How can you be sure that the circulation you buy is out of the "street corner, headline reading" class—that your investment in white space gets inside the front door of a home worth while?

You are not sure *unless you use a morning newspaper*, and there's only ONE in Detroit—The Free Press. Use it and you're assured of attention unflagged, interest unchecked, desire-to-buy unrestricted.

ontrol the sale of
utomotive Merchandise

THE production of two and one third million automobiles last year and a correspondingly colossal output of trucks, tractors, parts, accessories and shop equipment—is a tribute to American manufacturing methods—but no less a tribute to American salesmanship.

For each car and each truck and each of all the other products had to be sold twice and in many cases sold three times before it reached the ultimate consumer.

No automotive product can be distributed without trade assistance and the co-operation of these three men—the Jobber or Distributor, the Dealer dispensing merchandise and the Dealer selling service, is as greatly needed by the Automotive manufacturer as are the machines that build his product or the workmen that uphold its quality.

This year there will be an even greater production of things automotive than last year — and competition will be more keen.

The tradesman must adopt better merchandising methods to hold and build his trade and the manufacturer must stir himself no less to hold the tradesman.

The need of better selling, by the trade, will be met by Motor Age and Motor World in two big Special Issues devoted to merchandising.

These two selling issues coming two weeks apart and at the very start of the selling season will bring to the trade merchandising information and selling ideas which will be of practical every day value throughout the year.

And these two issues devoted to selling may well be the means of disseminating your own selling message. If you are out to build trade patronage for 1923 here are two numbers that should certainly carry your advertising.

How a National Advertiser Found a Bargain in Detroit

ONE of the biggest successes in The Detroit News now is a product that had never been there before.

When the advertising manager of The News recently met the sales manager for this product he bluntly asked him why he had picked Detroit as one of the first cities for his campaign.

His answer was simple:

"After all, what we are buying is population. We haven't the money to go everywhere at one time—and so, when we read in Printers' Ink that Detroit was unique, in that a consolidation of newspapers made it possible to practically blanket the entire city with one paper—it didn't take us a minute to decide on Detroit."

The Detroit News

Greatest Circulation Daily and Sunday In Michigan

"Always in the Lead"

Most Consistent Record Of Advertising Lead

Is Held by Detroit, Where The News Has Been at or Close to the Top for Eight Years.

THE DETROIT NEWS has the unique distinction of being either first, second or third in advertising in America for eight consecutive years. The News has been FIRST three times, SECOND four times and THIRD once.

This notable achievement is due to two factors largely—the singular prosperity of Detroit and the remarkably thorough coverage of The News.

In 1922, The News increased the amount of space devoted to news matter, curtailing many columns of space, otherwise The News would have again occupied first or second position.

The value of The News to advertisers wishing to cover the whole Detroit field with one paper can easily be ascertained from this record of eight years of leadership—an achievement unrivaled by any other paper in this country.

Greatest Circulation Weekday and Sunday in Michigan

"Always in the Lead"

Rotogravure Opens Way

Selling Without Advertising | Armed With Roto Contract

ROTOGRAVURE appeals not only to the buying public; it sells the merchant, too. The Sales Manager of a nationally known cosmetic and toilet goods manufacturer discovered this when he sold all the department and big down town stores in three days, due to the fact that Detroit merchants realize the magnificent sales appeal of a Detroit News Rotogravure campaign. Armed with a News Rotogravure contract your dealers are half sold before the salesman even discusses the product. The Detroit Sunday News now has more than 270,000 circulation and reaches practically every home in Detroit and vicinity. The Rotogravure is largely responsible for this circulation.

The Detroit News

Greatest Weekday and Sunday Circulation in Michigan.

The Largest Farm Paper

Directors of Agriculture Read The Farm Journal

L. J. Taber

Before Mr. Taber became the Director of Agriculture of Ohio, he occupied such positions of influence as Lecturer Ohio State Grange, Master Ohio State Grange, Executive Committeeman Ohio Farm Bureau Federation, Director on Cooperative Association Board, Executive Committeeman Ohio Dairymen's Association, President Ohio Home Protective League. He is a Director of the Farm Loan Bank.

It Pays and Proves It Pays

MAKE YOUR DETROIT SCHEDULE MORE FLEXIBLE

A Choice of Days Will Give Your Advertising Position Advantages.

DETROIT is experiencing a prosperity today that rivals the peak period of 1920. Already many automobile manufacturers are finding it difficult to keep production in pace with demand. There will be a shortage this spring both of cars and skilled workers.

Advertisers, realizing Detroit's unusual prosperity, are endeavoring to capture the Detroit market through The Detroit News, Detroit's greatest circulating newspaper. As a result, The Detroit News finds itself in a tight place on many days for space. This is a condition which could largely be obviated if more advertisers were to follow the practice of many prominent advertisers and allow The Detroit News some choice of publication days. Such advertisers find that The News is enabled to place their advertising most advantageously.

Twice a week advertisers would also find it advantageous to order one insertion in The Sunday News, which now has more than 270,000 circulation. The week day and Sunday combination is the ideal in Detroit where the population is composed of such variegated elements that it is advisable to reach them both through the Sunday and week day medium. The Sunday News makes one appeal and the week day News another. Some elements prefer certain sections of the paper Sundays which they do not read week days and vice versa. Cover all Detroit by using both issues of The Detroit News at pro rata cost.

1923 Year Book of Detroit News Now Available

DO you know that Detroit produces 75 per cent of all the automobiles in America? Do you know that America's fourth city is first in the manufacture of pharmaceutical supplies, and that this great city has a variety of industries, ranging from the manufacture of car wheels to corsets? Do you know also that no metropolitan city in America has one newspaper that covers the field as thoroughly as The Detroit News? These and a thousand other interesting facts about Detroit and The News are available to space buyers and advertisers in the new year book, "Detroit and The News," just off the press.

The Evening Bulletin

Philadelphia's Newspaper

The Bulletin's daily circulation of half a million copies is larger than that of any other daily or Sunday newspaper published in Pennsylvania, and is one of the largest in the United States.

Sell Spring Fashions to the 685,000 women of

Philadelphia

Chestnut, Walnut, Broad and other women's shopping streets in Philadelphia are lined with establishments which prosper because by advertising in The Bulletin they tell nearly every feminine shopper of their offerings of correct and fashionable attire.

Nearly every woman and girl in Philadelphia and vicinity will spend at least $10 on her Spring wardrobe.

Dresses, gowns, hats, hosiery, shoes and other things for women's wear will entice the dollars from their hand-bags.

If you manufacture goods which appeal to girls and women, you can reach the 685,000 feminine buyers in the third largest market in the United States through their favorite newspaper—The Bulletin.

Dominate Philadelphia

Like a forest against the skyline, radio masts tower over

Philadelphia

Glance in any direction in Philadelphia from the elevated railroads, or from the taller buildings—you gain an idea of the great market for radio goods in the third largest city in America.

At the receiving end of each of these radio outfits are enthusiasts watching every new development—and buying equipment to perfect their sets.

If you make radio equipment, you can persuade this great army of fans to insist upon getting your goods.

Retailers of radio goods select The Bulletin to carry their selling talks to the buying public—because in The Bulletin they can reach most fans and radio prospects in and around Philadelphia.

Selling sporting goods and outing garments in

Philadelphia—

leading sports centre in America

"Philadelphia leads all other American cities in the number of individuals who take part in outdoor and indoor sports."—Dr. E. J. Cattell, former City Statistician.

There is plenty of playing room in Philadelphia.

From one to five or even more teams represent most of Philadelphia's 16,000 industrial plants in various forms of athletics.

Thousands of mercantile and business establishments, clubs, associations, public and private schools, colleges and other educational institutions; public playgrounds, Sunday Schools, etc., are represented in sporting events of all kinds throughout the year.

You can teach this great army of sports enthusiasts to ask for your goods by name or trade-mark through The Bulletin—the recognized sporting authority and the favorite newspaper of Philadelphians.

To Reach The Consumer Is The Ultimate Object of Advertising

"National Advertising," in its January issue, shows Washington (D.C.), with 14,997,312 lines, ranks SECOND in the United States for local display advertising in Daily and Sunday editions.

This indicates conclusively what a fertile field the National Capital is for advertised goods—and also the importance with which the local merchants regard THE STAR as an advertising medium.

It reaches the consuming public here—thoroughly and influentially.

We shall be pleased to furnish any desired data concerning this market.

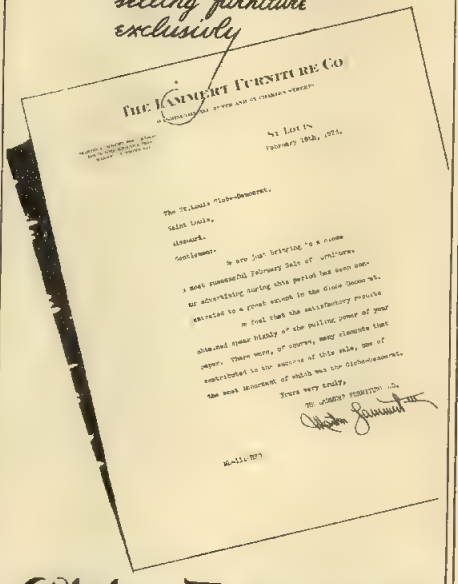
"This from the largest firm in the country selling furniture exclusively"



THE KAMMERT FURNITURE CO

St. Louis
February 28th, 1923.

The St.Louis Globe-Democrat,
Saint Louis,
Missouri.
Gentlemen:

We are just bringing to a close our most successful February Sale of furniture. The advertising during this period has been unusually attractive to a great extent in the Globe because we feel that the satisfactory results obtained appear highly of the pulling power of your paper. There were, of course, many elements that contributed to the success of this sale, one of the most important of which was the Globe-Democrat.

Yours very truly,

COLUMBIA MO.

Home of Missouri State University

The 49th State

—Add this new commonwealth to your map. It's a circle—radius 150 miles.

Call it "Globe-Democrat Influence." The capital is St. Louis.

The population exceeds 4½ millions. The wealth is based on a wider variety of natural resources and industry than any other state can show.

The Globe-Democrat serves the entire 49th state. No other single newspaper even claims such coverage.

St. Louis the City with $85,000,000 to spend on Municipal Improvements

—Here is a remarkable test-town for merchandise. Besides her stable, highly cultured residents, Columbia has students from all over the state and nation. The student bodies of the University and two Women's Colleges bring the population up to about 13,000.

Columbia is well-to-do, with bank deposits aggregating $4,494,125. In addition to her educational and manufacturing pursuits Columbia is active in a mercantile way.

40 Grocery Stores (Retail) 11 Drug Stores
3 Groceries (Wholesale) 4 Hardware Stores
19 Auto Dealers and Garages 6 Shoe Stores
6 Building Material Dealers 5 Jewelers
8 Dry Goods Stores 2 Furniture Stores
5 Men's Furnishing Stores 4 Stationers
7 Confectioneries

Columbians and Columbia students represent really a cosmopolitan buying group. They live well. They buy well. They buy in Columbia and in St. Louis.

. . And the Globe-Democrat has twice as much circulation in Columbia as any other out-of town newspaper. . . Think of this influence.

This is Bill Herschell, of The News staff, poet of highways and by-ways; poet of the city streets, master of song. Bill has been writing features and poems regularly for The News for more than twenty years. Incidentally, his "Long Boy," the doughboys' marching song of those stirring days of '17 and '18, made him nationally known.

IN Indianapolis, people turn *first* to read Bill Herschell, because in his twenty years on The News he has endeared himself to all as the Hoosier poet and philosopher. One feature does not make a newspaper, but one pre-eminent feature like Bill Herschell helps mightily. The long-maintained editorial ideals of The News have made it first in reader interest, first in reader loyalty, first in the hearts and homes of Indiana people.

Schnull & Company, large and progressive Indianapolis wholesalers, know the value of space in The Indianapolis News. They use it themselves.

Has the Wholesaler Enough Items Already?

Talk to the average wholesaler in any city and see if he hasn't a fixed conviction that his market will absorb a certain volume and no more. In nine cases out of ten, the wholesaler will tell you that the introduction of new brands merely means a further division of the volume. Volume for a product must come from two places: (*1*) from the business of other brands; (*2*) from increased consumption. The language that a wholesaler understands is adequate advertising, scheduled on a non-cancellable basis in a dominant newspaper such as The Indianapolis News. He knows it will create a demand which he must meet or else the retailer will have his order filled by some other wholesaler.

Attention: Mr. Chas. E. Sweet
Dear Sir:
The writer has spent five weeks since the first of the year in New York City, and it seems to be the opinion of some that conditions in our Southwestern country, especially Kansas, are not good. I do not know how this opinion could prevail. It surely has been started by someone who does not know the conditions at all as I took particular pains to inquire as to business all along the line, and came back with the feeling that we were in better shape than at any place between the Mountains and New York, at any rate.
You will remember our tractor show at Pichita, Kansas, last week which is a pretty good barometer for the farm market and I can say that I never have seen a crowd feel as optimistic since the peak period during the war.
I really felt that we were going to have a good crowd at Pichita as I took extra assistance there, not only to wait on the people but that they too could sound out conditions over the country, and they all came back with a feeling that they were going to run over the quota set for them for 1923.
Our sales are above the average for this time of year and we can't for the life of us, see how the east could get information that would lead them to think we are in bad shape out in the real "he-man" country.
Yours very truly,
TWIN CITY COMPANY
Manager.

CHARACTER

The advertising department of The Indianapolis News is proud to acknowledge that the paper is, very frankly, conducted from "upstairs." The editorial department and the business office work in perfect harmony, but from the days of John H. Holliday, in 1869, it has been recognized that The News is first a *newspaper*, second, an advertising medium.

With such a heritage it has been easy to establish and maintain the editorial and business policies which react to the benefit of *all* readers and *all* advertisers. Legitimate advertising, the commercial news of the day, has a place in a newspaper. Business is honorable. Advertising, its voice, needs no apology. Advertising in The News is never camouflaged to simulate news or editorial matter. There is no room for the speculator, the fake, the questionable or suspected advertiser. Rigid scrutiny protects the integrity of the advertising columns, as well as the editorial matter.

The advertising department makes no boast that these standards are part of the daily routine of the paper. An advertising department would not be conducted otherwise—on The News.

Do You Cooperate

Tom Witten, exponent of the famous Trenton (Missouri) Community Idea, in speaking to hardware and implement dealers, says:

"Put the stuff on your counter and in your display windows that your farmer-customers are reading about in their farm papers. Then if you have only one or two salesmen working for you in your store, you will have an additional thousand or two working regularly for you right out on the farms. They'll help you do your canvassing, break the ice and wear out more cash registers.

"Not a week passes by but that I receive benefits from Capper Farm Press Advertising. The lines that attain the steadiest year-round sales are the advertised lines. When my farmer-customers get the impulse to buy from farm papers, I tell them where to buy it in my local newspaper advertisements, in my display windows, and on my counters.

"I have always felt an added degree of confidence in those products whose manufacturers believed in advertising because their own good

THE News rate card carries every concession which even the most powerful advertiser can secure. Position is sold on a definite rate basis. The service of the merchandising department is available alike to all advertisers. There has never been a time in the history of The News when all local and national contracts could not be laid on the table before any interested person. Rigid censorship keeps the advertising columns clean, at a loss of hundreds of thousands of lines revenue annually, but insures the reputable advertiser of good company. At the same time the virile, independent policy of the editorial department, acknowledging no subservience to any class, creed or influence and fighting only for the welfare of the community, has built a reader loyalty, which while not expressed in the advertising rate, is amply reflected in the superior results accorded News advertisers.

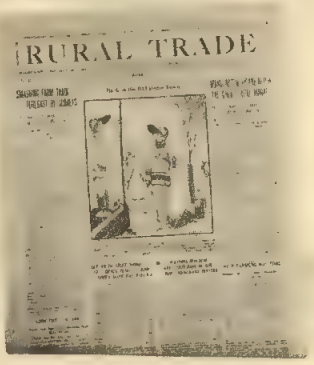
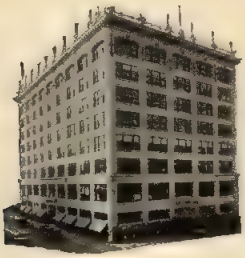
Merchandising





The Wm. H. Block Company uses more space in The Indianapolis News than any other retail advertiser in any one newspaper in America.

What Influences the Dealer in Buying Your Merchandise?

The retailer is interested primarily in a *profitable volume.* He must meet the demands not only of varying seasons and styles, but for new brands which are constantly coming on the market. The Wm. H. Block Company does not stock a newspaper-advertised product just to be good fellows. Primarily they are interested neither in the success of a manufacturer nor a newspaper. But they will stock a new product or reorder an old one for which adequate advertising has been scheduled in The News on a non-cancellable basis, because they know that there will be a demand for it. They know that it would be bad business not to be able to meet that demand. No successful retail merchandiser, however, will carry the "gamble" on a new product. He will not stock it on a promise of advertising that is contingent upon a certain volume of goods being absorbed by the market. Newspaper advertising has a valuable dealer influence, but the indefinite promise of space should not be expected to get more than an indefinite promise of support from the retailer.

Your Banker will OK a Farm Paper Advertising Campaign today

Ask your banker about the farm market today.

Ask him if the agricultural situation has not improved to the point where an intensive sales and advertising drive would bring you highly profitable and much needed business.

Ask him if you can afford to remain out of the farm field.

We asked a group of the largest and most representative midwestern bankers regarding conditions. The telegraphic replies were optimistic, even enthusiastic. They told of increased marketings, higher prices, lowered interest rates, rapid liquidation of indebtedness (as much as 50% decrease reported in some sections), increasing deposits, and best of all, increased buying with certain prospects of further increases.

Farmers are buying heavily again, and buying will increase steadily throughout 1923.

Ask your banker about the most promising sales areas. Whether you should scatter your efforts and advertising thinly over the country as a whole, or rather, concentrate in one or more certain well-defined areas.

Ask him about the 18 Capper Farm Press States.

Janesville's New Million Dollar High School

One of the paramount attractions for industry in a community is its educational advantage.

Janesville, Wisconsin, is growing. To take care of this growth the high school building, pictured above, was built and is now occupied.

This is but one indication of the wealth of this community—there are many others thoroughly covered in The Gazette's comprehensive survey of this rich market, ready for distribution soon. Send for your copy now. It will be forwarded when issued.

The Gazette absolutely dominates a 30-mile radius around Janesville, containing 122,000 prosperous people. No other medium or combination of mediums can be used to cover this market. The Gazette is the only available medium for developing increased sales volume.

McCALL'S

Unlike Any Other Community

Joplin, Missouri

The Market 240,000

The main reason why Joplin should be included in most campaigns is because Joplin is the distributing center for a definite market of 240,000 people.

This is reflected by the fact that the Globe and News-Herald have over 30,000 paid circulation, although Joplin proper has only 30,000 population.

There are splendid and diverse wholesale concerns.

The distributing facilities are far and away above the average through 7 railroads, 2 electric lines and an abundance of exceptional roads.

Joplin is in the heart of the justly famous "Ozark Playgrounds," producing a tourist "crop" worth some 5 million dollars.

Fruit, grain and livestock, manufacturing, wholesaling, mining and "vacationing" combine to make a most exceptional market worthy of every advertiser's cultivation.

NEW YORK STATE FARM PRODUCTS

There are nine co-operative marketing associations in New York State. One of these associations does a yearly business of more than $80,000,000.

Contributing greatly to the success of the co-operative marketing movement is the Dairymen's League News, the farmer-owned marketing paper.

The News each week carries several columns of editorial and news matter about co-operative marketing. It is regarded as the main champion of co-operative marketing in New York State.

For that reason it goes into the homes of more than 100,000 farm owners of the prosperous, progressive type who have the vision to get behind the co-operative movement.

The Dairymen's League News presents an exceptional advertising medium for the products farmers buy.

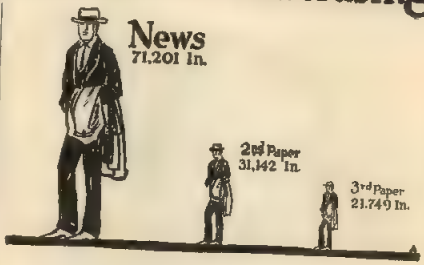
Detroit News Also Leads In Men's Wear Advertising



THE leading department stores, boot and shoe houses, furniture dealers, jewelry merchants, women's wear stores and grocers prefer The Detroit News and spend from 60 to 80 per cent of their advertising appropriations in its columns.

The men's clothiers also find that the home paper—the paper that goes into the home and stays there—brings the best results.

During 1922 the 16 leading men's merchants used 71,201 inches of Detroit News space, while the second paper carried 31,142 inches, less than half, and the third paper but 21,749, less than a third. To sell the men of Detroit use The News, which reaches practically every home.

The Detroit News

He gives to his public responsibilities the same close attention and determination to succeed which brought him success in farming.

THE FARM JOURNAL—1,150,000

Do You Seek to Reach People With Incomes of $5,000 a Year or Over?

ACCORDING to an analysis of the Federal Income Tax Reports for the year 1920, 628,000 persons acknowledged net incomes in excess of $5,000 a year.

According to New York State Income Tax Reports for the same period, there were 112,127 people in the State who acknowledged incomes of $5,000 or over.

A study of these returns shows that 78,902 reside in New York City and immediate New York State suburbs as follows:

	Number of Returns Over $5,000	Taxable Income Represented
New York City.....	74,154	$1,178,915,000
Mt. Vernon.....	1,145	13,666,900
New Rochelle.....	1,358	17,843,800
Ossining	98	1,564,700
Peekskill	109	1,122,600
Port Chester.....	171	2,532,000
White Plains.....	633	8,504,700
Yonkers	1,234	15,474,100
	78,902	$1,239,623,800

These figures would seem to indicate that these 78,902 people have 21 per cent. of the taxable wealth of the country.

Obviously, if you have an article you want to sell to people of this class, here is the largest group of them on earth, every member of which can be easily reached through the daily newspapers.

New York Chicago San Francisco

Over a Million Lines Gained!

In 1922 the World-Herald published 1,102,241 lines of paid advertising MORE than it did in 1921. This increase was over five times the increase made by the next Omaha paper. The third paper lost.

The World-Herald published 49.4% (or almost half) of the clean paid advertising in the three Omaha papers in 1921-22.

The figures below represent the agate lines of clean paid advertising in the three Omaha papers in 1921-22, medical ads being deducted from the other papers' totals, as the World-Herald refuses them all:

	World-Herald	Next Paper	Third Paper
1922	11,261,264	6,154,778	5,371,604
1921	10,159,023	5,944,120	5,842,592
Gained	1,102,241	210,658	
Lost			471,988

The following figures show the percentages of the total clean advertising in the three Omaha papers, published individually by each newspaper in the years shown. For example, the World-Herald published 43.66% of the total clean advertising in all the papers in 1920, 46.29% in 1921 and 49.42%, or almost half, in 1922.

	World-Herald	Next Paper	Third Paper
1922	49.42%	27.01%	23.57%
1921	46.29%	27.07%	26.64%
1920	43.66%	27.32%	29.02%

The World-Herald's city circulation is 40 per cent greater than that of either of the other Omaha newspapers. It is for this reason that the advertiser is able to concentrate his efforts in the World-Herald and to be certain of far greater returns than he can secure elsewhere.

Back General Publicity with *Mail Advertising*

If you are doing magazine advertising—back that publicity with *direct mail* support. In that way you increase the effectiveness of your general advertising, extend its influence, and make it more productive. For instance:

—give every inquiry a prompt and effective follow-up.

—reach dealers, special lists, etc., with letters and proofs of current advertising.

—tie up to dealers with full information as to current publicity, suggestions for taking advantages of periodical advertising, ideas for display, trims, etc.

—let jobbers and their salesmen know what you are doing to create further demand. Furnish helpful information to dealers. Adopt mail methods for inducing dealers to push your line and sell more efficiently.

—issue a house magazine for automatically keeping before the field, to build good-will, help the sales force, etc.

—work out merchandising plans so that all your advertising is harmonized—insuring maximum results.

Let us help you!

Greatness Through Simplicity

While many American newspapers make frantic efforts to win public approval through development of the sensational, the freakish and the bizarre, The Portland Oregonian continues a constant embodiment of newspaper greatness which has been achieved largely through simplicity.

It speaks in clear, concise English; its make-up is orderly and plain; it is clean—these are simple virtues, but, coupled with them is a scope of news service seldom equaled and a record of 75 years of sound editorial policy.

There is no other paper like The Oregonian in all the west—few like it in all the world. The folks who read it have little taste for newspapers of poorer quality—they are satisfied with nothing less than The Oregonian's standards of excellence.

This is why no other newspaper in the Pacific northwest approaches The Oregonian in influence or prestige—why it leads all others in circulation and advertising volume.

Average paid circulation February, 1923:

Daily 85,633
Sunday 123,814

Philadelphia

Third Largest City in America, is Breaking Building Records

22,588 building operations with a total cost of $114,881,040 were begun during 1922 in Philadelphia, according to the annual report of the Bureau of Building Inspection.

Of this big sum, $49,273,320 was for 9,651 dwellings, and $5,000,000 for apartments—almost fifty per cent of the total spent for real family homes in "the city of homes."

In addition, the city of Philadelphia is spending millions of dollars for sewer construction, highway betterments, subway and elevated transit and other improvements.

With this great addition to its buildings, and with every indication pointing to continuation of the construction programme, Philadelphia offers greater opportunities than ever before to manufacturers of all kinds of goods.

Dominate Philadelphia

Create maximum impression at one cost by concentrating in the newspaper "nearly everybody" reads—

The Bulletin

"In Philadelphia nearly everybody reads The Bulletin"

The circulation of The Philadelphia Bulletin is larger than that of any other daily or Sunday newspaper published in Pennsylvania and is one of the largest in America.

Net paid daily average circulation for 1922 —493,240 copies a day.

New York—Dan A. Carroll, 150 Nassau St.
Chicago—Verree & Conklin, Inc., 23 East Jackson Blvd.
Detroit—C. L. Weaver, Verree & Conklin, Inc., 117 Lafayette Blvd.
San Francisco—Allen Hofmann, Verree & Conklin, Inc., 681 Market St
London—M Bryans, 125 Pall Mall, S. W. 1
Paris—Ray A. Washburn, 5 rue Lamartine (9)

(Copyrighted 1923 Bulletin Company)

29,427

29,427 was the average net paid circulation of the Portland Press Herald for February, 1923.

This is a gain of 57% over February, 1922 and a gain of 24% over the average for the three summer months of 1922.

Announcing New Ownership

Statement of the Retiring Publisher

With the April issue, the HARDWARE DEALERS' MAGAZINE has been purchased by the publishers of the "American Exporter," to whom I have sold this business.

The new owners are the publishers of one of the oldest, largest and most progressive business papers, and the dominant one in the export field.

In parting with my publication and in retiring from active business after 29 years of publishing the HARDWARE DEALERS' MAGAZINE, I am gratified that my paper passes into the hands of a publishing institution of high ideals, and that it will assuredly enter an era of increased activity and greater service to its industry.

The record of the present management of the "American Exporter," representing a family of pioneer publishers of business papers, in developing the "American Exporter" from a comparatively small publication 18 years ago to become one of the outstanding trade journals of the country, is an assurance of their qualification to direct the HARDWARE DEALERS' MAGAZINE.

The affiliation of the two publications will add strength to each and will give hardware manufacturers a service of world-wide scope.

It is particularly promising that the new publishers of the HARDWARE DEALERS' MAGAZINE have associated with them as Vice-President and Editor, Mr. Roy F. Soule, who is so well known to the hardware field that he needs no introduction. In giving his entire energy, enthusiasm and personality to the HARDWARE DEALERS' MAGAZINE, there is no doubt of the leadership this publication will exert in its field.

In bidding farewell to the hardware trade, I wish to express my deep sense of appreciation for the years of loyal friendship and bespeak for the new organization the hearty support of the friends of the HARDWARE DEALERS' MAGAZINE. I give my assurance that the magazine will abundantly reward them for their support.

Very truly yours,

Daniel T. Mallett

Richmond (Va.) Leads!

In Department Store Gains

TWELVE per cent increase in business for the last five months of 1922, the largest in the Fifth Federal Reserve Bank District, according to the official government report. Compared with the one-half of 1% gain of Washington, and 7.9% gain of Baltimore, it is a conclusive proof of the growing importance of Richmond as a retail center.

THAT The Evening Dispatch is keeping pace with Richmond's development is indicated by its December, 1922, gain of 33% in advertising, as compared with December, 1921. The Evening Dispatch and Times-Dispatch can be bought in daily combination at 11c, which offers an excellent medium for thorough coverage of this fertile field. A Service Department is maintained, which will gladly co-operate with you in your sales efforts.

Obviously—100 responsible customers who are able to buy abundantly and pay their bills are worth more to any business than 500 who are able only to look in the window and wish. What is true of 100 is equally true of 1,000.

In Denver, *The Rocky Mountain News* (morning) and *The Denver Times* (evening), circulate almost entirely among the more substantial class—people who have money with which to buy. This explains why more automobiles and accessories are sold in Denver and the Rocky Mountain region, thru advertisements appearing in

THE ROCKY MOUNTAIN NEWS

and

THE DENVER TIMES

than any other medium in this section. The fact that these papers have for years carried the largest total lineage of local automobile advertising further demonstrates the truth of the above statement.

WANTED
Writer of PLAIN, HUMAN Advertising

—who would like to tackle and master the writing of advertising copy for a firm which mails nine million letters, booklets and folders per year to the business and professional men of America;

—who wishes to receive what he is worth, no matter what the figure may be;

—who would enjoy a happy business family to work in; and a city of small size to live in;

—who would like to be one of a young personnel with vision, progressive spirit and speed;

—who desires to make his last change and settle himself for life, in a sound, stable business already grown to large figures.

A man of the calibre we seek may hesitate to answer an advertisement. Don't have false pride. Big men and big business concerns are coming more and more to make each other's acquaintance through the medium of advertising.

We prefer a man under thirty-five—and a Gentile.

He need not have had previous experience as a mail-order executive, nor as an advertising man. **Perhaps he is now a newspaper reporter or an editor or a contributor to magazines or a writer of books.** Or perhaps he is right now producing direct-to-the-consumer mail-order advertising that is pulling exceptional results.

We want a man whose copy will be NATURAL, SINCERE and CONVINCING rather than clever; who can tell his readers plain truths in a homely but interest-gripping way; who can write the kind of copy that makes the reader feel an irresistible "urge" to buy and a complete confidence in the firm which is selling.

Write us about yourself. Give full particulars of your business history, your present salary, bonus, etc.

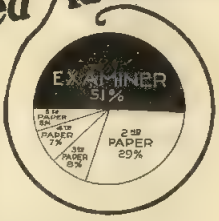
Be very sure to enclose samples of your work to show us that you can write forcefully.

The right man will receive an adequate salary to start; and if he makes good he can ultimately have an interest in the business.

Your communication will be held in strictest confidence.

"EXECUTIVE," Box 284, care of Printers' Ink.

The Examiner in San Francisco Overwhelmingly Leads in Classified Advertising



During 1922 the San Francisco Examiner carried 5,306,686 lines of Classified Advertising.

—Which was more than that carried by the Chronicle, Bulletin, Call-Post and News combined!

—2,322,152 lines more than was carried by its closest competitor.

—3,294,242 lines more than was printed by all evening newspapers combined.

Further evidence of the San Francisco Examiner's Want Ad supremacy is reflected in the remarkable gain of 377,874 lines of Classified Advertising during 1922 over 1921

—three times greater than the combined gains made by all other San Francisco newspapers

Here are the figures:	1922	1921	Gain
The Examiner	5,306,686	4,928,812	377,874
Second Paper	2,984,534	2,833,664	100,870
Third Paper	700,574	688,058	12,516
Fourth Paper	789,026	795,788	*6,762
Fifth Paper	522,844	513,352	9,492

*Indicates loss

To carry such a tremendous volume of Want Ads in excess of all other San Francisco newspapers shows conclusively that The Examiner successfully serves the wants and offers of the greatest number of people—

true-talk

about SEATTLE and her newspapers

1 The Mansions on the Hills.

Like Ancient Rome, Seattle is founded on hills. These hills are the centers of distinct groups of population which, reaching out, have gradually merged into one.

Mansions of the wealthy top the hills; there is no single high-class residential section—nor any slums.

A unique situation indeed. Judge then how evenly the Star's city circulation covers the city when the figures show that no hill-section receives many more Stars than any other—it reaches mansions and masses alike.

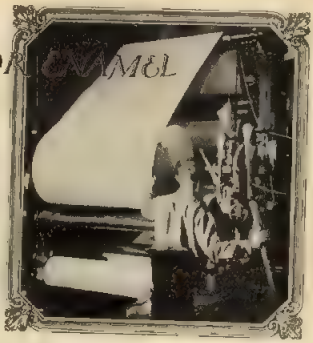
SUPERIOR ENAMEL



CALENDERING MACHINE

Where gloss is put on Superior Enamel. Q After every precaution is taken with formula, material and equipment, vigilance is not suspended in the Allied Mills. For it is at this point that paper takes on or loses quality. The human element determines largely how good a sheet will be. With born paper makers at work in the Allied Mills—1500 of them—a high standard of quality is assured for all Allied Papers.

For Better Catalogs and Booklets

SUPERIOR Enamel offers you a well coated surface that takes beautiful impressions—that holds the fine tracery of delicate engravings—that brings out the *full* richness of colors from process plates.

With *Superior Enamel* you can retain much of the beauty that one naturally expects to sacrifice in a catalog or booklet printed on a coated paper that is not too expensive. For this is an *Allied* paper—which means that it is made from carefully selected raw material and is handled by men who *live* paper and *know* how to work exceptional quality into it.

* * * *

Superfine Enamel is an aristocrat of coated papers; *Superba* is another high grade enamel; while *Porcelain* admirably meets the need for a coated paper even lower priced than *Superior*. If you are after fine results and the *exact* stock for your *particular* needs, go over these Allied Papers with your printers. We will gladly send samples on request.

true-talk

about SEATTLE and her newspapers

2

The Slumless City

FEW TENEMENTS — no slums — no concentration of the poor—and therefore no single wealthy residential district.

How, you ask, does such a city "happen"?

Simply, first, because only one-sixth of Seattle's people are foreign. Second, because Seattle is a city on hills and the more wealthy citizens (seeking the heights) thus have their homes scattered the length and breadth of the city.

Add to your realization of this peculiar fact the fact that the Star's circulation is spread evenly over the various hill-sections and you can see why this paper today offers such thorough advertising VALUE.

How the Illustrated Letter Is Being Used to Get Added Sales

Because of their economy, effectiveness and adaptability, four-page illustrated letters are being widely used by companies in many different lines. You can find them selling automobiles and files, clothing and plows, electric hoists and steam traps. Every company that is using them wisely is getting results in sales. What companies like Marmon, Blaw-Knox, Payette R. Plumb, Inc., and others are doing with illustrated letters is explained in an article by C. B. Larrabee, with several illustrations of actual letters in the April issue of PRINTERS' INK MONTHLY.

The Use of Automobiles in Small-Town Sales Work

What is the best type of automobile for salesmen? Where can salesmen use cars to best advantage? What is the ideal equipment for salesmen's cars? Why should salesmen's cars be insured? How can you dispose of old cars? These and many other questions are answered by J. J. Witherspoon, in an article in the April Monthly, which is based on the experiences of thirty of the biggest users of automobiles in the country.

Back to Fundamentals in Advertising to Foreign Markets

"A lot of Americans seems to think just because this is Paris everything must be up to 1923, or beyond," said an executive of the Paris Branch of the Burroughs Adding Machine Company. "In some things it is; but in others the country is still back in 1860. Our problem is to make our publicity cover both dates." J. R. Sprague, to whom he was speaking, is just finishing a six-months' investigation of business in Europe. What he has learned about advertising to foreign markets is told in an illuminating article in the April Monthly.

Also in the April issue of *Printers' Ink Monthly* are

WHAT TO DO BEFORE MAKING UP THE SALES QUOTA
"SOFT-BOILED SALESMANSHIP"
IS THE RECIPE BOOKLET GOOD ADVERTISING?
DISPLAY CONTAINERS THAT WILL INCREASE YOUR SALES
MAKING IT EASIER FOR SALESMEN TO MERCHANDISE ADVERTISING

and fifteen other significant, how-to, advertising and sales articles of vital interest to the executive.

Forty Million Dollars

On the Horizon for Shreveport Farmers

So much attention is paid to Shreveport as an oil and gas center, as a lumber region, and as a manufacturing zone, that its importance as an agricultural district is perhaps not fully realized.

By official estimate the value of the farm crops grown in 1921 in the Shreveport territory was $25,000,000.

In 1922 it is conservatively estimated that farmers in this territory will receive $40,000,000 for their crops, an increase over 1921 of $15,000,000.

Shreveport's permanent prosperity is built upon agriculture. Long before oil and gas were discovered, Shreveport was a wealthy and thriving city. Other resources have helped to expedite its progress, but its fundamental wealth and advancement rest soundly upon the successful crops grown in the fertile valley of which it is the trade and marketing center.

The Shreveport Times covers the farm lands and farm homes of this section as thoroughly as it reaches the city buyers. It is the direct and logical medium for selling all kinds of goods to the prosperous agricultural district around Shreveport. Large circulation and thorough distribution make it the only medium needed.

A New Word in the Language

OUR client, the 1900 Washer Company, of Binghamton, New York, sought some word or phrase to denote the exclusive *double action* of the 1900 Cataract Electric Washer —some expression that could not be "borrowed" by competitors. So we coined the word "*cataraction*." "We believe that does it," said the client. Just an incident in the campaign, for creative thought is all in the day's work at this agency.

¶ Those advertisers who look for something beyond "good copy" should be economically interested in the specific knowledge and experience of an advertising agency that enable it to invest its clients' appropriations on a merchandising basis.

¶ Our agency has been giving sound merchandising service and placing intelligent advertising copy for 32 years.

¶ Many of our national and local clients have endorsed the success of our service over a long period of years by continuously increasing appropriations.

A discussion of Cone Service involves no obligation.

Why it gets results—The unusual results which BUSINESS MAGAZINE delivers to advertisers are largely explained by the unique way in which its readers are obtained. Each name is personally picked by a Burroughs salesman right in the territory where it originates, and that salesman must pay the postage on every copy.

Naturally, by this method, waste is reduced to the vanishing point—every name represents real buying ability and buying authority or influence.

A recent actual survey of 50,000 of the 160,000 readers of BUSINESS MAGAZINE showed that its list was made up entirely of business executives, and that various lines of business were represented as follows: Manufacturing, 44%; Retailing, 28%; Wholesaling, 18%; Public Utilities, Insurance, Banking, Construction and others, 10%.

"BUSINESS" is producing greater traceable results per dollar spent than any other publication we use—R. N. Fellows, Advertising Manager, Addressograph Co., Chicago.

Vision!

WRITING many years afterward of his impression of the first number of THE WORLD under Mr. Pulitzer's direction (May, 1883), Ryerson W. Jennings, one-time candidate for the Presidency of the United States, said:

> Crossing Chestnut Street Bridge, Philadelphia, many years ago, I bought from a bright-eyed newsboy the first number of the New York *World* under Joseph Pulitzer's management. I saw at a glance that the emancipation of the newspapers of this country had commenced, and the people were to get the news of the day in an uncolored form; that great wrongs were to be righted; that light was to be let in where darkness covered it; that crooked things were to be made straight.
>
> —*The Story of a Page*

Rather a large order for a new and struggling paper. Today's WORLD is the best indication as to how well it filled the bill.

This 1923 GARDEN ANNUAL issue will have the closest attention of the better type of New England farm families who prefer to buy from HOMESTEAD advertisers, because of their confidence in their favorite farm paper.

Your advertisement in the 1923 GARDEN ANNUAL may be used to bring you direct inquiries and orders, or to stimulate your dealers, and support your distribution. This March 3 issue will have an unusually long life, as our readers keep this feature number as a handy reference of "what to buy—and when to buy it."

The GARDEN ANNUAL has been paying advertisers for 18 years. The 19th will pay you.

No advance in rates—45 cents a line, $6.30 an inch, $315 a page, 66,000 net paid. Forms close in Springfield February 24. Reserve your space early for this Spring feature number which "opens up" the New England Spring season.

The National advertisers and local merchants in both want ads and display advertising AGAIN demonstrated their newspaper preference in Omaha—and in 1922 this preference was shown in no uncertain terms, for of the 22,785,420 lines of clean advertising published by the three Omaha newspapers, the World-Herald alone carried 11,262,118 lines. Note the lineage table below:

All measurements in lines, by the Haynes Advertising Agency, an independent measuring service

	World-Herald	Next Paper	Third Paper
Total Display (less medical)	8,826,622	5,237,540	4,583,432
Want Ads....	2,435,496	914,186	788,144
Total clean, paid advertising....	11,262,118	6,151,726	5,371,576
Medical.....	None	315,364	536,578

Compared with 1921, The World-Herald gained over 1,100,000 lines, five times as much as the next paper; the third paper lost.

LET there be no compromise in the whiteness of your business stationery: a dingy paper oft belies the message.

Choose Danish Bond. Its virgin whiteness begins many hundred feet underground in artesian water of crystal clearness. No need here for mud removers or compensating chemicals. Clean, new rags and pure water and years of knowing *how*—these basic elements make Danish Bond.

You will like its body, its snap and crackle, its toughness and durability. Made in white and ten distinctive colors. The price is not high, not low. Ask your printer for an estimate.

The quality is high
The price is reasonable

Per Dozen

No. SR—Fully Nickel Plated and Polished; Weight per Dozen, ¼ lb.....**$12.00**

Twelfth Dozen in a Box

A Handsome Display Stand Furnished with Every Order of 15 or More Sets.

The Bell System's transcontinental telephone line crossing Nevada

Highways of Speech

Necessity made the United States a nation of pioneers. Development came to us only by conquering the wilderness. For a hundred and fifty years we have been clearing farms and rearing communities where desolation was—bridging rivers and making roads, civilizing and populating step by step, three million square miles of country. One of the results has been the scattering of families in many places—the separation of parents and children, of brother and brother, by great distances.

To-day, millions of us live and make our success in places far from those where we were born, and even those of us who have remained in one place have relatives and friends who are scattered in other parts.

Again, business and industry have done what families have done—they have spread to many places and made connections in still other places.

Obviously, this has promoted a national community of every day interest which characterizes no other nation in the world. It has given the people of the whole country the same kind, if not the same degree, of interest in one another as the people of a single city have. It has made necessary facilities of national communication which keep us in touch with the whole country and not just our own part of it.

The only telephone service which can adequately serve the needs of the nation is one which brings all of the people within sound of one another's voices.

Are You?

BUSINESS everywhere doesn't need more typewriters so much as it needs *a better typewriter.* One that can produce more and finer typing than was formerly possible; that offers more conveniences to the operator than typewriters used to offer; that requires less care and stands up longer under all kinds of usage.

The Royal has a way of living up to the claims that are made for it. Before you buy another typewriter let us "show you" how the Royal does finer typing and more of it, why it has longer life and is easier to operate. We believe you are open to conviction!

We can—
May we?

This company is naturally enthusiastic about its product and the results it is giving in offices where the dual demand for volume and finest quality of typing exists, with emphasis on the quality.

It is bad business to make claims for a product which can not be confirmed by practical every-day usage. Still, we say that the Royal is the soundest typewriter investment you can make. May we demonstrate at your convenience?

BENCH VISES

ABERNATHY RAPID ACTION

Especially Suitable for Manual Training and Technical School Equipment.

ROLLER NUT SCREW STYLE

These Vises have but ONE part in addition to the elements of an old style, slow acting screw vise, and that is the "Roller," which is a large substantial casting, Practically impossible to put out of order even by abuse. They **have no springs whatever,** but depend upon the **weight of the "Rollers" for their action, and this is a Permanent factor.**

So constructed that it is absolutely impossible for the nut section to rise or the screw to spring out of engagement.

The "Roller" is a practically balanced cylinder containing a tapered dovetail mortise into which a nut section is removably fitted; the "Roller" simply hangs upon the screw, and due to its weight and the resulting frictional contact between these two parts the "Roller" rolls in whichever direction the screw is turned.

Made of the very best quality gray iron castings, well machined and nicely finished, with cold rolled steel slides; with an extra smooth and ccurately milled steel screw and with the highest grade of phosphor bronze hobbed nut, of more than usual length, which insures strength and long wear.

Standard Cabinet and Pattern Makers Roller Nut Screw Style

No. 80

Each

One in a Box

CLUTCH STYLE
Manual Training School Special

Made of the very best quality of gray iron castings, well machined and nicely finished. with cold rolled steel sides.

Clutch No. 20

This Vise is instantaneous in adjustment; that is, the handle being in a vertical position, the front movable jaw may be drawn or pushed to any desired adjustment by a **single motion.**

The compression feed is three-fourths of an inch for each revolution of the handle, and if it is so desired the front jaw may be fed the whole length of its adjustment by a continuous turning of the handle, but approximately a **one-fourth** turn of the handle is all that is necessary to clamp an article for any ordinary purpose. The front jaw may also be pushed to an adjustment **regardless** of the position of the handle, which is often a convenience and a further saving of time.

The entire manipulation of this vise is accomplished by the handle alone, and all working parts are located under the bench, where they are protected from knocks and dirt.

Each

No. 20—Jaws 10 inches Wide; 3 inches Deep; Opening 9 inches; Weight 28 lbs. **$15.20** 8.00

St. Valentine's Day in Pudding Lane

Illustrations by
Gertrude A. Kay

The story of St. Valentine's Day in Pudding Lane is on page 31.

Directions—Paste the entire page on heavy wrapping paper, then cut out around the dark outline. To make the dolls stand up, cut the base into three parts, bending forward on the red dotted line and backward on the blue dotted line. To open Santa Claus' window, cut along the dark line at the top and bottom, and down the center, and bend forward on the red dotted lines at the sides. Then get Santa and his brothers into play with Santa's arms reaching over the window ledge toward the cat.

Which play would you make?

Cribbage—Peter has played 3, 5 and 6. dealer 7 and 4. Dealer holds 5 and 6. What is the obvious play? What is the best play?

Are you foresighted?

In life, as in cards, some play for the next trick while others look ahead to the ultimate score. But people who make it a habit to

Play Cards for Recreation

soon develop foresight. They play to win the game, not merely an immediate point or two. What other amusement so sharpens the mental qualities that are necessary for business and social success?

FOR REST AND RECREATION-

BERMUDA

THIS SUMMER

BERMUDA solves your summer travel problem—it offers an unique vacation in a foreign land, at most moderate cost. The equable summer temperature averages 77 degrees and there is an invigorating, cooling breeze 24 hours of every day. There are no noises—no railroads, trolleys, automobiles, or factories. Just the place to rest tired nerves.

For recreation, there is the best surf and still-water bathing, sailing, canoeing, fishing, cycling, driving, tennis, golf on fine 18-hole courses, and sightseeing—including the Crystal Caves and Sea Gardens. Dances and parties at the hotels, too. In summer these 150 islands are a luxuriant panorama of exotic flowers in full bloom—oleanders, hibiscus, poinciana, bougainvillea, etc., all at their best.

Only two days from New York—a delightful summer sea voyage on palatial liners. No passports required.

Secure beautiful illustrated book from the Furness Bermuda Line, 34 Whitehall Street, New York, or any travel agency, or

Romsdalshorn—Romsdalsfjord
(More Fylkes Ruteselskap)

THE fjords of the west coast of Norway are among Nature's greatest handiwork. Some are walled by great frowning cliffs, others by lofty snow capped mountains and still others by fertile smiling hills. In solemn grandeur and majesty they are unsurpassed. Unlike anything else in the world the fjords are Europe's supreme spectacle.
